Midweek News Summary

Federal officials warned beer wholesalers this week that if the industry wants to hold off a drive to ban beer commercials on radio and tv, it must police itself and revise marketing tactics. *See Page 2.*

Coca-Cola USA revealed this week a new "Tab's got sass" ad theme and said it plans a massive five-week network tv blitz starting Nov. 2 for major brands. *See Page 2.*

Church & Dwight is introducing a plaque-fighting tooth powder called Dental Care. *See Page 2.*

The Wrangler division of Blue Bell will break a $25 million-to-$35 million campaign Nov. 19 for all its men's and women's clothes, further proof that if the jeans market has not yet reached bottom, it's sagging. *See Page 3.*

Coca-Cola Co. has added sparkle to Columbia Pictures by helping it "spend smarter" to promote films, cross promoting certain films and enabling the studio to research the videocassette market. *See Page 3.*

The Federal Communications Commission has ordered a tv station to meet Fairness Doctrine obligations for the first time since Mark Fowler became chairman. *See Page 3.*

Nicaragua's ruling Sandinista Front party, in its first election since overthrowing the Somoza government in 1979, has launched a Western-style media blitz to ensure its continued dominance. *See Page 3.*

MicroPro International Corp. has unveiled a new word-processing program in an effort to regain the preeminent position in the market. *See Page 3.*

Subaru, the least likely car to be stolen, is making progress in another marketing niche—styling. *See Page 56.*

DIRECT MARKETING

New York University, noting that direct marketing has become a $200 billion-a-year industry, has established the Center for Direct Marketing. The center will offer a one-year program on the subject, said to be the first of its kind. *See Page 6.*

A mailing list users' group has formed a committee to help stop abuse and unauthorized use of such lists. *See Page 7.*

MDs move to halt Kellogg health ads

By STEVEN W. COLFORD

California's Cancer Advisory Council, under the auspices of the state's Department of Health Services, is expected to ask the U.S. Food & Drug Administration to investigate Kellogg Co.'s All-Bran ads that stress cancer prevention.

The 14-member council has concluded that the ads are "misleading and objectionable."

The FDA, according to a spokesman, already is studying the Kellogg ads, and the Federal Trade Commission is believed to be conducting its own review of the print and tv campaign launched earlier this month via J. Walter Thompson USA, Chicago.

The controversial Kellogg cereal campaign (AA, Oct. 29) cites a National Cancer Institute study linking cancer prevention to fiber consumption.

The campaign brings to the forefront the dilemma of regulatory agencies that must evaluate the truthfulness of advertising claims for foodstuffs based on health or medical benefits—not taste, appearance, smell or any of the usual selling points of food.

"The line between food and drug [advertising] is getting grayer," an FDA spokesman said. "Foods—or products in general—marketed with a medical claim is a growing area."

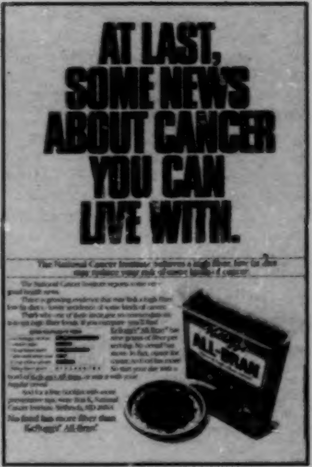
The fact that this time the advertiser is Battle Creek, Mich.-based Kellogg, with 1983 sales of $2.3 billion, and not a "mom-and-pop" operation is another new twist for FDA.

"It's just like that new product of Kimberly-Clark—the tissue [Advent] that kills cold germs—we're being asked about them, too," the spokesman said.

"Clearly, the product has a drug in it, though the company did not come to us for permission to market it," he added.

The FDA and state health officials in California expressed similar reservations over the All-Bran ads, which broke in October and are due to run at least through December.

Among the unanswered questions being asked at the FDA are "whether the ad copy suggests that bran is intended for cancer prevention" and whether the cereal label "has adequate instructions for use—it doesn't say how to use it to reduce the cancer probability [because] the NCI evidence is not



One question is whether the Kellogg ad suggests "bran is intended for cancer prevention."

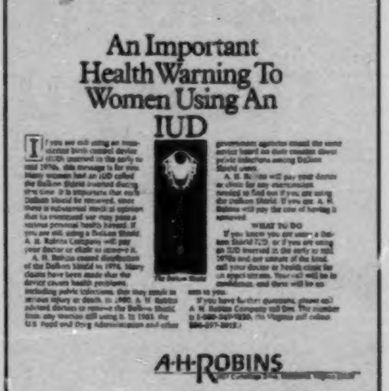
Robins starts antishield pitch



An Important Health Warning To Women Using An IUD
WHAT TO DO
A·H·ROBINS

A.H. Robins' ads discourage use of its Dalkon Shield. Burson-Marsteller, Washington, handles

By LISA PHILLIPS

Battered by product liability suits, A.H. Robins Co. is spending $4 million on a national ad campaign urging women to stop using what once was one of its hottest products—the Dalkon Shield contraceptive device.

The Robins campaign is a bid to reach those Dalkon Shield users who have not reacted to the waves of negative publicity about side effects that swamped the product in the 1970s and spawned more than 10,000 damage suits alleging serious injuries. Two women died of complications from using the product.

The Richmond, Va.-based company stopped distribution of the product in 1974, and the Food & Drug Administration last year urged women still using the shield to remove it.

Titled "An important health warning to women using an IUD"—an intrauterine device—print ads urge IUD-users to see doctors to determine if they are wearing a Dalkon Shield. The ads note Robins will pay for all medical visits to doctors or clinics, regardless of the brand, and will pay for the removal of all Dalkon Shields.

The women's rights to further legal action against Robins will not be waived by participation in the program, the ads state.

However, the campaign could be used by Robins in its efforts to defend against punitive-damage claims.

Print ads will break next week in 177 daily newspapers, 13 minority newspapers and in major national consumer magazines such as *Jet*, *Newsweek*, *People*, *Time* and *TV Guide*. Two ads are scheduled for *USA Today* and the campaign will begin in the *National Enquirer* later this month.

A three-week flight of tv ads broke this week on all three networks, SIN Television Network, and on cable superstations WTBS, WOR and WGN.

The campaign is handled by Burson-Marsteller, Washington. A Robins spokesman said no estimate had been made on the final cost to Robins, which will depend on how many women see their doctors.#

Nets fight over sportscaster

Is Brent for sale?

By ROBERT RAISSMAN

New York—Picture this: It's opening night for "Monday Night Football" in 1986 and in ABC Sports' broadcast booth is a new team. Frank Gifford still holds the play-by-play mike, but beside him are CBS Sports alumni Brent Musburger and John Madden. Gone are "Dandy" Don Meredith and O.J. Simpson.

That scenario appears to be taking shape. According to well placed network sources, ABC has made Mr. Musburger a solid offer that not only would place him in the "MNF" booth next year, but would allow him to do a number of other

Feds rap beer promo tactics

Stop college capers, police marketing efforts, BATF officials warn, or risk stiffer ad controls

By SCOTT HUME

LAS VEGAS—If the brewing industry hopes to stall the drive to eliminate beer advertising on tv and radio, it must more vigorously police itself and revise marketing tactics, especially on college campuses.

That warning was sounded by officials of the federal Bureau of Alcohol, Tobacco & Firearms to the National Assn. of Beer Wholesalers at NABW's meeting here this week.

"I must tell you that I am disturbed by the increasing number of brewery-sponsored activities on college campuses," Bruce Weininger, chief of BATF's industry compliance division, said during a seminar.

"While I recognize such sponsorships are not technically in violation of the Federal Alcohol Administration Act," Mr. Weininger said, "such promotions are not in keeping with the industry's goal of promoting moderation."

After his speech, Mr. Weininger emphasized that the industry must take seriously efforts by citizens groups, such as Mothers Against Drunk Driving, to restrict or eliminate beer advertising.

"This industry has done a very good job speaking out against alcohol abuse, but wet t-shirt contests and chug-a-lug competitions on college campuses will undo a lot of that good work," he said. "Unless the industry takes a good look at these and other tactics, there is a very real possibility that the authority for reform will be put in the hands of Congress and that beer and wine advertising will be banned."

An indication that the industry does take the threats seriously came Oct. 29, when NABW members voted in favor of a new bylaw concerning beer on campus. The new policy states that wholesalers must abide by the wishes of a college administration concerning availability and promotion of beer on campuses.

In the short term, it appears that BATF will put beer advertising under closer scrutiny. Thomas George, chief of the bureau's regulations and procedures division, said several areas are due to be opened soon for public discussion and possible policy changes.

Among them are the use of athletes in beer advertising and regulations concerning use of the terms "light" and "natural."

Current regulations restrict advertisers from using athletes who are active players and from depicting athletes drinking beer before they go out to participate in a sporting event.

Mr. George declined to say whether those restrictions might be liberalized or restricted further, but he noted that the last time the bureau undertook a revision of beer advertising policies, it got 10,000 letters calling for tighter restrictions.

Another aspect of marketing about which brewers and wholesalers were warned was what Mr. Weininger called "the ever-increasing number of problems" relating to beer advertising at sports and entertainment sites.

The most common, and to BATF the most serious, violations are contracts that call for advertising in exchange for brand exclusivity.

"As the competition in this industry has become more intense, this has become a much more serious problem," Mr. Weininger told ADVERTISING AGE.

Some smaller brewers have complained that the $2 million fine BATF levied against Anheuser-Busch this summer for sports-marketing violations (AA, July 2) was too small a price for so large a company to pay. But Mr. Weininger defended the fine, the largest the bureau has ever called for, and noted A-B also signed a consent decree.

"Under that decree, we can return to court and get a cease-and-desist order if we have any indication that the violations are recurring," the BATF official said. "And I assure you we will."#

Tab turning 'sassy' in Coke brands' blitz

By NANCY GIGES

NEW YORK—Coca-Cola USA, feverishly completing a bevy of new commercials, revealed this week a new "Tab's got sass" ad theme and said it plans a massive five-week network tv blitz starting Nov. 2 for Tab, Sprite, Coke and other major brands.

Coke also has added golfer Tom Watson to its stable of celebrities working for the Coke brand. Mr. Watson initially will make promotional appearances, a step that often leads to appearances in Coke advertising.

The company showed its new commercials at an Oct. 31 press conference here, where it said the coming network tv blitz is set to deliver 550 million impressions. During that period, 21 different spots for Coca-Cola soft drinks will air on an average of one every three hours, the company said.

"This higher level of spending of fourth-quarter national advertising is the result of careful planning and selective, but not necessarily incremental, spending," commented Sergio Zyman, senior vp-marketing.

Holiday season ad binges by soft-drink companies, once out of character for an industry geared to warm-weather sales, are becoming more common, observers note.

Beginning Nov. 3 and running through election day, Coca-Cola will use an "election" theme for a print and tv effort for Sprite. One spot shows a man entering a voting booth and he puzzles over his selection. The spot closes with the man seen standing in front of a soft-drink vending machine and the candidate he chooses is Sprite. An ad in *USA Today* on Nov. 6, Election Day, will offer a 75¢ refund for Sprite bought during that week, and other tv spots will cite the newspaper offer. Marschalk Co. is the agency.

Actress Cindy Harrell will appear in spots for Tab through the end of this year, but new music with the "Tab's got sass" theme will replace the controversial "Let's taste new Tab." SSC&B is the agency.

Company officials said new long-term advertising clearly positioning the brand will begin next year. The objective this year was to

Phone company eyes holiday callers

MCI connects with P&G

By BRIAN MORAN

MCI Communications, looking to build its long-distance customer base before the heavy holiday-calling season, this week kicks off its first consumer product tie-in promotion: A coupon effort with Procter & Gamble offering one hour of free calls.

Cincinnati-based P&G has dropped 30 million coupons in newspapers serving more than 100 markets for the two-part MCI promotion.

The coupon instructs consumers to call a special 800 number to sign up for the Washington-based MCI's service. By submitting three proofs of purchase from P&G's Cheer, Era and Cascade detergents, consumers are eligible to receive credit for 20 minutes of calls via MCI.

Customers remaining with MCI for 60 days receive credit for an additional 40 minutes worth of calls.

P&G is supporting the promotion with spot tv commercials that will run until the promotion ends Dec. 15. A 30-second spot broke Oct. 28. Leo Burnett USA, Chicago, handles.

The MCI tie-in is the latest in a string of promotions P&G has undertaken with major marketers. Last month, it kicked off a "Computerrific" promotion with IBM Corp., the computer giant's first-ever consumer product tie-in (AA, Oct. 22). The combined effort was designed to bolster IBM's PCjr model.

Earlier, three P&G brands—Cheer, Crest and Ivory—were part of a tie-in with 100 McDonald's Corp. franchises in the St. Louis area (AA, Oct. 8).#

LEAVES YOUR TEETH FEELING CLEANER THAN TOOTHPASTE, YET IT'S JUST AS GENTLE. New Arm & Hammer DENTAL CARE has baking soda, which more and more dentists recommend, plus fluoride and a fresh mint taste. Comes in an "easy-pour" flip-top plastic bottle. And now save 50¢. To remove plaque and have your teeth feeling cleaner, brush with new Arm & Hammer DENTAL CARE Tooth Powder.

THE NEXT GENERATION IN ORAL HEALTH CARE.

Church & Dwight is testing a new Arm & Hammer dentifrice that's mint-flavored and contains fluoride. Kornhauser & Calene handles.

Baking soda may put teeth in Dental Care

By NANCY GIGES

Church & Dwight is introducing a plaque-fighting tooth powder called Dental Care.

Until now, the company had used its century-old Arm & Hammer baking soda to enter the $900 million dentifrice category with advertising positioning the household standby as a plaque-fighter.

Now Church & Dwight has put into test in Madison, Wis., a powder packaged in a plastic bottle with a flip-top lid. Priced competitively with other dentifrices, the powder is mint-flavored and contains fluoride.

The company has told the trade it plans to support the new item heavily with a full program of advertising and promotion, although it is doubtful Church & Dwight could meet the $40 million spending in measured media invested by Colgate-Palmolive and Procter & Gamble for their Colgate and Crest category leaders.

Print ads include a 50¢ coupon and carry the theme "The next generation in oral healthcare." Packaging says the product is "for adult oral healthcare."

Tv spots by Kornhauser & Calene, New York, point out that the powder "leaves teeth feeling cleaner than the leading toothpaste and also reduces plaque." Copy explains the powder "neutralizes and deodorizes plaque acid and teeth feel cleaner."

For years, dentists have told their patients to use baking soda as an economical alternative to toothpaste, and two years ago Church & Dwight picked up on that usage by promoting baking soda as "a proven way to remove plaque." But this new product carries a price tag that is competitive with other major toothpaste brands, and, in fact, one Madison buying group turned down the new product essentially because of the pricing.

While promoting plain baking soda as a dentifrice may have sold a few more cases for the essentially stagnant brand, Church & Dwight must find successful new products to grow because baking soda is a flat category.

A number of years ago, Colgate-Palmolive tried to capitalize on the baking soda idea by selling a product called Peak with a baking soda formula.

Although still available in limited areas, the brand never became the success Colgate hoped.#

Practice

(Continued from Page 18)

tative and quantitative. Having cleanly jettisoned the old theory of summary statistics and magic numbers, we now accept the practice of backing up our basic evaluative measurements with custom-tailored diagnostics.

The most important step our industry has taken is to systematically validate the enormity of our data. While sales figures have been difficult to ferret out of clients' locked vaults, the era of cooperation has begun.

The inescapable conclusion from the cumulative weight of the industry's evidence is that we've been producing attitudinal data that has a very high correlation to sales.

So, 40 years of experience by a large number of organizations has provided a vast body of information that is reliable and valid. We must remember to have confidence in these tools that we've nurtured. Researchers do themselves and their industry a disservice, however, when we don't trust our insight and expertise to allow relatively untutored managements to dictate the techniques to be used for copy testing.

We have the experience, we have the tools, we have the know-how. It's time we stood up and made sure other segments of the marketing community recognize this.

Survey results positive

By Jack J. Honomichl

The survey research business continues to grow, according to the Council of American Survey Research Organizations, and it shows no signs of stopping.

Project commissions in the second quarter of 1984 were up 13% over the similar period a year earlier.

More than 100 members and 50 guests, speakers and exhibitors heard this industry evaluation at the ninth annual CASRO workshop Oct. 10 to 12, at the Scottsdale Conference Resort in Scottsdale, Ariz.

A confidential survey of 60 member companies showed that their collective revenues, based on newly commissioned projects, were up 11% in 1983 over 1982, officers reported.

CASRO member data for the second quarter of 1984, based on 66 reporting companies, show the upward trend continues. Project commissions in the second quarter of 1984 were up 13% over the similar period a year earlier.

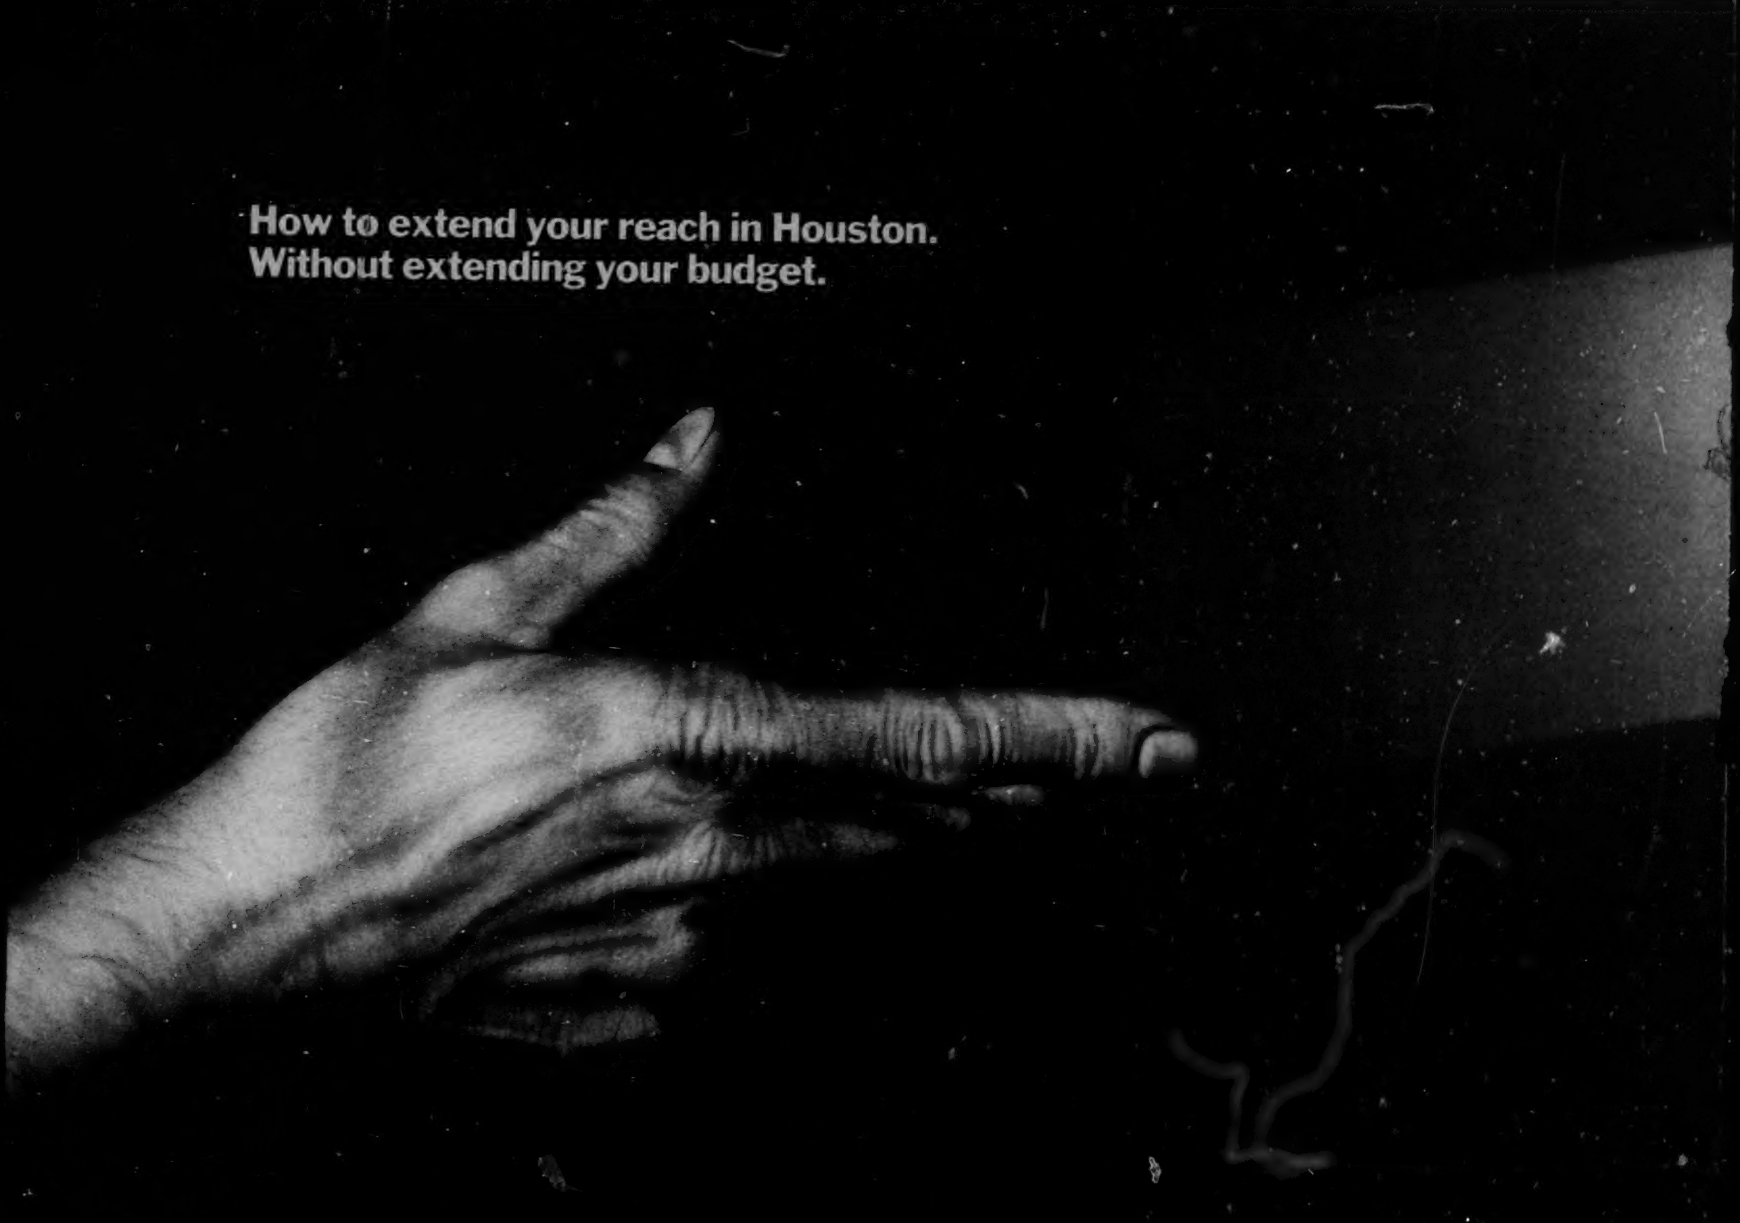
Officers elected at the conference are Thomas Lea Davidson, chairman; Joseph F. Baldi, chairman-elect; John Gilfeather, secretary, and Charles Kenney, treasurer. Diane Bowers (center) is executive director of CASRO.

The smaller companies (those with annual revenues of $2 million or less) did particularly well, according to the survey, with project commissions up 18.7% as a group.

The large companies (revenues of more than $6 million) were up 11.5%, and midsize companies ($2 million to $6 million) were up 5.9%.

Also, according to Robert E. Shaw of Burke Marketing Services, chairman of the financial/compensation survey committee, pretax profits of the 60 companies, expressed as a percentage of sales, were up to 4.3% in 1983, a sharp rebound from the recession year level of 2.8% in 1982.

The survey also reveals a continuing shift in the relative im-



How to extend your reach in Houston.
Without extending your budget.

portance of data collection methods used by Council of American Survey Research Organizations' companies in conducting projects for their clients.

In 1983, the membership reported that 41% of the dollar volume stemmed from projects where WATS/centralized telephone interviewing was the main data collection methodology, an increase from 38% in the two previous years.

One reason for the increase in telephone research, according to the survey, was the expanded use of computer-assisted equipment, which improves data recording.

Personal, door-to-door interviewing continued to drop in importance and hit a new low of 13% in 1983.

The survey also revealed there was a substantial increase in entry-level hirings during 1983, an expression of the industry's good health.

The survey also revealed there was a substantial increase in entry-level hirings during 1983, an expression of the industry's health.

The organization also announced the election of its board of directors.

Thomas Lea Davidson, president of Davidson-Peterson Associates, New York, moved from chairman-elect to chairman, succeeding Richard McCullough of Winona Research, Minneapolis, who continues on the board.

Joseph F. Baldi, Directions for Decisions, New York, was named chairman-elect. Charles Kenney, president of Research Data, Framingham, Mass., was elected treasurer, and John Gilfeather, executive vp of Yankelovich, Skelly & White, New York, was elected secretary.

Also elected to the board was Marshall Greenberg of National Analysts, Philadelphia.

Continuing on the CASRO board for another year are Foy N. Conway of Conway/Milliken Corp., Chicago; Kathleen Knight of Behavioral Analysis, Irvington, N.Y.; Robert J. Lavidge of Elrick & Lavidge, Chicago; Dexter Neadle of Audits & Surveys, New York, and Harry W. O'Neill of Opinion Research Corp., Princeton, N.J.

Charles Kenney, membership chairman of CASRO, also told attendees that membership had grown to 123 companies, up from 107 a year earlier.

The comprehensive program, engineered by workshop committee chairman Roger Ehle of Conway/Milliken Corp., focused on the theme, "Moving Our Business Forward."

Donald Clifton, chairman of the board, SRI Research, Lincoln, Neb., was the featured dinner speaker and discussed the motivation and management of staff in a research company environment.

Other guest speakers at the dinner included consultants on personal selling skills, financial planning for personal and corporate objectives, and tax matters related to mergers and acquisitions.

Before adjourning, CASRO settled on the Homestead in Hot Springs, Va., as the site of its 1985 workshop Sept. 11 to 13, which will be a commemoration of CASRO's 10th year.

Harry W. O'Neill of Opinion Research Corp. will be program chairman.

Plotting structural changes in industry

By Eileen Cole

Prediction—even generalization—about the market research industry is a hazardous task.

The nature of the industry is not closely defined, and there is considerable lack of clarity about its boundaries. Companies holding large databases and supplying secondary data reports, for example, often are not considered part of the research business.

Eileen Cole is chief executive officer of Research International, a London-based market research company.

But there is little doubt that in the next few years, marriages between them and the more traditional market research companies will be frequent enough to cause dramatic changes in the structure of the industry.

It is a notorious truism that the market research industry is among the least well-researched of any industry. Estimates of expenditures are hard to come by and embarrassingly liable to error from faulty definition, misinterpretation or lack of comparability.

Anyone embarking on a crystal ball exercise in such a situation is asking for trouble. Nevertheless, speculation about the future in a business growing so quickly and so diversely is fascinating enough to encourage an attempt at forecasting the next five or ten years.

Because this predicting requires at least some rough definitions, for the purposes of this article, "market research" is defined as commercial market research in both the continuous (market measurement) and custom-designed areas. It does not include work done wholly within, for example, the universities, without content from a commercial market research agency or supplier.

The outstanding characteristic of the industry defined this way is that of vigorous long-term growth. This is true both worldwide and in all the major geographical areas, though particularly in the U.S. and Europe. The industry considers itself subject to the vagaries of recession and boom, and so it is in the short term. In the middle and longer term, despite constant predictions that growth had come to an end, it continues to flourish.

About $3 billion was spent with commercial research agencies worldwide in 1983, compared with slightly more than $2 billion in 1979. The larger part of this sum was spent by the subsidiaries of multinational corporations, and more than half of it was accounted for by the world's top 20 research organizations.

The general nature of the research spending and of agency-supplier structure in developed countries during the past 10 years shows a market dominated by a few large agencies with many smaller agencies or specialist suppliers.

The ratio of expenditures at large to small suppliers have been moving toward 80% to 20% respecitvely, a pattern typical of industry in general and a movement away from the old "cottage industry" structure of research.

The U.S. is in a class by itself in total expenditure, accounting for more than 40% of the worldwide commercially available market. This over-all preeminence is reinforced by examination of the world's top 10 market research companies.

In the custom research area, European-based market research companies play a significant role.

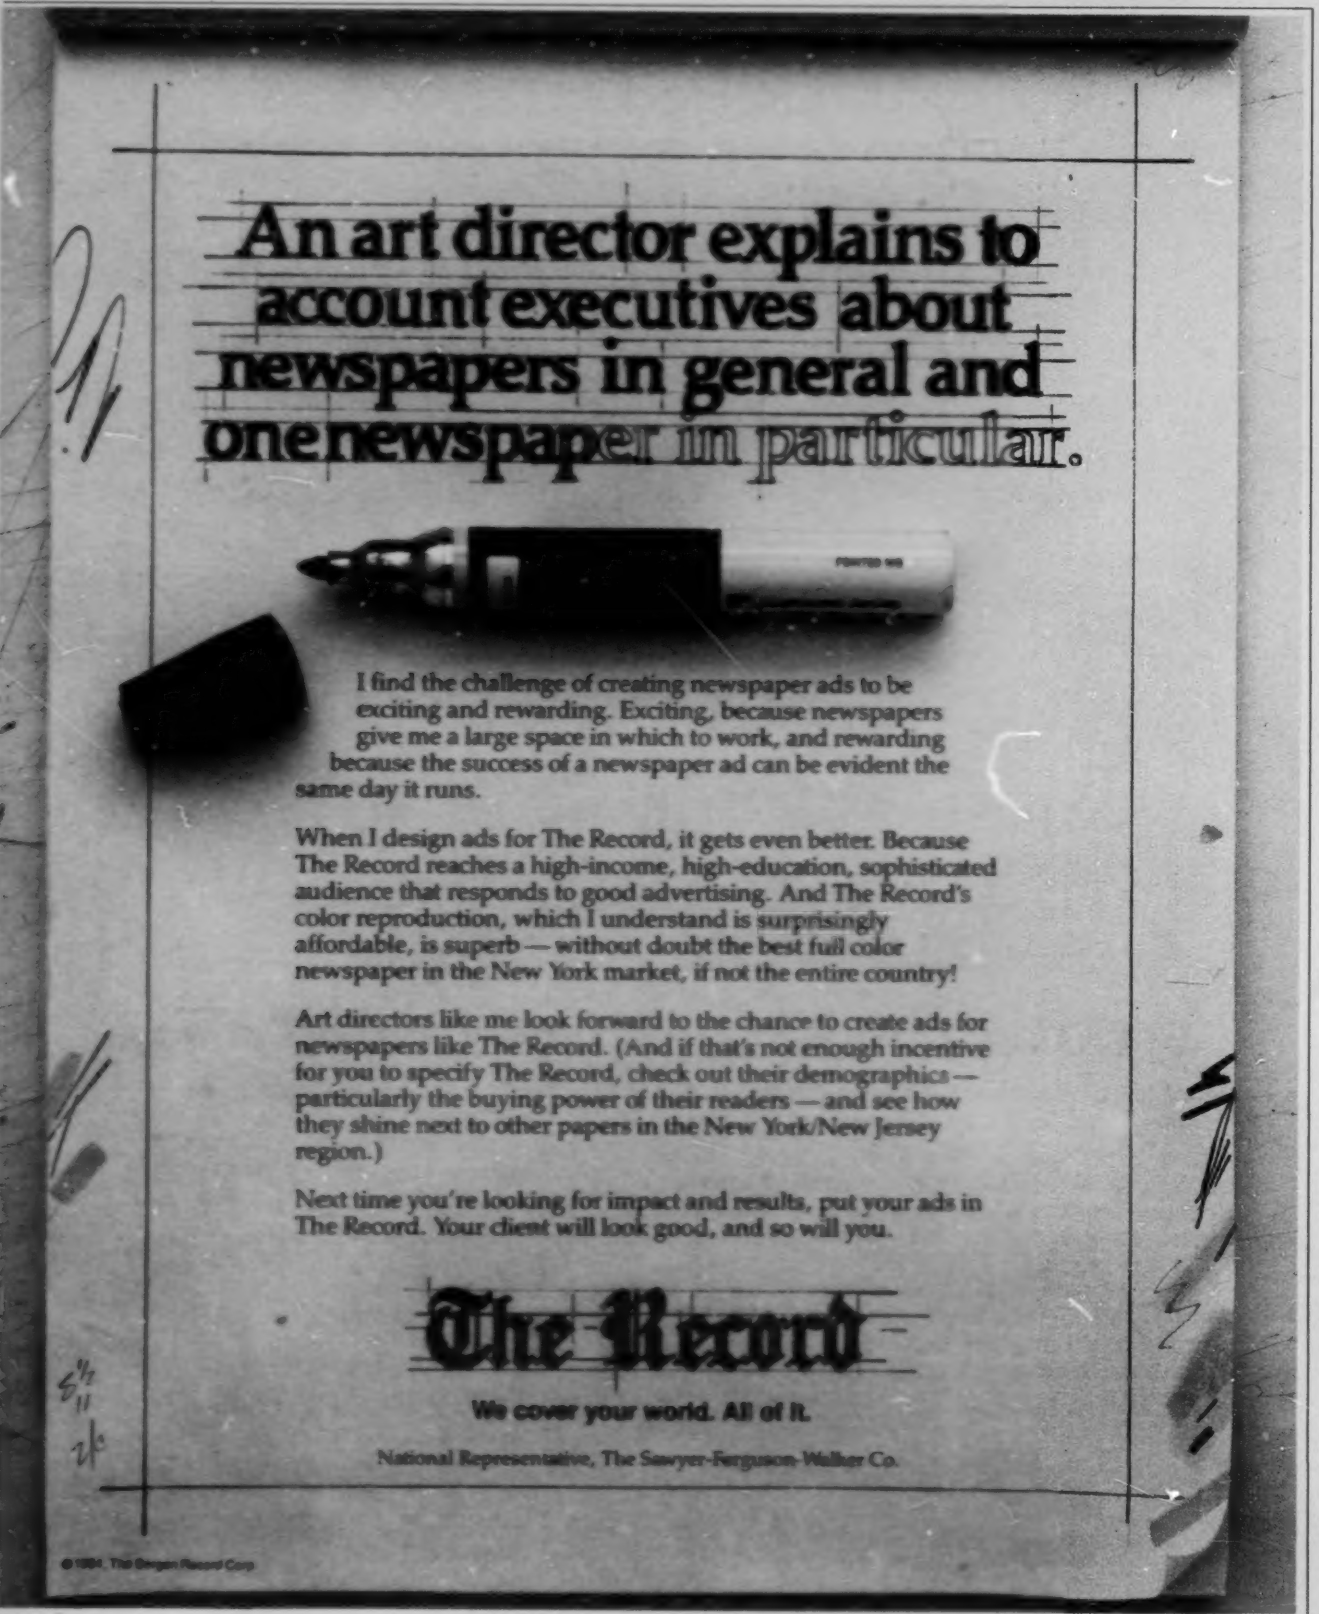
—Eileen Cole

The four largest companies are American owned and primarily are concerned with market and media measurement. The next largest is a U.K.-based company, also primarily concerned with continuous market measurement.

In the custom research area, however, the U.S. domination is much less. European-based market research companies play a significant role in this area and are particularly dominant in international research.

Apart from the U.S., total market research spending is dominated by European countries as a group, notably by the U.K., Germany and France, and the growth rate in Europe, even allowing for the vagaries of exchange rates, now tends to exceed that in the U.S.

In terms of volume, allowing



An art director explains to account executives about newspapers in general and one newspaper in particular.

I find the challenge of creating newspaper ads to be exciting and rewarding. Exciting, because newspapers give me a large space in which to work, and rewarding because the success of a newspaper ad can be evident the same day it runs.

When I design ads for The Record, it gets even better. Because The Record reaches a high-income, high-education, sophisticated audience that responds to good advertising. And The Record's color reproduction, which I understand is surprisingly affordable, is superb — without doubt the best full color newspaper in the New York market, if not the entire country!

Art directors like me look forward to the chance to create ads for newspapers like The Record. (And if that's not enough incentive for you to specify The Record, check out their demographics — particularly the buying power of their readers — and see how they shine next to other papers in the New York/New Jersey region.)

Next time you're looking for impact and results, put your ads in The Record. Your client will look good, and so will you.

The Record

We cover your world. All of it.

for lower averge European salary levels, this growth is probably even more marked.

The weakest part of this analysis relates to Asia/Oceania. Very little information is available on research expenditure in Japan, for example. Research undoubtedly is growing there and elsewhere in the region, where there has been a good deal of research industry investment recently.

Apparent growth rates may be affected by differential inflation, but discounting such inflation changes the relationships only marginally. Above all, it underlines the strong real growth in the industry virtually everywhere.

Between 1977 and 1983, there have been two major world recessions and a period of general economic stress. In these circumstances, the long-term resilience of the research industry and its apparent ability to adapt itself to change and to economic conditions are especially striking.

One of the most significant and on-going characteristics of this growth, as far as custom research is concerned, is the extension in all countries of the range of product areas in which research is carried out.

In all countries, market research had its origins in fast moving consumer goods industries, much stimulated by the conditions of oligopoly there. These industries still dominate the spending worldwide both in custom research and in market measurement. The view that research expenditure soon would cease to grow was based mainly on the misconception that it would be confined to these fields.

However, economic circumstance, a recognition of the marketplace value of research information and increasingly hard selling by researchers themselves in the past 10 years have extended custom design work—and to some extent, market measurement—into a new ballpark of clients.

Finance, travel, leisure, consumer and industrial durables, ethical and nonethical pharmaceuticals, energy, social, welfare and political areas all now are researched worldwide to a degree that would have seemed impossible 15 years ago.

Such development obviously has everything to recommend it from a marketing company, consumer and research income point of view. But, it has its risks.

The application of market research techniques in the social and political arena brings the in-

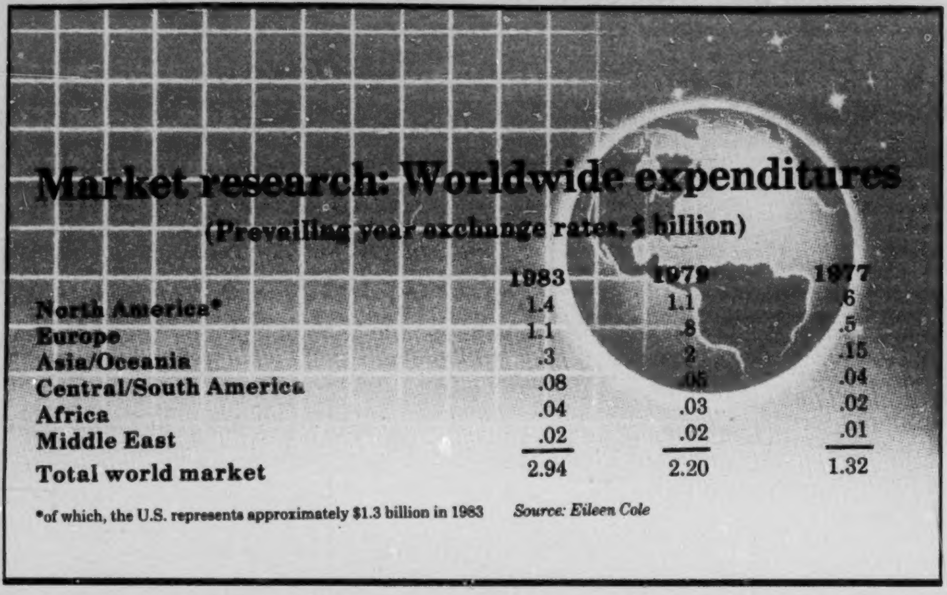
Plotting

(Continued from Page 35)

creasing involvement of pressure groups of all kinds, for some of which proving a deeply held conviction may be more important than the ethical research standards. Increasing pressure on the integrity of researchers as this situation develops could be a real hazard in the next 10 years.

As the range of products researched has widened, so has research's geographical spread. An important result of this parallel product and geographical development is the growth of the international custom research agency.

This is a European rather than a U.S. phenomenon. With the exception of the two dominant market measurement suppliers (A.C. Nielsen Co. and IMS International), U.S. agencies have very limited international operations, even though some of the members of the top 20 are members of international research chains. The enormous size of the U.S. market results in an overwhelming focus by American suppliers on the U.S.



Market research: Worldwide expenditures

(Prevailing year exchange rates, $ billion)

	1983	1979	1977
North America*	1.4	1.1	.6
Europe	1.1	.8	.5
Asia/Oceania	.3	.2	.15
Central/South America	.08	.05	.04
Africa	.04	.03	.02
Middle East	.02	.02	.01
Total world market	2.94	2.20	1.32

*of which, the U.S. represents approximately $1.3 billion in 1983 *Source: Eileen Cole*

This contrasts with the smaller but more internationally minded markets. The U.K. is the operating base of two major multinational research organizations—Research International and AGB Research PLC—and also provides the international base for two U.S.-owned suppliers—IMS and MRBI—as well as Gallup International.

Few American research companies seek or are able to offer comparable international research capabilities, and British agencies operating either from their U.S. offices or from the U.K. have become the major suppliers of American corporations' international research needs.

Three main factors influence this trend. The first and most significant is that British agencies have specialized in the international research field for a long time and are experienced in a highly technical and complex area.

In addition, U.K. salary costs are lower, tending to reduce the cost of research carried out from a European base. Third, the recent movement of exchange rates in favor of the dollar makes British research agencies increasingly attractive to American corporations.

Total figures on the growth of international research are hard to come by. However, experience in one large agency shows that, although the pattern changes with economic circumstance, long-term growth now tends to outstrip the over-all increase in research spending.

> **British agencies have specialized in the international research field for a long time.**

The next five years are likely to be marked by continuing growth of international work as multinational companies prowl the world looking for new markets, seeking improved efficiency in existing markets or continuing the development of international brands.

This growth is likely to be taken up mainly by European—and especially U.K.—agencies, while U.S. suppliers increasingly are preoccupied with the confrontation now developing in the market measurement-database businesses. In parallel with the European development, however, local agencies in many overseas countries are likely to develop, increasing over-all research spending.

International agencies will grow significantly in size as they invest in resources necessary to provide adequate service to international clients. Such changes are further developments of existing trends and can be predicted easily. More difficult to predict with accuracy is the effect of the rapidly increasing emphasis on database systems requiring a large investment, now a major feature in the

U.S. and beginning to develop elsewhere.

The growth in market research spending is only part of a more general growth in expenditure in the information industry over-all. The sale of information presents an increasingly attractive prospect to businesses. Putting a range of different kinds of information gathering and processing skills together under one ownership is even more attractive.

The whole concept of the information business is being transformed and so may be its ownership and organization. The acquisition of A.C. Nielsen Co. by Dun & Bradstreet and the linking of Arbitron and Burke Marketing Services are likely to be the first of many acquisitions, mergers or cooperative ventures.

The advancing technology at the root of this development has been putting new life into market and media measurement systems in the U.S., systems that while operationally efficient, until recently had all the hallmarks of inertia.

The attractive bait of the immense American research spending, combined with a belief that this inertia, which had slowed major new creative thinking, could be broken, has begun to attract vigorous competition.

This competition is not only American. Major European agencies are being attracted to the U.S. both in the market-media measurement and in the custom area, bringing with them technologies they consider the equal or superior of systems in use.

The European agencies face a considerable battle, especially in market measurement. Traditional attitudes to existing suppliers, a tremendous task in putting over their new thinking to a wide range of new clients and the long established system locking in database system information to clients' own information systems are all against them.

However, recent successful American experience has shown it is possible to break the pattern. But it requires considerable investment and is a game for the big boys or those who can find big backers or rich new owners. Market-media measurement systems in the U.S. are heating up into a considerable battle of technologies, systems and money.

On one side of the battle line is an inert system slow to change because of habit and because of the difficulties of having to reshape company data. On the other side is reinvigorated or new suppliers competing with long-established operations and convinced of significant improvements in the system they have to sell.

How this will shake out is difficult to predict. But it is certain that new techniques and the increasing use of large database systems, closely tied in some cases to one source data, will cause the creation of larger and larger companies through acquisitions, mergers or partnerships. Such new supply organizations will move toward marrying the whole range of research, databases and custom research into one whole.

At the same time, they will be tying up an increasing proportion of clients' research budgets, leaving less for the creative use of custom research. Moreover, the practice of locking in data to the client's own systems is likely to make for inertia in creating and accepting change in the custom area.

After the initial period of warfare, this is not the most exciting of long-term prospects for American custom research. With the great emphasis it places on consistent repetitive measurement, it is likely to mean little in the way of wide-ranging research creativity coming out of the U.S. in the next few years.

The development of database systems and the need for large investment also is occurring in Europe and other parts of the world.

The tendency for the big agencies to get bigger and the others to get smaller must continue.

The tendency for the big agencies to get bigger and the others to get smaller must continue, with middle-size agencies having an identity crisis.

The tendency for the top end of the industry to become a much more widely based information industry, rather than concentrating simply on traditional research, also will be present. However, some of the pressures that occur in the U.S. are less marked in Europe, and some European attitudes to research always have been different from those in America.

As a result, there is likely to be a different emphasis in the structure of the industry. The European industry always has seen the custom market research agency as a creative, full-service operation including design execution, usually with its own fieldworkers and tabulation systems, and interpretation.

This structure makes for a creative attitude on the part of the agencies that are under pressure to develop new technologies to meet their clients' marketing needs and under much less pressure than agencies in the U.S. simply to turn out consistently comparative material and normative data. Also, the greater mobility of marketing people in the U.S. causes a demand for the same data routinely reported.

The relatively lower mobility in Europe, with marketing people staying longer with their product, encourages them to use

Plotting

(Continued from Page 37)

agencies to research more widely and diagnostically. The powerhouse for new technology in the custom research area therefore is likely to be consolidated in Europe, building on experience of the past 15 years.

In the highly competitive world of international research, it will be this kind of technology that is needed to help multinationals extend their markets. It follows that European strength in this area will tend to tie in international research to European suppliers.

International brands will become a feature of the research world in two senses. As international work develops, the custom research agencies developing their own chains will appear in more countries. Acquisition of local companies or close chain relationships will mean that the names of individual international companies carrying their own guarantees of quality will appear around the world.

In the case of custom research, these are likely to be mainly European-based agencies, but in the market measurement area, there will be a mixture of existing large American companies (notably Nielsen and IMS) and companies with a European home base such as AGB.

The other aspect of international branding will be in the product. Custom research work has been largely a commodity product in the past, certainly so far as non-U.S. agencies are concerned. Increasingly, however, these agencies are investing large amounts of talent and money in new technologies dealing with fundamental problems that affect most marketers.

As their investment in such work grows, they increasingly present their technology in branded form, both for more efficient marketing of their product and to protect their technical developments under a trade name.

These "brands" share many characteristics with U.S. "branding" of techniques, but they tend to be more complex. The main development areas in which this branding process is well advanced—as in the U.S.—are those of new product development testing from basic concept work to the finished marketing mix, with predictions of market share/tonnage; advertising tracking systems and—very recently—tracking/measurement systems for below the line expenditure and in-store promotional activity.

The extension of the branding system, however, is likely to go beyond this, and it may present European researchers with a dilemma between such systemization of their work and their pride in their creative design of custom work.

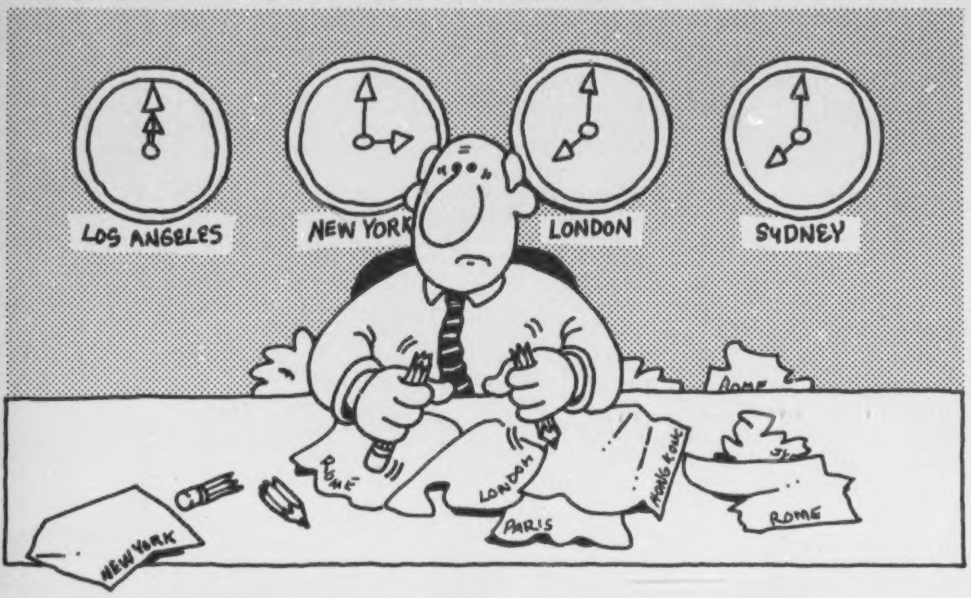
One other aspect of the overall shape of research may soon diverge between the U.S. and Europe.

The past 30 or so years have seen virtually the same retail measurement systems operated by the same suppliers on both continents. Nielsen was encouraged to set up in Europe by major clients there and operated with efficiency and success.

However, the larger retailers in Europe have grown more significant, giving the average Nielsen sample problems in representing all sections of the market satisfactorily. Proper representation of the largest retailers is difficult to achieve, in part because of their unwillingness to cooperate.

The advent of universal product coding and scanning technology has added greatly to the problems this presents. While Nielsen still is strongly placed in

International brands will become a feature of the research world in two senses.



International research need not be difficult

The coordination of international survey research can be a hassle. The challenges an international researcher faces include long-distance communication, language translation, selecting and briefing foreign suppliers, and processing and analyzing data using varying standards and systems.

NFO INTERNATIONAL RESEARCH, the overseas arm of the worldwide AGB Research Group, recognizes these problems and offers its clients research services throughout the world, from marketing consultation to analysis and presentation of data. This calls on the solid experience and expertise of over 50 group research firms in more than 20 countries. Associated firms, offering comparable standards and quality, extend this coverage to a worldwide service.

NFO INTERNATIONAL RESEARCH provides both custom-designed and syndicated consumer, industrial and social research conducted by personal interview, telephone, mail, focus group or central location.

How can NFO INTERNATIONAL RESEARCH help you? By having easily accessible executives who are experienced in international marketing research take charge of all phases of your study from beginning to end. An interactive software and telecommunication network makes the whole system a truly international operation.

The advantages are hard to match:

★ Expertise of one of the largest research organizations in the world

★ Elimination of problems with long-distance communication and language translation

★ Direct contact with readily available executives trained in international research

★ Centralized control of all tabulations and analyses from a domestic data base

★ Time and cost efficiencies having a SINGLE organization design and handle all phases of your research needs

For more details, please contact Eileen Kelly, Executive Director.

this area in the U.S. and has found continued acceptance in the retail measurement area, the situation is a good deal more complex in Europe. There, the largest retailers are considering doing measurements themselves, without agency intervention and without syndication of results.

Should this movement develop, the implications for marketing companies could be very serious and the demands on research agencies to create alternative measurement systems—particularly new types of consumer panels—very great.

The general economic pressures that encourage the use of machines instead of people are at work. In all kinds of research, therefore, we must expect to see this substitution occurring, especially in investment in hard and software related to fieldwork and all aspects of questionnaire and data handling.

European and overseas countries always have tended to do more face-to-face interviewing than the U.S., mainly because of the less widespread ownership of telephones in Europe in the past. In many countries, telephone interviewing is increasing rapidly.

However, the traditional practice of face-to-face interviewing, together with the more complex design of a good deal of European custom work, will keep it as an important method of data gathering there and this will be so in many overseas areas.

The emphasis on face-to-face interviewing, together with the fact that large custom research agencies in Europe almost all have their own national interviewer forces, has meant that the quality of personal interviewing, especially in northern Europe, is high.

Because any research is only as good as its data collection, this quality of fieldwork is a much-prized asset, and the custom of recognizing it by registration of agencies with a field force of acknowledged standards (already established in Europe) is likely to spread—to the benefit of clients.

All the factors discussed so far have been integral to the research or information industries themselves, and changes coming in them arise from those industries or from client pressures. Outside pressures, notably those from government and related forces, also will have an impact.

With increasing frequency, the call still is made for the suppression, at least around election time, of political polling.

It is vital to be alert to the suppression of democracy that this represents and to fight it at every turn. Perhaps more hazardous, however, is the ever-developing and ever-changing legislation relating to data privacy.

The danger for market research lies in the fact that well-intended and justified legislation to protect individuals is applied increasingly to market research data where individual information is lost in combination. In some major countries, the hazards to market research from this source are already significant. For corporations involved in multinational research, the issue is increasingly worrying.

The U.S. and the European market research industries, stemming from the same sources and still with the same general pattern, have developed on somewhat different lines, especially in the custom area.

Each has its strengths. The U.S. approach is orderly and systematic, making for smooth running, rapid turnaround (often branded) research, often formally integrated into the client's data and decision making process. It leans to standardized approaches and has a limited requirement for input from research agencies.

The client often plays a very major role in the design of the research and its interpretations and looks to the supplier for the mechanics. This focuses attention on the agency's mechanistic prowess but discourages it from creativity in its approach. There is great emphasis on normative data and consistent obtaining of the same data.

European countries always have tended to do more face-to-face interviewing than the U.S.

The weaknesses coming from these strengths are that creativity and change are discouraged, involvement of the agency in data interpretation is not encouraged and general all-around market research skills tend to give way to specialized skills in a narrow range of technology.

The European approach is strong in these latter areas. Clients expect agencies to play the major role in design and a large role in interpretation, so creativity is encouraged, and a good all-round training in research is the norm.

This approach also accepts the reality that not all data is clean and tidy, internally consistent, with no aberrant cells or necessarily congruent with other data (and that this can yield unexpected visionary insights into the market). However, the European researcher on average is a less good salesman, less brisk and efficient at time-tabling, more complicated (and sometimes academic) in his work and perhaps too little inclined to value norms and consistency in data.

We should move the two systems together, insisting on the best from both.

On both continents, research agencies share (at least in custom research) one characteristic they could do without—low pretax margins in a high-risk business. This, above all, is the target we should be aiming to raise to reasonable heights.

A lucky guess is OK... when you're lucky.

Chilton Research Services. A way to base business decisions on what's happening. Not what you think might be happening.

In business you need to know exactly what outcome a course of action is likely to bring. Which is why Chilton Research is proving to be an invaluable tool for decision makers.

We start by combining the best in human and technological resources. The result is research studies pinpointed to exactly what needs to be known.

Positioning a product, for example, requires defining the market and interpreting customer needs. Accurately. That calls for state-of-the-art data collection and analysis, careful planning and meticulous execution.

At Chilton your assurance of meaningful research is backed by the experience and professionalism of 160 specialists in statistics, marketing, communications, psychology, economics and data processing.

Whether your needs call for insight into specialized industrial markets or in-depth understanding of consumer attitudes, Chilton Research is ready. Give us a call.

Because research is the best way to ensure a lucky future.

A good reputation is the best recommendation.

- **Nuclear plants find out if tone alert works**
  CRS is currently conducting a three-year series of surveys to determine the effectiveness of nuclear power plant alert systems. Within 2 hours of the tone alert, CRS completes all interviews with a sample of representative households in the alert area to find out whether the siren was heard. Specific areas are then identified for siren enhancement.
- **Industrial survey determined size of market for 30 products**
  Employing a two-phase approach, CRS conducted 3,000 CATI interviews in the United States and Canada to determine brand share and market size for 30 products used by craftsmen and manufacturers in 60 end-user classifications.

  A custom-designed program, based on incidences determined in phase one, was used to allocate optimal sample sizes for the second interview phase. This two-step procedure ensured greater reliability of results within each industry grouping.
- **Insurance survey probes needs of older Americans**
  To determine the perceived coverage shortcomings of Medicare, 1000 CRT interviews were conducted with Americans over 65 about supplemental health insurance coverage. Results are being used to design health insurance programs that better meet the needs of the elderly.

Santa's choice

When two brothers sneak downstairs to catch a glimpse of Santa in this seasonal Sprite commercial, they find he drank all the Sprite they left for him—but did not touch a drop of rival 7UP. The spot by Marschalk Co., New York, will break in several weeks as part of a five-week blitz Coca-Cola plans for its major brands (AA, Nov. 1).

Will new Diet Pepsi revive 'taste' battle?

By NANCY GIGES

New York—Pepsi-Cola USA, aiming to regain diet-cola sales lost to Diet Coke, is switching to 100% NutraSweet formulas for its diet cola brands.

At a press conference here Nov. 1, Roger Enrico, president, Pepsi-Cola USA, said tests indicated consumers preferred new Diet Pepsi by better than 2 to 1 compared with Diet Coke, suggesting a new round of "taste test" challenge advertising.

The affected brands are Diet Pepsi, Diet Pepsi Free and Pepsi Light, all of which had carried part-NutraSweet, part-saccharin formulations.

The announcement came a day after Coca-Cola USA held a press conference here to talk about a flurry of new tv spots and heavy fourth-quarter advertising for its soft drinks (AA, Nov. 1).

Responding to Pepsi's announcement following the press conference, a Coca-Cola spokesman said: "We consider it the ultimate compliment to Diet Coke. In the face of Diet Coke's phenomenal success, it is not surprising to see a variety of marketing tactics by our competitors." He said Coca-Cola has no plans at this time to change any sweetener formulas in any of its diet beverages, but will keep its options open for the future.

Purchase, N.Y.-based Pepsi is the first major company to switch to a 100% NutraSweet formula, although some small brands, including Procter & Gamble's diet Orange Crush and Squirt's diet products, are sweetened with 100% NutraSweet.

Mr. Enrico vehemently denied that the formula shift was a "desperate move."

He said: "When we signed Michael Jackson, people said it was a desperate move. When we introduced the three-liter bottle, people said it was a desperate move. And when we introduced Slice, they thought we were nuts. Our total volume is up 8% this year, and our business is extremely healthy."

The president said the Michael Jackson deal, for which Pepsi paid close to $10 million, paid off in five weeks. "I don't think it will be any more difficult to make this pay out," he said.

He also defended Diet Pepsi's recent performance, noting that during the past 10 months, the brand's sales have grown more than 30%. "The gap between Diet Pepsi and Diet Coke has been significantly narrowed,"

Gargano to chairman

Ally, Dailey pick retirement dates

By STEWART ALTER

C. Ally

P. Dailey

Carl Ally and Peter Dailey, two well known ad agency executives whose names are on the doors of their agencies, both will retire Dec. 31.

Mr. Ally, 60, will retire as chairman of Ally & Gargano, but continue as a board member and as a consultant; he still owns more than 13% of A&G's stock, as does chief executive officer Amil Gargano, who takes on the chairman title.

In a separate development, Mr. Dailey, 54, who sold the Los Angeles-based Dailey International Group to the Interpublic Group of Cos. in 1983, will leave IPG as vice-chairman and a board member.

Neither move was considered a surprise to those familiar with the situations, though Mr. Dailey's departure has prompted speculation that he may be in line for a political appointment next year.

In A&G's prospectus, issued before it went public more than a year ago, it stated, "Mr. Ally's contract provides that after the initial one-year term he will serve as a consultant to the company for a period of two years," and following

'Stern' blasts editor for Hitler diary hoax

By JOSEPH M. WINSKI

Hamburg—The specter of Adolf Hitler continues to haunt *Stern*, the flagship magazine of Germany's giant publishing house, Gruner & Jahr.

Last week, *Stern* published a story that alleges a key editor involved in last year's publication of the infamous forged Hitler diaries knew they were false.

"We believe that Thomas Walde probably knew the stuff was false at least four weeks before" publication, Rolf Winter, *Stern* editor-in-chief, said in an interview last week with Advertising Age.

Mr. Walde was at the time editor of *Stern's* contemporary history section and immediate supervisor of Gerd Heidemann, the reporter who claimed to have found Hitler's diaries. Mr. Walde now works for the radio/tv unit of Gruner & Jahr.

In its current issue, *Stern* reports that Mr. Walde learned from a government crime technician in March, 1983, that the paper on which the "diaries" was written contained a whitening agent that was not available until after World War II. However, *Stern* says Mr. Walde refused to allow further testing of the papers and pushed for early publication.

The "diaries" were published in the April 25, 1983, issue of *Stern*, but within weeks the West German Archives ruled that they were "blatant forgeries." The ruling led to international criticism of the magazine's apparent stupidity and venality.

Stern's disclosure regarding Mr.

CORPORATE CLOSEUP

Tambrands survives in market 'jungle'

By SHERRY SIEGEL

LAKE SUCCESS, N.Y.—Edwin Shutt Jr., president of Tambrands Inc., pooh-poohs pronouncements by industry analysts that the company's Maxithins line of feminine pads is a phenomenal success.

"I think it's a successful brand," he admits, "but I wouldn't characterize it as a phenomenal success."

Despite Mr. Shutt's caution, the consensus is that Maxithins, the company's only U.S. product besides Tampax tampons, is the key to Tambrands' transformation from a stodgy, one-product concern into a diversified, aggressive company. Maxithins, introduced in 1981, has helped enough to put Tambrands in line for 12% to 15% annual growth in sales and earnings through 1988, according to Daniel Meade, an analyst with First Boston Research.

And with Maxithins in its lineup, the company changed its name in 1983, from Tampax to Tambrands, to reflect the evolution.

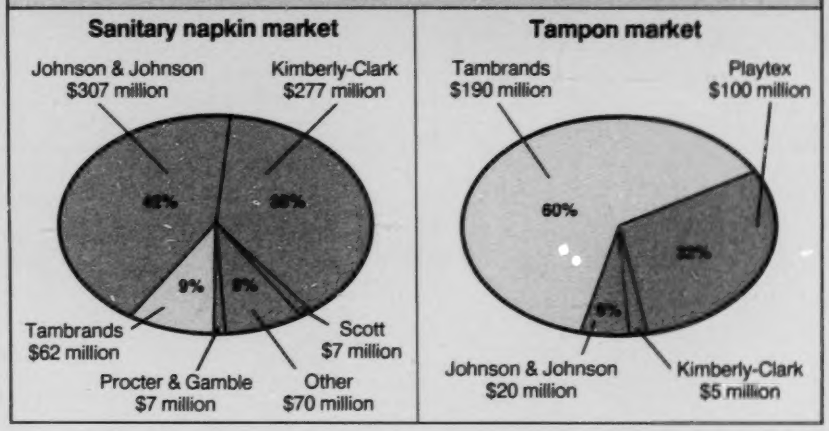
But to live up to the promise of the new name, the company must pass a number of tests. Chief among them are to keep Tampax going as the company's "cash cow," strengthen its hold in the pad market and absorb the cost of introducing Maxithins—$60 million has been spent so far—and future new-product introductions.

Tambrands, which had sales of $346.4 million in 1983, hasn't always been up to such challenges. In the mid-1970s, Tampax's market share started shrinking, falling to 41.6% by 1980. By then, said James Waggoner, an analyst with Bear Stearns, New York, the company had little to recommend itself, save a strong balance sheet.

Ironically, the toxic shock syndrome tragedy of 1980 proved beneficial for Tambrands. One analyst has written that TSS gave Tambrands "a new lease on life." Consumers turned to old reliable Tampax—especially its all-cotton variety—as superabsorbent fibers received heavy scrutiny as a possible factor in causing TSS.

Tambrands' slice of the market

Tambrands hopes the domination of Tampax in the tampon market will rub off on Maxithins' ability to make gains among sanitary napkins. Maxithins already has nearly 50% of the thin pad and pantyliners segments, but Procter & Gamble could make a sizable dent with its Always brand, which was introduced early this year. *Source: Daniel Meade, First Boston Research*



When Procter & Gamble pulled its ill-fated Rely tampons off the shelves in September, 1980—by which time it had attained a 12% market share—Tampax's share jumped 9%. Just as important for Tambrands, the brand that was shaping up as Tampax's major competition had been knocked out of the action after only nine months.

Another positive jolt was the arrival in June, 1981, of Mr. Shutt as president. He came from Clorox Co., Oakland, Cal., where he was also president. Before that, he was with Procter & Gamble.

Mr. Shutt, 57, brought brand management and international marketing experience to Tambrands, talents necessary for the company's diversification into new-product areas—a strategy the company's board adopted in 1980.

With diversification in mind, Mr. Shutt implemented a number of changes in Tambrands' organization. The company:

- Established a national network of food and drug brokers, managed by Tambrands' regional sales managers.
- Reorganized its international operations, with marketing-trained regional managers made responsible for overseeing the international marketing effort.
- Hired a vp-management information systems to update and upgrade systems.
- Promoted the vp-fibers to exec vp, responsible for the company's newly organized research and development efforts.

Shortly after Mr. Shutt's arrival, Tambrands introduced Maxithins to 44% of the U.S. (in terms of population), and the thin, superabsorbent pad grew to capture about 11% of the thin-pad market.

Maxithins bolstered Tambrand's sales, which increased to $346.4 million in 1983 from $287.5 million the previous year. Earnings, however, did not rise as quickly, reaching $51.7 million in 1983 from $43.3 million in 1982.

Analysts have lauded Tambrands for entering the thin-pad market quickly, second after Johnson & Johnson's Sure & Natural.

Even with the fast introduction, however, Maxithins faced considerable competition. The pad market is a veritable jungle, encompassing thick pads, thin pads and panty shields, different absorbencies and regular or deodorant varieties.

Tambrands entered into this catamenial pandemonium only with products in the fastest-growing segments: Thin pads and pantyshields. According to Bear Stearns' Mr. Waggoner, while the company has nearly 20% of the total pad market, it actually has close to 50% of the thin pad and pantyshields markets.

The pad market was relatively calm before 1980. But after TSS broke, the category went wild. Women began changing their habits—"dual usage," using a tampon along with a pad, is growing, for example—and the pad

WHO SQUEEZED "C" OUT OF SUNKIST?

It could be important to your marketing program. Because the same techniques that developed Sunkist Vitamin C tablets for Rexall, also put Baking Soda in more than thirty million refrigerators, developed Mellow Roast Coffee for General Foods, and S.O.S. Oven Pads for Miles Laboratories.

They could be just what you've been looking for to restage that fading star, or create a successful new product's plan. Gerald Schoenfeld, Inc., consultants to America's major marketers, now offers the "Better Concepts Program."

Question: While you're developing new products, who's watching the scores?

The answer to better concept scores — scores that exceed all bench marks — is better concepts.

Whether it's developing new products from scratch or treating old products like new, better concepts are the key.

To find out more about the "Better Concepts Program," call or write Sonia Kallen, (212) 986-9257.

Gerald Schoenfeld inc.

Republic perks up pitch

By BRIAN MORAN

NEW YORK—Republic Airlines hopes a new image-builder marketing push beginning this week will have business travelers bragging they've gotten something for nothing.

Republic's $8 million fall advertising campaign, which breaks Nov. 6 during election night coverage on ABC and CBS, hones in on the never-ending search for more comfortable flights and hassle-free connections.

Dancer Fitzgerald Sample here, Republic's new agency, will pepper network tv, radio and newspapers with a list of "perks" aimed at getting consumers to choose Republic as their preferred airline. The ad effort is part of a wholesale revamping of Republic's image, which extends to a new corporate logo and a paint job for the carrier's 133 planes.

DFS, which won the $30 million Republic account last June, tapped senior vp Cliff Freeman, creator of Wendy's "Where's the beef?" campaign, to join the agency's first creative effort for Republic. The resulting pool of comic tv spots plays on the business executive's dread of out-of-town trips.

Mr. Freeman, who may take credit for perhaps the best-known ad slogan of the '80s, admitted to a tinge of apprehension about his new assignment.

"In fast-food, you have three major players and the battle lines are simpler," he said. "With airlines, the ad message usually has so many elements that it's a little unfocused. Normally, I don't like to do it."

Republic Airlines
We make you feel like flying

Tag line for Republic Airlines' revamped image print ads is "We make you feel like flying." Dancer Fitzgerald Sample, New York, handles.

Mr. Freeman said DFS' creative team for Minneapolis-based Republic, headed by Stanley Becker, exec vp, was able to get around the problem by focusing on a one-word theme near and dear to the hearts of business travelers: Perks.

"It excited me as a fresh word that's not used much in print or broadcast, and there's a lot of empathy attached to it," Mr. Freeman said. "A lot of us have always wanted more from business trips that usually mean leaving our families, bad food and no sleep."

DFS' pool of tv and radio commercials for the "Perks" campaign includes introductory spots outlining Republic's service benefits, plus followup spots focusing on each perk.

The introductory tv spot features a businessman who keeps getting interrupted at the worst possible times—during a backyard barbecue, an anniversary dinner with his wife and his birthday party—by phone calls from his boss ordering him off to Omaha.

"We know what it's like to be in business," an announcer says as the woebegone businessman faces up to another road trip. Later, fortified by perks such as free drinks, front-of-the-plane wide seating and separate check-in facilities—for $15 more than Republic's normal coach fare—the traveler leaves the flight content. He even ignores a ringing pay phone at the airport.

Another spot shows a logjam of jets awaiting takeoff at an airport while confusion reigns in the control tower. The spot pitches Republic's major hubs of Detroit, Minneapolis-St. Paul and Memphis as less congested.

Other perks described in the campaign include Republic's frequent-flyer program, which requires 20,000 miles to earn a free

(Continued on Page 92)

‘Jungle’

(Continued from Page 4)

market grew from $438 million in sales in 1979 to $730 million in 1983. (During that time, the U.S. tampon market grew from $232 million to $315 million.)

Right positioning

Maxithins' success is attributed to its being in the right segment of the market, the $60 million in advertising and promotion that Tambrands has spent so far and the product's unique packaging design: Each pad is folded and individually wrapped, so it's discreet and travels well.

For its advertising, Tambrands generally uses network tv commercials wherever they're permitted, along with ads in women's service magazines around the world. The company spent $48 million in media in 1983, up from $44 million in 1982 and $28 million in 1981. William Esty Co., New York, has handled Tampax since 1980 and recently was given responsibility for a new product. MCA Advertising, New York, was assigned Maxithins in 1981 and about six months ago, the company assigned another new-product project to a third, undisclosed agency. Worldwide, Tambrands works with perhaps 20 agencies, Mr. Shutt noted.

Because of promotion costs, the Maxithins line still is losing money for Tambrands, though sales for 1983 reached $62 million and are estimated at $85 million for this year. The line is expected to turn profitable in 1985, with sales expected to be $100 million to $110 million.

Maxithins' performance during P&G's test of its Always pads in Minneapolis from December to January bodes well for Tambrands, analysts believe. While Always accumulated 20% of the market during a $100 million P&G promotion blitz, Maxithins didn't lose any share and, in fact, grew from 6% to 7.5%, according to Diana Temple, an analyst with Salomon Brothers, New York. Always took share away from Johnson & Johnson and Kimberly-Clark instead.

Despite all the activity in pads, Tambrands isn't ignoring its tampons. The tampon market is growing slowly, about 3% to 4% a year. But Tambrands has more than 60% of the market and sells more than 2.5 billion tampons yearly, producing $190 million in sales in 1983, up from $179 million in 1982.

Signs of innovation

Last year, the company introduced tampons with rounded cardboard applicator tips into the U.K.; in the U.S., the company is testing plastic applicators in the Pacific Northwest. Although some analysts say the company should have gone to plastic sooner—its biggest tampon competitor, International Playtex, uses plastic—others consider both moves positive signs of innovation.

Much of Tambrands' international effort centers on education: Spreading the word about internal feminine protection. Though Tampax tampons are sold in more than 135 countries, many women in them do not even purchase feminine protection.

Mr. Shutt likens the situation to that in the U.S. before World War II, "when no women used tampons or knew about internal protection." He recalls that ads in women's magazines would be accompanied by an education campaign.

"We're making a very conscious effort to repeat that experience [overseas]," he said. "The media haven't been worked to the extent we think they can." Toward that goal, the company has a three-person office in Manila, two people covering the Middle East and Africa and recently added a second person in South America.

New product on tap

Tambrands has been promising a new product in 1984, and Mr. Shutt is hoping to introduce it in the fourth quarter. But that may be delayed until 1985. Tambrands is saying only that it's outside the catamenial market and will take advantage of the company's delivery network of drugstores and supermarkets.

Analysts have surmised that it's an incontinence product, contraceptive sponge, oral hygiene product ("Maxifloss," cracked one analyst) or general skincare item. The company is planning a new product introduction in early 1986, as well. The first product, whatever it is, is expected to reach $10 million to $15 million in sales in its first full year.

Tambrands has made a strong commitment to product development, signaled by the arrival of Pablo Zamora from P&G product development, as vp overseeing the noncatamenial product-development effort. Before Mr. Zamora's arrival, catamenial and noncatamenial product development had been lumped together.

In addition, Mr. Shutt is "constantly on the lookout" for potential acquisitions. The company has $93 million in cash, no long-term debt and stockholders' equity of $200 million (as of yearend 1983). First Boston's Mr. Meade figures the company could easily rustle up a fund of $200 million for a purchase.

But the consumer product area has been "pretty well picked over in the U.S., and a lot of junk is brought to us" by the investment community, said Mr. Shutt. The company vowed in its 1983 annual report to avoid acquisitions of companies it doesn't know how to manage.

Unknowns ahead

As Tambrands evolves into a diversified organization, Mr. Shutt has been plumping its employe ranks. Mr. Shutt mentions proudly that Tambrands hired one of the top MBA graduates from Columbia University this year, though the student was pursued by Johnson & Johnson and Procter & Gamble.

Amid all the good news, a few unknowns lie ahead for Tambrands. All the causes of TSS remain to be found—Tambrands has so far committed more than $4 million to the search—but some believe that tampons will be exonerated as a major cause of TSS. And the Food & Drug Administration is talking about standardizing absorbency ratings for tampons. Such a requirement might cost the industry millions in compliance.

But Tambrands appears strong and ready to do battle with any adversaries in catamenial products or any new-product areas it chooses.

"Where they go from here is pretty much a mystery," said Bear Stearns' Mr. Waggoner. But for a "sleepy company that never used to make the Nielsen," as Hercules Segalas, analyst with Drexel Burnham Lambert, New York, put it, Tambrands appears, in one sense, to have already arrived.#

Lapin, Rose combine

New York—Lapin & Rose Associates has been formed with the addition of Rich Rose as a principal in the pr and marketing agency formerly known as Jackie Lapin Associates, based in Woodland Hills, Cal.

Mr. Rose, who will remain here, was an account supervisor in Taylor & Silverman Communications, a sports pr agency whose principals, Alan Taylor and Ira Silverman, earlier this fall formed separate agencies. Lapin & Rose has opened an office here at 212 Fifth Ave., 10010.#

LEGAL NOTICE

UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA

UNITED STATES OF AMERICA,) R-31-M
Plaintiff,) NOTICE
v.)
FOSTER & KLEISER COMPANY, GEORGE W. KLEISER, WALTER F. FOSTER, AUGUST F. LAUSEN, JR. and RESTOP REALTY COMPANY,)
Defendants.)

TAKE NOTICE that Metromedia, Inc. ("Metromedia") has filed a motion for an order terminating the Final Decree in this action which was entered on March 13, 1931. The plaintiff, the United States of America, has consented to the entry of such an order, but has reserved the right to withdraw its consent for at least seventy (70) days after the publication of this Notice.

The Petition in Equity in this action, which was dated April 16, 1930, alleged that defendants combined and conspired to restrain and monopolize interstate trade and commerce in outdoor advertising in California, Arizona, Oregon and Washington ("the four-state area"). The Final Decree enjoined defendants from monopolizing or attempting to monopolize outdoor advertising in the four-state area. In particular, the Final Decree prohibited defendants in the four-state area from:

1. Acquiring the assets, affairs or business and from receiving, holding or voting the stock or other share capital of any competitors;

2. Formulating, adopting and practicing the policy of interfering with competitors for the purpose of preventing them from carrying on lawful busineses;

3. Formulating, adopting and practicing the policy of contracting with advertisers for displays of outdoor advertising at unfair or discriminatory prices and unfair or discriminatory terms and conditions;

4. Knowingly inducing or attempting to induce customers of competitors to breach contracts by changing and reducing bids for the display of outdoor advertising below the prices charged by defendants or their competitors;

5. Knowingly making false and unfair statements regarding the business, business standing, credit and intergrity of competitors;

6. Granting preference, priorities, rebates and discriminations in prices and terms of contracts in favor of certain advertisers for the purpose of preventing competition;

7. Giving free display of outdoor advertising for the purpose of preventing competition;

8. Compelling or attempting to compel owners of outdoor advertising structures to sell structures on such terms as may be determined and dictated by defendants by threats that outdoor structures will be constructed and operated in competition thereto; and

9. Paying any soliciting agency any higher rate of commission on contracts for outdoor advertising awarded to defendants for the purpose of inducing an award of contracts.

Interested persons may submit comments concerning this matter by sending them to P. Terry Lubeck, Assistant Chief, Intellectual Property Section, Antitrust Division, Department of Justice, 21 12th Street, N.W., Washington, D.C. 20530 (telephone: 202/724-7974). Such comments must be received by the Division within sixty (60) days.

Copies of the complaint, Final Decree, motion papers, all comments submitted and all further papers filed with the Court will be available for inspection at the Legal Procedure Unit of the Antitrust Division, Room 7416, United States Department of Justice, Tenth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530 (Telephone: 202/633-2481), and at the office of the Clerk of the Clerk of the United States District Court for the Central District of California, United States Courthouse, 312 North Spring Street, Los Angeles, California 90012. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by Department of Justice regulations.

Newspaper ad spending up in Aug.

New York—Advertising spending in major daily newspapers skyrocketed in August, with gains in 13 of the 16 categories measured for Advertising Age by Media Records Inc.

The department stores category, the medium's largest advertiser, was up 24.4% to $81.26 million, a gain of $16 million over the year-earlier period.

Food stores were up 9.1% to $25.9 million; radio, tv, phonographs, records were up 34.8% to $14.5 million; alcoholic beverages were up 35.2% to $2.1 million; airlines were up 23.9% to $7.5 million; new passenger cars were up 32.1% to $10.03 million; publishing and media were up 45.7% to $8.03 million, and cigarets were up 53% to $5.35 million.

Among the smaller categories, soft drinks/diet and nondiet were up 1.5% to $390,674; sporting and leisure-time equipment was up 48% to $242,476; cosmetics, makeup, manicure products were up 40.8% to $368,862; soaps, cleansers, polishes were up 147.2% to $508,324, and headache remedies and sedatives registered $565,978 against no activity in August, 1983.

Losing categories included cameras, photo supplies & services, down 4.9% to $661,862; beverages/coffee and tea, down 64.2% to $96,869, and cold, cough and sinus remedies, which showed no activity this August.#

Plaque fighters keep pushing

By LAURIE FREEMAN

Marketers of toothpastes said to fight plaque continue to enter the $1 billion dentifrice market despite the lack of regulatory action on the part of the American Dental Assn. and the Food & Drug Administration.

To date, neither the ADA, through its voluntary "seal of acceptance" review, nor the FDA has released scientific or legal standards for the evaluation of these plaque-fighting dentifrices (AA, March 19).

Instead of waiting at least another six months for the ADA's Council of Dental Therapeutics approval, Vipont Laboratories, Fort Collins, Colo., has asked dentists and dental hygienists to recommend plaque-fighting Viadent toothpaste and mouth rinse.

The small company will start a $1 million national direct-mail public relations campaign later this month to educate the dental community about Viadent's benefits. The Public Relations Board, Chicago, handles the campaign.

It is not unusual for pharmaceutical marketers to introduce their products through the dental and medical communities. These "sampling" activities are not regulated by professional organizations such as the ADA and the American Medical Assn.

Appearing in distinctive purple-and-gold packaging, Viadent is certainly the most expensive of the generally higher-price antiplaque formulas. A 3-oz. tube retails up to $3.49 at some drugstores, while its main competitor, Minnetonka's Check-up, is priced a full dollar less, at $2.49 for its larger, pump-dispensed 4.1-oz tube.

Zendiaum toothpaste, a plaque-fighter marketed by Cooper Laboratories, Palo Alto, Cal., features "a unique dual-enzyme system, to keep teeth cleaner and prevent deposit buildup," according to its package labeling. It retails for $2.49 for a 2.3-oz. tube.

"Viadent costs more because of its main ingredient, sanguinarine," said Lawrence Frederick, Vipont president. Sanguinarine is a chemical derived from the bloodroot plant, said an industry source. According to some clinical studies conducted by Vipont, Viadent is effective in plaque reduction and removal.

Plaque is the product of bacteria in the mouth. It creates a dull, rough buildup on teeth that can lead to gum diseases.#

Europe Craft wins lawsuit

Los Angeles—Europe Craft Imports, marketer of Members Only clothing, has been awarded more than $73,000 by a federal district court here in a judgment against Sam Kotler.

Mr. Kotler was convicted of forging the signature of a Europe Craft officer on a licensing agreement that the defendant then used to set up a manufacturing and sales organization to duplicate and sell the Members Only racing jacket in the U.S.#

Tv fights beer ban talk

Nets join to counter critics

By VERNE GAY

New York—The three tv networks are pooling resources in an unusual cooperative effort to fight groups that advocate banning $526 million in wine and beer advertising from the airwaves.

The networks have put together a 40-minute videocassette detailing what they have done during the past 18 months to combat alcohol and drug abuse. The videotape will be shown Nov. 13 during a meeting at the U.S. Justice Department with network representatives, pro-ban advocates and advertising and broadcast trade groups.

Essentially, the networks want to set an agenda with these groups that will eliminate any talk of banning wine and beer tv advertising. At the same time, they want to show that they and their advertisers are not part of the problem, as several of the groups that will be present have contended.

"My concern is that this [meeting] is characterized as a defensive move," said Betty Hudson, NBC's vp-advertising and promotion, who will be the principal network representative. "We hope it will be a constructive move. We want to schmooze before they launch [an attack]. If they come to the party with the presumption that we won't cooperate, then that's awful."

Ms. Hudson added, "There is indeed a societal problem with substance abuse, and it would be worth spending our time on it even if there were not this [ad ban] pressure. Taking the advertising off the air might give [the pro-ban groups] a sense of accomplishment, but whether they've done something to cure the problem is another question."

The meeting was set up by the Justice Department's Office of Juvenile Justice and Delinquency

New B&W brand debuts Wild West character

Brown & Williamson breaks its Eli Cutter brand into West Coast test this week. Ads via Geer, DuBois associate the cigaret's "legendary taste" with Eli Cutter, a fictitious 1800s outlaw. Copy says it "delivers the same good taste and deep down satisfaction enjoyed by men in the days of the Old West." B&W declines comment but likely test markets are San Francisco, Sacramento and Fresno.

Investors high on ad agencies

Taking stock

By STEWART ALTER

A burst of recent activity indicates that institutional investors have started giving much more serious attention to ad agency stocks.

The many reasons for this change include, perhaps most significantly, an improved image of the ad agency business itself and greater recognition of the value of advertising in general.

Food, household and tobacco products have become "very mature industries," said Charles Crane, a former senior food analyst at Oppenheimer & Co., New York, who released his first report on the agency business only two weeks ago. "Consequently, stimulating growth within these industries either means advertising the living daylights out of existing lines or introducing new products," he said, observing how the fortunes of ad agencies are a natural extension of that development.

Oppenheimer is only one of several major institutional investor-oriented securities companies that have recently started issuing reports on ad agency stocks.

Morgan Stanley & Co., New York, issued its first agency stock research report, on Saatchi & Saatchi, in early June. Wertheim & Co., New York, issued its first such report, also on Saatchi, in early July, and a second, on Ogilvy & Mather, in early September.

In all three cases, the analysts involved have added ad agencies to their package-goods coverage, which is something new. The core of analysts who have followed

Mickelberry revenues spurt 46%

New York—Mickelberry Corp., the parent of agencies including Cunningham & Walsh, Laurence, Charles & Free and Nadler & Larimer, reports third-quarter revenues of $31.7 million, up 46% from the same period in 1983, and net income of $528,000, up 13%. Nine-month revenues rose 40%, to $89.7 million, with net income up 29%, to $1.8 million. The 1984 figures reflect several acquisitions, most notably Direct Marketing Agency, one of the larger direct-marketing ad agencies *(see related story at left).*

Old Style brands switch to Ogilvy & Mather

La Crosse, Wis.—G. Heileman Brewing Co. has moved the assignments for its Old Style brands to Ogilvy & Mather, San Francisco, from Campbell-Mithun, Chicago. Despite the loss of the flagship Old Style line, which billed about $5 million in measured media last year, C-M retains other Heileman brands (including Blatz, Special Export and Schmidt).

Philip Morris rolls out low-tar Merit in boxes

New York—Philip Morris USA next week will roll nearly national with Merit low-tar filters in crushproof box packaging. The marketer hopes to improve the No. 6-selling brand's performance by combining what it claims are the two fastest-growing elements in the industry—low tar and box packaging. The king-size box will be promoted via an "across the board" campaign by Leo Burnett USA, Chicago, in magazines, newspapers, outdoor boards and Sunday supplements. Ads feature the tag line "A world of flavor in a low tar."

Marriott Marquis first in luxury chain plan

New York—The Marriott Marquis Hotel, scheduled to open here in June, 1985, is but one 1,876-room cog in the master marketing plan of Washington-based Marriott Corp.

The plan, as outlined in the Nov. 5 charter issue of *Crain's New York Business*, calls for construction of a chain of Marriott Marquis luxury hotels in major U.S. cities that attract business conventions and trade shows. Marquis hotels are scheduled to open in Atlanta next June and in Orlando, Fla., in 1986.

As part of the over-all marketing strategy, Marriott Corp. has signed a letter of intent to sell its 876-room Essex House hotel on Manhattan's Central Park South to Nikko Hotels International, a subsidiary of Japan Air Lines, for an undisclosed sum.

According to *CNYB*, Marriott Corp. chairman John Willard Marriott would not discuss details of the Essex House sale, saying only that JAL will pay "more than $125 million—much more." The sale will be completed in June, 1985, when the Marriott Marquis opens for business at Broadway and 45th Street, a decidedly less-than-luxurious neighborhood.

The Manhattan Marquis will not benefit financially from the Essex House sale, according to Stephen Giblin, the Manhattan Marquis' marketing and sales director, even though Mr. Marriott said the sale of the Essex will make it easier to market the Marquis. Mr. Giblin declined to disclose the Marquis' ad budget. The campaign is being handled by Warren/Kremer.

Marriott Marquis is part of the revitalization of the Times Square area, instigated in part by the construction of the New York Convention Center to the south between 34th and 39th Streets and 11th and 12th Avenues, scheduled for completion in April, 1986.

Other area hotels are being renovated in anticipation of more conventioneers. The old New York Statler was renamed the New York Penta after being purchased for $46 million and renovated with $20 million from Ascot Associates, a partnership among Abelco Associates, local real estate developers and the European Penta Hotel chain, which is owned by British Airways, Lufthansa and Swissair (AA, April 2).#

Crain's debuts in New York

New York—*Crain's New York Business* is the latest in a series of new business publications for the metropolitan New York market. A second charter issue of *CNYB* will be published by Dec. 10 by Crain Communications, which also publishes Advertising Age and other consumer and business publications. The first regular weekly issue will appear Jan. 7.

Each charter issue will run 40 pages, with a 50-50 ratio of advertising to editorial. Ad space for both issues was sold out. Initial circulation of *CNYB* will be 80,000, going primarily to top execs of smaller-to-midsize businesses. Selected newsstands also will carry the paper.#

Charles (Skip) Wilhelm, circulation director, passes out charter issues of *Crain's New York Business* at Grand Central Station.

National sweepstakes due in January

Beatrice offers tasty promo

By JANET NEIMAN

Beatrice Cos.' U.S. foods unit Jan. 25 will begin its national promotion and sweepstakes (AA, Oct. 1) dubbed "The United Tastes of America."

As part of what Beatrice says is a $400 million advertising budget for 1985, the promotion, including various national and regional Beatrice brands, is to build and generate corporate and brand awareness.

Beatrice plans to advertise United Tastes with a 30-second network tv spot Jan. 25 and 26. Print support will consist of 44 million couponed, freestanding newspaper inserts Jan. 27, and will be followed by a second tv spot, reminding consumers to use the insert, on ABC's "American Music Awards" Jan. 28.

The effort is from J. Walter Thompson USA, Chicago, which competed with the other Beatrice agencies for the assignment.

The insert coupons, divided into breakfast, lunch, dinner and "anytime snack" categories, will double as entry forms for the United Tastes sweepstakes. Consumers can fill out the form and redeem the coupon to enter the sweeps, or can enter by sending in the coupons or special-entry blanks from in-store displays.

The grand prize in the United Tastes sweeps will be four one-week vacations to "Breakfast in Hawaii, Lunch in San Francisco, Dinner in New York and Snack in Disney World," and $25,000 cash. Four first-prize winners will receive one-week trips to any of the four cities, and 1,000 prizewinners will receive a $150 grocery shopping spree.

Beatrice will support the promotion with special co-op advertising allowances for the trade between Jan. 14 and March 2, and point-of-purchase displays.

The new Beatrice "red stripe" logo, to be used at the end of all tv spots, will be launched during the United Tastes promotion. Beatrice is telling the trade the "red stripe" advertising "will aid consumer awareness and association of the recently acquired Esmark brands with the Beatrice family."

The company will support the logo with the audio identification that accompanied the words "You've known us all along" in earlier corporate advertising.

Next month, Beatrice will sponsor the CBS Christmas special "A Christmas to Remember," with Kenny Rogers and Dolly Parton, and "It Came upon the Midnight Clear," a made-for-tv movie starring Mickey Rooney.

Beatrice also plans a "major fall event" for next September and October to coincide with its sponsorship of the Miss America pageant.#

business account from Benton & Bowles. Ally, which already handles MCI's $40 million consumer advertising business, will present a speculative 1985 business-to-business campaign to MCI at a Nov. 12 meeting in Washington. Ally, which initiated the pitch, expects MCI to significantly boost business-to-business ad spending in '85 after a Jan. 1 splintering of the company's marketing functions into seven regional units (AA, Aug. 27). MCI needs "a stronger selling program for the business sector, which is going to be responsible for most of their bottom line in the future," an Ally executive said.

Other late news

● New York—**Needham Harper Worldwide** has added $3.5 million in billings from two Honda dealer groups: Tri-State Honda Dealers of Pennsylvania, New Jersey and Delaware, a newly formed group, and the Greater Pittsburgh Honda Dealers Assn., formerly at Robert L. Stevenson Inc., Pittsburgh. Needham is the national agency for Honda and also handles the Tri-Honda Dealers of New York, New Jersey and Connecticut.

● New York—**American Tobacco Co.'s** new print and outdoor ads for Lucky Strike Lights carry the theme "Light my Lucky." One features a male cyclist and the other a chic female. Laurence, Charles & Free handles.

● St. Louis—**Anheuser-Busch** will for the first time use Michelob spokesman John Forsythe in on-premise promotions during the upcoming holidays. The star of ABC-TV's "Dynasty" will be pictured on restaurant and tavern table tents as well as on retail point-of-purchase material promoting both Michelob (handled by Ted Bates Advertising/New York) and Michelob Light (handled by Needham Harper Worldwide, Chicago).

● Whitestone, N.Y.—**White Rock Products Corp.** is introducing this month Wineberry wine coolers into Connecticut, New Jersey and New York. The launch will be backed by a $1 million campaign by Venet Advertising, New York.

● St. Louis—**Ralston Purina Co.** in January will begin marketing Rainbow Brite, a fruit-flavored, rainbow-shaped children's cereal using the name and character licensed from Hallmark Cards' Hallmark Properties unit. Saturday morning tv and heavy newspaper couponing will support via Gardner Advertising here.

● New York—**Newsweek** and **Time** start squaring off today in a marketing battle over their election issues. *Newsweek* brings out an extra issue, with Apple Computer taking 40 ad pages as the sole advertiser. Promotion is in print (magazine, newspaper and trade) and broadcast (radio and tv). Leber Katz Partners handles. *Time* brings its Nov. 19 issue out early, with expanded editorial and $12 million worth of ads, a single-issue record. Promotion is in print (newspaper and possibly trade) and broadcast (radio). Young & Rubicam handles.

● New York—Competitive bids for the **Des Moines Register & Tribune Co.** are not expected, following an offer this week from Dow Jones & Co. and members of Register & Tribune Co. management. Industry analysts say the company, particularly its flagship Des Moines paper, has suffered business declines due to the depressed farm belt economy and increased competition from smaller Iowa dailies and direct mailers. "It's not all that tantalizing a property," newspaper analyst John Morton said. Dow Jones and the Iowa investors offered the Cowles family $112 million.

● New York—**W.R. Grace & Co.** will spend $600,000 in the next two months and another $2 million to $3 million next year in support of a new tv spot it introduced into its corporate campaign this week. The ad, which will also have a print element, looks at the problem of the growing federal deficit. Marschalk Co. handles.

● New York—**Canada Dry Corp.**, part of R.J. Reynolds Industries' Del Monte Corp. subsidiary, will launch on Nov. 26 a four-week holiday promotion on network, spot tv and radio for its mixer line. "Nothing gets a party started like Canada Dry" is the theme. The company is spending close to $4 million, including about $1.5 million through its independent bottlers. Young & Rubicam handles nationally.

● Newark, N.J.—**People Express Airlines** breaks a newspaper ad effort this week for its new Newark-to-Denver service. It will offer one-way fares of $114 off-peak and $128 peak beginning Nov. 15. Ads, headlined "The smart way to the Denver peaks," will run in more than 20 newspapers. Plapler & Associates, New York, handles.

● New Orleans—**Louisiana World Exposition** has filed for Chapter 11 in a U.S. bankruptcy court here. It lists only 20 of its largest creditors, for a total indebtedness of $36 million. Observers have said that the world's fair is expected to close Nov. 11 with as much as $140 million in unpaid bills. McDonald & Little, Atlanta, which handled the fair's initial advertising and was subsequently fired (AA, July 30), and its current agency, Fitzgerald Advertising here, are listed among the 20 creditors. According to papers filed, McDonald & Little, a subsidiary of Ted Bates Worldwide, New York, is owed $1.3 million and Fitzgerald is owed about $243,000.

● **NEWSLINE: Robert Naegele**, 69, founder and chairman of Naegele Outdoor Advertising Cos., Minneapolis, died Nov. 6. He suffered a stroke Nov. 1. Naegele officials had been negotiating the sale of the company to 3M Co., and a Naegele spokesman said his death isn't expected to affect the negotiations. . .**Gleneagles Hotels**, Edinburgh, Scotland, a four-hotel group that includes London's Picadilly Hotel, has assigned its U.S. and British advertising to **Calet, Hirsch & Spector**, New York, its first agency. . .**Fuji Photo Film USA**, New York, is kicking off a tv and newspaper campaign to promote the "Fuji videocassette video cash rebate," in time for holiday sales. Tv spots will feature a videocassette recorder that dispenses $1 bills to dramatize the rebate offer. Lord, Geller, Federico, Einstein is Fuji's agency. . .**Clorox Co.**, known in Spain as Casamitjana Mensa, has assigned Conejo Dishwashing Liquid and other unspecified assignments to **Carvis Needham**, Barcelona, an international partner of Needham Harper Worldwide. Foote, Cone & Belding previously handled. . .**Tofu Time** on Nov. 20 opens the first of a number of planned Tofutti retail stores in New York to sell its soy-based frozen dessert, a nondairy substitute for ice cream products. Levine, Huntley, Schmidt & Beaver handles.

Chains diagnose need for image campaigns

By Esther Fritz Kuntz

If it's good for General Motors, is corporate-image advertising good for the nation's top hospital chains?

Yes, say most chain executives, who are making national image campaigns—long ignored by healthcare companies—a cornerstone of newly integrated consumer ad programs.

"You don't see General Motors running ads on the West Coast with different logos and messages than the ads its runs on the East Coast," says Joel W. Hass, vp-marketing and communications for Adventist Health System/U.S. His company is conducting a two-market test of ads designed for national use.

The analogy between the automotive industry and multihospital chains is drawn also by Arthur M. Rosen, executive vp, Sudler & Hennessey, New York. In both industries, he says, the corporation advertises its name and logo nationally, trying to create the image of a quality product. Then the dealers—or individual hospitals—use that corporate name in their local ads. "It's their job to get customers into the showroom," he says.

But worrying about getting showroom traffic—let alone advertising to consumers—is a new problem for hospital chains.

Esther Fritz Kuntz, a free lance writer and former reporter at Modern Healthcare, *regularly covers the healthcare industry.*

While they have advertised regularly to investors and potential acquisition candidates, most of the leading chains began consumer advertising only during the past year.

And although individual facilities did their own local advertising in the past, spots didn't mention that the hospital was part of a chain—nor was the parent company involved in local campaigns.

But now chains have begun to coordinate marketing from the top down. At the same time that parent companies are initiating national corporate-image campaigns, individual hospitals are making the corporate connection a key part of local ads.

Efforts to link hospitals with their corporate parents are designed to develop brand-name loyalties among patients. "Our research shows that consumers would rather go to a hospital that belongs to a system," says Mr. Haas of Adventist.

Customers—trained on chain restaurants, retail stores and gasoline stations—believe that the quality of care is higher at a chain-owned hospital because chains have access to greater resources than do individual facilities, he says. They also expect services to be less expensive because of economies of scale.

Developing brand loyalty was what Humana Inc. had in mind when it began adding corporate identification to the names of its 86 hospitals two years ago, says Robert Irvine, director-public relations. Investor-owned Humana, headquartered in Louisville, is the second-largest multihospital corporation in the nation.

As they diversify into new healthcare services, other chains are discovering the value of corporate advertising and the name recognition it creates, says William B. Colwell, vp-public relations, Evangelical Health Systems, Oak Brook, Ill. And hospital corporations are diversifying into virtually all areas of healthcare, including health maintenance organizations, urgent care clinics and home healthcare.

Hospital Corp. of America, Nashville, launched a multimedia campaign for its 14 Houston-area hospitals Sept. 30. It is the first consumer ad effort by the nation's largest hospital corporation, HCA spokesman David McFadden says.

The theme of the campaign—"HCA. We care for America. We care for you"—is intended to let consumers know that each of the 14 facilities is affiliated with the leading U.S. hospital company, which operates 339 hospitals nationwide.

"It is no longer sufficient to simply deliver quality services," says Roland D. Wussow, HCA vp-corporate communications. "It is now necessary to communicate the specific services HCA offers."

Houston was chosen as the site for the pilot program, developed by Eric Ericson & Associ-

Corporate image consumer ad campaigns are being tested or used by hospital chains such as Adventist Health System, Hospital Corp. of America, American Medical International and National Medical Enterprises, which includes Century City Hospital in California.

Searching for agencies qualified to practice

An Advertising Age Roundup

Increased competition in the healthcare industry has created a veritable boom in the medical advertising business in which certain agencies stand to gain more than others. A few may realize a windfall.

But ad and healthcare executives disagree on which agencies will—and should—benefit.

"Medium-size agencies have a great opportunity here," says Richard McDonald of McDonald Davis & Associates, Milwaukee, an agency boasting 40 hospital clients in 23 states.

Most large agencies, Mr. McDonald says, would not have accepted his 40 hospital accounts. "They can't afford to," he says, "because most individual hospitals cannot afford to pay the large agencies' higher fees."

Robert Aurin, senior vp at D'Arcy MacManus Masius, Chicago, agrees. Mr. Aurin started his career in smaller agencies, where he accumulated 2½ years of healthcare ad experience with six clients. But despite stints at Leo Burnett Co., Foote, Cone & Belding and Young & Rubicam, he has not worked on a healthcare account since he left the smaller agencies.

Information for this roundup was gathered by free lance writers Elizabeth Chappell White and Esther Fritz Kuntz, Modern Healthcare *associate editor Julie Franz and Ad Age associate editor Julie Liesse Erickson.*

"Individual hospitals are not million-dollar accounts," he says. "They simply don't have enough money in their budgets to interest the big agencies."

However, arguments that healthcare accounts are not large enough to merit the attention of most agencies quickly are becoming obsolete—at least as far as chains are concerned. Although individual hospitals' ad budgets usually are limited to the $100,000 to $200,000 range, a chain combining hospitals and related healthcare business can provide a lucrative account for an agency.

Although chains still aren't big spenders, they are increasing ad budgets. Most of the large chains now budget more than $1 million annually; ad executives think the amount only can grow as competition heats up and campaign results become apparent.

There's proof in the story of Wexler & Shalek. A new Los Angeles agency, W&S picked up the accounts of two National Medical Enterprises hospitals last December when the total budget amounted to only $200,000, creative director Gary Wexler says. But after initial work, W&S was awarded all 23 NME hospitals in California—with an ad budget exceeding $2 million—and the $1.25 million account for NME's 11 urgent care centers.

Beyond budgetary considerations, previous healthcare experience has become an issue in agency selection. Mr. McDonald's 24-year-old agency has worked with healthcare accounts for 16 years. Not surprisingly, he says he believes healthcare-related experience is extremely important. His agency often hires people who have worked inside hospital public relations and marketing departments.

"Healthcare advertising is very different from commercial advertising," says Mr. McDonald, whose agency also handles traditional commercial accounts. "There are a lot of intricacies to consider."

For instance, he says, agencies "in the know" are aiming their healthcare advertising at women, because research has shown that women make most of the healthcare decisions for the family.

And Mr. McDonald says even the style of healthcare advertising must be monitored carefully. "You can't get too cute," he says, "and too much pizazz can seem sensational."

According to Mr. McDonald, developing these skills takes time; however, the agency he says presents his company with the fiercest competition—Chicago's Sturm Communications—is only four years old.

Art Sturm, founder of the agency bearing his name, deliberately avoids hiring people with medical backgrounds. "You get too close to it and you always want to do things the way they were done before," he says.

He does, however, admit that the field has many idiosyncrasies and that a basic knowledge of healthcare is necessary or "the whole thing looks like absolute chaos."

Concerns about previous healthcare experience may be water over the dam soon, as many healthcare clients explore new medical services in which past industry experience may prove meaningless.

For example, the Group Health Assn., a 127,000-member health maintenance organization, turned to Demaine Vickers & Co., a small Virginia agency with little or no healthcare experience, for its creative work.

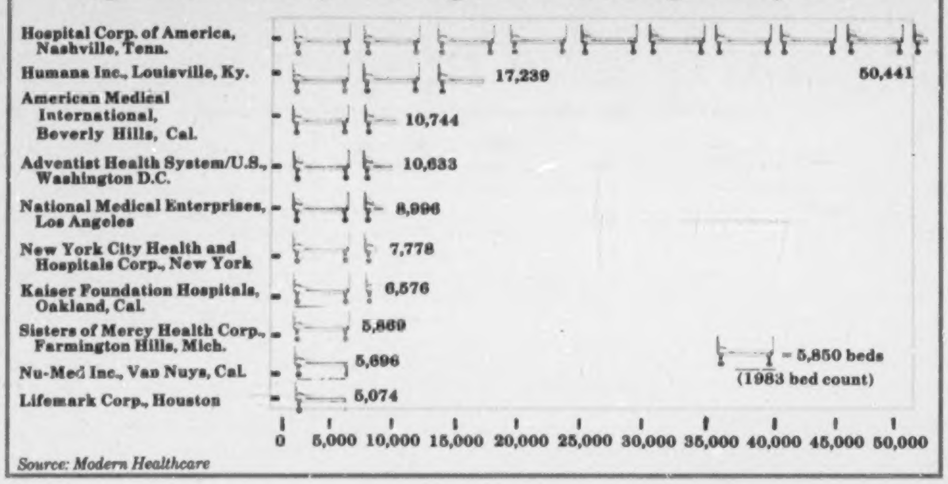
Agency principal Ron Vickers defends his position as a new kid on the healthcare advertising block. "A new agency can come in with an open mind," he says. "Especially with HMOs, a new agency doesn't know about the stigma HMOs felt in the past."

Hospital chains, unlike many other healthcare providers, favor agencies with consumer-marketing expertise over those specializing in healthcare advertising. General agencies, they reason, have expertise in speaking to consumers in layman's terms; most healthcare specialists have earned their expertise in marketing pharmaceuticals to physicians.

For other healthcare marketers, the criterion in selecting an ad agency is experience in advertising for professionals. The in-house agency for Phoenix-based Health-Tech of America, a dental franchiser, handles business for other local doctor and lawyer groups.

"Hiring a regular consumer-product ad agency is a major mistake that many healthcare franchises make," says Health-Tech president Douglas Gordon.

Top 10 centrally managed multihospital systems



Source: Modern Healthcare

ates, Nashville, because of the intense competition among area facilities, Mr. McFadden says. Later, HCA will begin similar ad campaigns in other markets.

With 12 Houston hospitals, American Medical International is one of HCA's prime competitors in the area. Beverly Hills, Cal.-based AMI has just begun advertising in the Houston market, says Ruth Galatzer, vp and director-advertising and promotion for the nation's third largest hospital chain. Ogilvy & Mather is the agency for AMI accounts in the eastern and central U.S.; Grey Advertising handles AMI nationally.

Although hospital chains are placing new ad emphasis on their corporate identity, most of their marketing directors still believe that advertising the individual hospital is more important. As Adventist's Mr. Hass says, "Systems don't take care of people—hospitals do."

Adventist is developing a catalog of ads for its 80 hospitals, Mr. Hass says. When one of its hospitals selects an ad, all the corporation need do is tailor the ad with a few mechanical changes.

The company is testing its catalog campaigns in five Los Angeles and four Chicago hospitals. Later, the chain plans to switch the campaigns to see how versatile they are.

The campaign's regional adaptability is of special interest to Adventist as it tries to forge a national corporate identity out of what was, until now, a loose affiliation of hospitals owned by the Seventh-Day Adventist Church. The organization—the nation's largest not-for-profit hospital chain and the fourth-largest system over-all—will open national headquarters in Arlington, Va., on Jan. 1.

To create the desired national identity, the ads need a similar look, Mr. Hass says. That's why Adventist chose one national agency—Doyle Dane Bernbach/Los Angeles—to handle all its hospitals.

But although hospital chains can achieve economies of scale by using the same ads in different markets, some have decided that local market differences demand individualized campaigns. National Medical Enterprises, Los Angeles, the nation's fifth largest hospital chain, has divided its hospital advertising accounts between two regional agencies designing separate campaigns for different NME hospitals.

When Wexler & Shalek, Los Angeles, won the account for 23 NME hospitals in California, creative director Gary Wexler says, "We thought we could use the same ads for the different hospitals and just change the name. But it didn't work out that way."

Some of the hospitals are located in affluent areas and others in blue-collar neighborhoods. Some want to sell themselves as high-tech hospitals, while others prefer projecting a warm and friendly image.

NME's Century City Hospital, for instance, is a small facility in an affluent, largely Jewish Los Angeles neighborhood. It competes with the large, prestigious University of California at Los Angeles Medical Center and Cedars-Sinai Medical Center. With that in mind, W&S wrote one ad for the hospital that reads, "The last thing you need to get in a hospital is lost."

A physician-referral ad aimed at the market's ethnic makeup reads, "If your son didn't become a doctor, we can recommend the ones that did."

A physician referral ad has been used to launch campaigns for all 23 hospitals. It invariably elicits the greatest response, Mr. Wexler says. One NME hospital has received 500 inquiries to the ad each month.

A referral service in general is a good way to bring more patients into a hospital, says Nathan Kaufman, NME senior vp-marketing. If a hospital refers a patient to a doctor, the physician generally will send that person to the referring hospital for care. Based on the national ratio of office visits to admissions, he says, every seven patients referred to a physician results in one hospital admission during the year.

Geography played a different part in the ad campaign for four NME hospitals in New Orleans, all situated in a bedroom community on the west side of the Mississippi River. Ninety per cent of the area residents were commuting to downtown hospitals on the east side—by the only route, a traffic-congested bridge.

"Awareness of the west bank hospitals was nil," says Melinda Helton, marketing director of Bauerline Inc., New Orleans, which serves NME hospitals in Florida and Dallas as well as New Orleans.

Bauerline placed an outdoor board at the entrance to the bridge to reach people trapped in traffic. It reads, "Why put a river between you and your hospital?" The agency used the same line in a local tv spot, ending that commmercial with the tag line "We're on your side." At the same time, the hospitals aimed a testimonial ad at physicians.

Awareness more than doubled as a result of the ads, Ms. Helton says. And when the fourth NME hospital opened on the west bank recently, it reached 90% occupancy in its first month of operation.

Although multihospital companies are using everything from tv to outdoor boards in advertising their facilities, they favor local newspaper ads directed at individual hospitals' markets. Print media are better suited to the informational, long-copy ads most hospitals are running, says Ian Latham, senior vp-creative director, Ogilvy & Mather, Atlanta.

A series of O&M-designed AMI ads provided detailed information on a variety of topics: Medical emergencies, proper nutrition, baby sitter care. Parts of those ads, Mr. Latham says, were meant to be torn out and pasted on a kitchen cupboard—something consumers couldn't do with a radio or tv spot.

"The concepts are almost reversed—ours is a service orientation versus their product orientation.

"When you market professional services, you are dealing with a negative demand. People come to you when they need help. You can't sell the negative experiences of professional services in the same way as you sell the positive experience of buying a product."

Glenda Wetzel, communications director for Benjamin Rush Center, a psychiatric hospital in Rochester, N.Y., agrees. When Rush wanted to begin advertising its psychiatric care, the marketing staff elected to produce its own tv spots.

"Most agencies are geared to selling material things," she says. "An agency that gets a hospital account has to shift its thinking to deal with human services and not cars and clothes."

Ad professionals agree that all healthcare clients present delicate aspects. Says Joan Webb, vp at Doyle Dane Bernbach/Los Angeles, "Dealing with the healthcare system is like dealing with a religious system: You have to be sensitive to both the consumers and the [practitioners]."

Mr. McDonald says he also feels the weight of the subject matter. "Dealing with life and death," he says, "is a tremendous responsibility."

Advertising

(Continued from Page 11)

did the Assn. of University Programs in Health Administration begin mandating courses in strategic planning as a requirement for accreditation.

In addition to the surplus of hospital beds, the U.S. medical marketplace is being affected by a "doctor glut." By the end of this century, there will be some 643,000 physicians nationally—a 33% increase over the current count of 485,000. In contrast to today's ratio of one doctor for every 500 people, there will be one doctor for every 388 people in the year 2000.

Dentists face the same problem. Douglas Gordon, president of Health-Tech Management, a dental franchiser, says research puts the ideal ratio of dentists to consumers at one for every 2,000 people—compared with the current figure of one for every 1,600.

Competition already is heating up among the growing number of medical professionals who are finding jobs scarce and consumers willing—and able—to shop around for medical care.

"It's certainly a problem on the suppliers' side, but it doesn't stop there," Dr. Gordon says. "Demands are lower, too. A lot of kids come through our offices and, because of improved education and local fluoridated water systems, don't have any real dental problems—not even any cavities. That makes for pretty stiff competition for their business."

Another wrench in the healthcare works has been technology's mixed blessing. Improvements in medical technology have cured diseases and lengthened life expectancies, but often at no small cost. A physician's attempt to do "everything possible" for a patient may add up to devastating medical bills that often go unpaid.

Nonetheless, many hospitals continue to purchase the latest, most sophisticated equipment in an effort to keep up with the Joneses.

Today's healthcare consumers are willing to pay for a good healthcare product at a fair market price. But in contrast to years past, an increasingly well-informed, discriminating and generally healthy public is being offered a wider choice of medical services than ever before.

"I don't think the audience has ever been so befuddled by health care," says Ronald Watt, president of Hesselbart & Mitten/Watt, a full-service Cleveland agency serving several healthcare accounts. "You used to just go to your local doctor, but today you're buffeted by the healthcare choices available."

"Healthcare used to be a seller's market, but now it's a buyer's market," says Jim Houy, vp at the American Hospital Assn. "There currently are more hospital beds than there are patients to fill them." The result: The competition is heating up faster than some hospitals can handle.

"Some hospitals will be unable to compete in this kind of marketplace," Mr. Houy says. "[Some] already are in the difficult situation of having to sit back and watch other guys stealing their customers."

Despite these troubled times for hospitals, Mr. Houy says he believes the competition is necessary and that advertising plays an important role in the process. "Somehow the decisions have to be made about which hospitals will survive," he says. "Either we regulate the hell out of everything and play God, or we put it out in the marketplace and let the people decide."

Mr. Watt agrees. "The key to success today is that everyone must realize that they are in business," he says. "And to stay in business, they have to market what they have to offer."

Marketing and business practices already have become so competitive that advertisers are drawing comparisons between the healthcare business and fast food.

"This is 'Burger Wars' in healthcare," says Art Sturm, founder of Sturm Communications, Chicago, a healthcare advertising specialist.

In Mr. Sturm's opinion, the healthcare market is teeming with similar products; the challenge to the advertiser is to create a campaign that differentiates between products. He says healthcare advertisers are asking the consumer the medical equivalent of "Do you want it flame broiled or fried?"

Healthcare advertising itself has spurred the creation of some of these new business opportunities.

The debut of medical advertising has allowed for innovation in the healthcare industry, says Art Lerner, assistant director of the Federal Trade Commission's Washington bureau. "Since then, there has been a blossoming of HMOs [health maintenance organizations], emergency centers and free-standing clinics—groups that depend on advertising to get business."

Advertising almost certainly will play a part in determining who wins and loses in the newly competitive environment.

"Our clients are entrepreneurs, really, just like us," Mr. Sturm says. "Historically there has been a lot of camaraderie in this business. Now there is stiff competition.

"Our clients want to be leaders and they want to win at somebody else's expense."

Marketing staffs give hospitals a shot in arm

By M. Lynn Folse

A seven-member team of heart surgeons, anesthesiologists and nurses hovers over a patient on the operating table at Memorial Medical Center, Springfield, Ill. It's the grand opening of the hospital's new cardiology and cardiac surgery facility. A crowd of people shuffles by and local media roll their cameras, but the medical specialists never flinch.

Memorial Medical Center in Springfield, Ill., simulated an operation to promote its new cardiac surgery facility.

They can't. They are lifeless mannequins borrowed from a local department store to simulate open heart surgery.

This is just one of the innovative techniques hospitals are using to market their capabilities and services to the public.

Four or five years ago, the traditional hospital public relations department was content to produce a house organ and a press release here and there. Today, in response to the rapidly changing healthcare industry, hospitals are adding marketing personnel, hiring outside communications specialists and launching aggressive, multimedia consumer ad campaigns.

Recent evidence suggests that this fledgling trend is beginning to gain momentum.

Today, more than three-quarters of metropolitan hospitals have a marketing department or person responsible for marketing, according to a recent survey by MarketPlus Measurement Systems, a management information service of Walker Research, Indianapolis.

But this phenomenon is relatively new. The MarketPlus survey showed that only 20% of these departments had existed for three years or more, and that more than a third were created less than one year ago.

USA Today reports that 60% of hospitals have hired marketing specialists. One consultant estimates that hospitals are spending $1 billion a year promoting their services.

This figure barely scratches the surface of the $360 billion healthcare industry, third largest in the U.S. behind education and automobiles. In all likelihood, this marketing phenomenon will grow as hospitals face increasing competition, rising provider costs and fewer government reimbursements.

Perhaps the biggest contributing factor is the nation's overabundance of hospitals. This, along with growing numbers of healthcare alternatives, has driven hospital patient census down; many hospitals are operating at between 40% and 60% bed occupancy.

Of the about 7,000 U.S. hospitals—two-thirds of which are individually owned—as many as 500 may close their doors this year, some experts say. Hundreds more may be acquired by large hospital-management companies.

Faced with what may be a widespread hospital "recession," hospital administrators must break out of their traditional not-for-profit orientations and take a long hard look at the advantages of marketing.

"Hospitals are faced with the exact same marketing challenges as General Foods is—they just don't know it yet," says Susan Anthony, senior account supervisor for Silverman Mower, a full-service agency in Syracuse, N.Y. Ms. Anthony directs the marketing program for United Health Services, a not-for-profit operator of three area hospitals in Johnson City, N.Y.

Because everyone needs healthcare at some point, the industry always has been very consumer-oriented, says Ron Watt, a Cleveland-based healthcare specialist and president of Hesselbart & Mitten/Watt, a full-service marketing company. He says healthcare "is the highest form of consumerism—but no one realized it until all the competition arose."

"Hospitals are getting more into pricing strategies, recognizing that the cost of healthcare is one of the public's greatest concerns," says Jann Dorothy, founder of the McMillan Group, Kentfield, Cal., a marketing consultancy and full-service agency specializing in healthcare.

"We have 20 hospital clients, including both for-profit and not-for-profit ownership, and all are doing price-based campaigns." The campaigns range from price-oriented maternity campaigns to same-day surgery and urgent care campaigns.

"People are changing their attitudes," she says. "They are starting to look at medicine as a business."

Still, says Teri Louden, "I think there is a fine line in advertising by hospitals." Ms. Louden is president of Louden & Co., a Chicago healthcare consulting agency.

"[Hospital marketers] don't want to be seen as slick promotions people," she says, "but on the other hand, they need to get patients, to sell their services."

Karen Bradley, director-public relations/promotions at St. Catherine's Hospital, Kenosha, Wis., points to the difficulties of marketing voluntary hospital services.

"It's hard for people to accept marketing of an institution associated with life and death," she says. "The key to a successful ad campaign is to package the humanitarian aspects of a hospital without sounding brash or Madison Avenue."

Merle Allen, director-public relations for Memorial Medical Center, credits the success of his hospital's emergency-services advertising campaign to careful

(Continued on Page 16)

Competition gets creative juices flowing

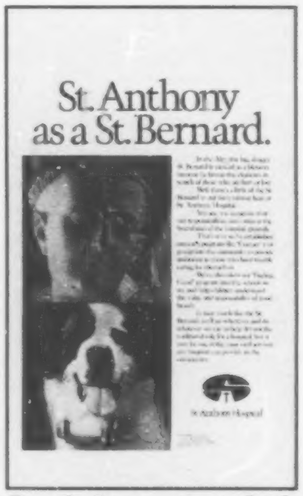
Some of today's best hospital advertising is being spurred by intense competition.

St. Anthony Hospital, a small Catholic facility in Louisville, was faced with severe competition from the four major area hospitals operated by Humana Corp., a large hospital chain with a large ad budget. Humana's headquarters are also in Louisville.

A series of award-winning ads created for St. Anthony by Doe-Anderson, a large independent ad agency in Kentucky, resulted in increased occupancy for the hospital.

St. Anthony was Doe-Anderson's first and only healthcare client. As a public service, the agency developed the campaign on a net fee basis.

"St. Anthony has to work a lot smarter and harder to go up against the chain," says Jay Giles, creative director for the ads. "Since we couldn't hope to compete with our moderate budget, we tried to outthink them."



St. Anthony as a St. Bernard.

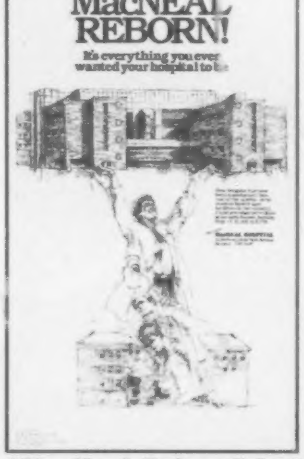
Doe-Anderson created ads playing off St. Anthony Hospital's name.

Going for the most impact with the budget they did have, the agency created five page ads that Mr. Giles says bring out the hospital's personality.

"Hospitals all tell you how caring they are," he says. "We wanted to do something different."

Playing off the hospital's name, the ads featured slogans such as "The Patience of a Saint" and "Saint Anthony as a Saint Bernard."

One ad, depicting a nun holding a newborn infant, read, "She wants to have your baby." This ad won a fifth district golden Addy from the American Advertising Federation; the over-all campaign won a silver.



MacNEAL REBORN!
It's everything you ever wanted your hospital to be

"MacNeal Reborn" had great results for MacNeal Memorial Hospital.

One of the nation's most competitive markets is Minneapolis-St. Paul, where physician surplus is a constant problem and hospitals are being taken over by healthcare corporations at twice the rate of the rest of the U.S.

One-third of the Twin Cities' hospitals have occupancy below 55%, estimates the Minnesota Medical Assn., and some 1,500 beds have closed in the past five years.

In this cutthroat environment, advertising has boomed. One Minnesota hospital, Methodist Hospital in St. Louis Park, took on 32 competitors at once, using cost comparisons as the basis for its promotional campaign.

A survey conducted by the community's hospital council determined that Methodist's

(Continued on Page 16)

Hospitals

(Continued from Page 14)

preparation of an entire marketing strategy that, before advertising started, gained the public trust.

"A not-for-profit hospital has to design its advertising campaign similar to a political campaign," Mr. Allen says. "You have to marshal all the internal audiences, community groups and special interest groups behind you, especially the most powerful group—the physicians."

Mr. Allen communicated the hospital's intentions to 1,200 key people to gain their support before launching the advertising component of the program.

"Commercials and ads were step 10 in an entire 16-phase marketing strategy," he says. Letters and brochures providing information about the center were sent not only to hospital staffers and officers, but also to medical students, area businesses, government offices, clubs and organizations, and police and fire departments, among others.

"Many hospitals are in dilemmas because they are communicating with only one segment of the population," Mr. Allen says. "An ad campaign will not only flop, but it may hurt the institution if the appropriate steps are not taken to prepare the community."

Ms. Louden agrees: "We recommend that a hospital develop an entire marketing strategy . . . that they look at their current image and plan what they want their future image to be."

She says a lot of advertising activity is coming from suburban and smaller community hospitals where competition is severe.

But perhaps some of the most carefully executed and effective image advertising is being done by religious institutions, hospitals that a few years ago would have considered advertising a sacrifice of long-held humanitarian principles.

One of the forerunners in hospital advertising was a religious facility, St. Francis Hospital of Evanston, Ill., well known regionally and nationally for its Galvin Heart Institute.

In 1981, wanting to develop a better perception of St. Francis as a major medical center, the hospital engaged the services of William A. Throckmorton Inc., a small Chicago full-service marketing agency currently with seven local hospital clients.

To emphasize the hospital's breadth and personality, Throckmorton developed a series of ads that told different patient success stories.

The ads were placed in regional editions of *Newsweek, Sports Illustrated, Time, and U.S. News & World Report* as well as *Chicago* magazine.

"The ads created a flurry of excitement in the media," says Diane Carlson, director-public relations at St. Francis. "Hospitals at the time were just not doing advertising because they thought it was undignified."

The hospital's pioneering campaign was featured on NBC-TV's "Today," Chicago's WBBM-TV and Cable News Network and in stories by the Associated Press.

Even small rural hospitals are diversifying, identifying an unusual consumer need and positioning themselves to fill that niche.

Hopedale Medical Complex, a small, not-for-profit hospital in a rural central Illinois community of less than 1,000, recently instituted an alcohol treatment center for the elderly and handicapped, two groups of people with special treatment needs that were not being met by other hospitals' general detoxification programs.

Today, Hopedale is attracting patients from across the country after marketing its service

Competition

(Continued from Page 14)

costs were lower than the area's average in 67 diagnosis-related illnesses. The hospital spent $15,000, in two ad campaigns consisting of direct mail pieces and print ads, to capitalize on that information.

To survive in Chicago, the home of not only many major medical associations and healthcare marketing companies but a large number of prestigious urban hospitals, aggressive suburban facilities are stepping up marketing campaigns.

The management staff of MacNeal Memorial Hospital, in west suburban Berwyn, recently built a $62 million, 427-bed acute care facility to replace the old hospital, which was on the verge of bankruptcy. To upgrade its image, MacNeal implemented a strong and integrated marketing program.

Called "MacNeal Reborn," the award-winning marketing program, developed by Chicago's Ruder, Finn & Rotman public relations and Sieber & McIntyre ad agencies, showed outstanding results after one year, says John Doyle, MacNeal's director of marketing and public affairs.

The benchmark of the campaign, he says, was a comprehensive telephone survey of 19 communities to find out what consumers thought of MacNeal and what their healthcare needs were. This established a database from which to work and measure results.

"An image-building program

through local radio and tv spots and direct recruitment from hospitals nationwide.

Results from these and other successful hospital advertisers are encouraging more hospitals to overcome their long-held suspicions of advertising and fears of consumer resistance and jump on the bandwagon.

The ones who don't may be left behind. Evidence suggests that the public welcomes hospital advertising.

"Public acceptance of hospital advertising is quite high," Ms. Dorothy says. "We've seen no backlash to any of our advertising. People are glad to get the information."

Ms. Dorothy also says ownership does not figure into acceptance of the message.

William Throckmorton agrees. "Today people are less concerned with whether a hospital is not-for-profit, private or religious and more concerned with the quality of care and cost-effectiveness of a hospital.

"People have become real shoppers for healthcare."

For marketing professionals, this exposes an untapped—and potentially enormous—market. Most are just becoming aware of possibilities.

"We're much more sophisticated today than we were," Mr. Watt says. "We'd get creamed if we did today what we used to do. The profession has changed a lot since I started and so has the entire healthcare field.

"It's highly exciting."

---

is important to enhance institutional loyalty," Mr. Doyle says. "But it is also important to build volume and increase market share by getting people to access the hospital through its major 'distribution points.' "

So MacNeal promoted those prime "distribution points": Its emergency room, urgent care services, physician contacts and self-referral programs such as alcohol and drug treatment.

MacNeal's combined program of image-building and special services marketing, supported by advertising, public relations and research, proved to be a sound formula for success. Followup research in six marketing areas showed that after the yearlong program, unaided recognition of MacNeal showed a 22% increase. Similarly, unaided preference showed a 17.3% gain from the precampaign figure.

"We went from being one of the pack among 10 hospitals to being second choice behind Loyola to overwhelmingly the consumer's first choice," Mr. Doyle says.

The "MacNeal Reborn" black-and-white ad won a Chicago golden Addy award, and the public relations program won a Silver Quill from the International Assn. of Business Communicators.

But the best part, Mr. Doyle says, is that after a steady 19% loss of business from 1975 to 1983, MacNeal has turned the corner. For the first time in nine years, the hospital's 1984 census showed a 10% year-to-year increase. *—M.L.F.*

Big centers follow in small footsteps

Many large, well-established, conservative institutions are sitting back and closely watching the flurry of marketing activity exhibited by their smaller, often more aggressive counterparts.

Barnes Hospital, St. Louis, a solid referral hospital and the main teaching facility for Washington University School of Medicine, doesn't need to worry much because it is one of the nation's 10 largest hospitals.

But even Barnes' patient occupancy is down 5% to 8% this year compared with 1983, says Daisy Shepard, director of public relations.

"In the St. Louis area, everyone is advertising like mad now," she says, producing a folder of other hospitals' ads she has clipped from area media. "Normandy Hospital is advertising its 'Rock-A-Bye Baby club'; St. Joseph's in Kirkwood is pitching its emergency care center with the slogan: 'Sometimes Degrees Do Make a Difference' and 'We'll Treat Your Arm and Leg Without Costing You an Arm and a Leg' . . . ."

Ms. Shepard says the flurry of activity started about August. "It took until midyear before hospitals began to realize their census were down, and then it took them some time to develop ad campaigns, and now . . . it's everywhere," she says.

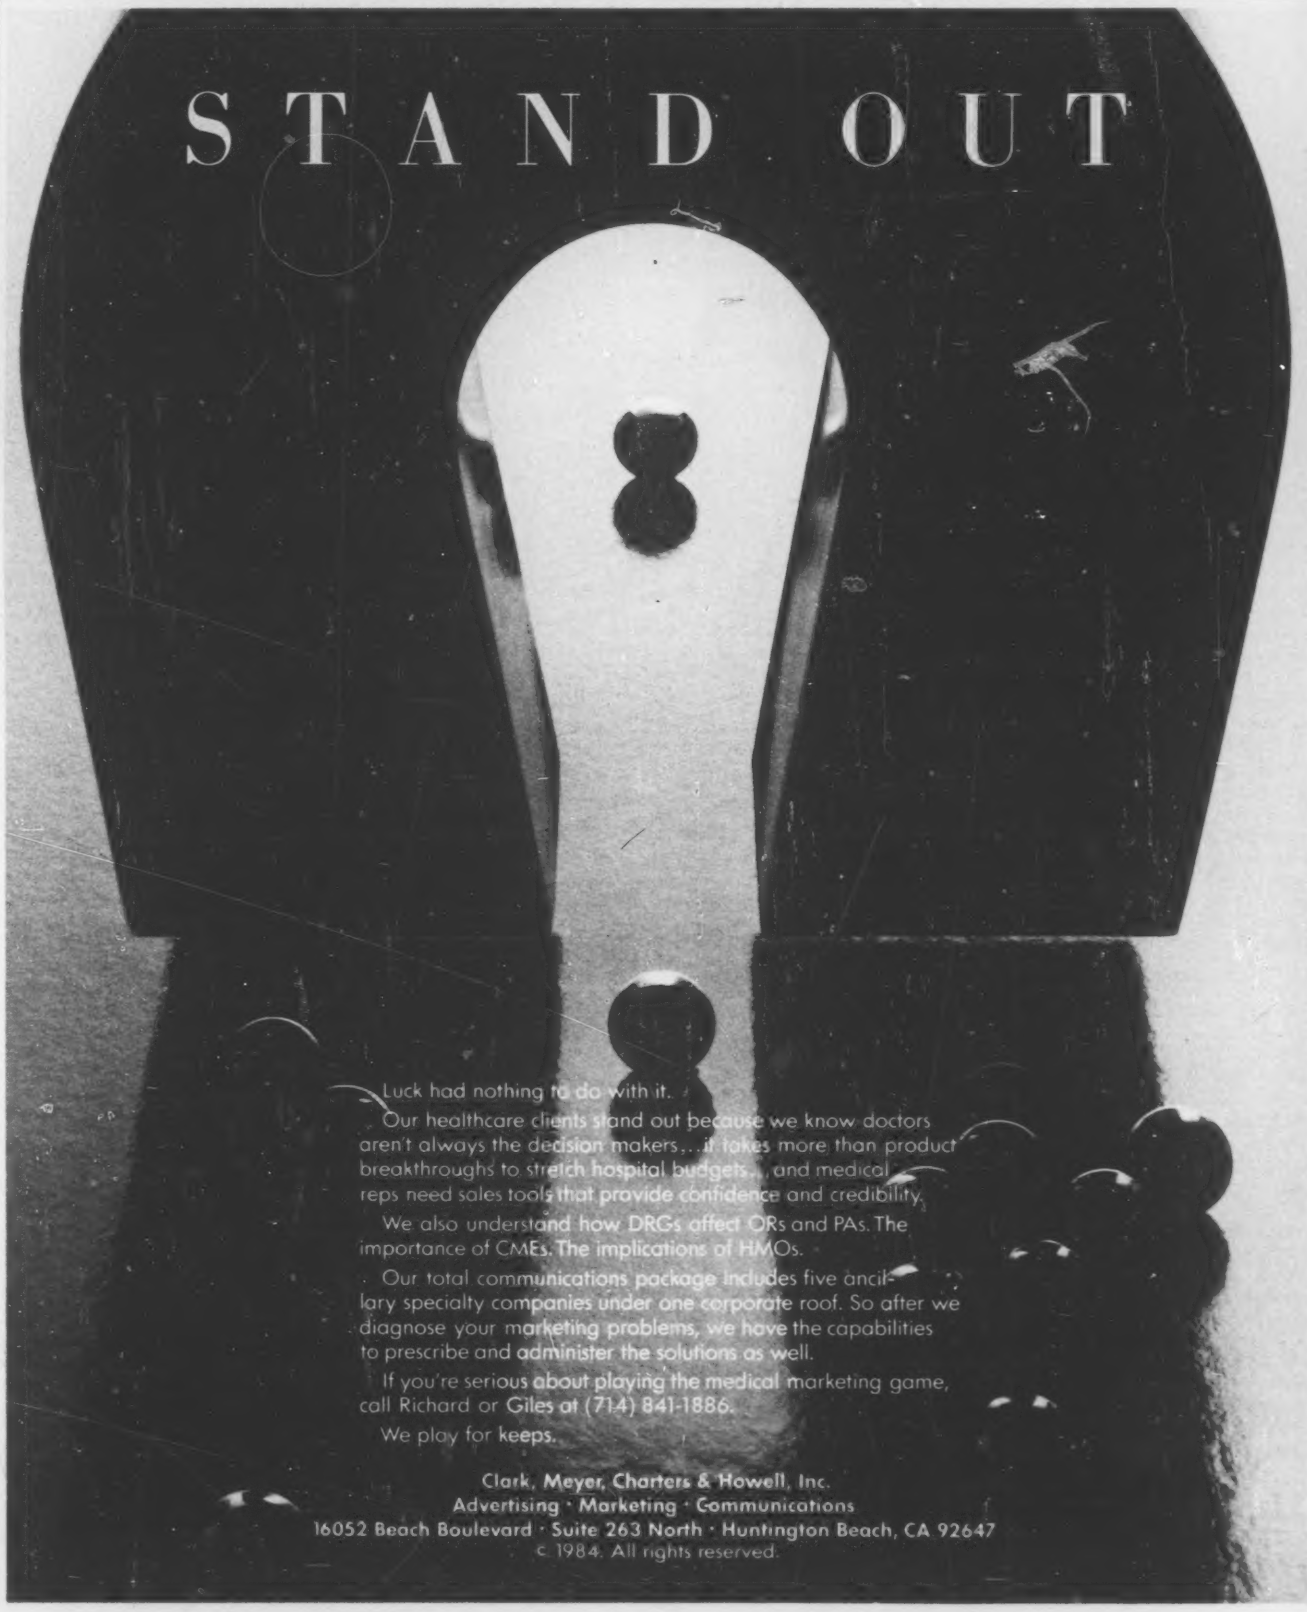
"I think all 50 hospitals in the St. Louis metro area will be advertising by the end of next year," she says. "Advertising is a stopgap for them right now, but next year it will be built into their budgets and it will be much more detailed."

Although Barnes has not done any advertising, Ms. Shepard is developing radio and print ads and engaging a media buyer for a breast cancer screening program soon to be marketed.

Rush-Presbyterian-St. Luke's Medical Center, a large referral hospital, maintains a similar position in Chicago.

"We don't have a marketing program like some of the smaller hospital communities who have been hit hard with the competition," says Carolyn Reed, news services manager for Rush.

Ms. Reed says Rush has been watching the activities of Chicago hospitals that are battling it out for patients. "Chicago has been in the vanguard as far as marketing is concerned," she says. *—M.L.F.*



Luck had nothing to do with it.

Our healthcare clients stand out because we know doctors aren't always the decision makers . . . it takes more than product breakthroughs to stretch hospital budgets . . . and medical reps need sales tools that provide confidence and credibility.

We also understand how DRGs affect ORs and PAs. The importance of CMEs. The implications of HMOs.

Our total communications package includes five ancillary specialty companies under one corporate roof. So after we diagnose your marketing problems, we have the capabilities to prescribe and administer the solutions as well.

If you're serious about playing the medical marketing game, call Richard or Giles at (714) 841-1886.

We play for keeps.

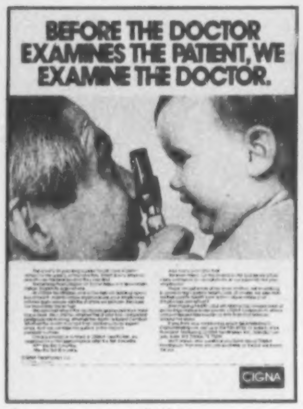
HMOs keep profession on its toes

By Elizabeth Chappell White

One of modern healthcare's greatest marketing forces was born in the 1930s, at the site of a Mojave Desert construction project.

Watching some 5,000 workers build an aqueduct designed to route water from the Colorado River to Los Angeles, Sydney Garfield saw a great opportunity. The doctor set up a practice offering prepaid medical services to each of those workers.



BEFORE THE DOCTOR EXAMINES THE PATIENT, WE EXAMINE THE DOCTOR.
CIGNA

As competition among HMOs increases, advertising will play a more important role.

By chance, one of the contractors on the project took an interest in the medical project. His name was Henry J. Kaiser, and the rest is history.

Today, more than a half-century later, the Kaiser-Permanente Medical Care Program is the largest health maintenance organization in the nation with 4.6 million members coast to coast.

The most recent figures from the Group Health Assn. of America show 320 HMOs nationally. Statistics provided by Interstudy, a healthcare policy research company, show 15 million people enrolled in HMOs.

By 1993, HMO enrollment in the U.S. is projected to climb to 50 million.

"The competition among HMOs is getting very stiff," says James Dougherty, GHAA executive director. Headquartered in Washington, the GHAA recently celebrated its 25th anniversary as the national HMO trade organization; Mr. Dougherty has served as GHAA lobbyist for 14 of those years.

"From my experience," he says, "I see unlimited growth opportunities for the next decade—and a lot of HMOs beginning to develop advertising campaigns."

Perhaps the Kaiser Foundation's situation is the best reflection of the booming HMO marketplace. Because of its success, for years Kaiser could afford to enforce a strict policy against all advertising. Their doctors found it distasteful and unprofessional, and besides, there was virtually no competition.

In recent years, however, Kaiser has loosened its rules. The foundation has permitted its individual HMOs to advertise and is considering hiring an agency to work with top headquarters executives.

Kaiser's policy change is symbolic of changes in the HMO market—changes especially dramatic when one considers that it was not so long ago that HMOs were illegal in some states and were accused of being part of a communist plot to undermine the free practice of medicine.

It took an act of Congress to make HMOs a medical power to be reckoned with.

With the passage of the HMO Act of 1973, the federal government became the strongest supporter of HMOs. Signed into law by President Richard Nixon, the

act struck down lingering state restrictions on HMOs and required employers to offer their workers the HMO medical insurance option. The law also provided startup funds for new HMOs.

It was President Jimmy Carter, however, whose unprecedented commitment to HMOs resulted in a federally funded HMO marketing program within the Department of Health and Human Services.

"We developed a promotional campaign to help broaden the public's awareness of HMOs," says Janet Sadler, market development specialist with the national HMO office. In its prime, the marketing program employed 22 government staffers churning out "generic ads" that independent HMOs tagged with their individual names.

> **"We really feel we broke the ice about what was acceptable for HMO advertising."**
>
> *—Janet Sadler*

Ms. Sadler thinks the government took a bold step when it decided to give HMOs a promotional boost. "We really feel we broke the ice about what was acceptable for HMO advertising," she says. "In the past, it was viewed as garish to get up and tout yourself as a healthcare delivery system, but we did it in good taste."

The campaign used radio and tv spots to increase HMO enrollment in specific communities; each HMO paid for media placement.

When President Reagan took office, Ms. Sadler's group was forced to shift gears. "We closed out government support for HMO development and began targeting the private business community," she says. New efforts portrayed HMOs as an attractive investment opportunity.

It worked. "We created a demand and investors picked up the ball right away," Ms. Sadler says.

The response from private investors has been so enthusiastic that the current administration no longer sees a need for Ms. Sadler's marketing department. Only two professional staff members remain. "The organization," she says, "is being disbanded."

But the government's involvement did spur dramatic changes in the HMO marketplace. Barbara Santry, an investment analyst with Alex. Brown & Sons, Baltimore, recommends HMOs as one of the best investment opportunities available in the healthcare industry. "Stocks are up 30% per share yearly—even 50% among the leaders," she says.

> **"I see unlimited growth opportunities . . . and a lot of HMOs beginning to develop ad campaigns."**
>
> *—James Dougherty*
> *Group Health Assn. of America*

Big business is investing in HMOs in other ways, too. As healthcare costs continue to rise, companies are encouraging HMO enrollment in an effort to cut employe healthcare benefit costs. Chrysler Corp., Detroit, which claims healthcare benefits add about $600 to the price of a new car, reportedly offers its employes U.S. Savings Bonds if they can persuade a fellow employe to enroll in an HMO.

HMOs' share of the health-

(Continued on Page 22)

rs have served their country.
llion of them are alive today.

28.5 Million veterans are currently eligible for free VA medical care.

3.5 Million veterans are over the age of 65.

12.6 Million World War II veterans will be 60 or older by 1985—and statistically will require five times more medical care than those under 60.
For the great majority of these veterans, the VA will be the health care provider.

The VA is DRG exempt and can expect to assume the responsibility for an increasing patient population from cost-conscious private sector medical facilities and Medicare referrals.

The VA is currently treating more than 1.3 million veterans on an inpatient basis while annually providing for 17.8 million outpatient medical visits.

More than 39 million prescriptions for ambulatory patients and more than 7 million intravenous and parenteral nutrition solutions were dispensed by VA pharmacies in 1982.
The $500 million spent by the VA on pharmaceutical purchases in fiscal year 1984 is projected to double by 1987.

Gain access to this lucrative and expanding market through VA PRACTITIONER, the magazine devoted exclusively to the needs of the physicians and pharmacists of the Veterans Administration.

HMOs

(Continued from Page 21)

care market, currently estimated at 6% by Interstudy, will expand even further when recent measures to make HMO enrollment available to Medicare beneficiaries take full effect. The new Medicare tie-in is spurring a great deal of ad activity. The Health Care Finance Administration is sending notices to let people eligible for Medicare know which local HMOs have contracted with the federal government to provide Medicare benefits.

According to Wayne Fowler, who heads the HCFA's medical practice department, the American Medical Assn. complained the notices were an unfair government promotion of its members' competition.

"Our notices are not promotional, they're informational," Mr. Fowler says. "But I imagine [the AMA] would prefer that we did nothing."

Reserving the right to set standards for how other advertisers handle the Medicare-HMO programs, the HCFA has written into its regulations a rule requiring that all ads be HCFA-approved.

The Federal Trade Commission has complained that the HCFA prescreening process puts HMOs at a competitive disadvantage against other healthcare providers operating without such restrictions. But, on the other hand, the AMA has recommended even stricter, more explicit guidelines for all HMO advertising.

Mr. Dougherty says the GHAA is against government censorship of HMO ads, but some "initial monitoring" of advertising aimed at Medicare beneficiaries may be necessary.

One HMO working successfully within the HCFA guidelines is the Fallon Community Health Plan, Worcester, Mass., a pilot project for the new Medicare contracting. "We began advertising in 1980 because it was the only way to reach the mass market of Medicare recipients in a brief period of time," says Denyse Newbery, director-marketing and community relations at Fallon.

"We didn't get terribly flamboyant with the ads because of the HCFA review process, but we were able to reach a whole new market that has never been tapped before."

Ms. Newbery thinks the HCFA prescreening issue will fade into the background as the competition among HMOs heats up and advertising becomes more aggressive.

"Advertising will become critical because of the increasing competition," she says. "It's going to be like McDonald's and Burger King.

"For-profit HMOs owned by companies with the big bucks don't skimp on their advertising, so we'll have to match them."

Barry Averhill, executive director of the Michael Reese Health Plan in Chicago, says he feels a similar pressure. "As the numbers [of HMOs] increase, there will be a name awareness problem," he says. "We will have to compete with the for-profit HMOs that are buying big ads on the sides of downtown buildings and even commercials during the Olympics."

Although most HMO companies are just beginning to advertise seriously, some already have set aside substantial marketing budgets.

The big money competitors worrying smaller and not-for-profit HMOs are those such as Blue Cross-Blue Shield, Chicago—relatively new to the HMO business but with plenty of resources at its disposal—which hired Marsteller to launch its major new fall ad campaign, and Los Angeles-based Maxicare, whose current national campaign is being handled by Foote, Cone & Belding.

Some HMOs seek the personal touch—and lower fees—of the smaller ad agency. On Pennsylvania Ave. in Washington is the Group Health Assn., a not-for-profit HMO with some 127,000 members of which almost half are federal employes.

Jeremiah Cole, GHA's director-marketing, decided to hire a new agency soon after assuming his position eight months ago. "We wanted a smaller agency where we would be a significant client and where top principals would come to work with us."

Mr. Cole says he was not interested in specific healthcare ad experience as he was in "good, solid broad-based experience." The HMO hired Demaine Vickers & Co., a small Alexandria, Va., agency.

As both employers and employes continue their search for cost-saving medical alternatives, HMOs stand to benefit immensely. And as HMO companies jostle for position in the increasingly competitive marketplace—at least in part with advertising and promotional campaigns—agencies serving them face a bright future as well.

Challenge: Restore life to High Life

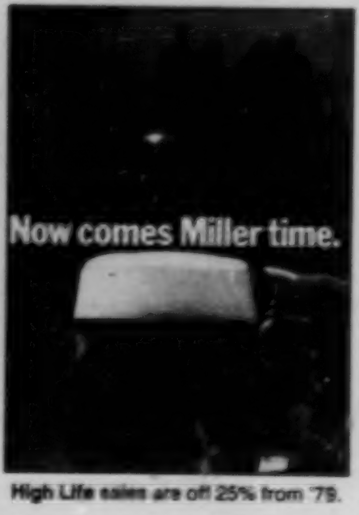
By SCOTT HUME

Most beer-industry observers credit Philip Morris Inc. with one of the greatest consumer marketing achievements of the century. It moved Milwaukee-based Miller Brewing Co., which ranked as the country's seventh-largest brewer when PM bought it in 1970, to the No. 2 spot in less than 10 years.

But those same observers believe that a marketing miracle of equal proportions may be needed to turn around Miller's ailing High Life brand.

"There's no question that this is as great a challenge as Philip Morris has ever had," said Manny Goldman, beverage analyst with Montgomery Securities, San Francisco.

Miller High Life has lost 5 million bbls., or 25% of its market, since peaking in 1979. While still the nation's No. 3 brand (behind Anheuser-Busch's Budweiser and Miller's own Lite brand), High Life's sales continue to slide.



High Life sales are off 25% from '79.

Since January, Miller has been reviewing the High Life advertising assignment.

The difficult challenge of rescuing the brand will be borne not only by Miller but also by whichever agency finally gets the assignment.

Backer & Spielvogel, New York, has had the task since 1979, when the agency was formed by two executives from former High Life agency McCann-Erickson (AA, June 25, '79, et seq.). Presentations concluded last week from the latest round of challengers for the account: Leo Burnett USA, Chicago, and the New York offices of N W Ayer; Jordan, Case & McGrath, and J. Walter Thompson USA.

The first round of alternate-creative presentations concluded in July. That round included Burnett and two other major shops: Chiat/Day and Doyle Dane Bernbach, both New York.

(Miller executives have never confirmed which agencies have been invited to pitch the account and were not available to be interviewed for this story.)

Although the High Life account has been a $50 million piece of business, it surprises at least one brewery executive that so many of the nation's top agencies would be so eager to confront the challenges of reviving the brand. "What's so amazing to me," he says, "is that so many agencies seem willing to take [the High Life account] on!"

The question everyone is waiting to have answered is: Can anyone turn the brand around? The winning agency's challenge may be as great as Philip Morris'.

"Is High Life a goner? I wouldn't go that far. There's a reasonable chance of stemming the erosion," Montgomery Securities' Mr. Gold-

CBS may return to cable tv field

By SUSAN SPILLMAN

New York—CBS, which two years ago became the first company to fold a cable tv network, is considering spending $71 million to get back into the cable programing business, sources say.

The media giant is said to be negotiating to buy a one-third interest in four regional sports networks currently owned jointly by Cablevision Systems, Woodbury, N.Y., and Washington Post Co. CBS also is talking to Cablevision about at least a one-third interest in two national pay tv channels, Bravo and American Movie Classics. Sources reported CBS is willing to pay a total of $71 million for both packages.

Spokesmen for Cablevision, CBS and Washington Post Co. declined comment on the negotiations. Sources said, however, that if details can be worked out, a deal could be signed within a month.

The motivation for CBS to get back into the cable programing arena, analysts said, is to secure another outlet for sports programing. Sports broadcast-rights fees in recent years have risen sharply and having another distribution vehicle beyond the tv network would help CBS stay competitve with NBC and especially ABC in rights bidding.

The analysts further noted that CBS appears concerned that ABC already has its cable sports outlet

Adman Travis recounts Reagan turning points

Tuesday's winners

By JOHN J. O'CONNOR

New York—It was late on a Friday night last March, and Jim Travis and Jim Weller were putting together a list of people who might want to work on Ronald Reagan's reelection campaign as members of the Tuesday Team.

The two Della Femina, Travisano & Partners executives were standing outside the men's room of the Orso Restaurant on W. 46th Street, and Mr. Travis asked Mr. Weller who he would hate to compete against in a creative shootout. Without hesitation, he replied Hal Riney of Ogilvy & Mather, San Francisco.

Minutes later, Mr. Travis was on the phone to San Francisco, reaching Mr. Riney who was still at the office. Mr. Riney accepted the invitation, and the Tuesday Team's dream creative team began taking shape. In addition to Messrs. Riney and Weller, the Tuesday Team would draw on the creative talents of Ron Travisano of Della Femina, Tom Messner (Ally & Gargano), Phil Dusenberry (BBDO) and Marvin Honig (formerly of Doyle Dane Bernbach and now at Geers Gross).

Mr. Travis, the Tuesday Team's chief executive officer, explained this scenario in a hectic 20-minute interview two days after the President's landslide reelection last week. As he was about to dash to the airport for a 10-day vacation in Europe, Mr. Travis heaped praise on the people who put together more than 50 Reagan tv spots that aired, 35 that were not used and 25 on behalf of the Republican National Committee and the Republican National Congressional Committee.

Accompanied by Mark Zimmerman, a former account exec at J. Walter Thompson USA, New York, who served as account supervisor, Mr. Travis spoke of how the planning and analyis of Tuesday Team media director Robert Hinson (Rosenfeld, Sirowitz & Lawson) enabled the Reagan campaign to achieve a stag-

Last Minute News

Swiss court bars Barclay low-nicotine labeling

Lausanne, Switzerland—British American Tobacco Ltd., London, has lost another round in its effort to advertise its Barclay cigaret brand here as a 1mg-tar, 0.2mg-nicotine smoke (*see related item on Page 3*). The Swiss Federal High Court barred BAT from using the low-tar designation in advertising and on packaging, pending a decision by Swiss health authorities on whether Barclay's tar content can be measured adequately by existing cigaret testing equipment. A spokesman for BAT's U.S. subsidiary, Brown & Williamson Tobacco Corp., Louisville, said BAT would change its packaging and advertising to comply with the order.

Fischer returns to Grey as consultant

New York—Keith Fischer, who on May 1 left D'Arcy MacManus Masius here as president, has been quietly working at his old alma mater, Grey Advertising, as a consultant. He has been working two days a week on general management and selected recruiting projects. Mr. Fischer still does not intend to return to the agency business fulltime and is looking into other business ventures.

Tv ad sales expected to hit $9.3 billion in '85

Chicago—Network tv ad sales will top $9.3 billion next year, a 10% increase over 1984, says Television Bureau of Advertising. TvB, which

Agencies cheer vote: 'Consumers will spend'

An Advertising Age roundup

Agency executives across the country are glowing in the aftermath of President Reagan's victory, asserting it means nothing but good news for ad agencies.

The Reagan landslide is "good for business, so it will be good for the agency business," says Mario Donna, partner and co-creative director of Keye/Donna/Pearlstein, Los Angeles.

Mr. Donna's optimism was echoed by a number of agency heads. A strong economy will continue during the next four years, they believe, bringing in more business from their current client lists as well as first-time advertisers.

They also think the Republican victory means the average American will have more money in his pocket and he'll be more likely to spend it than tuck it away for a rainy day.

"Many clients held their breath during the election. They didn't know if disposable income was going to go down," said Neil Cameron, senior vp-general manager, Ogilvy & Mather/Atlanta. "It would have happened if taxes were going to be increased [under Mondale]."

St. Louis agency executives agree. In the last year they have seen commercial construction on the upswing and unemployment figures fall two percentage points to 7.1%. The city's economy looks better than it has in a long time, and agency executives seem to think Reagan's reelection may clinch the recovery.

Ken Johnson, president of Batz-Hodgson-Neuwoehner, St. Louis, says the victory has buoyed the spirits of many clients who worried about the uncertainties of a change in the administration.

But in Houston, where the economic recovery has been modest at best, opinions about what Reagan's victory means are more tempered.

"I don't think the election will affect Houston's economy one way or another," said Art Casper, president and chairman of Winius-Brandon Advertising. "I just think we're in for some rough times economically, at least for the short term.

"I don't see a giant light at the end of the tunnel because of Reagan's reelection. Had it gone the other way, the tunnel would be a lot longer."

Mr. Casper says the federal government is not going to cure Houston's ills. Only a diversification of the market's economic base will fix the sluggish recovery,

Nestle bar sells with a passion

By GAY JERVEY

Tv viewers in Eau Claire, Wis., and Albany, N.Y., this week will get a chance to look—and possibly do a double take—when Nestle Co. begins a new campaign that moves All-American candy bar advertising into the MTV-esque world of the erotic, pulsating sell.

The new ads, themed "Nestle's passion," feature throbbing music and lyrics, such as "Did you ever have a craving?" "What a creamy sensation," "Gimme, gimme your Nestle" and, in what appears to be a brief moment of hard product sell, "Smooth and rich. Everybody loves it, tastes so good, no other chocolate does it."

The spot—which is punctuated with the word "passion," accompanied with lavish visuals of chocolate dripping and young, beautiful people taking nibbles and bites—

NOTE: Part run figures not available

Source: Media Records

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodology to report comparable figures (1984 month vs. 1983 data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*):

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column formats.

8 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 8 column formats.

9 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 9 column formats.

6 column broadsheet standards or tabloids which have a slight depth change in 1984 but did not change column format are converted back to original depth.

Mondale 'risks' fall short

AUSTIN, TEX.—The Mondale-Ferraro strategy of taking chances and going for the "win" may have helped fuel President Reagan's historic landslide victory, a top Mondale aide said last week.

"Our strategy was not to lose by 10 to 12 points; the idea was to win," said Roy Spence, the Texas adman who served as the Mondale campaign's media adviser. "We probably could have gotten closer with a basic, straight Democratic approach, but Mondale believed, as did I, that we had to go for a win strategy."

Although Walter Mondale knew he was up against "probably the most popular president" since Franklin Roosevelt, Mr. Spence said, the strategists scrapped traditional Democratic efforts in political ads and decided to focus on issues such as the deficit, nuclear freeze and the "Star Wars" approach to deterrence.

The hardest-hitting portion of this strategy came only in the last 10 days of the campaign, said Mr. Spence, an exec vp with GSD&M here. The big buys came in states the campaign deemed close, including New York, Pennsylvania, Massachusetts and Illinois.

"Though we didn't win," Mr. Spence said, "we were coming home with heavy [emphasis on] fairness and arms control that moved voters dramatically—but not fast enough." He added, "Maybe they [the critics] were right that we could not sell our issues: War and peace, decency and fairness."

Mr. Spence, preparing for a vacation after working with Mr. Mondale since before the primaries, said public opinion bounced sharply during the two debates between the presidential candidates. After the second debate, many Americans went back to their good feelings for President Reagan that existed before the first debate, he said.

Looking back, Mr. Spence said the Mondale campaign could have done a better job of focusing on the issues and may have had too many messages in executing the "high-stakes win strategy."

Some critics point to a failure in the campaign as its inability to capitalize on the momentum it gained from the Democratic national convention. Reports have indicated, however, that internal bickering hampered the Mondale-Ferraro campaign initially. Mr. Spence had no comment.#

New California lottery may spend $50 million

LOS ANGELES—California's state lottery, expected to start March 21 following voter approval last week, promises to be one of the more hotly contested advertising accounts in the state. There is speculation that some $50 million will be spent to promote it.

At present, California Gov. George Deukmejian has 30 days to name the five-member commission and executive director to run the state's game. Once that is undertaken, lottery management will determine when and how the lottery will be promoted.

Under the Proposition 37 lottery initiative, passed Nov. 6 by a 58%-to-42% margin, no more than 16% of the lottery's total revenues may be spent for operations. Advertising, marketing and promotional expenses will make up a percentage of that sum.

The initiative spells out that the commission will expend 3.5% of the projected sales of all lottery tickets for advertising, promotion and incentives in the first year. The California lottery—which more than likely will be the largest in the U.S.—is projected to have annual sales in the range of $1.5 billion to $1.7 billion, sources say.

According to the initiative, an independent company is to review the effectiveness of the lottery's marketing program. The results of that audit will be presented to lottery management and California governmental officials.#

Cheery vote

(Continued from Page 2)

he adds. Compared with the rest of the country, Colorado is enjoying good economic times. Average personal income ranked eighth-highest among the states in 1983, and in September the unemployment rate was lower than all but eight other states. So, as a rule, Denver ad executives are pleased with the election results, on the assumption that Reagan's continuation in the White House will mark a continuation of prosperity.

"Our business has never been better than it has been in the past four years," said Tom Hagan, exec vp, Karsh & Hagan. "Let the good times continue to roll."

One exception to the general optimism is Garry Mitchell, president of Tracy-Locke/BBDO, Denver. "I think anyone who is saying that this is going to be good for the advertising business is premature and apt to be wrong," he says. But Mr. Mitchell appears to be a lone wolf crying in the night.

In New Jersey, where the state is making a fast metamorphosis from a manufacturing to a white-collar economy, agency executives are glowing.

Bob Prewitt, president of DANA Advertising, Hopewell, N.J., agrees. DANA has seen its billings grow from $3 million in 1983 to $10 million this year. Our business is driven by [attitude] as much as by reality," he said. "There is a feeling of growth and as long as there is a feeling about it, people are willing to spend money to make money. . .That's what marketing is all about."#

Winners

(Continued from Page 1)

gering 620 gross rating point level on network tv during the final week of the campaign.

Joan Blayney, Tuesday Team associate media director and formerly with NBC Entertainment, later estimated that the Mondale campaign managed a 500 gross rating point level in the final week before Election Day. In the last two weeks of the campaign, Mr. Zimmerman estimated, the Reagan-Bush '84 campaign spent $5 million of the $23 million media budget.

Mr. Travis said he believes a key strategic move involved the airing of the Reagan documentary (put together by Mr. Dusenberry and first shown during the Republican national convention) on all three networks, major independents and cable tv at 8 p.m. Sept. 11. The maneuver, he said, enabled the campaign to be kicked off with an over-all 25.6 rating and 46 share.

"From the very beginning," Mr. Travis said, "we thought the election would be very close, no more than a four-to-five-point spread. People were saying Mondale had put together one of the best political organizations in history, and he was one of the best professional politicians around."

As a result, the Tuesday Team worked relentlessly, with commercials being written, approved and produced in a matter of a couple of days. Reagan strategists even drew key lines from the spots to be used in President Reagan's and Vice-President Bush's speeches. They selected "Prepared for peace" (Weller), "Prouder, stronger, better" (Riney) and "America's coming back" (Weller).

Mr. Zimmerman explained another strategic aspect of the campaign was the planned use of commercials from the pool that were synchronized with the issues President Reagan was addressing on a week-by-week basis.

Messrs. Travis and Zimmerman bristled over criticism that the Reagan spots were merely "slick pictures."

"If you look at our commercials, the imagery drove up the positives about Mr. Reagan's policies," Mr. Travis said. "But copy was always tough. It cited the administration's accomplishments and drove up the negatives of Mr. Mondale without ever mentioning his name."

Mr. Zimmerman said critics are forever saying how political advertising is so negative. "The White House understood that we happen to be, in terms of communicating, the experts in getting the message to people in 30 seconds. We merely tried to give the people advertising they would like to watch. I think we did politics a service."#

Jack springs new name

By JENNIFER PENDLETON

Ralston Purina Co.'s Jack in the Box fast-food chain is trying out a new name—Monterey Jack's—and returning to an old habit in its tv advertising—logo blasting.

The 800-unit San Diego-based restaurant chain, which turned around its once slumping business with menu and store design changes beginning four years ago, is completing that process with a new name it hopes is more in keeping with its improved image.

This week, the Ralston subsidiary will convert its 30 stores in the Seattle area to the Monterey Jack's name, following a company tryout of the new moniker in Beaumont, Tex., and Albuquerque. The company has put up new signs and changed employe uniforms to reflect the new identity. Sources close to the company describe the switch as a test which, if successful, will be introduced systemwide.

Richard Pearce, Jack in the Box's vp-marketing, refused to comment on the name change.

Jack in the Box is informing the public of its new name with at least one tv commercial using a familiar theme, an exploding logo. One spot features footage from the company's famous 1980 "Clown blasting" commercial in which an elderly lady drives up to a Jack in the Box clown to watch it blown to bits by dynamite.

This time, the old lady returns to the Jack in the Box sign to find out the changes the fast-food chain is planning. The narrator outlines the menu revamp of the past four years and explains that, as the chain has improved, its child-oriented name just doesn't fit. The camera then zeroes in on the Jack in the Box sign, which is demolished in an explosion. It reveals its new Monterey Jack's name.#

Chicken

(Continued from Page 1)

fast-food restaurants and retail grocery stores, as consumption of red meat declines. Dublin, O.-based Wendy's is hoping that the new spot's tag line, "Parts is parts," will do for its chicken sales what "Where's the beef?" did for its hamburgers.

Burger King's original "broiling vs. frying" campaign showed that consumers would respond to advertising that addresses technical points of difference as well as claims of superior taste. The new Wendy's spot follows a similar tack, contrasting the "100% natural boneless breast of chicken" used in its sandwich with the "processed chicken" used in McDonald's Chicken McNuggets and in Burger King's and some other competitors' chicken sandwiches.

"Processed chicken" spot

In the "Parts" commercial, a customer at an unnamed fast-food restaurant asks what the person ahead of him has ordered. Told that it's "processed chicken," he asks for an explanation. The counter worker explains in excruciating detail that processed chicken is made from various parts of a chicken that are ground up and formed into shapes. The counter worker shrugs off a question about *which* parts of the chicken are used with the reply "Parts is parts."

The spot reunites the team that brought America "Where's the beef?" Mr. Sedelmaier directed from a script by Dancer Fitzgerald Sample senior vp Cliff Freeman. DFS' Susan Scherl produced the commercial, with Donna Weinheim's art direction.

Mr. Freeman admitted that trying to follow the phenomenal success of the "Where's the beef?" campaign did present an obstacle.

"The pressures were felt by everyone, I think, including Joe," Mr. Freeman said. "But eventually we got over it. We had to. And I think we did a very good, very effective spot."

There really was no pressure, he said, to write a memorable line that could take off as "Where's the beef?" did. "'Catch-phrase' thinking is destructive," he said.

Mr. Freeman also said he and Mr. Sedelmaier have collaborated on additional Wendy's commercials (but not "Where's the beef? IV" or "Parts is parts II") currently being tested.

The Sedelmaier-directed spot was one of two different executions for the chicken sandwich Wendy's considered (AA, June 13). "Parts is parts" aired in Richmond, Va., this summer, while another spot, featuring chicken puppets dancing at the Chicken Club, was tested in Oklahoma City. A Chicken Club sandwich (the basic sandwich topped with bacon) is a menu option for Wendy's operators, and it's possible that the second spot will be used nationally.

Chicken has become a major part of most fast-food chains' menu lineup. Analysts say Chicken McNuggets, introduced in 1980, now account for about 10% of per-store sales for McDonald's. That would be approximately $750 million in domestic sales.

A similar trend has taken hold in the retail frozen boneless chicken market. That segment, now $275 million, has grown rapidly during the past few years, with the introduction of Hot Bites from ConAgra's Banquet Foods unit and more competition from Tyson Foods and Victor F. Weaver Inc.

Banquet Foods, St. Louis, is extending the Hot Bites line of chicken patties, nuggets and sticks with Entree Express, a five-item line that includes regular, barbecue and Italian chicken patties.

Chains reacting

But the fast-food chicken chains already have begun fighting back both McDonald's and local freezer cases. Louisville-based KFC is rapidly expanding the marketing territory for Kentucky Nuggets, which it began testing this summer (AA, Aug. 20).

Church's Fried Chicken, San Antonio, the nation's No. 2 chicken chain, has joined the counterattack, too. Last month it launched Crispy Nuggets in its 1,300 stores (AA, Oct. 1).

Oak Brook, Ill.-based McDonald's last year withdrew its McChicken sandwich from most stores where it had been offered. One of that product's competitive disadvantages, analysts said, was that it was made from processed chicken, while other chains—like Arby's, KFC and Wendy's—were introducing natural chicken breast sandwiches.

With Wendy's, KFC and Church's advertising now all pointing disparaging fingers at McDonald's processed-chicken McNuggets, one of Big Mac's most important menu items is in for a market-share war on three fronts.

But McDonald's is not without its own formidable arsenal. Sources say new advertising support for McNuggets is set to break around Thanksgiving.#

No doldrums for public shops

By STEWART ALTER

NEW YORK—Need proof that 1984 is shaping up as a banner year for public ad agencies? Consider the strong results for the traditionally limp third quarter.

"I'm always prepared to explain away the third quarter and apologize for it, to point out that it's not at all unusual that expense levels are high because the fourth quarter is the big season for ad agencies and they're staffing up," said Alan Gottesman, a securities analyst who follows ad agencies at L.F. Rothschild, Unterberg, Towbin.

"But this year I didn't have to do it," he said. "Everybody is running at 20% growth or better, so I have an unused, but ready, excuse."

Marketers "were out there advertising in the summer a little bit more than they normally do," said Mr. Gottesman. The Olympics was one factor, but not the only one, he said.

Indeed, as the accompanying chart indicates, the third quarter was strong for almost all the public agencies. The exception was Doyle Dane Bernbach, which was still in the loss column owing to its unusual year of account losses. But even DDB had an 11% gain in gross income in the third quarter, compared with the year-ago quarter, and cut its pretax losses in half (from $1.965 million to $948,000). For the nine months, it showed a gain of 26% both in pretax income and in net earnings—figures in line with those of the other public shops.

The summer months inspired a turnaround for Ally & Gargano, which had a lackluster fiscal year. (The agency is on a July 1 to June 30 fiscal calendar, so everyone else's third quarter is its fiscal first quarter.) In that quarter, which ended Sept. 30, net earnings rose a whopping 172% to $430,000 from the comparable period in 1983.

Foote, Cone & Belding, Chicago, also reported record revenues for its third quarter. Net earnings rose 62.2% to $4.7 million over restated 1983 earnings of $2.9 million. Results for 1983 have been recalculated to include the NCK Organization Ltd., which was merged into FCB last January.

Additionally, the third quarter found the public agencies continuing to improve their profit margins.

"Pretax profit margins improved in the third quarter and for the year to date in spite of the fact that translation of our international results sharply impacted our performance," commented Don Johnston, chairman-chief executive officer, JWT Group.

In the third quarter, JWT's pretax profits as a per cent of revenues edged up to 8.2% from 8%, while increasing to 8.5% from 7.4% for the nine months.

But the pretax margin increases were even more substantial for some of the other agencies.

Ogilvy & Mather's third-quarter pretax margins rose to 9.1% of revenues from 8%, and to 9.9% from 8.5% for the full nine months. For the Interpublic Group of Cos., the third-quarter pretax margin rose to 6.6% from 5.4%, while for the nine months the increase was to 11.5% from 9.6%. Grey Advertising's third-quarter margins rose to 10.4% from 8.1%, and to 11% from 9.5% for the nine months.

Even BBDO, which already runs a pretty tight ship, inched up to a 10.4% pretax profit margin as a per cent of revenues in the third quarter from 10.1% in the similar period, and to 13% from 12.6% in the nine-month period.#

Agency financial results

It looks like 1984 will be a banner year. All agencies, with the exception of Doyle Dane Bernbach, are reporting record high revenue gains. NM means not meaningful. Source: *Advertising Age*.

	Income ($000)			Revenues ($000)		
Agency	1983	1984	(%)	1983	1984	(%)

Aspirin

(Continued from Page 10)

determining a psa's truth or falsity, as well as for deciding whether to air it. He said the Fairness Doctrine might apply if the spot presented only one side of an argument "in an obvious and meaningful way."

At the FDA, which got condemnations of the psa from the Centers for Disease Control in Atlanta and Dr. Edward Brandt, assistant secretary for health, there is even more trepidation.

The agency claims several studies have indicated a Reye's-aspirin link and is involved in what it hopes will be a definitive national study on the disease. A pending proposal to include a Reye's warning on aspirin labels rides on the outcome of the study.

Despite its resolve, the FDA is reluctant to challenge the First Amendment right of the CCC to air its opinion, disputed though it may be.

"I can't say we couldn't perhaps find some legal excuse" to go after the psas, an FDA spokesman said. "But the fact that we find them misleading doesn't precipitate any action."

He said the FDA unsuccessfully asked the committee to withdraw its ads, then switched tactics.

The FDA's own Reye's syndrome message to nearly 10,000 tv and radio stations at a cost of about $12,000 went out as news, not a psa.

That decision stems from last year, when the CCC, using stationery with a legal firm's letterhead, warned tv and radio stations they would be subject to equal-time provisions if they aired the FDA's 1983 Reye's warnings, an agency official said. The CCC also warned supermarkets against displaying FDA-supplied materials on Reye's syndrome near their aspirin counters, or face possible charges of mislabeling.

The committee's psa was not sent to CBS or ABC, according to network officials, one of whom noted that independent stations, with their less-stringent regulations, might be more inclined to air them. NBC was unavailable for comment.

For its part, the CCC questions whether any evidence has been found to establish a Reye's-aspirin connection, and paints itself as a group of 1,200 caring pediatricians interested in issues affecting children.

"We are disappointed that the FDA singles out aspirin. . .based on earlier inadequate data," said Neal Chayet, a Boston attorney and cofounder of the committee and its parent organization, the International Science Exchange.

"The question is whether aspirin is a risk factor," said Mr. Chayet, who also hosts a syndicated radio program produced for CBS, "Looking at the Law." "We think it is in everyone's best interest to find a relationship, if there is any."

Mr. Chayet said the committee soon hopes to launch its own study on Reye's, an effort that would match the government's study. The National Health Service is due to release results of a pilot study in a few weeks that, one government source said, will reinforce the notion that aspirin increases a child's risk of Reye's syndrome.#

Car radio

(Continued from Page 3)

late in September and concluded in October.

GM also has completed a significant holiday radio buy across 10 markets that will employ a "Buckle-up, drive safely" theme.

The new emphasis on radio is a result of several factors, sources said, but primarily the auto makers are using radio as a wedge into the 18-to-34-year-old market.

"There is a greater emphasis on youth in [Chevy's 1984 media campaign], especially 18 to 34, and it is hard to reach this demographic on television," said a spokesman for Campbell-Ewald, Warren, Mich., Chevy's agency.

In the reorganization of General Motors, Chevrolet will be considered an entry-level nameplate, hence the importance of luring younger buyers.

The C-E spokesman said the funds for the radio buy were not taken out of the spot tv budget.

Radio also is getting increased attention because of staggered car introductions during the year, sources said.

Although the Spectrum and Ram 50 introductions will occur during the traditional October new-car period, other introductions occurred last spring.

Radio has become an important tool to support the new cars, sources said. Radio advertising offers great flexibility and can be used to build frequency quickly.

The Dodge Ram 50 buy is the largest radio buy that Dodge has made in a year.

The campaign, which will break this month, "is geared to take on the imports," said Gene McCarthy, executive media director at BBDO, Southfield, Mich., which handles Dodge.

Dodge decided to build heavy frequency for the car over a four-week period and believed radio could best be used for the effort.

Dodge's return to radio, like Chevy's, illustrates an effort to reach a youth market.

Like Chevy, Dodge deemphasized radio after the car market began to boom two years ago.

"You have to remember that Chrysler has always been responsive to radio, and during the tough days it spent a lot on the medium," Mr. McCarthy said. However, he said, when the climate improved, more money shifted to spot tv at the expense of radio.#

Remedy

(Continued from Page 6)

homeopathic product each year for the next seven years to its list of advertised remedies.

"There's really no equivalent to Oscillococcinum in the [over the counter] market," he said. "We are seeking to fill a void, not take business from other companies."

Mr. Borneman said his company considered changing the product's long, tongue-twisting name.

But it concluded that even if consumers couldn't remember how to say it, the difficulty would help them remember the product, and they could describe the product well enough to the retailer to ask for it.

"At worst, it's funny, entertaining, intriguing—rarely offensive," he said.#

Campbell's eyeing convenience market

By NANCY GIGES

CAMDEN, N.J.—Campbell Soup Co. is making a big push to take advantage of the fast-growing convenience food store market.

Campbell has formed a new business unit aimed at creating new products and repositioning existing products for these retail outlets, and has appointed C. Robert Marshall as general manager.

Formerly national accounts manager, foodservice products, Mr. Marshall joined Campbell in 1967 as a sales rep, and has worked in a number of marketing and sales positions. Noting that convenience stores are beginning to function as mini-restaurants, Mr. Marshall said his first objective is to talk to convenience store people. "We are the Campbell Soup Co., and I would like to get them in a soup program," he said.

Other big sellers in these outlets are hot beverages and microwave products. Mr. Marshall acknowledged that Campbell does not have a complete line now, but president Gordon McGovern is committed to this market and wants to expand as quickly as possible.

Another product line that will be investigated is the new Fresh Chef salads, which are testing in the Denver market. Mr. Marshall hopes to be ready to test products in about six months and foresees adding an ad agency in a year.

Mr. Marshall said the 58,000 convenience stores in the U.S. accounted for almost $29 billion in sales in 1983.#

High Life goes to JWT

B&S keeps media buys

New York—J. Walter Thompson USA this week was handed one of marketing's biggest creative challenges—the opportunity to help rescue Miller High Life beer.

Miller Brewing named JWT to succeed Backer & Spielvogel for creative responsibility on the $50 million Miller High Life account. The assignment was announced Nov. 12. Thompson reportedly was the last of the four agencies to give its final presentation last week.

Leo Burnett USA, Chicago, was said to have had the first shot, making its presentation to Miller Brewing executives Nov. 2. The New York offices of Jordan, Case & McGrath; N W Ayer, and JWT followed, in that order, Nov. 9.

Backer & Spielvogel hardly has been left out in the cold. A Miller spokesman said that agency will continue to handle media buying for all Miller brands, including High Life, which have total billings of about $150 million.

It also remains agency for Miller's Lite, Lowenbrau, Meister Brau, Milwaukee's Best and Magnum Malt Liquor brands. Creative responsibility for low-alcohol Sharp's LA earlier was given to Burnett, and Chiat/Day here has been assigned creative for Plank Road, a new premium brand now in test.

A source at Miller parent Philip Morris Inc. said Backer & Spielvogel had been told previously that it was no longer being considered for the High Life creative assignment. However, a source at Backer &

ANA tunes in to tv problems

Panel tackles 'light' viewer

Photo by Mary Herlehy

The incoming meet the outgoing at the Assn. of National Advertisers annual meeting: (From l.) Herbert Baum, newly elected ANA vice-chairman and corporate vp-marketing, Campbell Soup Co.; Karen Baum; Spencer Boise, new ANA chairman and vp-corporate affairs, Mattel Inc.; Marty Boise; Nancy Goldstein, and Robert Goldstein, outgoing ANA chairman and vp-advertising, Procter & Gamble.

Scottsdale, Ariz.—The word "light," a mainstay in national advertisers' product vocabulary for more than a decade, now is being applied to an elusive potential customer known as the light tv viewer.

But whether network tv should be the medium to use in trying to reach light tv viewers was one of several issues examined by a panel at the Assn. of National Advertisers' 75th annual meeting here. The panel also addressed itself to the problem of double-digit increases in network tv costs, clutter and alternative media options.

William Claggett, vp-director of advertising and marketing services, Ralston Purina Co., St. Louis, noted that 40% of Ralston's sales come from the light tv-viewing segment. Therefore, Mr. Claggett believes the three major tv networks should consider network cost reductions in light of the diminishing tv audience.

While Mr. Claggett admitted that 80% of Ralston's budget remains committed to network tv, he said "we have to keep massaging it [network tv] to get the maximum out of it." He also said the light tv-viewing problem has forced Ralston to become more intelligent in the programing that it buys. Through buys on miniseries and programing such as CBS-TV's "60 Minutes," he said, light viewers are being reached, although Ralston is "paying a premium to reach them."

Lawrence Lamattina, exec vp-media and network programing, SSC&B:Lintas Worldwide, New York, made the point that "advertisers are kidding themselves" in considering networks a "specialized medium." He noted that buyers of network time are looking for "big numbers and mass coverage."

On the issue of reducing network tv's escalating prices, Mr. La-

Des Moines buy ripples at Cowles

By WILLIAM GLOEDE

The surprise attempt by executives of the Des Moines Register & Tribune Co. and Dow Jones & Co., New York, to buy the Iowa company from the Cowles family has led to infighting among board members and major stockholders.

The developments have raised prospects that an outside media company may have a shot at acquiring not only the Des Moines company but also the Minneapolis-based Cowles Media Co.

Observers believe the five largest U.S. newspaper publishers each will make bids. The Washington Post Co. has in the past expressed an interest in a buyout.

One of the major players in the

Court forbids some ads for Advil

New York—A U.S. district court here has banned American Home Products' Whitehall Laboratories division from using previously discontinued ads for Advil, its nonprescription ibuprofen product. The court also said that Whitehall may continue to use ads now running. Former advertising, via Young & Rubicam, used the sentence "It's so effective that doctors have already prescribed it over 130 million times" and showed Advil as an orange-colored tablet, rather than its true color, brown. Upjohn Co., marketer of Motrin, an orange-colored prescription ibuprofen tablet, sought an injunction against all of Whitehall's Advil ads as deceptive and misleading.

Advance acquires 17% stake in New Yorker

New York—Advance Publications and its chairman, S.I. Newhouse Jr., will acquire 17% of the stock of The New Yorker Magazine Inc. for what Mr. Newhouse said are investment purposes. The stock is to be acquired from PaineWebber Group, which recently boosted its stake in the company (AA, Oct. 15), and from Philip Messinger, a private investor. New Yorker Inc. president J. Kennard Bosee said the company had been aware of Advance's move for a couple of days and that Mr. Newhouse "has told us there are no plans to seek control or influence management."

Gallo ready to squeeze into wine cooler market

By RUTH STROUD

E. & J. Gallo Winery's long-rumored entry into the fiercely competitive wine cooler category apparently is at hand.

The Modesto, Cal.-based winery is expected to introduce its cooler, Bartles & James, in several test markets early next year, sources said. From a first-hand description, the product seems aimed at a more sophisticated consumer than its successful predecessors, California Cooler, Canandaigua (Sun Country cooler) and Wine Group (20/20 Wine Cooler).

Bartles & James will come in green, 12-oz. bottles resembling those used for Michelob beer, with a white label and gold lettering.

Round of tests slated

One source said the cooler would be produced in limited quantities in the next few weeks and tested in several unidentified markets. Further information on advertising, pricing, packaging or contents was unavailable at press time.

Ogilvy & Mather, San Francisco, is Gallo's agency.

A Gallo spokesman said the company has been monitoring sales trends in the segment but has no plans to test a product. "Bartles & James is one of the names we are considering testing, but we have no firm plans at this point to even market-test," he said.

Gallo, the world's largest winery, is known more for building market share through skilled sales and marketing than for inventive new products. Longtime Gallo observers say the company often tests products internally for several months before trying them.

Rumors have swirled since early this year around Gallo's entry into the wine cooler market, with most speculation centering on a product called California Quencher. But that name was believed to be too close to another Gallo product, Boone's Farm Country Kwencher, a fruit-flavored wine.

Sizzling category

A Gallo wine cooler entry would fuel an already sizzling category. The $250 million-to-$350 million business has attracted some top U.S. wineries, including Heublein Wines, Farmington, Conn.; Wine Group, San Francisco, and, most recently, Seagram Wine Co., New York, which introduced Seagram's Cooler (AA, Oct. 25) last month.

Heublein and Seagram have products aimed at more upscale consumers, whereas category leader and pioneer California Cooler and its most successful competitors have sought a more down-to-earth positioning.

Heublein's Citronet, a clear-liquid, 4%-alcohol cooler hasn't fared well despite heavy advertising in some markets via DYR, Los Angeles, sources said.

Wine industry consultant Jon Fredrikson cited Citronet's example as reason to doubt the stylish positioning of Seagram's Cooler and Bartles & James.

About 29 million gals. of wine cooler were shipped through September, more than all the sparkling wine shipped in 1983. But lately the category has begun to reflect the seasonality of the beer and soft-drink markets. Shipments during September dipped to 3.8 million gals., down about 33% from the 1984 peak in July, he said.

Stockton, Cal.-based California Cooler, which controls 60% of the market, hopes to maintain its awareness in consumers' minds through holiday promotions and is busy concocting what sources say is an "absolutely wild" campaign for next year with new agency Chiat/Day, San Francisco.

Tom Gibbs, California Cooler's director of marketing, maintained that Gallo's expected entry doesn't disturb him. "The category needs more awareness, and this will help," he said.

Legal action taken

Mr. Gibbs is disturbed about two competitors, however. The company recently filed suits against Joseph Victori Wines, New York, marketer of Calvin Cooler, and Loretto Winery, Pleasanton, Cal., which sells California Special Cooler.

The suits claim both companies have created products that either in name, labeling or advertising have confused consumers and retailers into believing they are the real California Cooler. The suits seek preliminary injunctions against both companies. The defendants deny the charges.#

Lotus Jazzing up software

By BRIAN MORAN

NEW YORK—Two of the biggest movers and shakers behind Diet Coke's soaring success have rejoined forces to market a new Lotus Development Corp. software program as a mass-appeal consumer item.

Malcolm MacDougall, who headed SSC&B's creative team for Diet Coke, and Henry Cardello, onetime marketing director for Coca-Cola USA's cola brands, are working on an introductory ad campaign that will position Lotus' new Jazz software as an indispensable tool for baby-boomers.

"We're going to put Jazz on as many lips as Diet Coke," said Mr. MacDougall, president and creative director of Hill, Holliday, Connors, Cosmopulos here, which is handling creative for the Lotus product. HHCC/Boston, Lotus' agency of record, is handling media for the campaign, expected to break in March.

Mr. MacDougall said the campaign will address what consumers have been trying to figure out for a long time: What can a computer do for me?

Jazz, introduced here Nov. 12, is an integrated package for Apple Computer's Macintosh personal computer that includes word processing, spreadsheet, database, communications and graphics applications.

Cambridge, Mass.-based Lotus and Cupertino, Cal.-based Apple are discussing joint advertising and promotion campaigns for Jazz that could far outstrip previous spending levels in the software field. Lotus, which last summer became the first software marketer to advertise on network tv, "probably" will go back on tv with Jazz, Mr. Cardello said.

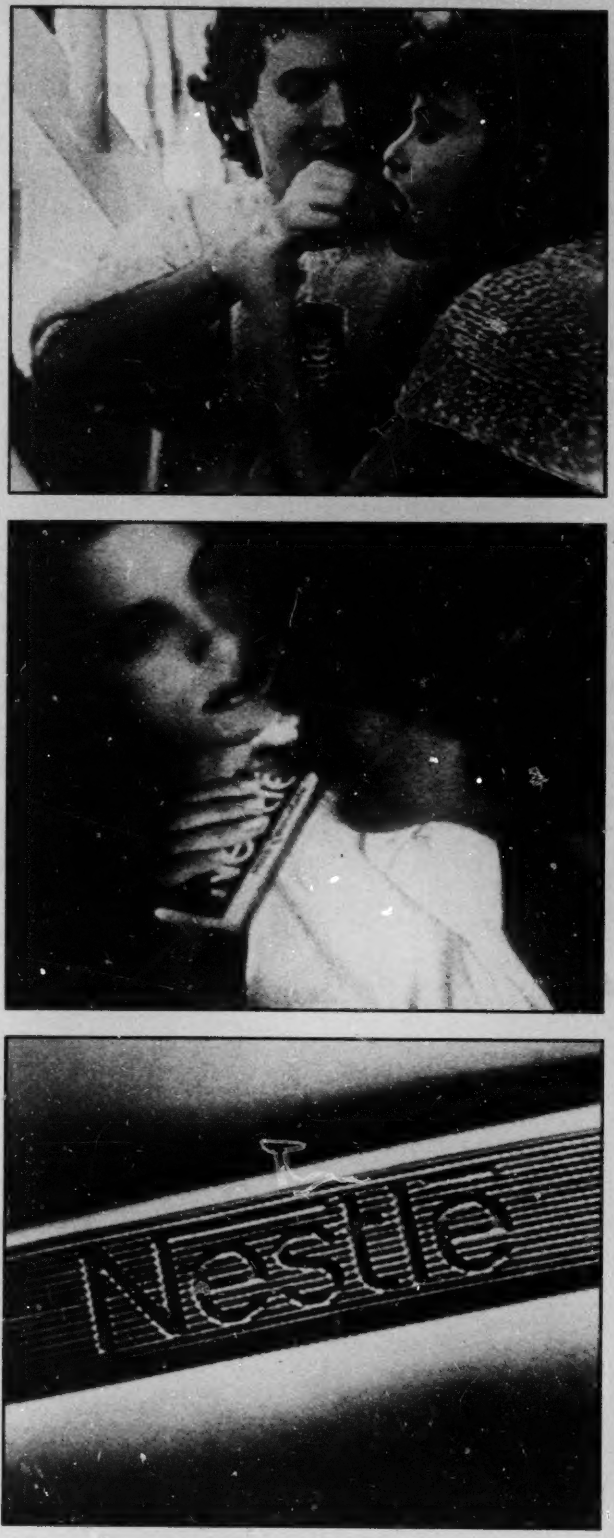
Mr. Cardello, who joined Lotus in July, is confident that the Macintosh's easy-to-use design will open up new, broader markets for integrated software.

Lotus' successful 1-2-3 software, which runs on the IBM Personal Computer and compatibles, is geared mainly to data-processing and management-information systems workers at *Fortune* 1000 companies.

Because Jazz is easier to run than existing integrated programs, the product-benefit message will translate better to tv, said Mr. Cardello. Lotus' tv spots for Symphony were criticized for failing to address what the product did.

Available late in the 1985 first quarter, Jazz is expected to improve Apple's penetration in the business market, now dominated by IBM.

At $595, Jazz is priced between the two existing Lotus programs, 1-2-3 and Symphony.#



Hot chocolate

The All-American candy bar gets a taste of the provocative in commercials Nestle Co. is testing in Eau Claire, Wis., and Albany, N.Y. (AA, Nov. 12). The spots, themed "Nestle's passion," feature throbbing music, suggestive closeups and lyrics filled with double-entendres. J. Walter Thompson USA, New York, is the agency.

Rodale tries 'Superfit' idea

By STUART J. ELLIOTT

EMMAUS, PA.—Rodale Press will test a fitness magazine next year and has filled two new top-level positions.

The moves are in keeping with Rodale's recent turn toward a more aggressive stance in product development, advertising, marketing and promotion.

This is all "the result of some strategic initiatives the company took," Rodale president Robert Teufel said during an interview. "In order to maintain our market share, it is essential we continue our growth."

The magazine to be tested is called *Superfit*. It first appeared as a supplement to the November/December issue of Rodale's *Bicycling*, and will be aimed at "a person who would be active in any sport, who has an interest in high-level training," Mr. Teufel explained.

Some 200,000 copies of *Superfit* —dated summer, 1985—are slated to appear on newsstands nationwide next April 23. Cover price will be $2.50. Rates for ads, to be sold initially by *Bicycling's* sales staff, are $600 for a b&w page and $1,000 for a color page.

If the test is successful, *Superfit* would become a quarterly, under the aegis of *Bicycling*.

Rodale also is considering the acquisition of small sports and fitness-oriented magazines that would be taken, like *Superfit*, into the Bicycling family.

Superfit is the first magazine to

Designing the office of the future

By Ed Fitch

"The office of the future." If that phrase doesn't set your mind to wandering, probably nothing will. Perhaps you picture yourself sitting at a command module, barking instructions into the air with a roomful of robots heeding your every beck and call.

Well, take your boot heels off the desk, forget George Jetson and skip the "Star Wars" illusions. Except for office furniture and design enhancements, the office of tomorrow most likely will look a lot like the place you park yourself every day. It simply may be a combination of the workhorses of today's technologies—terminals and telephones.

"Two years ago, once you peeled the onion, you found that companies [interested in office automation] really wanted word processing," says J. David Lyons, vp and general manager-information systems division of Westboro, Mass.-based Data General Corp. "In the last two years, companies have been investing in decision support, data processing, business graphics. The integration of voice and data processing capabilities will come to the forefront over the next year."

The potential results of this merger are astounding. Envision the capabilities of computers compounded and streamlined, accomplishing more operational functions and making people more effective at their jobs. *This* is the office of the future.

Manufacturers already are developing the essential ingredients and formulating the proper layout for this office. "All of the pieces are being put into place, although the determination of the value and utility are still ahead," Mr. Lyons says. Networking, electronic mail, microcomputer-to-mainframe software and hardware links—these enhancements of existing technologies are refining and expanding computer applications.

The key is communications. Networking is essentially intraoffice communications. Electronic mail serves interoffice communications, and micro-mainframe links provide intercomponent communications. "Real product development is blurring the lines between the two technologies," says Don Warden, director of advanced communications technology-research and development division, NCR Corp., Dayton, O.

The road to integrate these industries has taken some interesting twists and turns; how the business arrived at this junction is debatable. Whether the movement was driven by consumer need or industrial product development "is a little like the chicken and the egg question," says Eugene Lotochinski, vp-market development, Nashville, Tenn.-based Northern Telecom.

Mr. Warden agrees, saying that both market need and industry innovation are driving the convergence of technologies. "Another factor is the regulatory and legal environment, which is changing constantly and creating a framework that encourages the blurring of distinctions. The deregulation of the phone industry is continuing to lead both industries toward competitiveness," he says.

From the suppliers' perspective, technology will continue to explode of its own accord regardless of market need, says Richard Santagati, chairman of the board and president of Nynex Business Information Systems Co., White Plains, N.Y. "The reality is that as more products are made available, the market doesn't know how to use

Demand for electronic mail arrives early

By Lori Kesler

An exuberant public relations representative for an electronic mail company likes to tell how he nearly forgot his mother's birthday, then saved face at the last minute by sending her a birthday greeting via electronic mail.

Although electronic mail's fortunes never will hinge on cranking out birthday messages for mom, his story illustrates a valid point: Instant mail offers benefits anyone can understand.

After all, this is technology with a purpose, a procrastinator's dream come true, an efficient tool for folks who push their deadlines to the limit.

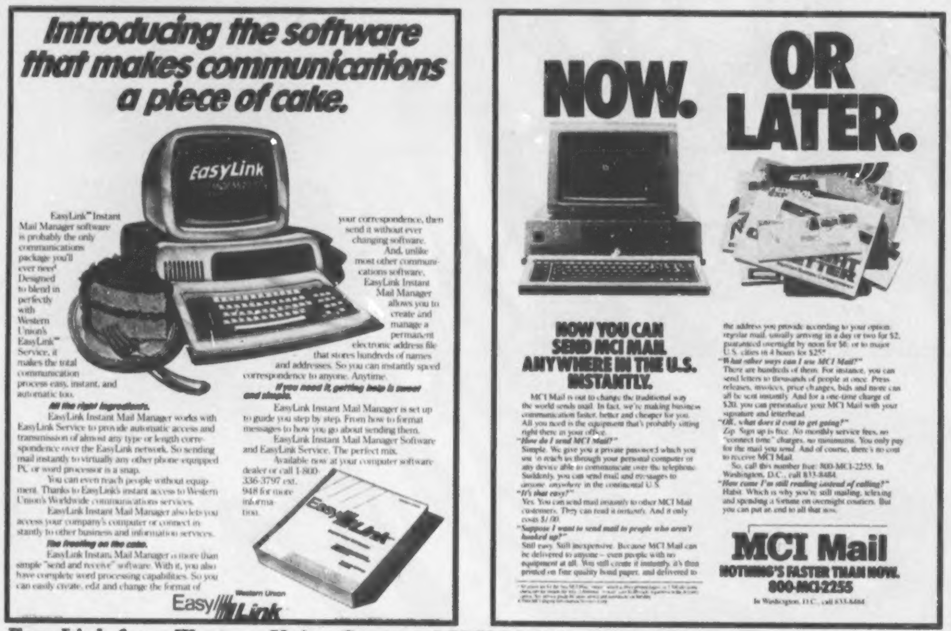
Electronic mail can give business professionals the means to communicate with hundreds of vendors, clients, distributors or sales people in one fell swoop. "Electronic mail will be the first electronic service to reach its peak by virtue of need," says Bob Smith, vp-marketing, Business Computer Network, Cardiff-by-the-Sea, Cal.

The electronic mail companies are just beginning to spread their gospel. Atari founder Nolan Bushnell once called the home computer "a tremendous solution looking for a problem." The same statement could have described electronic mail.

However, that's changing. One expert says the industry is reaching the point where market demands are outstripping technology. Customers are clamoring for services that are still on the drawing boards—a good sign that the world is ready to mail electronically.

Meanwhile, electronic mail companies are trying to figure out how to market themselves to the public. "The services are still pretty fuzzy," Mr. Smith says. "There's not a lot of benefit advertising going on." But this may be because the market still is taking shape.

A quick glance over the shoulder shows electronic mail hardly existed before last year. MCI Mail, the product of Washington-based MCI Communications Corp., perhaps the most visible and aggressive company of the lot, celebrated its first birthday in September. Rockville, Md.-based General Electric Information Systems Co., a provider of internal corporate communications systems, waited until late 1983 to invest heavily in the free-standing electronic mail market, powering itself into the fray with a series of new-product enhancements for its Quik-Comm service.



EasyLink
Western Union
EasyLink

Introducing the software that makes communications a piece of cake.

EasyLink™ Instant Mail Manager software is probably the only communications package you'll ever need! Designed to blend in perfectly with Western Union's EasyLink™ Service, it makes the total communication process easy, instant, and automatic too.

All the right ingredients.

EasyLink Instant Mail Manager works with EasyLink Service to provide automatic access and transmission of almost any type or length correspondence over the EasyLink network. So sending mail instantly to virtually any other phone equipped PC or word processor is a snap.

You can even reach people without equipment. Thanks to EasyLink's instant access to Western Union's Worldwide communications services.

EasyLink Instant Mail Manager also lets you access your company's computer or connect instantly to other business and information services.

The frosting on the cake.

EasyLink Instant Mail Manager is more than simple "send and receive" software. With it, you also have complete word processing capabilities. So you can easily create, edit and change the format of your correspondence, then send it without ever changing software.

And, unlike most other communications software, EasyLink Instant Mail Manager allows you to create and manage a permanent electronic address file that stores hundreds of names and addresses. So you can instantly speed correspondence to anyone. Anytime.

If you need it, getting help is sweet and simple.

EasyLink Instant Mail Manager is set up to guide you step by step. From how to format messages to how you go about sending them.

EasyLink Instant Mail Manager Software and EasyLink Service. The perfect mix.

Available now at your computer software dealer or call 1-800-336-3797 ext. 948 for more information.

Western Union EasyLink

NOW. OR LATER.

HOW YOU CAN SEND MCI MAIL ANYWHERE IN THE U.S. INSTANTLY.

MCI Mail is out to change the traditional way the world sends mail. In fact, we're making business communication faster, better and cheaper for you. All you need is the equipment that's probably sitting right there in your office.

"How do I send MCI Mail?"
Simple. We give you a private password which you use to reach us through your personal computer or any device able to communicate over the telephone. Suddenly, you can send mail and messages to anyone, anywhere in the continental U.S.

"It's that easy?"
Yes. You can send mail instantly to other MCI Mail customers. They can read it instantly. And it only costs $1.00.

"Suppose I want to send mail to people who aren't hooked up?"
Still easy. Still inexpensive. Because MCI Mail can be delivered to anyone—even people with no equipment at all. You still create it instantly, it's then printed on fine quality bond paper, and delivered to the address you provide according to your option: regular mail, usually arriving in a day or two for $2, guaranteed overnight by noon for $6, or to major U.S. cities in 4 hours for $25.*

"What other ways can I use MCI Mail?"
There are hundreds of them. For instance, you can send letters to thousands of people at once. Press releases, invoices, price changes, bids and more can all be sent instantly. And for a one-time charge of $20, you can personalize your MCI Mail with your signature and letterhead.

"OK, what does it cost to get going?"
Zip. Sign up is free. No monthly service fees, no "connect time" charges, no minimums. You only pay for the mail you send. And of course, there's no cost to receive MCI Mail.

So, call this number free: 800-MCI-2255. In Washington, D.C., call 833-8484.

"How come I'm still reading instead of calling?"
Habit. Which is why you're still mailing, telexing and spending a fortune on overnight couriers. But you can put an end to all that now.

MCI Mail
NOTHING'S FASTER THAN NOW.
800-MCI-2255
In Washington, D.C., call 833-8484

EasyLink from Western Union Corp. and MCI Mail from MCI Communications Corp. vie in the young electronic mail industry.

Even Western Union Corp., Upper Saddle River, N.J., whose 1938 telex machine represented the granddaddy of electronic mail, is just now starting to rev its corporate engines. Although it unveiled EasyLink two years ago, Western Union didn't promote it much until competitors pointed the way.

"Western Union has the largest share of the electronic mail market with its 1.5 million telex subscribers and 65,000 on EasyLink," Mr. Smith says, but "Western Union didn't even seem to know it was in the electronic mail business."

Audrey Mandela, senior analyst for the Yankee Group, a Boston-based market research and consulting company, says electronic mail may begin to look more like a retail industry early in 1985. "By then we'll see some real competition for MCI," she says, noting that Western Union's planned improvements for EasyLink should turn it into a more viable product in the next couple of months.

But, she says, the definition of electronic mail may get fuzzier as sending simple messages gives way to a broader range of applications, such as billing, order processing, inventory tracking, electronic banking and database information retrieval.

At the moment, a number of contenders are in the market: Along with Western Union, MCI and GEISCO, there's Email from CompuServe; Telemail from GTE; Dialcom offered by ITT; OnTyme from Tymshare, and the newest entry, RCA Mail from RCA Global Communications.

The electronic mail field has grown crowded and "the door is slowly shutting," Mr. Smith says. "The number of players probably won't grow. In fact, anyone getting in now is arriving pretty late."

The market already has claimed one fatality. The U.S. Postal Service's ill-fated electronic mail effort, E-Com, shut down this summer after losing an estimated $50 million to $100 million since its launch in January, 1982. The government is looking for a buyer to take E-Com equipment off its hands and operate it as a private enterprise.

But companies with the right stuff have plenty of opportunities. The industry's billings are expected to soar to more than $1 billion by 1990—possibly upward from that point. Experts predict an influx of some 3 million new subscribers in the next 18 months alone, most of them business customers.

J. Robert Harcharik, president of MCI Digital Information Services, estimates the electronic mail industry's 1984 billings will reach about $75 million, "which makes it a small business at the moment. But if you widen the outlook to include all kinds of urgent communications on hard copy—and we compete in those areas, too—the potential market is probably $3 billion.

"Then, if you go ahead and look at the first-class mail stream and see what's time-sensitive, the potential market size adds up to $8 billion or $9 billion today," he says. "In the future, who knows how much of our communications could convert to electronic transfer?"

Customers may look for more communications conversions because electronic mail is cheap. One company charges as little as

Lori Kesler is one of ADVERTISING AGE's computer-based correspondents.

Future

(Continued from Page 11)

them."

"The consumer—both the classic package goods consumer and the business professional—doesn't demand an integrated voice and data system until he absolutely has to have it," Mr. Warden says. However, it is becoming evident that the day of demand is fast approaching.

"Today, different departments within a company are using various technologies to meet the company's needs; it's a very patchwork-quilt approach," Mr. Santagati says. "The power of integration in terms of efficiency, functions and costs are not experienced." To realize these benefits, he says, most companies should integrate their systems, depending on the extent of their data processing operations.

Demand also is increasing because workers have become the most costly factor in the office automation formula. "The cost equation has shifted to where you can achieve extensive computing capabilities for a few thousand dollars," Mr. Lotochinski says. "Because the executives are the most expensive element of the system, the task is to give them a terminal to optimize their value."

To avoid duplicating efforts and to streamline the decision-making process, communication among terminal-tied executives is critical.

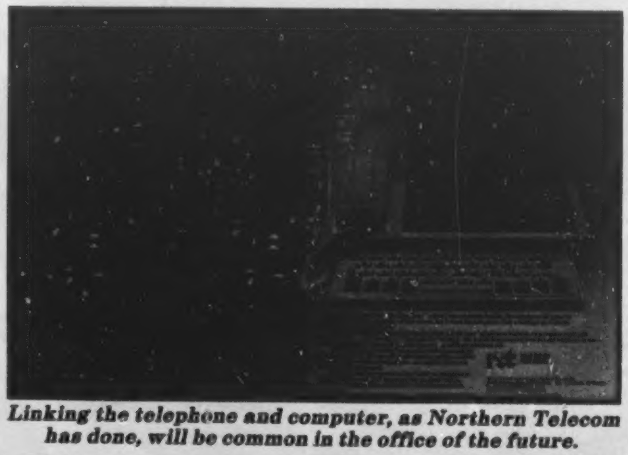
Because it is in corporate America's best interest to merge data processing and voice communications functions, strategic competitors serving the office automation market must have a product that does it all, Nynex's Mr. Santagati says. Customers don't want to go to different vendors, he says, so "vendors want to be able to say, 'Stick with me and I'll offer all of the products you'll ever need.' "

But just because two very technically oriented industries are converging doesn't mean research and development departments can spin out a combined product line tomorrow. "Two respected [data processing] companies, Wang and IBM, couldn't develop a voice PBX that handles voice and data communications at the same time," he says.

"Voice capabilities are not easy to develop, so these companies go out and acquire the technology from smaller vendors," Mr. Santagati says.

Because PBX manufacturing is considered more risky—evolving and being replaced at a more rapid pace—some experts say data processing companies are in the position of having to approach the telecommunications manufacturers with partnership agreements.

Mr. Lotochinski says another factor may put data processing companies in a bit of a tougher spot. "The computer industry has grown up with fault conditions—a certain amount of down time has become expected. This is not expected of communications systems. Also embedded in telecommunications systems are very high reliability computers, so we're already very involved in aspects of computerization."



Linking the telephone and computer, as Northern Telecom has done, will be common in the office of the future.

For the most part, the emphasis seems to be on adding communications capabilities to data processing devices and systems. The increasingly popular local area networks, Mr. Lotochinski says, are a clear case of injecting the communications function into data processing.

It is clear that companies in both industries must understand the other's technology if they are to remain viable competitors. "It's not necessary to have a full product line addressing both tomorrow," NCR's Mr. Warden says. "But in terms of long-range planning and developing the proper system architecture, now is the time to start. Personally, I feel that

17 cents to transmit an electronic message coast to coast. Another sends a note around the globe for 50 cents.

And the price of many services probably will continue to fall. In the heat of competition, some companies already have dropped plans for initiation fees and monthly minimums.

"Compare the costs of electronic mail with other available means of communication and you can see the impact technology is having," says Charles Staumbaugh, marketing manager, Office Communications Operations, GEISCO. "That's why everyone is so interested. The cost-savings potential is tremendous."

> **"We've been tracking the trends since 1975, and . . . the growth in this area took place faster than we expected."**
>
> *—John Naughton*
> *Western Union*

Mr. Staumbaugh says although electronic mail technology has existed for many years, it became feasible to market the services only when large numbers of people had personal computers to hook into the systems.

"It's like when the phone was invented," he says. "People could use it only if they had somebody to call. That's what the industry's been waiting for."

John Naughton, Western Union's vp-information network systems and services, agrees that electronic mail's development has been driven by "the success and ubiquity" of personal computers and word processors. "We've been tracking the trends since 1975, and I have to say the growth in this area took place faster than we expected," he says. Support for electronic mail is coming from several places, Mr. Naughton says, including a "surprisingly strong demand from small businesses and individual users."

Mr. Naughton envisions the market developing across a wide spectrum, with "the worlds of simple messaging and more complex data communications moving together very quickly."

Most companies are carving out special niches in the market. GEISCO, expecting most of the industry growth to come from big business, is positioning itself to serve that market segment.

MCI Mail, on the other hand, targets the other end of the market with an open-ended system that will send both electronic messages and hard-copy letters. "We designed our system for small businesses—and priced it for them, too," Mr. Harcharik says, "because until we got in, electronic mail just didn't offer anything for Harry, the little guy."

With MCI Mail, Harry can use electronic mail to communicate with all his associates—system subscribers and nonsubscribers alike. MCI executives figure it won't take Harry long to realize that all-electronic mail delivery is the fastest and cheapest way to go. And sooner or later, they say they hope he'll get everyone else to join MCI.

Western Union is "going after all market segments, the small users and the large, because the network drives the business," Mr. Naughton says. "As a network gets larger, it has more value at all levels."

Although "Western Union is looking at the entire market," Ms. Mandela says, "right now they appear to be addressing the small user more than anything else." She says Western Union also is attempting to protect its huge international telex base by-

(Continued on Page 14)

Carriers travel new routes

Taking advantage of electronic mail is a bit more confusing than using the U.S. Postal Service—you don't just stick a stamp on something and send it. The following examples—covering three of the larger players—illustrate how the electronic mail market has been segmented and explain how the various services are structured.

MCI Mail

MCI Mail, launched in September, 1983, by Washington-based MCI Communications Corp., allows its 150,000 subscribers to send three to five pages of text from their own computers or word processors to other registered users for $1.

In virtually all electronic mail systems, the letter goes into an "electronic mailbox," which holds the material until the recipient can retrieve it. The company says it's developing an alert system—probably phone-based—to tell subscribers when an urgent message arrives.

MCI Mail also delivers to nonsubscribers in three ways:

- High-priority letters and messages can be transmitted and printed at one of MCI's 18 "postal sites" and delivered by Purolator Courier within two to four hours for $25. Letters can be printed on a company's letterhead if previously registered.
- MCI Overnight, priced at $6, also is delivered by Purolator.
- The MCI Letter, which costs $2, is transmitted via MCI phone lines to company postal sites. From there it is relayed to the U.S. Postal Service for next-day delivery.

MCI Volume Mail, a direct mail product, sends the same letter to hundreds or thousands of addresses.

In 1985, MCI Mail plans to focus its marketing efforts on certain specialized groups, including ad and public relations agencies, credit collection companies, professional associations and manufacturers with extensive dealer distribution networks. The company advertised heavily on tv last fall, but now prefers print ads.

EasyLink

Upper Saddle River, N.J.-based Western Union Corp.'s EasyLink, test marketed in 1982, began regular service in early 1983. It links 98,500 users who transmit 115,000 messages daily, or about 2.3 million a month. EasyLink can connect with those outside the network via Western Union telegram, Mailgram, cablegram or computer-generated letter.

A four-line message sent with high-speed equipment costs 17 cents. Starting in January, EasyLink will offer two-hour and overnight delivery service, priced at $30 to $40 and $7 to $10 respectively, through San Bruno, Cal.-based DHL Worldwide Courier Express. It recently introduced Memory Mail service for multiple mailings—customer billings, letters to stockholders, special offers.

EasyLink is testing a "mailbox alert" paging device—reportedly available early next year—that will tell the recipient a message is in the electronic mailbox. "Conversational EasyLink" also is being developed to enable two users to converse directly terminal to terminal.

EasyLink's current ad push promotes a $95 software package that provides log-on capability, disk file management and word processing functions. The company is spending $15 million in advertising this year as well as heavily promoting its software package to computer dealers, including commissions for signing up customers. On the corporate customer side, Western Union is going after vertical markets such as trucking, banking, retailing and meatpacking with direct sales efforts and industry-specific proposals.

Quik-Comm

Quik-Comm has some 600 major company clients, mostly multinational corporations, that together generate about 2 million messages a month. Company officials predict their electronic mail service will generate more than $100 million in revenues in 1987.

Developed 11 years ago for internal use at General Electric Co., Quik-Comm could not be marketed to others until a 1980 Federal Communications Commission ruling sanctioned it.

At that time, Rockville, Md.-based General Electric Information Services Co., dressed up its Quik-Comm system and began selling it to longstanding clients such as Eastman Kodak. The effort succeeded and went international.

A year ago, GEISCO formed a venture within itself, called Office Communications Operations, to move quickly to develop a free-standing electronic mail service.

Its background in data processing services led GEISCO to customize electronic mail service for large companies rather than offer a generic package. GEISCO's 3,000 sales and support representatives market directly to corporations' management information systems personnel. Quik-Comm service may include amenities such as consultation, programing and specialized training for client users.

Quik-Comm has no service equivalent to the hard-copy products from MCI and EasyLink, but it provides a range of computer-based offerings such as computer conferencing and electronic bulletin boards.

—L.K.

---

companies that aren't eventually involved in both areas will be left out in the cold."

Niche vendors probably always will have a place in this highly diversified market, however. "Companies' office automation needs are different," Mr. Santagati says, "and the strategic competitors cannot fill all of the needs."

Mr. Warden says he doubts any one company will engineer a total system through in-house efforts. "But the large umbrella company has the ability to pull together all of the components."

How chummy companies should become with those in the other industry remains largely undetermined. "The trend is to cooperate with players in the other industry," Mr. Warden says. Examples of varying levels of cooperation are rampant—from IBM's prospective purchase of Rolm Corp. to NCR's equity stake in Ztel to Digital Equipment's technology development agreement with Northern Telecom.

"Although the trend to combine efforts is there, it doesn't necessarily portend the merging of these companies," he says. "Personally, I believe the stakes are sufficiently large that one industry will not take over the other. Most companies realize they have distinct limitations of expertise. Technologically, the correct and appropriate architecture systems will evolve so neither side has to go in and do the other's job."

Most companies also realize that if they are to maintain market flexibility, they should not establish ties that bind. Marketing agreements, technology development ventures and cross licensing seem to be the most prevalent patterns of achieving trans-industry technology.

Companies that acquire or merge with other suppliers "are tied to whatever products their plants manufacture; they are captives of their own product lines," Mr. Santagati says. Those that establish looser agreements, he says, are captive only to market need. "We focused on marketing agreements because it is too early and not necessary at this time to acquire companies to provide supporting technologies."

At their most basic, "the agreements spring from a need for people to come together both from a technology and marketing standpoint," Data General's Mr. Lyons says. "It doesn't really matter which form a company follows as long as they satisfy the need to bring technology and marketing skills together."

Between consumer demand and the wild ride through technology's wonderland, manufacturers in both industries will come together—and quickly. "Quite simply, by getting together you can come up with a better solution," Mr. Lotochinski says.

"Once the stand-alone computer was the key to delivering on the promise of the automated office, but needs have changed," Mr. Santagati says. "When you look at where we are today and realize where we can be in the future, it's incredible. The potential to tie office functions together makes the market unlimited."

Software links big and small

By Richard Edel

It may shock International Business Machines to learn that its mainframe computers are an endangered species. One ad for a computer software company shows an IBM mainframe sandwiched between etchings of vanishing and extinct species with the tag line: "Save the Mainframe."

Of course, the ads created for Irvine, Cal.-based Mega Group by Cox & Burch Advertising, Newport Beach, are tongue-in-cheek. Nobody expects IBM's mainframes, 70% of current U.S. mainframe installations, to become museum relics. Mega Group and vendors like it would face extinction if demand were to dry up for independent software targeted at mainframe users.

But such is the ironic hyperbole that captures the attention of data processing professionals in the battle to market mainframe-to-microcomputer software, says Ned Madden, account manager at Cox & Burch. "Everybody is predicting that the mainframe is going to die because of the phenomenal success of personal computers. But Mega Group is saying, 'Why should it?'" Mr. Madden says.

That very question is dwelling in the minds of mainframe hardware and software makers as they design products for the offices of today and the future. Competing with the expanding capabilities and user friendliness of the microcomputer, they are gambling big stakes that some data processing functions will remain within the exclusive realm of the big machines. Roughly translated, these companies' task is to personalize the rather imposing mainframe.

A major hurdle is to make the mainframes more accessible and understandable to nontechnical people, says Peter J. McLaughlin, president of Chicago Soft, a Mega Group competitor. "Previous to this product type, most white-collar professionals had been swimming in reams of paper from data processing batch reports," he says. "All of a sudden, this tool comes along allowing direct access to the incredible raw power of the mainframe."

Randy Whitesides, Mega Group's vp-marketing, agrees, saying, "Before, you almost had to be a programer to use a mainframe. Our software opens the power and flexibility of a mainframe to anyone who can operate a personal computer."

For this reason, many of the dozen or so independent software companies selling mainframe-to-micro software links are basing their ad messages on the similarity of their programs to those available exclusively for personal computers.

Mega Group takes IBM mainframes off the endangered species list.

Mega Group's own health depends on the continued survival of mainframes.

Mega Group, for example, offers MegaCalc, which resembles VisiCorp's VisiCalc, Lotus Corp.'s Lotus 1-2-3, Microsoft's MultiPlan and other popular and pervasive microcomputer spread-sheet programs. Chicago Soft offers Dynaplan, which resembles VisiCalc, Lotus 1-2-3 and Sorcim Corp.'s Supercalc.

In addition, mainframe software vendors are racing to market easy-to-use applications software for file management, electronic mail, communications, statistical analysis, word processing and other functions.

The interactive software is targeted primarily at professional-level users in the top 1,000 corporations. It also has applications in large universities and government agencies. Prices for a spread-sheet package can range from rentals of less than $1,000 a month to $20,000 for permanent license.

Because software programs are copyrighted, buyers generally purchase only the limited rights to use them. On-Line Software International, Fort Lee, N.J., offers licensing for a family of products, called Omnilink, at prices of up to $30,000.

Interactive software differs from so-called batch run programs, an example of which might include payroll check processing, in that it allows users to selectively tap database information to prepare budgets, per-

(Continued on Page 18)

Targeting friendly users

The success of advertising software programs that link mainframes to microcomputers sometimes depends not on what is said, but who it is said to, says Peter McLaughlin, president of Chicago Soft.

"You have to do highly targeted advertising [such as direct mail] or you generate an endless stream of questions from people who couldn't use your product. You could tie up all of your resources explaining that the product is great, but it won't run on an IBM PC XT," he says.

The chief problem is that many software buyers confuse products targeted at mainframe users with those available exclusively for microcomputers.

A case in point is Chicago Soft's mainframe spread-sheet program, Dynaplan, which was designed to resemble micro-oriented products such as Lotus 1-2-3. While both programs perform essentially the same tasks, Lotus is sold to personal computer users while the much more powerful and costly Dynaplan is sold to data processing managers in *Fortune* 1,000 companies.

"There are millions of potential Lotus 1-2-3 buyers, but we would be happy if we reach a total [mainframe] user base of 1,500," Mr. McLaughlin says.

Complicating matters is the fact that at times it is difficult to determine which end users need spread sheets for microcomputers and which should have those for mainframes, says John Worthen, president of Focus Research Systems, Hartford, Conn.

The market for spread-sheet applications is growing quickly, he says, but most of that growth is in the microcomputer arena. Mr. Worthen estimates that 10% of some 12,000 domestic mainframe installations already have mainframe spread sheets—a small niche of the over-all market.

"The interesting thing is that as senior level analysts and managers become more computer literate, will this result in an increasing demand for much more sophisticated financial modeling tools?" Mr. Worthen asks. "And the droves of general management have never gotten near the stuff. What will happen if they

form financial modeling and analyze data.

The information may then be recorded on floppy disk or returned to the mainframe for processing and storage.

"It is perfect for one-shot, 'what if' analysis," Mr. McLaughlin says. "What effect would interest rates have on a company if they went from 10% to 18%? Or what if you changed your inventory from 30 days on hand to 15 days? These are really middle-management decisions requiring information that you would otherwise have to create by hand."

The market for such programs barely has been scratched. Total mainframe installations in the U.S. are expected to grow from about 61,000 this year to about 72,000 in 1986 with a corresponding increase in mainframe software sales over the same period of $6.3 billion to $10.5 billion, says International Data Corp., a Framingham, Mass.-based computer industry research company.

This year, U.S. corporate management information service departments will spend $100 billion, $34 billion of which will go to hardware purchases and $5 billion to software packages, according to *Fortune*. A survey by *Software News* estimates the annual revenue growth of applications software in 1984 at 28% and spread-sheet software at 37%.

But questions remain about the ultimate profitability of mainframe-to-micro products as stand-alone microcomputers continue to score significant gains in meeting office productivity needs.

Although micros will never match mainframes in terms of memory and power, the number of users who need that kind of memory and raw number crunching power may be very limited, says David Bunnell, editor and publisher of *PC World*, San Francisco.

"The fantasy is that somehow it would be useful if everyone who works at a desk is linked to the mainframe," he says. "I believe the stand-alone option and the ability to communicate with other desktop computers is far more important.

"If you're the chief financial officer," Mr. Bunnell says, "it is important that you be linked to the mainframe. But if you're a marketing manager, its value is debatable."

The importance of mainframes will remain relatively static in years to come, he says. "But that does not mean they will become less important." Others share his opinion.

"The big questions [are]: 'Is the mainframe kind of a dying thing? Are minicomputers and micros becoming a lot more popular?' " says K. Michael Frazier, project leader-financial management systems, U.S. House of Representatives Information Systems in Washington.

The House information center recently purchased a $13,000 spread-sheet program from Mega Group and another from Oxford Software, Hasbrouck Heights, N.J., he says. The software links are used by the House Office of Finance, which pays the authorized expenses of legislators and their staffs. A mainframe link was needed for cost projections, budgeting and data analysis.

The finance office had been using a minicomputer's spreadsheet, which proved slow, limited and ineffectual, Mr. Frazier says.

Source: InfoCorp

"There is much renewed enthusiasm [about working with the mainframe] since establishing the software link," he says. "Once we extract data the finance office needs, we remove ourselves from having to deal with it. They are free to choose the information they want at their leisure. Users can manipulate the data to their heart's content."

Mr. Frazier says the software packages take the burden off programers because they eliminate the need to write ad hoc programs to obtain information from the database. "The main advantage of the software is that it is capable of handling a great deal of information," he says. "As long as there are mainframes, I think there will always be a need for something like this."

Some software vendors worry that significant changes in demand for mainframe-to-micro software products may attract the attention and competition of suppliers of mainframe and personal computer software. VisiCorp, for example, recently teamed with Informatics General Corp. to market VisiAnswer, a program linking an IBM personal computer with an IBM mainframe database.

IBM markets a mainframe spreadsheet program called OxyCalc—suppliers say it has not had a major effect on their sales potential.

Fortunately for those mainframe software specialists who desire a low profile, the market is mostly overshadowed by the ballooning market for micro programs.

"The big bucks are definitely there for the microcomputer market, its support, service and technology," Mega Group's Mr. Whitesides says. With several micro software suppliers recording sales last year in the $100 million range, it is likely that major companies will seek that market, he says. Even if Mega Group's 1984 profits of $3 million double or triple next year, they are minuscule by comparison, he says.

If IBM decides it wants to totally control the business, "there is probably nothing we can do," he says. "I doubt very seriously that that will happen."

To explain his confidence in this assumption, Mr. Whitesides says it would take a huge investment to duplicate the research and programing time companies such as Mega Group already have expended.

A second fact is even more telling: A certain huge mainframe manufacturer just became a Mega Group customer, he says.

Targeting

(Continued from Page 16)

do? "It's really a confused market right now and this is a great big issue," Mr. Worthen says.

The issue has many facets, analysts say. One is the cost of mainframe applications programs.

For example, the price tag of a mainframe spread-sheet package could exceed $20,000. That compares with a less than $1,000 cost for the best micro spread sheets.

Other issues include how programs are set up on the mainframe, the amount of mainframe computing time they tie up and how to establish controls over access to sensitive database information, experts say.

At least one marketer is trying to cover all the bases in its advertising and marketing. On-Line Software, Fort Lee, N.J., is offering entry-level mainframe to micro software that can be upgraded with a second program, providing a broader range of sophisticated functions. The package is a "generic" link, meaning it can work with existing programing and stored data, an important factor.

"We provide two versions of the product to reach the segmented users in the upper end of the market and at the lower end where most of the action is," says Spencer Rutledge, director-sales and marketing for On-Line.

"Some competitive products were offering a fraction of the function at a fraction of the cost," he says. With a powerful English-language data access and retrieval system—the mainframe's traffic cop—On-Line's package efficiently manages information into and out of the mainframe. It also supports personal computer communications via built-in electronic mail, which means "the personal computer is no longer an island," he says.

At least one data processing manager from a company very near the top of the *Fortune* 500 is impressed by On-Line's approach.

"I'd like a generic program [that works with all stored data]. I don't like the idea of buying several [mainframe-to-micro] links. I'd like to restrict users to a few packages that we know how they work," Mr. Rutledge says.

The data processing manager also says the near future looks bright for mainframe applications programs. "There is a tremendous pentup demand for these automated tools. Users want them today." —*R.E.*

Taking the next logical step

By Kurt Hoffman

The next generation of computers will lead much more than a mundane existence of repetitive number crunching. Thus far, conventional computing has lacked any semblance of actual knowledge or logic—lots of data, but no ability to reason with or apply that data. This task has been left to humans.

Changes are in store, however, as decades of research on artificial intelligence begin to bear fruit. One example is a knowledge engineering system that has yielded startling results diagnosing illnesses written about in the "New England Journal of Medicine." These early developments only foreshadow the potential of applying knowledge and logic to vast sources of data.

A few basics—very *basic* basics—might help. "Artificial intelligence," says Rosann Stach, manager-corporate development and public relations for Teknowledge Inc. of Palo Alto, Cal., "is the subfield of computer science that is concerned with symbolic reasoning and problem solving. It's a science of concepts and techniques."

The fundamental difference between artificial intelligence's symbolic processing and basic computer operations recently was explained by Abraham Hirsch, product marketing manager at Symbolics Inc. "Data definitions and the allowable relationships between data elements and files are narrow, literal and unforgiving .... Computers can go on crunching numbers indefinitely without getting bored or tired, but without getting any smarter."

On the other hand, he says, artificial intelligence's symbolic processing "seeks to emulate the richness of human thought, however crudely, by enabling computers to manipulate arbitrarily defined objects or symbols made up of lists of associated properties.

"Symbolic processing," Mr. Hirsch says, "therefore has two advantages over numerical processing—flexibility and the ability to accommodate uncertainty and extreme complexity."

The majority of artificial intelligence research traditionally has taken place in academic institutions such as Stanford University, Massachusetts Institute of Technology and Carnegie-Mellon University. Consequently, both the pool of experts and the available resources have remained fairly limited.

The growing attraction of artificial intelligence to many corporations, as well as the Pentagon through its Defense Advanced Research Projects Agency, is causing problems for the artificial intelligence research community. Institutions and other entities involved in basic research are hard pressed to bid for the talents of the limited number of experts. Academics have expressed concern that the brain drain is leaving basic artificial intelligence research foundering.

This is happening when recent gains in hardware and software technologies are bringing some of the most basic artificial intelligence applications within grasp. The development of symbolic computing machines—which efficiently process LISP, the specialized artificial intelligence computer language that expresses information in symbolic terms—has heightened corporate awareness of the potential.

However, not many commercial applications have been developed, says Susan Thomas of Quintus, a Palo Alto, Cal., software company. "Most of the activity is going on in large corporations, and they are developing applications for their own internal use."

Because of the field's youth, many of the companies involved are devising rather esoteric technical applications such as computer-aided design and com-

Chips are down for semiconductor industry

By Cathy Curtis

"Every chip sells for $5. Except for those chips that sell for less than $5."

This is Gelbach's Law, named after Santa Clara, Cal.-based Intel Corp.'s senior vp-director-corporate sales, Edward Gelbach. What it doesn't explain is that those circuit-laced, fingernail-size chips, which serve as the memory and brains of electronics products, are available at movie ticket prices only a few years after they were introduced at the going rate for season subscriptions to the opera.

The method behind this mad price cutting—some chip prices have plunged 70% within a year—is the semiconductor industry's remarkable production curve, which decrees that prices fall 20% to 30% for every doubling in production capability. Meanwhile, the number of circuits on a single chip has been doubling every year for the past two decades.

After a 1981-82 slump, the industry has been enjoying a boom. Last month at a Semiconductor Industry Assn. press conference, Irwin Federman, president of Monolithic Memories, Santa Clara, Cal., predicted "awesome growth" for certain segments of the chip market.

This year, the SIA forecasts a 48% jump in sales, to $26.3 billion, which should make the big five U.S. chip makers—Intel, Motorola, National Semiconductor Corp., Texas Instruments and Advanced Micro Devices—pleased as punch.

For the six quarters following the 1982 slump, chip makers have sold everything they could produce.

The boom collapsed during the last quarter into a mush period for sales.

Only a few months ago, a six-month wait by customers for commodity components was not uncommon. In today's supply-heavy market, it is possible to buy certain items "off the shelf." That's life in the fast lane of the semiconductor industry, in which a quarter can seem like forever.

In addition to suffering from more supply than demand, the chip industry has become increasingly capital-intensive in the past few years. The specialized machinery that manufactures the chips has grown more complex and costly. The price-tag of one line of machines that slice wafers into chips—fabricated out of half-millimeter-thick wafers of purified sand—has jumped from $20 million to $60 million in a few years. The big five chipmakers will spend an estimated $874 million for additional plants and equipment this year.

Chips are not the industry's only products. Others include electron tubes and resistors. But chips represent the leading edge in advanced semiconductor technology.

Not all chips are created equal in the razzle-dazzle department, however. At the bottom of the heap are commodity chips, notably the memory chips that store data and feed it to the microprocessor "brains." Decisions to buy these chips commonly are made by a customer's purchasing department, which is typically guided by price.

"They're like jellybeans," says Jan Rey, an analyst at Dataquest, San Jose, Cal. "They're a dime a dozen." These chips, which have a product life of about four years, represent the most vulnerable end of the business, the first area hit between the supply and demand swings that can make one quarter so different from the next.

Next in line are the microprocessors made for general applications. Every member of a microprocessor "family" offers some slight edge over its siblings. Intel's 80286 is the 16-bit successor to the 8088 and 8086; Motorola's 32-bit 68020 is the latest entry in the sophisticated 68000 family.

The ultimate success of these chips hinges on whether they are designed into industry-leading products. Intel is the blue-ribbon winner in this contest. In 1980 it came out with the 8088, selling the chip to International Business Machines for its PC. Now the 8088 has become the *de facto* industry standard, the brainpower of a host of other personal computers.

IBM, which now owns a 20% share in Intel, will be using the

Logical

(Continued from Page 21)

puter-aided engineering for semiconductor and computer manufacturing. Beyond this, the other players tend to be large corporations that are on the leading edge of their industries, Ms. Thomas says.

"It's not really as much the type of industry as it is the type of company," she says. "Innovative companies are looking into artificial intelligence."

For example, Ford Motor Co., General Motors and Chrysler all have active artificial intelligence programs. "The automotive manufacturers have been very interested, largely because their industry is highly competitive; they have the available financial resources to assemble and equip effective research teams, and they have very heavy requirements for automating the design process," Ms. Thomas says.

Also, Japan has an aggressive cooperative research program between the government and Japanese computer marketers. One thing U.S. auto makers and other manufacturers cannot afford is to let the Japanese become even more competitive in research and design.

Most of the commercial artificial intelligence systems are being offered by small companies that apply, package and sell the research. "The people who are going to be out there with marketable products are the spinoff companies founded by or built around artificial intelligence experts who at one time were performing basic investigation for an educational institution or large corporation," Ms. Thomas says.

If someone is a real whiz "and they want some independence, chances are you'll eventually find them in a small company, possibly one they started themselves," she says. "It's a pattern that happens all the time in the computer industry." Smaller companies have attracted millions of dollars from venture capitalists in the past several years and, in some cases, have had major U.S. corporations buy into their activities.

Artificial intelligence has four basic commercial fields: Natural language processing, computer vision, computer hardware for symbolic processing and knowledge engineering. Knowledge engineering, which encompasses "expert systems," is probably the most familiar, as well as the most fantastic, to the general public.

Although knowledge engineering is barely into the first stage of its infancy, industry analysts agree that its rapid growth is certain. "Knowledge engineering is the process of achieving expert problem-solving performance from computer systems by incorporating human knowledge and experience into those systems," Teknowledge's Ms. Stach says.

80286 in its PC AT desktop computer. Able to handle 16 million pieces of computer information, the 80286 may be the next silent star of the personal computer world.

The area of biggest growth today is in custom chips made for specialized computer applications. Some analysts think the market for microprocessor chips for graphics-oriented personal computers will be the next bonanza. Now these chips are very expensive to produce. A big demand will push the price down, but currently the computers are too expensive to attract much consumer attention.

Specialized microprocessors are sold with a package of technical support. "That's why Intel is ahead," says analyst Bill Frank at Infocorp, Cupertino, Cal. "[They have] a sell-to-the-engineer mentality."

Typically, it takes four to six weeks to develop a new microprocessor; more sophisticated varieties may take 1½ to three years. Intel's George Alexy, product market manager-high-performance microprocessors, says his company often will disclose information at an early date so customers can forecast future product designs.

"When the 8086 and 8088 were designed," he says, "we were disclosing information on the 80186 so that they could anticipate the capabilities of the next generation and plan for it in the hardware and software design."

In manufacturing a chip, the prime concern "is keeping within a common architectural family so as to be certain to preserve as much software in the market," Mr. Alexy says. Another advantage is "not having to retrain people every time a new microprocessor is developed." A chip maker generally will introduce a general purpose product to establish a software and customer base, and then add custom features in markets where the volume justifies the investment.

Chips typically are advertised within a quarter of a product's introduction, when the chip maker can deliver sample quantities but before volume production is up to speed. Sources esti-

(Continued on Page 24)

Resource & Development Corp., Norwalk, Conn., the 1985 knowledge systems market, including hardware, software and services, is estimated at $220 million. The total 1993 market is predicted to top $8.5 billion.

A knowledge engineering system consists of a vast database of information plus if-then rules that capture the practical applications of knowledge.

The end result: An enormous amount of information as well as knowledge of the practical applications of that information can be made available consistently and efficiently to a broad spectrum of people. Or in the case of the expert system, the highly specialized knowledge and experience of one person in an organization can be shared.

"An expert system is a program contained in a database that includes the knowledge and expertise of an individual or group of individuals in a specific topical area," Ms. Thomas says. "The expert system provides the nonexpert user access to that information in a relatively simple way, usually through an interactive dialog in a command language that is English or very close to English.

"The core of the artificial intelligence system is the ability to draw logical inferences between the facts, or the objects of facts, that are in the data base," she says. That process is an attempt to emulate human thought.

The real-world applications of knowledge engineering systems are mind boggling. From medical diagnosis to financial risk management decisions to automotive engine trouble shooting, the possibilities are endless. Several companies reportedly are working on expert systems for nuclear power plants that will explain and recommend responses to emergency conditions and then intelligently react.

Significant market-related trends are forthcoming, Ms. Stach says. "Many of these tools are being sold to researchers, and we expect to see sales moving more to the applications builders—the large management information systems companies and large corporations, as well as the software and computer vendors," she says. "The market will tend to evolve out of the research community." She also expects the end user market to grow.

In a few years, this type of sales activity probably will be a mere drop in the bucket as artificial intelligence research accelerates, fueled by corporate and venture dollars and the enthusiasm of expanded applications.

"The scope of the artificial intelligence field is really huge—we're talking about the next generation of software development," Ms. Thomas says. "It's not this separate little market that the general public seems to be focusing on right now. There's a lot of interest and activity in expert systems, but you're not hearing about the other 90%." ■

If you're selling SMALL COMPUTERS to BIG BUSINESS...

you must reach all 3 groups

Before you spend all your dollars on top management and the technicians, be certain you've covered the administrators, who make their offices *work*. They can make your sale—or break it, if they're not sold on you, your products, your training support, or your follow-through and service.

TOP MANAGEMENT

Industry giants cross lines

By Cara S. Trager

International Business Machines may be enjoying its leadership position in the office computer market, but it's clearly not resting on its desktop laurels.

With the entrance of American Telephone & Telegraph into the personal computer market last June, IBM may well have a monkey on its back whose potential strength may equal, if not exceed, its own. Although New York-based AT&T has miles to go in pursuing the competitive corporate computer market, let alone overtake IBM's lion's share of it, industry analysts say AT&T could emerge as a formidable competitor in the long-term.

Following the divestiture that allowed it to branch into computers, AT&T introduced six machines in March. These ranged from a superminicomputer used in telephone networks to a desktop supermicrocomputer that can support 18 terminals. In June, the company launched its personal computer, along with a local area network to tie electronic office machines into a single system, new software applications, four protocol converters and six printers.

Additionally, the telecommunications company purchased 25% of Olivetti Corp. in December, 1983, to establish a worldwide distribution channel as well as to share manufacturing expertise. The AT&T Personal Computer 6300 resulted from their joint efforts.

"AT&T is acting to get its house in order, and it's moving in several directions at once," says Ulric Weil, an analyst with Morgan Stanley in New York.

To be sure, IBM isn't standing still, either. The Armonk, N.Y.-based computer giant has been engineering aggressive acquisitions, launching new products and reducing prices. The company recently proposed to fully acquire Rolm Corp., a Santa Clara, Cal.-based telecommunications equipment producer; Big Blue currently owns 23% of Rolm.

Analysts say the Rolm acquisition would give IBM a substantial boost in the trend of combining voice and data transmission technologies. "IBM needs communications capabilities to tie hardware—the mainframes and office systems—together, and that's the reason it's doing the Rolm deal," says Ken Sobel-Feldman of the Gartner Group, a Stamford, Conn.-based computer industry consultancy.

The proposed Rolm acquisition also represents IBM's effort to strengthen its position in a field that is AT&T's bailiwick. The move puts IBM squarely in competition with AT&T, which entered the computer market after cultivating a major share of the PBX business.

"Over the long-term—about two to three years—if all goes well, AT&T will be a major competitor to IBM, and IBM is acting as if it expects it to be," Mr. Weil says.

IBM has increased its share of Intel Corp., a supplier of critical microprocessor and memory chips, to 20%. Analysts say the link gives IBM an advantage in producing mainframe computers, reducing its dependence on chip shipments from Japanese companies.

Both the Rolm and Intel ventures reflect IBM's eagerness to accelerate product development by acquiring resources and talent, rather than relying on inhouse efforts.

At the same time, IBM is moving full speed ahead, spinning out products that could keep many competitors, especially a newcomer such as AT&T, at more than an arm's length. The PC AT (Advanced Technology)—reportedly twice as fast and offering three times more memory capability and four times more data storage than most business-oriented desktop computers—is perhaps the most significant introduction. Some observers say the model was named "AT" as a subtle dig at AT&T, although IBM sources deny this.

IBM bites the competition

Share of office personal computer sales

	1984	1983	1982
1. IBM	40%	30%	18%
2. Tandy	11	10	11
3. Apple	9	19	22
4. Hewlett-Packard	5	6	5
4. Compaq	5	3	—
6. Wang	4	—	—
7. Zenith	3	2	3
7. DEC	3	3	—
Other	20	27	41

Source: Future Computing

The PC AT has emerged as the new computer with which other suppliers must reckon. The relatively low-price unit—retailing at $3,995 for the base model, $5,795 for an enhanced version—generally is regarded as key to IBM's entrance into office computer networks and software. As a result, many suppliers of IBM PC-compatibles are expected to readjust their lines to market machines that impersonate the AT.

Whether AT&T will be among the vendors supplying a version of IBM's potentially hot machine remains questionable. For now, however, it seems unlikely.

"We don't need to respond to the AT—our 3B2 and PC Interface give superb price performance with a number of users involved," says Stuart Mencher, director-data systems marketing at AT&T Information Systems. "What we announced on June 26 was just the tip of the iceberg. We plan to announce new products every three to six months."

IBM is also on a nonstop course of product introductions. This year, the company introduced TopView, a software that allows the user to perform several tasks concurrently; Xenix, a multiple-user operating system for the PC AT; Cedar, a combination telephone-computer terminal, and two major business software series.

Beyond its acquisitions and new products, Big Blue is making headlines with its juggling of prices. The company, whose goods typically are priced as premium products, recently announced sharp reductions on some of its wares. For example, the price of the PC, complete with 64K memory and a 360K disk drive, was reduced from $2,105 to $1,185. Industry observers generally concur, however, that AT&T's wares remain competitively priced with IBM's.

Analysts predict that the PC AT is sure to spark price-cutting in an industry whose prices virtually are guaranteed to drop 15% to 20% annually. "IBM is generally higher priced—it's the umbrella for the market—but it still gets good margins," says Robert J. Conrads, director of McKinsey & Co., a management consulting company in Los Angeles. "The umbrella isn't as large as it used to be; only very efficient products can be produced."

Although IBM refuses to discuss its competition in the press, company sources acknowledge that some recent steps were taken in response to market conditions. "IBM announces new products and price reductions based on business decisions, and a lot of things are involved," says Michael Reisman, IBM communications specialist. "But to say IBM is doing all this in reaction to competition is wrong. That's not the only reason."

Nevertheless, such moves do serve to further strengthen IBM's already enviable position in the office computer market. As analysts see it, by moving to plug gaps in its product line, IBM stands little chance of losing its tight grip on the corporate market.

The company's distribution is vast and varied, selling wares through IBM Product Centers, as well as through authorized IBM personal computer dealers, personal computer and software dealers and value-added dealers and retailers. Additionally, IBM sales representatives pitch larger volume accounts.

Mr. Conrads also says that as companies require more technical expertise in communications and move data processing personnel into telecommunications functions, Big Blue's old clientele could be among its newest target customers.

Despite everything it has going in its favor, IBM is not necessarily a shoo-in to become the ultimate computer king. AT&T has potentially powerful

Chips

(Continued from Page 23)

mate that the cost of marketing a chip is 10% to 15% of projected revenues. As Jeff Nutt, technical marketing manager at Phoenix-based Motorola Semiconductor Products Sector, says, "Most of our customers spend a lot more—they're going for the general marketplace."

The pricing of chips is "a very touchy situation," according to Dataquest's Ms. Rey. "A company will advertise the price of a chip as close to $400, but if you want to buy it, you can pay from $400 to $0. The [average selling prices] you hear fluctuate depending on circumstance," she says.

Those circumstances normally are the quantity of an order, taxes added by import-export arrangements and the position of the chip in its life cycle. For quantities of less than 1,000 units, large manufacturers defer to distributors, who traditionally account for some 20% of sales.

Motorola, Intel's major competitor, has staked out 16 of the top 30 chip markets, according to industry analysts. Other markets that the company will target include robotics, high-volume data processing and computer-aided design and manufacturing. Successful at making both memory and microprocessor chips, Motorola is known for its marketing flair.

Motorola's 68000 chip was chosen by Apple Computer for its Macintosh, and the new 68020 powerhouse is rumored to be the chip of choice for the next version of the Macintosh. "Eventually, as time goes on, [the 68000] will become your common workhorse," Mr. Nutt says. On the market for four years, it has developed the all-important software and user base that keeps a middle-age chip blooming.

At the moment, Motorola believes it can rest on its 68000 chip, which is capable of routinely executing 2.5 million instructions a second and up to 8 million a second in single bursts. However, Santa Clara-based National Semiconductor, which came out with a less complex 32-bit chip last year, has teamed with Dallas-based Texas Instruments to create a new superchip.

"It's not clear what 32 bits really brings to the party," Intel's Mr. Alexy says. More performance isn't everything from Intel's view, especially because the market is still largely unable to use such a powerful performer. "Going to 32 bits is like trying to put a truck diesel engine in your car when you need a four-speed transmission," he says.

Statistics are being tabulated on the end-user market for chips. A few years ago, the unexpected growth of the videogame market was big news; during last year's explosion of the personal computer market, "you saw a lot of eight-bit microprocessors grow a lot," Ms. Rey says.

Because some 24 semiconductor companies took a beating during the 1970s when they attempted to cash in on the digital watch craze, much larger industries are being targeted today. Although chips can be found in everything from videocassette recorders to washing machines, analysts predict the biggest growth areas in industrial, automotive and telecommunications applications.

Computer manufacturers choose a chip depending on how it conforms to industry standards, "which is very often as simple as whatever IBM is choosing," says a marketing manager at a small Silicon Valley computer company. "You must conform to existing standards [if] you want the largest potential universe of customers. At one point, though, there isn't any bandwagon—just all those choices. You're assessing market conditions two to three to four years from now."

During the big boom, personal computer manufacturers became used to queuing up for their chips, a waiting game that depended on the size of the order, the availability of ready cash and previous relations with the chip maker.

To meet customer orders and assure broad geographic distribution, chip makers routinely license other chip suppliers—often Japanese semiconducter companies—to serve as second sources. Sometimes this results in joint product development; Intel has had a 10-year technology exchange relationship with Advanced Micro Devices.

The widely publicized shakeout among customers has been thought to be one of the chief factors—along with recent record high shipments—behind the sudden plunge in chip sales. "If there's a backlog on chip orders, when it starts swinging around, if a company stays in business, it can renegotiate the contract," Infocorp's Mr. Frank says.

"But if it's in Chapter 11 there's nothing you can do."

Computer companies tend to be "overly optimistic," Mr.

allies in the fledgling regional telephone companies such as Nynex, Ameritech and Pacific Telesis.

AT&T officials acknowledge that the former subsidiaries represent a possible distribution opportunity. However, other vendors also have a shot at these independent regional companies. Rather than rely on the regionals, AT&T is determined to become a regular player in traditional computer outlets—specialty stores, value-added dealers and value-added retailers.

Already, the company has won shelf space in Sears Business System Centers, MicroAge, ComputerLand, CompuShop, Genra, The Computer Store and Amerisource. With its products in 600 stores to date—already exceeding interim projections—AT&T is optimistic that it will reach its yearend goal of 900.

Still, the giant telecommunications company has a long way to go in catching up with the rest of the market.

"AT&T is strong in the office, but it's a hell of a challenge to crack the computer market," says Stephen T. McClellan, vp, Salomon Brothers, New York. "It's easy to come up with products—as IBM is demonstrating with Rolm—but AT&T must learn how to market and sell."

David Bunnell, chairman-publisher of San Francisco-based PC World Communications, also says IBM holds the key cards—selling experience and marketing expertise—in the computer game.

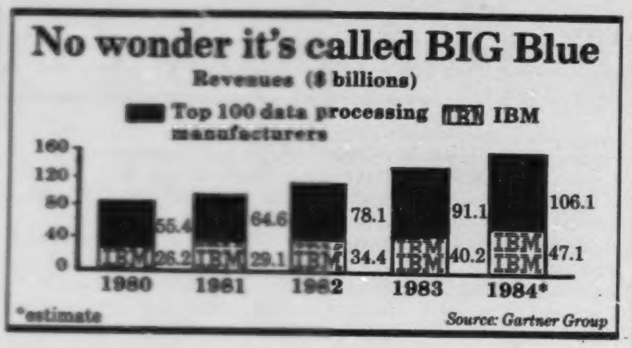
"IBM has lots of advantages. It's been a competitive company and a very successful one at that. Meanwhile, AT&T has been a protected monopoly that must learn to compete in the market. If I were to bet, I would put my money on IBM. No one has ever had to give it subsidies."

To such statements, AT&T's Mr. Mencher says: "Most analysts look at us as a phone company with a phone company mentality."

On the contrary, he says, for the past five years, AT&T has been gearing up for the divestiture and the company's subsequent entrance into computer marketing.

AT&T is ready to meet the challenge, Mr. Mencher says. Company sources say its Unix operating system, along with its other products and software, will position the company as an industry power. The Unix system, designed for a multi-user environment for any size computer, is being used by more than 70 manufacturers in 150 models.

AT&T also has come to the market with PC Interface, a new software program that allows up to 16 IBM-compatible computers, including AT&T's personal computer, to share the resources of its 3B2 machine, which utilises the Unix system.



No wonder it's called BIG Blue

*estimate

Source: Gartner Group

But while many industry observers say AT&T's Unix operating system is the wave of the future, Mr. Bunnell says he thinks otherwise. He calls Unix "a joke," noting, "It's too complicated, way too awkward and confusing to implement and use."

But, by virtue of its size and telecommunications expertise, AT&T still represents a force IBM must reckon with sooner or later.

"IBM has to be concerned about communications and computers merging. In the future, there will be only one desktop appliance. Today, it's the telephone and the second one is the computer. The future will just see one device," Mr. Bunnell says. "Whether it's IBM, Apple or AT&T, the one who controls the communications network will be the one . . . on the desk."

Mr. McClellan doesn't write off AT&T either. The communications giant, he says, will enjoy a long and prosperous life in the computer business. "AT&T will be No. 10 by 1990 in computers. They have enough resources to achieve that end."

Frank says. A chip maker often ends up with more product on its scheduled shipments than its customers can accept.

Currently, the ratio of average orders to average sales has dropped to unusual lows. During the past couple of months, some computer companies have dumped their surplus chips on the "gray market."

The present slowdown may be just a hiccup in the over-all trend toward booming sales. Adam Cuhney, vp at New York-based Salomon Brothers, says, "The washout is upon us or possibly behind us," with a coming turnaround in orders that "could be as surprisingly steep" as the dramatic growth of the personal computer market a year ago.

And, as Intel president Gordon Moore said recently, "The main aspect of semiconductor technology is that it is so broadly applicable. All that it has to do is to be applicable and reasonably inexpensive, and it finds its way into every little nook and cranny."

Take Off.

Launch sales in the nation's 10th largest market with the newspapers that are in command.

Atlanta is now the 10th largest MSA in the country. And counting.

And while network television viewership declines, Atlanta Journal-Constitution readership and circulation are up. We're now reaching over 1,000,000 Atlantans on a single Sunday. Combined daily readership has grown 21% over the past two years. And circulation is taking off—with strong increases seven days a week.

So if your mission is to reach Atlanta with power to spare, buy the Atlanta Journal-Constitution and come along for the ride.

Because the sky's the limit.

Nielsen attacks vcr zap factor

By SUSAN SPILLMAN

NEW YORK—Capitulating to advertiser pressure, A.C. Nielsen Co., Northbrook, Ill., will add a new report to its national quarterly tv sweeps ratings that will account for videocassette recorder taping, perhaps as early as this month.

During the four four-week sweeps periods, Nielsen will report two ratings for every tv show. The first will be the traditional rating. The second will break out only the number of homes recording, rather than watching, a program, according to Stanley Seagren, product development manager, Nielsen Television Index.

If the difference in the two ratings proves significant—and it isn't expected to be so initially—Nielsen will consider making changes in the way it reports all tv ratings, said Mr. Seagren.

Currently, Nielsen metered ratings include vcr recording. But advertisers, most notably General Foods, have complained that this method inflates the ratings, which serve as the basis for tv advertising costs.

The argument is that not all programing recorded on vcrs is watched. When the programing is played back, viewers often zap out commercials by using fast-forward controls.

The new Nielsen report could have wide-ranging impact on both the negotiating of advertising time and the setting of prices on network television. By breaking out the videotaping of programing, the report will provide advertisers ammunition to confront broadcasters on the issue of overpaying for previously measured viewing. Advertisers can be expected to use the report as a wedge to drive down prices.

Broadcasters could be faced with having to decide which Nielsen measurement to use when setting prices. If the new service is used, broadcasters in the long run will have to raise their cost-per-thousand rates or face the loss of considerable revenues.

The new Nielsen service is important for two other reasons. First, it will give advertisers an up-to-the-minute measurement of the impact of vcr usage on the segmentation

$20 million effort perks

GF 'coffs' up NutraSweet

By GAY JERVEY

General Foods, the White Plains, N.Y., company that pioneered multiproduct use for aspartame, will get there first again next month when it christens a new line of low-calorie International Coffees with NutraSweet.

Although GF declined to release budget figures, trade sources expect the company to spend $20 million during the first year, thus exceeding 1983 expenditures for the sugar-sweetened International Coffees brand, estimated at $15 million.

Cited by Wall Street as yet another example of GF's renewed aggressiveness—not to mention the seem-

Monday football beer bust seen for '85 season

By VERNE GAY

NEW YORK—The two-beer advertising exclusivity hold on ABC-TV's "Monday Night Football," which has generated controversy from Detroit to Washington because of suggested antitrust violations, could be a thing of the past by next year, according to sources.

But it will not be the threat of litigation or government intervention that ends Miller Brewing's and Anheuser-Busch's three-year reign on the broadcast.

This time, the sticking point is money: ABC is expected to press for similar, if not increased, advertising rates on the prime time sports program in 1985, even though "MNF" has suffered a severe ratings decline this season. The price of exclusivity advertising on football has less to do with ratings than advertiser demand for the programing. ABC, therefore, reportedly could increase the minimum exclusivity buy from three minutes to four minutes per game.

If the scenario works as it did in 1981, when Anheuser-Busch broke Miller's stranglehold on "MNF," the result will be the inclusion of

'Beer'—The movie

Ad world tweaked in spring spoof

By BOB MARICH

Some of Madison Avenue's own are getting ready to serve up a movie that spoofs the art of beer tv commercials and the advertising business that brews them.

The film is Orion Pictures' "Beer," targeted for a spring, 1985, release. Director Patrick Kelly, a newcomer to movies, is an agency copywriter turned tv commercials director best known for his work on the Federal Express campaign. Fourteen actors from Mr. Kelly's tv commercials are filling supporting roles in the movie, too.

"I'm looking forward to going beyond 30 seconds," Mr. Kelly said in an interview. "I just get going with a commercial, but then I have to quit. Usually, commercials would work great in 35 seconds."

Mr. Kelly, 43, had a hand in Federal Express both as an Ally & Gargano copywriter and then later, after he left the agency, as a New York-based independent tv commercials director. Mr. Kelly's associates say his 22-year advertising career is marked by a penchant for injecting offbeat humor in his work. "He's a comedy junkie," says Mike Tesch, a colleague still at Ally & Gargano.

In "Beer," a hard-driving female agency executive, played by actress Loretta Swit of "M*A*S*H" fame, concocts a campaign for the failing Norbecker beer brand. The campaign catapults three "regular guys" to stardom as presenters in its commercials. "When it's time to get lucky, just whip out your Norbecker" is a slogan used to promote a macho image for the beer.

L. Swit

D. Wohl

Mr. Kelly insists "Beer" will be a simple, straightforward comedy. But other sources say the film heaps on Madison Avenue the same type of biting, black-humor satire that the movie "Network" aimed at the tv business.

In "Beer," Ms. Swit's character is a hard-boiled, ambitious ad agency executive who, when the three tv commercial stars are lost in a plane crash, crassly responds by planning an elaborate funeral as a publicity stunt. When it's

Booze ban meet: No High Noon yet

By STEVEN W. COLFORD

WASHINGTON—It was not the guns-blazing shootout that many in the advertising and alcohol industries anticipated. But the second Department of Justice meeting on alcohol and drug abuse shed some light on how widespread the ban-the-booze movement is—not very—and how uninformed many of the less hard-line citizen and consumer groups are of what the industries and media are doing in the way of programing and public service efforts.

The meeting of citizen groups such as the National Council on Alcoholism, Students Against Drunk Driving and the B'nai B'rith Youth Organization also failed to produce a clear portrait of what Justice intends to come out of the four sessions.

The first meeting last month was for alcohol advertisers and the media, and the third, later this month in New York, will focus on businesses that have implemented programs to deal with employe drinking. The final meeting will be for professional health groups.

An attempt at last week's meeting by officials from the department's division of juvenile justice and delinquency prevention to bring some unanimity from the disparate voices failed.

When James Wootton, deputy administrator, tried to sell the citizen groups and representatives of the media, alcohol and advertising indusries on the idea of a statement of purpose, the meeting bogged down into battles of semantics and philosophies.

The biggest stumbling block was the department's propensity to

Quaker may join growing parade of health claims

By DAVID SNYDER
Crain News Service

KANSAS CITY, Mo.—If medical research programs come up with the right answer, Quaker Oats Co. soon may suggest its oat products can reduce cholesterol.

But top executives for the $3.3 billion Chicago company said after its annual meeting here last week they won't give the final go-ahead for a health-oriented marketing strategy until medical claims linking oat bran to reduced cholesterol levels are confirmed by additional research. More conclusive findings are expected soon from at least two university research projects, partly funded by Quaker.

A Quaker ad campaign would come as interest in health claims by food producers has skyrocketed. Last month, Battle Creek, Mich.-based Kellogg Co. launched a controversial new ad campaign suggesting its All-Bran high-fiber cereal can reduce the risk of cancer (AA, Oct. 29, *et seq.*).

Regardless of adverse publicity created by the Kellogg campaign, observers agree a similar Quaker campaign stressing cholesterol benefits could create a major new selling point for its extensive line of oat bran and oatmeal items.

"We will certainly try to put [the research findings] to use," said William Smithburg, chairman and chief executive officer. "But we want to make darn sure we have our ducks in a row and that we have clearly documented our claims."

Quaker is funding research by nutrition experts at the University of Kentucky, University of Toronto and at Northwestern University.

So far, findings by the Kentucky research group indicate that con-

Eggert link forged

DYR goes Deutsch

By DENNIS CHASE

DYR Worldwide, making its first move to gain Japanese clients in Europe, announced today it is linking with R.W. Eggert GmbH, the second-largest independent agency in Germany.

The nonequity agreement is DYR's first link with an agency other than its parents, Young & Rubicam and Dentsu. But agency officials decided a link with a major German shop was needed in order to lure major Japanese clients in Germany.

"If we go into a market, it can't be as the 55th-largest agency," said Alexander Brody, DYR president-chief executive officer.

DYR, a 50-50 joint venture owned by Young & Rubicam and Dentsu, will bill $300 million this year, or 50% more than 1983. Eggert, the 11th-largest agency in Germany, billed $65.3 million last year.

Mr. Brody said the agency has assigned Fumio Oshima to the Eggert office to go after blue-chip Japanese clients.

"Our prospects include anyone on Dentsu's client list, which means all leading Japanese companies," Mr. Brody said.

In Eggert, Mr. Brody has chosen a fiercely independent German

JWT not sure which theme won High Life

By STEWART ALTER

That Miller High Life is going to be a hard advertising puzzle to solve is best confirmed by examining the single idea that won the $50 million account.

There wasn't any.

J. Walter Thompson USA's presentation that last week brought it the creative assignment for Miller Brewing's High Life brand (AA, Nov. 15) was an array of "very, very different" creative ideas, some of which Miller will now put into test.

"I think what was most interesting to them was the breadth of the thinking on the creative work and that we demonstrated a good understanding of the beer business," said JWT/USA chairman Burt Manning.

That Thompson's presentation succeeded in establishing its credentials as a savvy beer shop was a particularly sweet part of its High Life triumph.

The JWT team with the most recent beer experience, the Chicago-based group that had been assigned to Adolph Coors Co.'s Herman Joseph's brand, was kept on the bench while the rest of the Thompson system contributed ideas to JWT's High Life team.

The quarantine on the Chicago Thompson beer unit was "disturbing," Mr. Manning said, though Thompson had agreed to it after it quit the Coors business to pursue

World News Roundup

LONDON—**The British government**, to the dismay of the pharmaceutical industry, plans to chop $130 million from the National Health Service's budget next year by telling doctors to prescribe generic drugs for common ailments such as colds, indigestion and anxiety.

OTTAWA—**The new conservative Canadian** government has terminated Canadian Media Corp., which handled the government's $45 million media buying account. No replacement has been named.

LONDON—**Ogilvy & Mather International** has bought Trenear-Harvey Bird & Watson, which claims to be largest direct-marketing agency in the U.K. THB&W will be merged into Ogilvy & Mather Direct and will have combined billings of $26 million.

BERLIN—**Brinkmann A.G.**, a subsidiary of Rothmans, has picked Team/BBDO to handle its $6 million Lord Extra filter cigaret account, which pulled out of Foote, Cone & Belding in October.

MELBOURNE—**Atari Inc.'s** principal Australian distributor, Futuretronics Australia, was placed in receivership—the first major casualty in the videogame/home computer market here. Futuretronics owes McCann-Erickson $400,000 and Concord Advertising $130,000.

ZURICH—**Peter M. Schneeberger** has been ousted as president-chief executive officer of Ringier A.G., Switzerland's largest publishing enterprise, and replaced by two sons of founder Hans Ringier.

LONDON—**Coleco Industries** reportedly is pulling its videogames and Adam computer out of the U.K. market. The Adam computer made its debut in the U.K. this summer.

Bergin repels British invasion

By JOHN J. O'CONNOR

SCOTTSDALE, ARIZ.—Thanks to a remarkably insightful presentation by McCann-Erickson U.S.A. president John Bergin, America's creative reputation has won a victory on a scale akin to the Marines' liberation of Grenada.

In debating the "bloody Brits," two top executives of Saatchi & Saatchi Compton Ltd., London, at the Camelback Inn here, the acid-tongued Mr. Bergin, who characterized the confrontation as a "public 'smugoff,'" argued that great creative work is not confined to any country.

On the other hand, Terry Bannister and Roy Warman, joint managing directors and chief executive officers of Saatchi & Saatchi Compton, had come to the Assn. of National Advertisers' 75th annual meeting to show why "the U.K. is the fountain of creativity," Mr. Bannister observed. He drew laughs with the afterthought, "but not acknowledged by the French." Pity he and Mr. Warman did not bring along a larger supply of such bon mots to blunt the Bergin tour de force.

To drive home his point that creativity is not confined to any country's boundaries, Mr. Bergin—a judge for this year's Cannes Festival—showed commercials from around the world, including his "favorite beer commercial," a 30-second Saatchi spot for Castlemaine Australian beer's introduction in the U.K. ANA members laughed almost as loud when the spot was reshown during the Saatchi executives' time at the mike.

Mr. Bergin also made the point

New PMG steps into firefight

By STEVEN W. COLFORD

WASHINGTON—In 1970, Paul Carlin, named last week to succeed William Bolger as Postmaster General, received the Benjamin Franklin Award, the U.S. Postal Service's highest management honor, for helping to reorganize the service.

After assuming office Jan. 1, Mr. Carlin might be in line for another medal—the Purple Heart—as the verbal skirmishing between second and third-class mailers over the recommended postal rate increase threatens to explode into legal warfare.

By the time Mr. Carlin, the

'New York Times' tops designers' list

By MICHAEL EMERY

The *New York Times* is the nation's best designed newspaper, and *USA Today* uses color in the most effective manner, according to a nationwide survey of newspaper graphics experts.

For this study, commissioned by ADVERTISING AGE, Media Research Institute, Pacific Palisades, Cal., polled 604 members of the Society of Newspaper Design and received 170 responses. The majority were from graphics editors, art directors, editors and others making daily decisions on page design and the use of color.

The *New York Times* was the overwhelming choice in the over-all design category. This perhaps will be a surprise to some, but not to anyone who has followed the overhaul conducted during recent years by executive editor A.M. Rosenthal and his associates, including assistant managing editor-art Louis Silverstein. The *Times* has been honored in every Society of Newspaper Design competition, beginning with the first in 1979-80.

The *Morning Call* of Allentown, Pa., edged *USA Today* for second place in over-all design, followed by the *Seattle Times* and *Washington Times*.

In the color category, *USA Today* was a landslide winner. However, in response to a number of other questions, respondents indicated they would make major changes with *USA Today* if they had the chance. The *Register*, based in the Orange County, Cal., city of Santa Ana, and the *St. Petersburg* (Fla.) *Times* placed second and third in the color

'New York Times' tops design list

(Continued from Page 3)

category, followed by the *Chicago Tribune* and the *Morning Call*.

The first of 21 questions asked respondents to pretend they were at a convention, holding up and ranking "the five best designed newspapers" for the audience. Design was defined as "use of typography; story and photo layout; use of sketches, diagrams and other informational graphics, and over-all organization of the paper's elements."

They then were asked to rank the five papers using color "in the most appropriate and effective fashion."

Other questions involved design changes at the respondent's paper, and the impact *USA Today* has had on design. Here are the findings of the study:

- Respondents listed 102 different papers in the over-all design and color rankings, but when it came to the top five there seemed to be a consensus. The *New York Times* was marked by 48%, the *Morning Call* and *USA Today* by 38%. *Seattle Times* by 32% and *Washington Times* by 27%.
- The *Seattle Times* demonstrated impressive consistency in gaining support from all regions in both categories. In the over-all competition, the *Times* was the only paper to finish in the top five in all five regions (all other leaders slipped at least once).
- Smaller papers, such as the *Herald* of Everett, Wash.; the *Columbia* (Mo.) *Daily Tribune*; the *Eugene* (Ore.) *Register-Guard*, and the *Virginian-Pilot*, Norfolk, Va., were recognized for their efforts.
- Fully 67% of the respondents said their paper increased its use of color during the past year. Color was introduced by 11%.
- Regarding informational graphics (charts and graphs), 22% said they introduced it and 60% said they increased the amount used.
- Photo layouts had been given more emphasis on only 25% of papers, despite the over-all increased interest in page appearance and impact.
- The most likely person to initiate a design change would be the graphics editor or the managing editor, but usually in consultation with someone else. Editors were listed next. Only one person said a committee would decide (although several papers reported having committees), and only one said a consultant would have the authority.
- Forty per cent said the main reason for design change was a "deep interest in keeping up with design trends and technology" as opposed to whim, competition or desire for status. However, many respondents indicated multiple reasons.
- There is a sense of frustration on the part of many respondents, 120 of whom (77%) said they have been denied chances to make design changes because of cost or more often lack of authority. In fact, 86 listed authority problems and a few singled out tradition-minded publishers.
- The typical respondent was someone with between five and nine years of "experience in this specialty." Slightly less than half had some design training in a journalism school, and slightly more than half (some were the same people) had design training elsewhere on campus. Despite this training, 78% said they learned the most about "design principles" on the job.
- *USA Today's* impact has been recognized by professionals. A full 60% said their paper has changed because of *USA Today's* presence, and 94% said they thought papers other than their hometown paper had changed because of *USA Today*. Changes in color were mentioned by 62 (40%); informational graphics by 50 (32%). There was little influence in the areas of typography, layout, photography and news play.
- Asked about *USA Today's* "best contribution to the field of design," almost everyone listed a specific area (sports, weather) or a technique (informational graphics) rather than crediting the paper with intellectual and motivational leadership.
- If given a chance to change something on *USA Today*, 62 (40%) would tinker with Page One. However, another question revealed great unhappiness with the size and handling of photos.
- Which papers do these Society of Newspaper Design members check for suggestions? The *New York Times* is the winner again (34%), followed by *USA Today* (19%), the *Morning Call* (16%), *Seattle Times* (11%), the *Register* (11%), *Chicago Tribune* and *Boston Globe* (10%) and *St. Petersburg Times* (7%).

Best in over-all design

1. The **New York Times** led in three regions: West, South and mid-South, and East. It slipped to sixth in the mountain states and the Southwest and was second in the Midwest.

The *Times* was mentioned on 81 of the 170 sheets (48%) and only a half-dozen qualified their votes with "inside pages only" or "Sunday." The streamlined look of the various special sections and the greatly improved Page One have great appeal to respondents.

2. The **Morning Call** of Allentown, Pa., had strong support in four regions. While it slipped in the mountain and southwestern region (ninth). The *Call* was fourth in the West, first in the Midwest, second in the South and mid-South, and third in the East. The *Call* was fifth in the color category.

3. **USA Today**, first by a wide margin in the color category, was strong in four regions in the over-all category. Although ninth in the West, *USA Today* was first in the mountain and southwestern states, third in the Midwest, fourth in the South and mid-South, and second in the East.

4. **Seattle Times**, the most consistent of all of the papers, was second in the West, second in the mountain-southwestern area, fifth in the Midwest, fifth in the South and mid-South, and fifth in the East. The *Times* was seventh in the color rankings, slightly behind the *Orlando Sentinel* and ahead of the *Miami Herald*, both known for color.

5. **Washington Times**, although embroiled in controversy because of ownership by the Rev. Sun Myung Moon's Unification Church, has earned much respect in the design field. The *Times* was third in the West, 10th in the mountain states and the Southwest, seventh in the Midwest, third in the South and mid-South, and fourth in the East. In the color category, the paper ended up 10th.

6. The **Register**, based in Santa Ana, Cal., is another paper with impressive over-all votes: Fifth in the West, third in the mountain-southwestern area, sixth in the Midwest and seventh in the South and mid-South and East. In color rankings, the *Register* was a clear second, well ahead of third place *St. Petersburg Times* in total points and first place votes.

7. **Chicago Tribune**, fourth in the use of color, slipped badly only in the South and mid-South on its way to a seventh-place finish in over-all design. The *Tribune* was seventh in the West, eighth in the mountain-southwestern region, fourth in its own Midwest, 14th in the South and mid-South, and ninth in the East.

8. **Boston Globe**, a solid performer, emerged with a profile similar to the *Chicago Tribune*. The

Many respondents from design ranks

Media Research Institute sent questionnaires to 604 American members of the Society of Newspaper Design, an organization that has become prominent through its annual award competition and its publications. In all, 170 responses were received, with 156 respondents indicating a position with a daily newspaper; 14 answers were from academics and outside consultants.

Of the respondents, 33 were from the West, 24 from the Mountain states and the Southwest, 38 from the Midwest, 34 from the South and mid-South, 38 from the East, while three did not identify their area.

The respondents included 38 who said they were the graphic design editor/coordinator at their paper; 13 who said they were graphic designers (a number held two positions), and 13 others who said they were art directors or assistant art directors.

Also, 15 editors, 15 managing editors, 33 "other" editors and two publishers responded.

Responses came from most of the leaders in design, including 17 persons at papers of more than 500,000 circulation, 19 at papers of between 250,000 and 500,000, 30 at papers of between 100,000 and 250,000, 32 at papers of between 50,000 and 100,000 and 58 at papers of less than 50,000.

A number of the questions applied only to those working on a daily newspaper, and percentages offered for those answers are based on the number 156. Otherwise, percentages are based on the entire response group of 170.

There was only one suggestion that there was a built-in bias in using the Society of Newspaper Design members, who are tied to the "Allentown school" of design. An advantage of using the society's list was that many members are familiar with papers outside of their regions, including some of the smaller papers.

It should be remembered that this is a recognition survey based on the perceived quality of design and use of color. The numbers should be viewed in a general way to note patterns and attitudes about the vast number of changes in design and use of color. —*Zanaleen Steiner*

Globe was sixth in the West, seventh in the mountain-southwestern section, fell to 13th in the Midwest, earned sixth in the South and mid-South, and finished eighth in the East.

9. **St. Petersburg Times**, living up to its reputation for use of color, finished a strong third, well ahead of the *Chicago Tribune*. In over-all design, the *Times* was consistent, getting eighth in the West, fifth in the mountain-southwestern area, eighth in the Midwest and sixth in the East.

But it transcended any expectation of regional bias, as respondents in the South and mid-South placed the *Times* ninth, behind the *Orlando Sentinel*.

10. **Kansas City Star**, 10th in over-all design, finished 14th in the color rankings. In addition, the sister *Kansas City Times* picked up a few votes.

The *Star* was 13th in the West, moved to 11th in the mountain-southwestern region, 10th in the Midwest, 11th in the South and mid-South and the East.

Notably absent from the over-all design rankings were some newspapers often ranked in the top 10 in over-all quality: *Los Angeles Times*, *Christian Science Monitor*, *Philadelphia Inquirer* and *Washington Post*. (However, this survey was undertaken before the *Post's* major redesign.)

Other major papers that didn't make the top 20 in this survey include the *Dallas Times Herald*, *Milwaukee Journal* and *St. Louis Post-Dispatch*, along with the Detroit, San Francisco and Denver papers.

It should be noted that the *Los Angeles Times*, the nation's largest newspaper in ad linage, only recently began the conversion to color. Daily special Olympics sections, featuring color photos, were part of this emergence. Nevertheless, the *Times* received only two mentions for its over-all design, with the others listed above faring about the same.

Design is a very subjective thing to judge. A "sharp layout" to one person is "too cluttered" for another. But apparently one group of papers (plus probably a few other smaller papers going unnoticed) consistently is outdistancing the others when it comes to the application of design principles.#

These newspapers were ranked among the 10 best designed papers in the U.S. by members of the Society of Newspaper Design in a study commissioned by ADVERTISING AGE.

TRAHEY GOES TO THE MOVIES

Add three films to your 'don't miss' list

By JANE TRAHEY

I don't always get to the right preview at the right time in the right place to get to the right issue at ADVERTISING AGE, so in the last week or so I paid my hard-earned cash to see some of the hot movies I missed. Here's how I rate them.

AMADEUS. Rated DM. From an esthetic point of view, "Amadeus" is beautiful. Miroslav Ondricek's photography of old Prague convinced me I was deep in the heart of old Vienna. The acting is knockout. Tom Hulce (Mozart) is brilliant. Mozart's talent, precociousness and bizarre behavior drive the court-composer Salieri, a conservative and mediocre musician, right up the palace walls. He is consumed by jealousy.

The direction is intriguing, and anyone who admires perfect timing will love it. And I can think of a hundred other reasons to go. The way director Milos Forman interweaves music with plot, action with opera, story with symphony is worth $5. And for Mozart's deathbed dictating of his requiem to Salieri, who hopes to claim it as his own as soon as Mozart dies—well, you owe Peter Shaffer, the author, another fiver.

PLACES IN THE HEART. Rated DM. Bob Benton, ex-advertising impresario, writes and directs this Sally Field movie. It's a reminiscent tale of Benton's home town, Waxahachie, Tex., during the Depression. The props are stellar and lend great authenticity to the story.

Sally Field does her Norma Rae bit again. But who cares? She does it so well. Here she is left to cope with two children, a mortgaged farm and a dwindling bank account when her husband is shot by a drunken black teen ager.

The movie has a cast of good folks and bad folks. The bad include the greedy banker, the cheating cotton broker, the philandering husband of Sally's sister and the Ku Klux Klan.

The good folks are nicely topped off by Mose, a black itinerant beggar who coaxes Sally to let him stay for room and board in return for helping her grow a cotton crop, and a blind young man who is plopped into Sally's house by the greedy banker.

Even though I had been warned about the symbolic ending, I liked it. If Benton hadn't added that touch, he would have ended up with just a '40s movie. Want a warm and nice two hours? See "Places in the Heart."

KARATE KID. Rated DM. This is a thoroughly charming (if highly unbelievable) movie. A displaced, lonely teen age boy is dumped into the California scene when his mother moves. He is bullied to bits at school.

He meets the "super" of his new apartment building—a wise, elderly Japanese man who grows bonsai trees for a hobby. The super, played by Pat Morita, sums up the kid's problems and teaches him the martial arts. The kid gets his self-image back. The tricks Morita plays to teach karate to Ralph Macchio, the kid, make the movie a lot of fun. If you see it, take a kid.

THE BROTHER FROM ANOTHER PLANET. Rated NP. Too bad David Bowie was busy. He's what's missing. This movie is a strange amalgamation of creatures who escape from a planet, where they are slaves, only to inhabit one directed by John Sayles.

There are nice touches, such as a new look at Harlem and some good cracks at New York City bureaucracy in the welfare world. There is also enough well choreographed violence for all. I thought it needed popcorn, but they're standing in line for this movie so word-of-mouth is good.

FIRST NAME CARMEN. Rated ABAM. This French film is the next best thing to a Seconal. There's an unexplained boring string quartet that is cut into an unexplained bank robbery that is cut into at least a half-hour of footage of waves breaking against the shore. Between the surf and the strings I slept.

I know it's chic to love Jean Luc-Goddard, but it beats me why the critics pat him on the back. This is an unmitigated bore. Unless you want a nap.

WOMAN IN RED. Rated ABAM. I can believe a genius like Gene Wilder would remake a wonderful French movie. But I can't believe he'd do it so badly. Gene Wilder stars with Charles Grodin. It ain't enough.

GARBO TALKS. Rated NP. A soupy story about an aggressive New York mother (Anne Bancroft) and her highly influenced-by-mama son (Ron Silver). Mama comes down with an inoperable brain tumor. Her last wish changes her son's life. She wants to meet the ever-elusive Garbo. Can sonny boy pull it off before tumor takes over? Tune in.

A SUNDAY IN THE COUNTRY. Rated SAM. A touching film about a 70-year-old painter who looks forward to and spends a day with his son, his son's wife and his son's children. The lot of them disappoint him. They are their usual klutzsy selves. Then his vibrant, offbeat daughter drops in and breathes life into the old man and jealousy into her brother.

The movie is slow paced, but it is about a 70-year-old who *is* slow paced. Based on a novel by Pierre Bost, it is directed by the gifted Bertrand Tavernier. If you like French countryside pictures and bittersweet tranquility—try it.#

Jane Trahey's rating guide

DM - don't miss

WF - wildly funny

NP - needs popcorn

SAM - slow as molasses

IPIF - if parking is free

ABAM = avoid by all means

Radio stations foster loyalty in Detroit

By Pat Strnad

Marketers and black-oriented radio stations are humming the same tune and the lyrics go like this: Radio is the most effective means of targeting the black consumer market.

"It's critical that advertisers who want to reach blacks use black media. When a black radio station features an ad for a product, it's almost like an endorsement of that product," says Joel P. Martin, president-creative director, J.P. Martin Associates, New York.

> **"There's some personalization here . . . . Mainstream advertising doesn't have that kind of faith."**
>
> *—Norman Miller, WQBH*

"Many of the radio personalities are key community figures, and listeners know who they are. Blacks do look at tv, of course, and some advertisers can reach them there.

"But messages coming from a black radio station make ads more convincing and believable," she says.

This information is of particular interest to marketers interested in moving their products in Detroit, a city with a sophisticated radio market and a black population that is 63.1% of the city's total population of 1.2 million.

According to the U.S. Census Bureau, the average household income for blacks in Detroit is slightly more than $16,000, an average that surpasses that for blacks in every other major urban area in the U.S.

One station reaching that market takes its ad responsibility seriously. Detroit's black inspiration station, WQBH (am), screens its advertisers, says Norman Miller, sales manager at WQBH.

"We don't allow ads for products that aren't any good. There's some personalization here, a level of trust," Mr. Miller says. "Mainstream advertising doesn't have that kind of faith."

Some leading national advertisers agree. Black listeners' confidence in black radio is a key reason Coca-Cola Co. uses the medium, says Sara Tozer, director-advertising at the Detroit-based bottling company.

"Our relationship with the [black] radio station gives us a strong competitive edge," she says.

Gregg Reynolds, vp-public affairs for Kentucky Fried Chicken, Louisville, Ky., says although KFC doesn't advertise through black media on a national level, local co-op groups do so for individual franchisers.

"We make extensive use of black radio because people are more responsive to it than they are to any other media.

"There is a tremendous amount of loyalty to black radio stations. We know there's big listenership in black radio," Mr. Reynolds says.

Radio not only provides a favorable environment for ad messages, but an opportunity for the advertiser to become personally involved with the public, Ms. Tozer says.

"Black radio stations are usually involved in community activities, which is very important to us," she says. Her company recently participated in a break-dancing tournament with a Detroit black-oriented radio station, WJLB (fm).

"It was outrageously successful. That kind of activity really makes the difference, in addition to the media value of the station. It creates a positive environment," Ms. Tozer says.

Aside from the community involvement and awareness black radio maintains with its listeners, many advertisers use the medium mainly because of its ability to target an audience.

"Radio in general reaches a large bulk of people when no one else can," says Pat Miller, car advertising specialist for Detroit-based Ford Motor Co.

"You can't drive and read the paper. And when you're on the road, you're only minutes from a supermarket," Mr. Miller says.

In addition to its point-of-purchase accessibility, the medium offers other advantages.

"There are psychographic factors involved in why radio is especially important to reach the [black] consumer," says Tom Burrell, president-creative director, Burrell Advertising, Chicago.

"Radio is more personal, dynamic, and traditionally has been very segmented," he says.

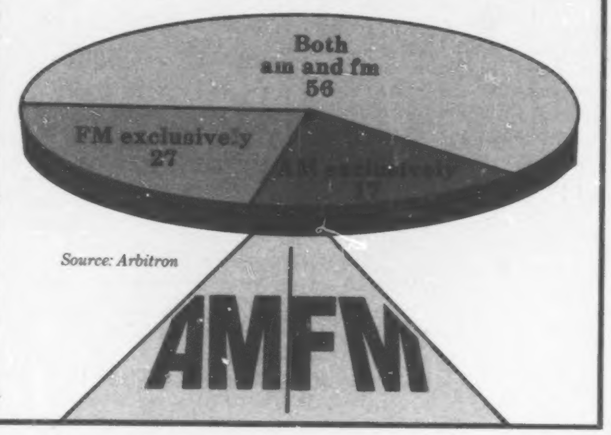
In radio, the black market is one of many segmented audiences. However, within the scope of black radio there is more segmentation.

And one area—covered by Detroit stations WCHB (am) and WQBH (am)—is gospel music programing.

Ms. Martin of J.P. Martin Associates says she believes gospel music programing is a fantastic opportunity for corporate messages and family products.

Black radio listeners in the balance

(per cent of am and fm listeners)



Source: Arbitron

"Gospel music attracts primarily women and families. Gospel listeners are generally conservative, they're believers, and they're church-going. Most black leaders come out of the church," she says. "Look at Martin Luther King Jr. and Jesse Jackson. The church is the rock the black community is built on. Religion is a delicate issue, and it takes a sensitive company to deal with the church."

Another segment of the black radio audience is the youth market. There are many youth-oriented black radio stations in Detroit, and they provide an audio medium for such advertisers as Coca-Cola, McDonald's, Burger King, Michelob and others.

Creatively, black radio is no different from other forms of black-oriented media. "We tend to use black models and black voiceovers in black-targeted ads," Ms. Martin says. "We want to instill a semblance of the black environment. On the creative side, there are differences in tone, style and sense of humor.

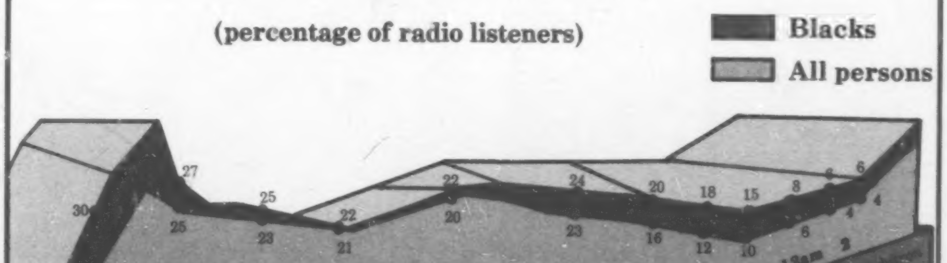
Striving to bring more realism and sophistication to the black market is Jackson & Co., a Detroit-based ad agency that specializes in minority marketing communications.

"We try to target black professionals and we show their life styles," says Cedric Jackson, president of the agency. "I know of one station that goes back to the old '60s routine. They use situations that don't fit the modern black today."

Black radio listeners top all

Monday-Friday average two-hour rating

(percentage of radio listeners)



However, using a black model and voiceover doesn't make an ad more attractive to black consumers, if that strategy is the only one being used, according to Mr. Burrell.

"Black people are different from white people, and you've got to factor that in. For many products and services, the way a consumer perceives a product is important, and it could be different enough to warrant different strategic approaches," he says.

"It's not really an executional issue, but a strategic one. Just changing the voiceover or putting a black person in the ad sounds like a cosmetic way to make the ad different. It's not how you say it, it's what you say," he says.

However, with the proper marketing strategy, radio can be an effective means of communicating with the black consumer.

Despite these attributes, Mr. Jackson says Detroit is indicative of national radio in that many national advertisers consider black radio there as third, fourth or even fifth rated. "It's not a top buy. Local retailers have no choice but to buy because they're here. The national view is, however, if we have a few dollars left over, we'll give it to Detroit," he says.

Several of Detroit's black radio stations echoed similar sentiments.

Verna Green, general manager of WJLB (fm), says there is a bias among advertisers, a reluctance to accept blacks as significant consumers.

"There's a tendency among advertisers to look at income level rather than consumption level with blacks. More attention is given to what they don't have than to what they do have," Ms. Green says.

Martha Jean Steinberg, WQBH's vp-general manager, a radio personality and a Detroit black community leader, says, "Advertisers just don't realize that when you advertise through us, you're investing in the community."

Black radio is effective in reaching the black market through community involvement and formats, according to Anthony Moore, vp-media and research director, Proctor & Gardner, Chicago. "Music has taken on a noncolor; what breaks out the [black] segment is community involvement," he says.

In Detroit, some of the radio stations are changing from black to urban contemporary formats. Stations that once were exclusively black are evolving toward broader formats to entice a wider audience.

Joe Spencer, program director of WGPR, says there is an advantage to a lot of black radio not being limited to black audiences. "It used to be if advertisers were going to go mainstream advertising, they wouldn't advertise on black radio because it was too specialized. Now it's getting much more general."

Pat Strnad is an editorial assistant in the Detroit bureau of Advertising Age.

Ford ad buy fuels Super Bowl fillup

By VERNE GAY

New York—It's last call for the Super Bowl.

Despite its breathtaking $1 million-a-minute price tag, ABC's broadcast of the 1985 Super Bowl moved much closer to a sellout last week when the Ford division of Ford Motor Co. locked up domestic auto sponsorship as part of a $10 million package buy. J. Walter Thompson USA, Detroit, is Ford's agency.

At press time, ABC had only two remaining unsold minutes in the game.

The deal with Ford is ABC's biggest coup to date in its struggle to maintain pricing on Super Bowl XIX. In September, Chevrolet, the incumbent domestic auto sponsor, decided against taking its option to participate in the game as a protest of the $1 million price tag. Observers at the time had predicted ABC would be forced to split the domestic auto sponsorship between several auto makers, leaving open the possibility for "opportunistic buys" on the game at prices far below the $525,000 going rate for individual 30-second spots (AA, Sept. 24, *et seq.*).

The importance to ABC of maintaining single auto exclusivity was underscored by the network's willingness to sell Ford five spots in the Super Bowl as the lesser part of a "special events" package that includes more than $7 million in time on the fall, 1985, ABC 10-hour miniseries "North and South."

Ford's move also signals the seriousness of its com-

(Continued on Page 76)

Super Bowls' super costly 30s

This chart shows the year-by-year increases in the average cost of a 30-second commercial on the Super Bowl broadcast over the past 10 years. While the average rating of audience has remained relatively constant, the prices have escalated more than 400% since 1975 and cost-per-thousand rates have increased threefold.

This year, the average Super Bowl commercial will cost between $500,000 (on a package or exclusivity deal) and $525,000 for a single unit. The 1985 Super Bowl price hike is the greatest since 1982, the first Super Bowl after the NFL season was interrupted by the players' strike. *Source: Lord, Geller, Frederico, Einstein and J. Walter Thompson USA, New York.*

Year	Game *(winner in bold)*	Cost	CPM	Rating
1975	**Pittsburgh** vs. Minnesota	$110,000	3.74	42.4
1976	**Pittsburgh** vs. Dallas	125,000	3.96	42.3
1977	**Oakland** vs. Minnesota	162,000	4.72	44.4
1978	**Dallas** vs. Denver	185,000	5.27	47.2
1979	**Pittsburgh** vs. Dallas	222,000	6.28	47.1

Court protects Chiat/Day from Godfather's hit

By SCOTT HUME and RUTH STROUD

Los Angeles—A state appeals court last week freed Chiat/Day from a controversial court order barring key staffers from working on the agency's Pizza Hut account.

For Chiat, the appellate court's action takes some of the sting out of its bitter court fight with Godfather's Pizza, an advertiser it first courted, then jilted in favor of the more lucrative Pizza Hut business.

It also should calm the national ad agency community's fears that the California courts were on the verge of setting new standards of conduct for agencies that pursue the business of rival advertisers.

The American Assn. of Advertising Agencies had intervened directly on Chiat's behalf to protest a trial court's initial decision in the case.

Chiat's victory was not complete, however. Part of Godfather's Round 1 court victory—an order barring agency executives from disclosing confidential Godfather's marketing information—was upheld by the appeals court.

Still to be decided is the suit filed by Costa Mesa, Cal.-based Godfather's, a division of Diversifoods, Itasca, Ill. The suit, filed against Chiat last July (AA, July 16, et seq.), charges that the agency withdrew from the competition for its $5 million creative account to pursue the $20 million account of Godfather's major competitor, Wichita-based Pizza Hut.

The suit alleges breach of fiduciary duty, unfair competition, breach of contract and breach of implied covenants of good faith. It seeks punitive damages of $10 million or 20% of Chiat/Day's net worth, whichever is greater.

It also sought the injunction prohibiting Chiat/Day from disclosing the sensitive marketing information it had given the agency and prohibiting 10 agency staffers who had worked on the Godfather's presentation from working on Pizza Hut advertising.

A preliminary injunction covering both confidentiality and account personnel was granted by the California superior court in September. It is that injunction

P&G's liquid Tide ad asks "Who could create a liquid laundry detergent that's better than yours?"

Can liquid Tide pull Wisk under?

By NANCY GIGES and LAURIE FREEMAN

Procter & Gamble is planning a $50 million ad campaign for the national introduction of Tide liquid laundry detergent as it seeks to recoup market share lost to other liquids and blunt the rollout of Lever Bros.' Surf.

Heavy-duty liquids have grown to more than 24% of the total category, up from 21% in 1981, but the $700 million segment has continued to be dominated by Lever's Wisk. Not even P&G has been able to slow Wisk's climb to a better than 7% share of the $3 billion laundry detergent business. Meanwhile, Tide's share has fallen from 24.5% in 1981 to 21.8% for the first half of 1984.

With an expected $50 million campaign also set for Surf (AA, Oct. 25), pitting the brand against Tide powder, heavy-duty detergent advertising will pound the airwaves next year. Both companies are expected to spend at least an equal amount in promotion.

The liquid Tide introduction kicks off Jan. 14, with tv spots created by Saatchi & Saatchi Compton, New York. With the

CBS set to close cable buy

By SUSAN SPILLMAN

New York—CBS is expected to close two deals this week to buy equity in six cable tv networks for $60 million to $70 million (AA, Nov. 12).

The media giant will announce the purchase of a one-third interest in four regional sports networks owned jointly by Cablevision Systems, Woodbury, N.Y., and Washington Post Co., sources said. In a separate deal, it will acquire half of two national pay tv channels, Bravo and American Movie Classics, now solely owned by Cablevi-

Last Minute News

Ponderosa may pull up stakes on account

Dayton, O.—Ponderosa reportedly plans to move its $15 million-plus account out of Avrett, Free & Ginsberg, New York. The 700-restaurant chain has beefed up broadcast advertising in the last two years in an effort to expand beyond its niche as a budget steak house operation. Ponderosa spent $3.6 million for spot tv in the first half of 1984, up 9% from the total for all of '83 and more than 2½ times the total for '82, says Leading National Advertisers. Neither the ad agency nor Ponderosa would confirm the reports of an impending switch.

JWT, ABC to weigh effectiveness of 30s vs. 15s

New York—J. Walter Thompson USA and ABC-TV will undertake a joint research project to compare the effectiveness of 30-second units with 15-second units. The commercials, to be supplied by five advertisers, will be examined in different clutter situations, JWT says. Results will be presented in March at the Advertising Research Foundation's annual meeting.

CBS Super Bowl radio broadcast 80% sold

New York—CBS Radio Network is 80% sold out on its 1985 broadcast of the Super Bowl (*see earlier story on Page 1*). Major advertisers include American Honda Motor Co. Anheuser-Busch, Cotter & Co.'s True-Value Hardware Stores, General Motors Corp. and its Buick and Delco divisions, Stearns & Foster Co. and Toshiba America. A 60-second unit on the CBS radio broadcast costs $30,000.

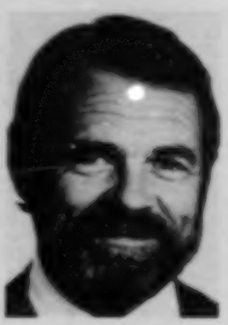
O&M's Riney unit gets independence

By JENNIFER PENDLETON and RUTH STROUD

Ogilvy & Mather's San Francisco office will soon become an independent subsidiary of its international parent, a move that frees the agency, now headed by creative titan Hal Riney, to become a major force nationally.



H. Riney

The shift, which O&M International made public last week, coincided with the San Francisco shop's announcement that it had gained the $5 million-to-$10 million Crocker Bank account. That business, formerly at Needham Harper Worldwide, Los Angeles, conflicted with California Federal Savings & Loan Assn., a $12 million account recently gained by O&M's Los Angeles office (AA, Nov. 5).

In a telephone interview, Mr. Riney said that though Crocker Bank's selection accelerated the agency's decision to spin off its San Francisco office, the move had been contemplated for some time.

Conflict, the inevitable by-product of membership in a large multinational agency, was holding back the agency from pursuing many new business leads, said Mr. Riney, who holds the title of exec vp-managing director. The agency now has annual billings of $80 million to $100 million.

The newly independent shop hasn't been named yet, but it seems likely that Mr. Riney's name will have a prominent spot in the title.

Mr. Riney denied speculation that the decision to make O&M an independent unit may stem from a fear of losing the powerful creative executive to another shop.

Sources say Mr. Riney's considerable creative reputation is the main drawing card of new business to the agency. If he were to be lured to a competitor—or were to set up his own shop—he could effectively obliterate O&M's San Francisco presence, they contend.

Agency sources describe the decision to split the San Francisco office as "an Interpublic [Group of Cos.] so-

Admen agog as Saatchis shop around

By STEWART ALTER

Saatchi & Saatchi Co., once content to gobble up ad shops, has been on a spree in recent weeks buying everything but agencies.

Less than a month ago (AA, Nov. 1), the London-based company announced it was going to spend $20 million to buy a research company (Yankelovich, Skelly & White, New York) and a consulting organization (McBer & Co., Boston). Before the dust could settle, it plunged into its largest acquisition to date, when it agreed to spend $100 million to buy Hay Group, Philadelphia (AA, Nov. 15), one of the world's largest management consulting companies.

Then, within a week, it closed another deal, buying Irv Koons Associates, a New York-based package design organization.

Because of its size, Hay has to be the most significant of these non-advertising agency acquisitions and the one raising questions about Saatchi's ability to manage a diversified communications conglomerate as well as it can put one together.

Hay's purchase thrilled the British financial markets, but got mixed reviews among leading U.S. agency executives. None of those U.S. executives interviewed saw it as a trend they were likely to follow.

"I think it's a rather good idea," said John Bowen, chairman-chief executive officer, Benton & Bowles, New York, and the most enthusiastic respondent. His appreciation paralleled Saatchi's own explanation of the move.

"Despite what clients say, they do depend on ad agencies to give

Antsy Esty gives world an earful

By STEWART ALTER

New York—With gaining new business in mind, William Esty Co.'s new management team plans to raise what has become the lowest profile on Madison Avenue.

"We would like to talk to the public more," said Laurence Wassong, Esty's new president-chief operating officer, who described an interview with him and new chairman-chief executive officer Gordon Bushell as "our coming-out party."

That may be ho-hum material anywhere else, but it's big news at Esty, which has been less than eager to give interviews since its founding in 1932 with R.J. Reynolds Tobacco Co. as its first client.

What has changed? Well, RJR for one—the client has jacked up its own profile, especially in recent years since it became an active acquirer.

And Esty, while remaining solid with 12 blue-chip clients, has not been winning RJR assignments as a result of those acquisitions. In fact, the agency has been losing accounts, such as Colgate-Palmolive Co. and Warner-Lambert Co., because it lacks an international presence.

With that as a backdrop, Esty's low profile has kept it from getting calls to pitch new business.

"What we'd like to do is get on

(Continued on Page 78)

Ziff-a-dee-do-dough: $700 M!

By WILLIAM F. GLOEDE

NEW YORK—The sale of the 12 business and 12 consumer magazines owned by Ziff-Davis Publishing Co. took a pair of unexpected turns last week and put the consumer books in the hands of CBS Magazines and the business books into the grasp of Rupert Murdoch's News America Corp. It also put $712.5 million in Ziff-Davis' coffers.

Industry sources said Mr. Murdoch had hoped to acquire all the magazines, but was outbid by CBS for the consumer books. His acquisition of the dozen Ziff-Davis business titles, concentrated in the aviation and travel industries, represents the Australian publishing magnate's first foray into business publishing.

News America paid $350 million for the 12 business titles, which include *A/C Flyer, Aerospace Daily, Aviation Daily, Business & Commercial Aviation, Hotel & Travel Index, Meetings & Conventions, Official Hotel & Resort Guide, Official Meeting Facilities Guide, Travel Weekly, Weekly of Business Aviation, World Aviation Digest* and *World Travel Directory*. All are profitable, according to a Ziff-Davis spokesman.

Mr. Murdoch called the acquisition "a major strategic investment" for News America, the U.S. subsidiary of his worldwide publishing conglomerate, News Corp. Ltd. He pledged to preserve the "editorial excellence and integrity" of the Ziff-Davis publications and also said, "We intend to retain the superb current staff."

In a joint statement announcing the sale, William Ziff, the sole shareholder in the company that bears his name, called Mr. Murdoch "one of the most brilliant publishing executives of our time."

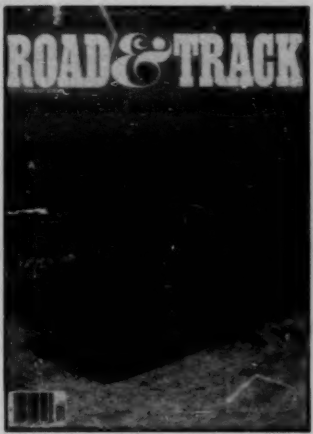
In acquiring the business publications, News America bested American Express Co. and Washington Post Co., both of which reportedly were eager to buy the group for its travel publications. An insider group also was attempting to acquire the aviation publications, sources reported.

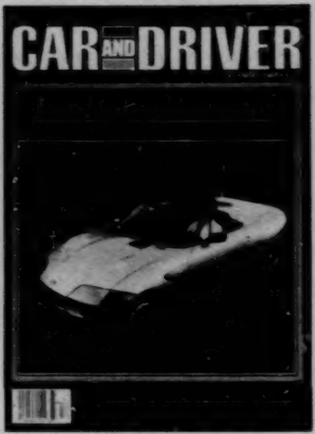
The $362.5 million sale of Ziff-Davis' 12 consumer magazines to CBS Magazines has advertisers pondering the potential for a new, male-skewed advertising network that could take shape as CBS absorbs the Ziff books.

CBS beat out such magazine giants as Time Inc., ABC Publishing and Times Mirror Magazines in the bidding for the Ziff-Davis publications. CBS did not bid on the business group.

Included in the sale to CBS are *Backpacker, Boating, Car & Driver, Cycle, Flying, Modern Bride, Popular Photography, Runner, Skiing, Skiing Trade News, Stereo Review* and *Yachting*.

Industry analysts believe CBS could expand the existing Ziff-Davis Magazine Network sales group, noted in the industry for its efficiency and professionalism, and merge it with the portions of its own network that rep the seven male-oriented titles of its 10 existing consumer magazines.





CBS Magazines' *Road & Track* **and Ziff-Davis'** *Car & Driver*, **formerly fierce competitors, will likely remain so even though they're to be united under the roof of Black Rock, CBS' New York headquarters.**

Joseph Fuchs, publishing industry analyst for Kidder Peabody & Co., said he believes "the real economic hook" of the deal is that "it makes a very compelling network advertising buy.

"Clearly, there are overlaps," said Mr. Fuchs. "They're going to

Colgate broadens position

Irish Spring to try new tack

By NANCY GIGES

Colgate-Palmolive is planning a big splash for the repositioning of Irish Spring bar soap as the company aims to bridge the deodorant and complexion segments of the $1 billion category.

Although the reformulated, repackaged version has been on retail shelves for several months, Colgate, New York, is expected to wait until the holiday season is over to begin its estimated $10 million campaign, which departs markedly from traditional bar-soap advertising.

Colgate gave consumers in Pittsburgh a preview of the new approach when it recently ran a humorous commercial on a one-shot basis. The spot shows a nervous Don Knotts-type character enthusiastically touting the soap he has discovered in a stand-up sell job. But while he is talking, each time he mentions the name Irish Spring, the soap he is holding in his hand squirts water at him.

Finally he becomes so disgusted with the soap he puts it in the

ADWATCH

Ads offer less bang for buck

By SCOTT HUME

The proliferation of advertised brands may be having a negative effect on advertising awareness.

A comparison of last month's results for ADVERTISING AGE's adWatch survey with those from a year earlier suggests that such a negative impact may be surfacing. While unaided recall of advertising is up (*i.e.*, a lower percentage of respondents drew a blank when asked to name the first advertising that came to mind), ad awareness in many product categories is down.

Last month, 56% of the 1,251 adults surveyed were able to name a specific advertisement when asked, "What advertising comes to mind from all that you have seen, heard or read in the past 30 days?" That compares with only 45% in October, 1983.

But in specific product categories, the problem of advertising "unawareness" continues. After all the millions of dollars put into tv, radio, print and outdoor advertising, the monthly adWatch survey always shows that significant percentages of the sample don't recall *any* of that advertising.

Take the wine category as an example. Last month,

Warwick starts 'Made in U.S.A.'

By PAT SLOAN

NEW YORK—The Crafted with Pride in the U.S.A. Council will break the first leg of a $30 million three-year campaign today via Warwick Advertising, but Warwick and others still are competing for the main body of the account (AA, Oct. 29).

Scheduled to make presentations to the council next week along with Warwick are at least 10 agencies, including Grey Advertising, Doyle Dane Bernbach and BBDO. The campaign, projected at a $10 million annual rate, is backed by the council. The group includes textile and fiber companies such as Du Pont and J.P. Stevens, as well as major American apparel marketers such as Blue Bell and Pendleton.

The council, chaired by Roger Milliken, chairman of Milliken & Co., was organized in April. The ad campaign was designed to tie into recently enacted federal legislation requiring that after Dec. 24 all domestically produced apparel and home furnishings carry a "Made in U.S.A." label.

Warwick's campaign, which may represent less than 10% of the council's $10 million annual budget, will set the stage for what to expect next fall. Running in trade publications, daily newspapers and national newsweeklies, ad copy emphasizes the advantages to retailers and manufacturers of buying goods made in the U.S., including faster delivery and reorders. Provocative headlines will note that once the consumer campaign begins, "She'll be looking for US in her blouse" or "He'll be looking for US in his slacks." Photography is by Francesco Scavullo.

When the next round of ads will begin or what their form will take is not known. Sean Driscoll, senior vp of Warwick, said that will de-

(Continued on Page 80)

Generics smoke out competition

By **JOHN C. MAXWELL JR.**

The big news in the cigaret industry continues to be the discount brands, led by generics.

While for the year they accounted for some 5.7% of the industry—almost double the 3.3% rate in 1983—they are probably running closer to a 6.5% rate currently. Of this, 4.7% is attributed to generics, 0.4% to the recycled Doral and 0.7% to Century (now in 88% of the country).

Liggett Group had the biggest over-all jump, up some 21% and a full-market share point, due entirely to the company's generic entries. R.J. Reynolds had the second-largest increase, up 1.5% with a 0.5% share point increase, again preponderantly due to its discount brands. The only reason why Brown & Williamson's volume and market share were off only slightly was due to new generic introductions.

Over-all, other companies had meaningful down volumes and market shares, with the exception of Philip Morris, which was up a modicum. In fact, the only major brand of Philip Morris that was up was Marlboro, 4.4% and a full market-share point. The only other meaningful brand that showed a reasonable increase was Newport, up some 8.9%. Reynolds' Winston, Salem and Camel seem to have stabilized.

One could make a case that if a company is not in discount brands, which is now the only growth area of the industry, its over-all sales volume is going to continue to be under pressure. Obviously if it were not for this grouping, plus some loading and new-product introduction, the industry would be down substantially more than our estimated 0.2% for the calendar year 1984.

As is well known, these discount-brand products have not been advertised to any degree; it has been mainly word of mouth that has caused them to grow. This proves the substantial need for this type of product in the marketplace.

It has been documented that people are increasingly price-value oriented, and if there are two products of the same quality available, they will choose to buy the cheaper one.

We feel that the main causative factor for discounting is the major jump of cigaret costs from about 70¢ a pack three years ago to now probably more than $1. This leap was the result of a major tax increase by the federal government and increases by state and local tax authorities as well as the increases imposed by companies over this period of time. We feel companies and state and local government (through taxation) will continue to increase prices. Therefore, we believe discount brands—because of their $2-plus per carton differential—will continue to grow, though much more moderately in the future.

Discount brands as a whole are now the fifth-largest-selling product (a fantastic jump considering they have been in the market for only three years). They are outselling everything except Marlboro, Winston, Salem and Kool.

Looking ahead, excluding a new surge on the part of the discount brands, it seems that we have seen the high in terms of cigaret consumption. Not only has the industry been adversely affected by prices, as discussed above, but by the increasing protest on the part of antismoking personalities. If 60 million-to-70 million smokers are required to give up one cigaret a day because of restrictive legislation or through social pressure, we are talking about 22 billion cigarets a year not being smoked.

This combination of higher prices for cigarets, the popularity of discount brands and antismoking pressures is not good for the industry over the longer term. However, we would not be surprised to see another price increase on the order of 3% prior to yearend.#

Mr. Maxwell is with Laidlaw Ansbacher, New York.

U.S. cigaret manufacturing

Philip Morris continues to pace the market, but R.J. Reynolds and Liggett Group showed significant gains during 1984, based largely on the strength of discount brands. ***Source: John C. Maxwell Jr., Laidlaw Ansbacher, New York.***

Snack line Chex out party mix's popularity

By **JANET NEIMAN**

After years of pushing its Chex brand cereals as ingredients for the well known Chex party mix, Ralston Purina Co. is test-marketing a three-item line of premixed Chex Snack Mix.

The product, in traditional, nacho cheese and sweet & nutty flavors, is testing in Marion, Ind., and possibly other markets.

St. Louis-based Ralston traditionally advertises the Chex snack as a party mix, but couponed newspaper inserts for the Chex Snack Mix say: "Now, that irresistible combination of seasoned Chex brand cereal, peanuts and pretzels isn't just for parties anymore."

Ads also play off the idea that "the snack you've loved for years" now comes in a box. "It's already oven-baked and oven-fresh, so you can love it alone or love it with friends. . .on the spot," the copy says. "You've loved it for years, but you've never loved it like this before."

Wells, Rich, Greene, New York, which handles advertising for Chex cereals, is also the Chex Snack Mix agency.

The new line is a logical extension of Chex cereals, and snack marketers aren't likely to be the only ones watching its progress. Kellogg Co., Battle Creek, Mich., has promoted use of its 2-year-old Crispix corn & rice cereal—a direct competitor to Chex—with a back-panel recipe to make Crispix party mix.#

Kraft spreads itself around

By JANET NEIMAN

Kraft Inc. is spreading itself thick in the butter substitute market, entering its third such test-market product in a year.

The newest item, Parkay Plus, is a margarine with 28% real cream, now testing in western and midwestern markets. The product joins Sheffield Farms and Touch of Butter, both butter blends using vegetable oil.

Sheffield Farms has been testing in the Southeast since last fall (AA, April 30); Touch of Butter has been in midwestern and southwestern markets since summer (AA, Aug. 6).

Kraft's interest in the category appears to be two-pronged. As consumers move away from butter and margarine and toward lower-calorie spreads, Dart & Kraft's Glenview, Ill.-based foods unit needs to buffer itself against losses to its important Parkay margarine.

Sources say Unilever's Shedd's Spread, purchased last year from Beatrice Cos., has been eroding margarine sales rapidly and that Shedd's ButterMatch blend has done well in the butter-blend segment. (Sources say Unilever also is working on another entry in that arena.)

At the same time, Kraft, like other marketers, sees the possibility of higher profit margins that come with butter and margarine blends and spreads.

Kraft's Sheffield Farms entry, priced between margarine and butter, has been viewed as a way to recoup losses from consumers moving to blends from Parkay, although sources said there are indications that Kraft may be pulling it out of the market. Touch of Butter is seen as Kraft's response to Shedd's headway in the market.

Parkay Plus, however, is a margarine with cream, or what one source called "souped-up margarine," priced at about $1.19—the same as premium margarine. The cream content, this source said, "gives them more impact with the consumer than it's costing them."

Land O' Lakes Inc. initially opened up the blend segment three years ago with Country Morning Blend, containing 40% sweet cream butter. The Arden Hills, Minn., company has been joined since then by at least three Beatrice products—Golden Farms Blend, Keller's Golden Blend and Hotel Bar Blend—marketed in various regions of the country.

Growth of the blend segment, however, has been more sluggish than expected, reaching about $65 million.

Like Sheffield Farms and Touch of Butter, Parkay Plus is being advertised in a tv, magazine and newspaper couponing effort emphasizing taste.

Needham Harper Worldwide, Chicago, which also handles Sheffield Farms, has the Parkay Plus account. Foote, Cone & Belding, Chicago, handles Touch of Butter.#

AdWatch

(Continued from Page 3)

21% of the sample said, "An advertisement comes to mind, but I don't recall the brand." Another 42% said, "Sorry, nothing comes to mind."

In other words, no wine advertising proved significantly memorable to nearly two-thirds of the national sample.

The "unawareness" total for the liquor category is even higher—72% said no specific brand advertising came to mind.

Distilled-spirits producers' self-imposed lack of tv advertising partly explains that higher total, however.

In many categories in which comparable figures are available for October, 1983, and October, 1984, "unawareness" totals are higher this year. While 25% of the sample came up dry last year when asked to name the first beer advertising that came to mind, that figure was 30% last month.

Similar increases of at least five percentage points show up in the medicine and drugs, cosmetics, tobacco, cameras and pet foods categories.

Major advertisers do not appear to be the losers in this trend. The total share of first mentions garnered by the top five advertised brands within each category has remained approximately the same. When the percentage of persons saying they can recall no specific advertising has risen, the change usually has come at the expense of secondary brands.

Budweiser, Miller, Miller Lite, Coors and Stroh accounted for about 45% of total first mentions in both the October '83 and October '84 surveys. But the higher percentage of respondents this year saying no advertising comes to mind means fewer brands other than the top five are being recalled, or that they are getting less recall.

What all this suggests is that while the number of brands and products within most categories is growing, it may be getting more difficult for those new brands to compete for consumer awareness.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a random sample of consumers to name the advertising that first comes to mind from all seen, heard or read in the previous 30 days.

Last month, 1,254 adults were questioned by telephone. Under adWatch methodology, an increase or decrease in recall between monthly surveys of 2.8 percentage points is considered statistically significant and attributable to more than sample variations.

Among significant changes last month:

- "Unawareness" is hardly a problem for the **fast-food** category, since 90% of the sample was able to recall a fast-food advertisement. Fast-food's problem is changeability, as it proved last month.

Once again, Wendy's was the survey's biggest gainer. Last month, its advertising came to mind first for 27.4% of respondents, up 6.1 points from a 21.3% share in September. Much of that gain came at the expense of McDonald's, whose share of category awareness continued its slide. Big Mac's advertising was named by 35.9% in October, down 4.1 points from 40% in September.

Burger King remained in the No. 3 spot despite a 3.3 point drop to 10.5% of first mentions. But the new comparative advertising that broke last week could help BK narrow the gap once again.

- Despite having a fairly narrow user base, the **computer** category has a surprisingly strong awareness level. Only 31% of respondents last month were unable to recall advertising for computers, a better showing than the laundry (37%), medicine (38%), home electronics (62%) and financial services (62%) categories, among others.

Apple still dominates the category, getting 33.3% of first mentions last month. But IBM made a small improvement, rising 2.9 points to a 16% recall share. Commodore remained No. 3 with 5.7%.

- It may seem un-American, but 20% of respondents didn't recall any advertising for **cars and trucks** last month. Among those who did, more recalled Ford advertising. Its share of first mentions last month was 23.9%, a 2.9 point improvement over September.

Chevrolet ranked second with 14.5%; Toyota was No. 3 with 8%.

- The two leaders in the **airlines** category swapped standings last month. American's recall rose 2.9 points to 16%, enough to displace United in the No. 1 spot. Eastern's share of first mentions dipped 3.1 points to 8.8%, keeping it barely ahead of No. 4 TWA (8.4%) and No. 5 Delta (8.2%).

- Folger's is back as No. 1 in the **coffee** category even without Mrs. Olson. P&G put the product's longtime spokeswoman on hiatus in September (AA, Sept. 27), but recall of the product's advertising hasn't suffered at all. Indeed, it rose slightly (2.5 points) to 24.5%.

Meanwhile, recall of former No. 1 brand Maxwell House tumbled 6.9 points—the heaviest loss of the month—dropping it into the No. 2 spot with 20.2% of first mentions. Perhaps Maxwell House could pick Mrs. Olson up on waivers.

Sanka moved into the No. 3 spot with 6.4%.#

Decadence

(Continued from Page 36)

rately portrayed—in "The Big Chill."

Nine years ago, a couple of the Decadence Party hosts were teachers, one was a lawyer at a legal-aid clinic, one a perennial student. Struggling, idealistic, hard-drinking, dope-smoking types (although they were already beginning to swear off the dope by then). Fertile minds, tons of potential. Most of them hung out together in certain Quarter bars, and there were other connections—Tulane and U. of New Orleans.

Now look at them: Solid citizens, hard workers, conformists—the ones who don't leave home without it. The legal-aid lawyer has become a prosecutor for the city, and has even run (unsuccessfully) for district attorney.

One of the teachers is a real estate broker who owns some nice pieces of property around town. Another teacher has become the chief economist for the city.

The perennial student has married her gynecologist and, word has it, left school...

At 3 o'clock the party is losing whatever steam it had. At 4 o'clock, I'm having trouble spotting any scene with a remote hint of decadence, or even modest excess.

At 8 o'clock that morning I'm on my way back to New York. Forget about October 31st in the Quarter. On the streets of Greenwich Village, there's a parade every Halloween that, while not quite decadent, is four or five times as racy as anything I've seen down here all week.#

Brady's Bunch

I think **Svetlana** and the Russians deserve one another.

Roger Railton-Jones of Carl Byoir (how about that for a pr guy's name?) writes to say **Richard Burton's** first film, about the inundation of a small town by a great new dam, was "The Last Days of Dolwyn," produced by Anatole de Grunwald about 35 years ago. Railton-Jones worked for Grunwald, and after the film was made Burton returned to the West End stage but was, even then, Railton-Jones recalls, talking about "making a financial killing in the movies."

Was anyone terribly surprised when all six of our **Olympic fighters** won their first pro bouts the other night on ABC?

I'm deeply shocked to learn, now that the elections are over, that **Mr. Stockman** has informed the President the current year's budget deficit won't be the $175 billion he promised but actually $210 billion. I guess new data suddenly became available because I'm sure if he'd had this info on Nov. 5, Mr. Reagan would have shared it with us.

Interesting quote from Time Inc. editor-in-chief **Henry Grunwald** in his Chet Huntley Memorial lecture: "It is significant that several right-wing activist groups have been set up to finance libel litigation against the press for political reasons."

Grunwald

Burton

Stockman

Anouk Aimee, the lovely French actress in town with her pal, designer Emanuel Ungaro, said the remake of "A Man and a Woman," with Jean-Louis Trintignant, is about to roll. Anouk looks every bit as good as she did in the original and in her first big film, "La Dolce Vita." And she's still wearing those dark shades.

Joel Raphaelson of Ogilvy & Mather informs me that **Mencken** was not "sour." And he promises to tell me about a chat he and Mencken had in 1948 at the Progressive Party (Henry Wallace) convention in Philadelphia. Such promises sustain me in these difficult times.

Bob Lauterhorn of International Paper tells me their public service ad campaign getting kids to read and write effectively, "The Power of the Printed Word," which has been running since 1979, draws about a thousand letters a day. With functional illiteracy a bleeding wound in this country, this is solid stuff indeed.

Best football game of the season, college *or* pro, was Boston College-Army. **Flutie** was there, of course, and Army had some kid with three broken ribs playing quarterback and running every other play. Final was 45-31 and when it was over all those Boston Irishmen got up and cheered the Army guy. When you get stuff like that, who needs Kansas City versus the Vikes?

Good party tonight (Nov. 26) at the Algonquin in Manhattan. Arthur Miller, **Dustin Hoffman** and others will be there to celebrate a new publication of "Death of a Salesman" by the Limited Editions Club.

Sexy Rexy Harrison, sporting a Henry Higgins hat, camel's hair coat, red scarf and three-week beard, annoyed a few patrons of the Four Seasons the other day by stepping merrily to the head of the hatcheck line. Liza Doolittle would 'ave 'ad 'is 'ead.

I asked **Pavarotti** if he enjoyed popular music. Oh, yes, very much so. The Beatles? "I am ecstatic," said the great man. Boy George? "Ah, yes." Luciano was in town for a Madison Square Garden concert, yet another sellout.

J.C. Penney president David F. Miller takes over a New York disco, Private Eyes, tomorrow (Tuesday) to launch a new women's wear collection by **Lee Wright**. Mr. Miller says Penney is determined "to become America's first national department store."

Only two world heavyweight champs attended college. Who were they?

Michael Paulle, whose Synarome Corp. came up with the pre-election idea of a "Gerry" perfume, tells me now they're thinking of a **George Bush** cologne called "Kicking Ass."

I'm supposed to know about such things but I was absolutely stunned when New York's *Daily News* announced cartoonist **Paul Rigby** was jumping to the *News* from the rival *Post*. Rigby, an Australian, has long been closely associated with *Post* owner Rupert Murdoch, having worked for Rupert's papers in Australia and London before coming to New York seven years ago. A source at the *News* tells me several other *Post* stars are on a *News* "hit list" as Jim Hoge heats up the newspaper wars.

Richard Burton married five wives, drank too much, ignored his doctors' advice, raised hell and left an estate of $4.58 million. There must be a moral here somewhere.

Browning spray from Clorox bows

By JENNIFER PENDLETON

Buoyed by predictions that microwave ovens will be in more than 50% of U.S. households by the end of 1985, Clorox Co. will become the first major company to market a microwave browning agent nationally.

The Oakland, Cal.-based marketer will be out with Kitchen Bouquet Microwave Browning Spray in December, backed by magazine, newspaper and tv advertising (AA, Nov. 19). The browning spray is a line extension of its Kitchen Bouquet browning, seasoning sauce and gravy aid.

A Clorox executive said regional browning agent products are usually applied with a brush. Clorox's pump spray offers greater convenience, the company believes.

Ads in women's and food magazines, as well as freestanding inserts, will break in December. They will compare the look of meat prepared in a microwave oven without a browning agent with those sprayed with Kitchen Bouquet. Newspaper ads and tv spots will follow. Young & Rubicam, San Francisco, is the agency.#

Saatchi

(Continued from Page 2)

them marketing counsel and not just to make ads," said Mr. Bowen. "So in the broadest sense, consulting with clients is part of the totality of an ad agency."

British investors also liked the idea. "The market reaction was very enthusiastic," said Mark Shepperd, an investment analyst at Phillips & Drew, London, the securities company that placed £80 million worth of stock with its clients in order to fund the buy.

"They're brilliant in financial maneuvers. No one can fault them in that area," said Philip Geier Jr., chairman-chief executive officer, Interpublic Group of Cos., New York.

But management consulting is not a direction IPG is headed in. "I wouldn't do it," said Mr. Geier. "I want to see things integrated into the agency system. I believe in communications coordination."

Robert Jacoby, chairman-chief executive officer of Ted Bates Worldwide, New York, believes that management consulting is a very different kind of business from advertising.

"I think it's a big mistake," he said of the Hay acquisition. "Every time agencies, in this country at least, have gone too far afield in acquisitions they've gotten burned.

"If you wander too far afield in acquisitions, how do you go in and fix it if something goes wrong?" said Mr. Jacoby.

Others, including Mr. Bowen, didn't see that as a problem. "My experience is that if you have a good set of managing principles, it works everywhere," he said.

But does Saatchi have those good management principles? Or is it buying up too much too fast?

There is some concern among potential sellers about being caught up in the whirlwind. In discussing why Doyle Dane Bernbach International decided not to sell, Barry Loughrane, chairman-chief executive officer, gave a reason that might apply to other major shops as well. "Supposing Doyle Dane Bernbach sold to the Saatchis," said Mr. Loughrane. "Then a year later when they'd buy another agency, and the year after that when they'd buy yet another, what would happen to Doyle Dane Bernbach?"

Mr. Shepperd believes Saatchi will need some breathing space now. "They are going to be very busy over the next few years with this," he said. "I would be surprised if there was another major acquisition in the advertising sector in the next 12 months."

A Saatchi spokesman disagreed, saying, "This acquisition should not be taken to mean that we won't be in a position or interested in acquiring either another advertising business or another business." He also felt that the agency already has proved it is a successful manager of acquired businesses.

Except from a financial standpoint, "I don't think anyone in the U.S. is particularly impressed with what's happened at Compton," said Emma Hill, an analyst at Wertheim & Co., New York, who is generally impressed with Saatchi. "They've turned Compton into a money-making machine."

She compared Saatchi with Ogilvy & Mather, which she called "a superb advertising agency, but one that doesn't have the financial prowess that Saatchi has. Long-term success depends on how good you are at servicing clients, but stock price is dependent on how much money you're making this year," she said. "I'm not saying that they're not balanced, but just that they definitely stand out on the financial side."

Many industry observers agree that they have not seen any great transformation at Compton, but Saatchi and Compton explain that that's because none was intended.

"Compton is a very, very successful agency. It wouldn't be appropriate for Compton to change its image," the spokesman said.

Moreover, the Saatchi spokesman said, "This is a service business. If you're not managing a service business well, you lose clients or you lose personnel," neither of which has been the case at Compton.

Some think it's too early to project whether Saatchi will be a successful manager of a large variety of businesses.

"They're making sound business decisions. I think Compton was a smart move," said Ms. Hill. "But are they building an organization through acquisitions that has continuity and quality? I can't say they're not, but it's just too early."#

Daily double for Dallas

Bloom blossoms for 800-FLOWERS

Irving, Tex.—Floral telemarketer 800-FLOWERS and Chiat/Day, New York, have parted company, citing "mutual operating considerations."

Word leaked that Bloom Agency, Dallas, had snapped up the $12 million account, though officials at Bloom and 800-FLOWERS would not confirm the appointment.

Bloom issued a staff memo Nov. 20 announcing the agency's selection by 800-FLOWERS.

But the next day, Bloom officials would not respond to inquiries, and 800-FLOWERS vp-advertising Connie Kennedy stood by the company's prepared statement, in which president John Douglas said no agency has been appointed to succeed Chiat/Day.

The new telemarketer selected Chiat/Day last summer (AA, June 25). It then began test-marketing in Chicago in preparation for introduction in Dallas-Fort Worth, Los Angeles, New York and then a sweep nationwide in the first half of 1985 (AA, Oct. 15).

Ms. Kennedy said the disruption in agency relationships will not set back the company's scheduled national expansion.

Chiat/Day president Guy Day said that the agency and client are parting as "the fondest of friends." Distance had become a factor in the relationship, he said.

"Startup companies are strange beasties," Mr. Day added, saying that "emotionally, we were in sync, but we weren't right for each other."

The service can accommodate 600 operators at its headquarters and telemarketing center here, where customers' orders are relayed to 5,000 member florists. The service, based on minimum $30 credit-card orders, offers a replacement guarantee within 24 hours if, for any reason, the flowers are not beautiful when delivered.#

Fina closer to home at Levenson

Dallas—American Petrofina will end its 20-year relationship with Geer, DuBois, New York, on Jan. 1 by shifting its estimated $2 million account to Levenson, Levenson & Hill here.

Despite the change, Fina's advertising will continue to feature country singer Mel Tillis as spokesman, said J.W. (Bill) Cahill, the company's director of advertising and public relations.

The marketer of gasoline products in 22 Sunbelt and Midwest states had been quietly looking at what he said are the five leading agencies here. His goal was to develop an agency link closer to home.

The move follows the naming of Paul Meek as chairman in October and the promotion in March of Jackie Thomas to vp of the company's American Petrofina marketing division.

Mr. Meek has retained the posts of company president-chief executive officer. As chairman, he succeeds R.I. Galland, who retired. Mr. Thomas previously was on special assignment with Fina and had no official title.

In recent years, Fina has used tv in the spring, radio in the summer and tv again in the fall, Mr. Cahill said. It also has sponsored Southwest Conference college football broadcasts for two years.

The account shift does not affect Fina's petrochemical trade advertising account, which remains at Womack/Claypoole/Griffin, Mr. Cahill said.#

Ford buy

(Continued from Page 1)

mitment to "big event" use of tv as the cornerstone of its 1985 marketing plan, a strategy that has been unfolding for several years. Ford's 1985 media budgets still are not formally approved, yet the auto maker decided to move quickly on the special request of its media strategists to lock up both the Super Bowl and "North and South," a Civil War saga.

"We made a buy we felt was consistent with our advertising strategies and goals and [the buy] complemented what ABC wanted to do as well," said Chuck Schneider, media analysis manager of the Ford division.

The big buy will form a major wraparound for Ford's entire marketing strategy in 1985. While the Super Bowl will kick off the auto maker's calendar year, ABC's Civil War miniseries will be telecast near the start of its new model year. The miniseries will be used to support Ford's 1986 new-car introductions.

Ford's Super Bowl participation will total five announcements in the second and third quarters of the game. Ford also will have opening and closing billboard credits during those quarters.

Ford will share "North and South" sponsorship with four others. The deal gives the company opening and closing billboards on the telecast for four nights.

"This [buy] is not something new or unusual," said Mr. Schneider. "If anything, it is a restatement of the strategy we've had for some time, coincidental with the fact that we had sponsorship on 'Winds of War,' which was also on ABC. Basically, we think ABC has demonstrated the ability to produce high-quality miniseries." Mr. Schneider added that the Super Bowl and "North and South" would be two of the largest single tv purchases of the year.

Ford's appetite for the Super Bowl was whetted by the fact it would not have the baseball World Series in '85, Mr. Schneider said. He added that the purchase would not affect Ford's other National Football League commitments, which include quarter-game sponsorship on NBC's NFL schedule and on some of CBS' games.

Sharing the Super Bowl berth with Ford will be Nissan, the foreign auto sponsor, and a host of other advertisers, including Anheuser-Busch, Cullinet Software, ComputerLand, Johnson Controls, McDonald's, Minolta, Northwestern Mutual Life Insurance Co., Sharp, Sony, IBM and Stroh Brewery, according to ABC. Apple Computer also has purchased time on the event, which will be played at Stanford Stadium, Palo Alto, Cal., near the computer manufacturer's Cupertino headquarters.

At a cost of $525,000 for a 30-second unit, ABC will reap at least $25 million from the game. ABC said 46 units out of 50 have been sold, although four of the sold units technically are on hold pending final signing of contracts.

Initial resistance to the high price led to the pullout of several major advertisers that were sponsors of NBC's 1984 telecast, including National Life Insurance, Tandy and Eastern Air Lines (AA, Oct. 1). However, ABC confidently predicted it would be hanging out the SRO sign by kickoff on Jan. 27.

Nevertheless, resistance to the steep price did not soften at several agencies. A source at one major shop derided ABC's Super Bowl pricing strategy as "creative" and refused to place clients in the event. Yet it appears that many advertisers agreed with another opinion about the Super Bowl: "At first, you think $1 million a minute is mind-boggling and that no one could rationalize paying that," said one agency executive. "But then, after sitting in the quiet of analysis, you realize it will get a 50 rating and be a giant event."#

CBS Cable

(Continued from Page 1)

sion. Executives at Cablevision, CBS and Washington Post Co. refused to comment.

But other sources said the deal could be announced today.

The four sports networks serve Chicago, New England, the New York tristate area (Connecticut, New Jersey and New York) and Philadelphia. Bravo is a 4-year-old cultural channel, and American Movie Classics is a 6-week-old companion pay channel to Bravo.

The deal comes two years after CBS became the first company to fold a cable tv service. CBS Cable, an advertiser-supported cultural service, was disbanded in 1982 after piling up $30 million in losses.

"But this move makes a lot more strategic business sense," said Joseph Fuchs, an analyst at Kidder Peabody & Co. "They're not going it alone, so the risk is much less and these services have broader appeal than CBS Cable did. It's a logical extension of their business."

The main motivation for CBS' getting back into cable, however, may be to gain another outlet for sports programing. Sports broadcast-rights fees in recent years have risen sharply, and having another distribution vehicle beyond the network would help CBS stay competitive with its rivals, especially ABC, which now owns 80% of Entertainment & Sports Programming Network.

CBS could use the cable outlets for those sporting events it purchases as parts of packages but that it cannot squeeze into its network lineup. Having cable services also may give it leverage when bargaining for broadcast rights.

Not everyone agrees with the possible advantage of CBS' move. Alan Gottesman, an analyst at L.F. Rothschild, said that "the smartest thing CBS ever did was get out of cable. Why should they mess with their revenues like this? They're a $6 billion company."

The deal makes sense for Cablevision and Washington Post Co. It gives them cash and spreads the risk.

Of the six services, only SportsChannel in New York and Prism, the Philadelphia sports network, are profitable. Cablevision officials claim Bravo could break even by the end of the year.#

But heavy promotion is key

An Advertising Age roundup

The post-Thanksgiving Christmas shopping rush turned up strong sales for many stores across the country. But retailers had to work hard for their money and their fast break from the starting gate.

Department stores, in particular, relied heavily on intensive promotional packages that possibly cut into sales of some mass merchandisers and smaller specialty stores. But even so, not all department stores managed to keep up with the pack, as evidenced by some spotty sales and a slow start for a few in the Southeast. Southwest and Northwest.

"I've never seen such a promotional Christmas," said John Landschulz, a securities anyalyst who follows retailing for Mesirow & Co., Chicago. "The department stores have really worked the market, and consumers are responding to all the good deals. They hung back a little on promoting price but now they're in full swing."

Mr. Landschulz said that for the first time he is hearing mass merchandisers complain about how aggressive department store chains are taking market shares.

As a general rule, how things go immediately following Thanksgiving can indicate results for the entire Christmas season. Between Thanksgiving and Dec. 25, stores can take in as much as 30% of their annual sales and 50% of their profits.

Said Gil Berliner, vp with Independent Retailers Syndicate, a New York buying office representing 180 department and specialty stores and regional chains: "Promotions are still very much with us and very strong, but so far we're very positive, with our stores averaging 10%-to-12% gains for Thanksgiving weekend. But you have to take each day as it comes. The momentum started early and we hope it continues."

He cautioned that if there is any slack, stores will unleash a barrage of unplanned markdowns along with the planned sales.

On Nov. 23 and 24, Carson Pirie Scott & Co., operating 24 stores in the Chicago area and downstate Illinois, posted double-digit sales increases, said Neil A. Ramo, president of the chain's department stores division. But at least some of those gains, a Carson's spokesman said, were attributable to a 48-page "sale book," Carson's first-ever attempt to so visibly promote its traditional storewide

Billboard's buyers see stock topping charts

By STUART J. ELLIOTT

NEW YORK—One of the new owners of Billboard Publications says the company could someday be selling stock to the public.

"We hope to take the company public in the next three to five years, if the markets are right," said Gerald Hobbs, one of two leaders of a management group involved in the buyout of Billboard.

Such a move would be in keeping with the new owners' philosophy of "looking for growth" in the company, Mr. Hobbs said.

Billboard, which has been on the market since last summer (AA, July 5, *et seq.*), is to be sold to a corporation owned by Boston Ventures and a Billboard management group.

Boston Ventures is a limited partnership that specializes in investing in communications, entertainment and leisure companies. The Billboard management group is led by Mr. Hobbs, exec vp-publisher, *Billboard*, and Samuel Holdsworth, publisher, *Musician*, one of the company's five other magazines. An unspecified number of other employes also are to be shareholders in the management group.

The purchase price was not disclosed. But it is believed to be a bit more than $40 million, which would be on the high side of the estimates that publishing industry sources had placed on the company's worth. Those figures ranged from $30 million to $40 million.

Billboard's annual revenues are about $45 million, with net income said to be at about $3 million.

Under a definitive agreement reached Nov. 26 and expected to be completed early next year, Billboard is to be sold to Boston Ventures and the management group by William Littleford, chairman, president and

A(shton) to Z(iff) for Cole

By STUART J. ELLIOTT

NEW YORK—David Cole, former chairman-chief executive officer of Ashton-Tate, a leading software publisher, is joining Ziff Corp. to supervise its computer magazines, databases and information companies.

The appointment of Mr. Cole as president-chief operating officer follows by a week the sale of 24 major consumer and business publications by owner William Ziff (AA, Nov. 26). The naming of Mr. Cole is seen as a way to emphasize that Ziff Corp., even after selling $712.5 million in magazines, still owns some major media properties.

Mr. Cole will succeed Philip Korsant, who becomes Ziff Corp.'s chairman. Mr. Korsant succeeds Mr. Ziff, who becomes chairman of the executive committee, a new post.

"David Cole's mission," Mr. Ziff said in a statement, is to make the company's remaining holdings "preeminent in their fields." His "vision and thoughtfulness," he said, as well as Mr. Cole's past print experience, "make him particularly well suited to lead us."

Mr. Cole left Culver City, Cal.-based Ashton-Tate in October to accept what he then called a "once-in-a-lifetime position" with an unidentified East Coast company (AA, Nov. 26). He joined Ashton-Tate in 1982 as president-chief executive officer.

At Ziff, Mr. Cole will supervise 11 computer publications: *A-plus, A-plus Buyers Guide, A-plus Disk, Computers & Electronics, Creative Computing, Digital Review, PC, PC Buyers Guide, PC Disk, PC Tech Journal* and *PC Week*. He also will supervise two databases—Data Decisions and Data Sources—and five information companies. ∎

JWT & ABC ask: To split, or not to split?

By VERNE GAY

NEW YORK—J. Walter Thompson USA and ABC-TV Network, in an unusual joint research project, are seeking answers to an advertising enigma: Will split-30s hurt or enhance commercial tv?

The results of the project (AA, Nov. 26) will serve as the basis for ABC's policy in accepting and placing split-30s, which are two commercial units for dissimilar products from the same advertiser contained within a single 30-second commercial unit.

JWT hopes the results will support its position in favor of splitting the 30-second unit. The agency has encouraged clients to use split-30s to build frequency and cut costs. JWT therefore was encouraged by initial results of the test: Viewers tended to recall no more than four ads per half-hour program, no matter the length of the commercial or the number of commercial messages in a pod.

Both parties also hope the results will serve as the benchmark for industrywide acceptance of the practice.

The project is unusual in at least two respects. It marks the first time a major tv network is cooperating with an agency to decipher the impact of split-30s on viewer recall and commercial clutter. The formal union of a leading agency and a network on a pivotal research question is a milestone as well.

The issue of split-30s arose last year when Alberto-Culver, following the abolition of the National Assn. of Broadcasters code on acceptable commercial loads, demanded that the tv networks permit advertisers to "program" their 30-second units with more than one product. Previously, unrelated products could not appear in the same commercial pod.

The controversy, which has divided the advertising industry, centers on the potential of severe commercial clutter if splitting the 30 becomes the norm. Also, advertisers worry that the 15-second unit will replace the 30-second standard but that prices will not be cut in half. Split-30s also have divided advertisers into two camps: Package-goods advertisers, who most readily could employ split-30s to advertise underbudgeted brands, and other service and big-ticket-item advertisers, for whom the split-30 is worthless. This latter group fears that the increase in split-30s by other advertisers will weaken the impact of their own advertising.

ABC approached JWT in August about the collaboration because "we wanted to acquire credibility. For a network to do this on a unilateral basis might open it to questions," explained Marvin Mord, vp-marketing and research services, ABC Inc.

The research project will cover two phases. A third phase dealing with "other issues," including commercial zapping, will be undertaken by JWT alone.

The first phase, which ended last week, included interviews with 30 persons who had watched a half-hour pilot comedy show supplied by ABC. The program had three commercial breaks. The first pod

Crafted in the interim

Warwick Advertising's interim ad campaign for the Crafted with Pride U.S.A. Council uses provocative headlines to educate businessmen and consumers about the forthcoming "Made in U.S.A." labels. The bulk of the campaign, however, does not yet have an agency. Warwick is one of at least 10 agencies that will begin making presentations the first week in December (AA, Nov. 26).

MADE IN THE USA

He'll be looking for US in his shirt.

And in his jackets. And slacks. And rainwear.

Because as a result of Congressional legislation, consumers will have a choice. All apparel and home fashions manufactured in this country after December 24 will proudly carry a "Made in U.S.A." label.

Your customers are going to come looking for it. And we'll be telling them why they should look for it in a big, big way.

We're mounting a multi-million dollar campaign that will make consumers aware of the quality, the style, and the value of merchandise made in the U.S.

It's clear that we mean business. Big business for you. You already know you get better delivery with US. And that you can reorder easily with US. And that you don't have to commit your money far up in front with US.

So as you plan Fall '85, look at US before you leap overseas.

Take a good look at US.

CBS cable deal counters ABC

Sports rights bidding a key

By SUSAN SPILLMAN

New York—CBS' $57 million return to cable tv programing was a calculated move by the media giant to gain negotiating leverage in sports rights bidding and to counter ABC Inc.'s majority ownership of Entertainment & Sports Programming Network (AA, Nov. 12, *et seq.*).

It also gave CBS a virtually risk-free entry into the pay tv sports business, since team contracts already have been hammered out with the four regional sports services in which it purchased an equity interest.

CBS purchased equity in regional sports services in the New York area, Philadelphia, Chicago and New England, and two national pay tv networks—Bravo, a 4-year-old cultural service and American Movie Classics, a 2-month-old companion service.

"The deals give us some negotiating power when buying sports programing for CBS. It will especially make us competitive with ABC, which owns part of ESPN," said James Rosenfield, senior exec vp, CBS/Broadcast Group.

He added, "We targeted regional pay tv sports as an important area for us to get into several years ago, but in going it alone the economics just weren't right. This fits our strategic plan like a glove."

In 1983, CBS explored putting together sports networks in the San Francisco area and Cleveland.

As for Bravo, the service is expected to turn a profit for the first time by the end of this year. Mr. Rosenfield said Bravo represents an opportunity for CBS to show its programing expertise.

"We're in the tv business," said Mr. Rosenfield, "and pay tv is a part of the future of tv, so we should be in that too."

CBS had been in the basic cable adver-

Barter films hurt nets

Advertisers take notice

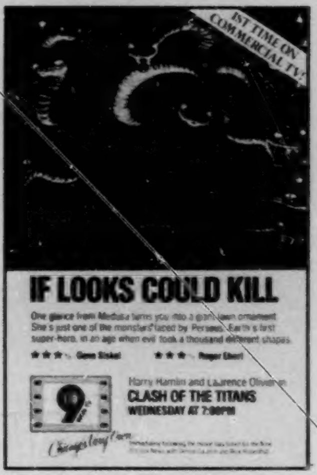
By BOB MARICH

A new generation of barter syndication movies and specials are challenging—and sometimes beating—the three commercial tv networks in their stronghold of prime time.

"Clash of the Titans," an MGM/UA Television theatrical film syndicated to 110 tv stations covering 85% of U.S. tv households during November, is the latest example of the trend.

The movie beat or tied the three commercial networks' programing, including CBS' "Magnum, P.I.," during a Nov. 1 telecast in San Francisco via KTVU, Cox Communications' independent tv station. In San Francisco, "Clash" averaged a 12.4 rating/19 share in the A.C. Nielsen Co. ratings and a 14.7/23 in Arbitron Co. ratings. The measurements came during a crucial rating sweeps period.

High ratings for "Clash" are trickling in from other markets, too, although tv stations elsewhere often are scheduling the movie on a variety of nights. Because such syndication specials tend to air over a period of days or weeks and pop up irregularly, their impact has been largely overlooked by the tv industry. However, many advertisers are taking notice.



1ST TIME ON COMMERCIAL TV!

IF LOOKS COULD KILL

One glance from Medusa turns you into a giant lawn ornament. She's just one of the monsters faced by Perseus, Earth's first super-hero, in an age when evil took a thousand different shapes.

★★★ — Gene Siskel ★★★ — Roger Ebert

Harry Hamlin and Laurence Olivier in CLASH OF THE TITANS WEDNESDAY AT 7:00PM

"Clash of the Titans" is just one syndicated movie beating the nets' prime time programs.

"The syndication market is a growing alternative to the [three commercial] tv networks in which you can get sizable national audiences," said Peter Spengler, vp-advertising sales at Bristol-Myers. B-M was a major sponsor of "Andrea Doria: The Final Chapter," an Aug. 16 prime time special about a sunken ocean liner, which posted a 19.5 rating nationally in the Nielsen Television Index. The highest network average during that week was ABC-TV's 13.3 rating.

More potent prime time syndication specials will surface in the weeks ahead.

A made-for-tv syndication movie starring Mickey Rooney, "It Came Upon the Midnight Clear," will air the week of Dec. 8. LBS Communications has lined up 110 tv stations covering 85% of U.S. tv homes to carry the drama. Columbia Pictures Television, a Coca-Cola Co. unit, produced the movie, and Coke is a half sponsor. Other major sponsors lined up by LBS are Beatrice Cos., Revlon Inc., Pillsbury Co., Procter & Gamble, American Cyanamid Co., Taylor

(Continued on Page 4)

FCB sees stars in syndication try

Los Angeles—Foote, Cone & Belding's tv programing arm is entering tv syndication for the first time with a series about Hollywood movies plucked from cable tv.

The program is "Seeing Stars," a weekly half-hour series in which stars talk about themselves and their movies. Orbis Communications, a New York barter-syndication company, will handle sales to broadcast tv stations and also national ads within the syndicated show.

"Seeing Stars" makes its syndication debut in April, at which time it will cease to run on USA Cable Network, where it started in June. FCB/Telecom, the agency's program arm responsible for five cable tv series, created the show as a sponsored cable series for Clorox Co., which will be the major sponsor of the syndicated version.

Jack McQueen, senior vp-director of FCB/Telecom, said the program's cable run proved it has audience-pulling power, particularly among young women, Clorox's target.

Past guests have included Sylvester Stallone, Bill Murray and Steve Martin.

Mr. McQueen believes the switch to broadcast syndication will increase "Seeing Stars" audience. He hopes that, as a syndicated vehicle, the series will reach about 70% of the U.S. (59 million tv households) compared with USA Cable Network's 32% penetration level (27.3 million tv homes).

Executive producer Dick Crew said tv stations carrying the show will get clips of star interviews suitable for plugging into the stations' news and local magazine programs as short reports.

"Alive & Well," Bristol-Myers Co.'s health series, made the transition to commercial tv syndication from cable tv in September. But that series, now on 15 tv stations, continues to air on USA Cable Network. Orbis Communications also is the syndicator of "Alive & Well," a five-day-a-week hour series in syndication.#

Media budgeting needs creative touch

By HERB ZELTNER

One of the chronic yet important challenges facing media strategists is answering agency and client management questions about the ad budget:

What is my optimum spending rate? Why should I okay such a large increase? All my other expenses are being held tight so why should my advertising costs be allowed to go up so fast?

It's understandable that considerable management attention is focused on the matter.

After all, media costs are usually one of the largest expense categories for most marketing organizations.

In an attempt to find good solutions to next year's budget, media and marketing strategists traditionally resort to one of several techniques.

The most common is adjusting last year's budget to reflect changes in volume or revenue goals. This presumes a direct cause-and-effect relationship between advertising pressure and sales results. That may be possible in retail and direct response efforts, but it certainly is a forlorn hope in most national-brand image advertising.

Another approach is adjusting last year's budget by the level of anticipated change in inflation indexes—usually for the economy in general, but sometimes by projecting media cost increases. The problem often inherent in this process is that a marketer ends up spending more to stay even, and thereby does not improve his coverage over the previous year.

This is the second in a series of articles about the dramatic new challenges that confront media thinking and practices. Written by Herbert Zeltner, editor of Ad Age's Sounding Board and a media expert and advertising consultant, the articles deal with the developments and trends that are shaping management decisions of today's media operations. The editors of Advertising Age invite reader response to these articles.

A third and widely used technique is studying competitive spending levels and then reacting. One alternative would be to maintain "share of voice" by estimating what it takes to achieve the same percentage of total competitive spending in the category. This "share of voice" approach can be adjusted, depending on the market situation and management intent.

The problem with this approach is that the competitors' figures probably are incomplete and out of date.

A further drawback to competitive "framing" is that this concept cannot account for likely changes in the effectiveness of new creative and media moves by competitors.

Another approach to budgeting ad dollars is the surprisingly widespread use of a "leftover" technique. In this case, the ad budget is simply the total of all remaining revenue funds (plus a planned profit contribution) after other costs are subtracted.

As primitive as the approach may seem, it offers practicality. Its use also recognizes that we really know very little about optimizing media expenditures, but it doesn't consider potential gains in adver-

Price increases to moderate in 1985

By Robert J. Coen

Media inflation in 1984 failed to track the general inflation rate, as had been expected. The composite increase of all media prices went from 7.1% in 1983 to 8.2% in 1984. The gross national product price deflator for the full year is expected to rise only 3.8%, as it did last year.

Since the middle of 1983, retailers and manufacturers have experienced a surge in pentup buyer demand. This is why media prices rose sharply again in 1984 while most other prices continued to move only moderately higher, in the range of 3% to 5%.

In 1985, the economic expansion will be considerably smaller than it has been, and next year's advertising activity will not receive the extra stimulus of the Olympics or the elections. The media inflation rate in 1985 most likely will be significantly lower than it has been this year.

Media price trends

Media price trends correlate with total inflation over long periods of time, but shifts in supply and demand are the major explanations for short-term price changes.

Because network tv prices have been rising faster than inflation and most other media prices, this category provides an ideal illustration of the way these variables influence price changes for the perishable time and space units of all media.

> **Shifts in supply and demand are the major explanations for short-term price changes.**

Brief observations about the recent trends in the other major media follow the more detailed review of network tv trends.

Network tv

Tv clearly has demonstrated that it can produce awareness and a minimal amount of information about products faster than any other medium. As a result, the demand for network time has grown nearly every year for a third of a century.

The table on p. 12 indicates what has happened to prime-time commercial prices between 1973 and 1983 as a result of the limited supply of prime-time inventory.

In 1973, all three networks combined had only 20,436 minutes of prime evening commercial time to sell. The increase to 23,980 minutes 10 years later is insignificant when considered in relation to the thousands of different brands bidding for these time slots.

For example, National Scanning Services, a subsidiary of NABSCAN USA, has nearly 300,000 product codes in its scanner dictionary. Some brands have three or four codes, but NABSCAN estimates there are more than 50,000 brands sold in supermarkets alone.

Ten years ago, five major product categories—food, toiletries, drugs, soaps and household supplies—accounted for 59% of all network revenues and, whenever their demand softened, network price rises were quite modest. In 1983, these advertisers accounted for only 48% of network revenues while new big spenders widened

Increases to moderate

(Continued from Page 11)

the buyer demand.

Advertisers of beer, apparel, utilities, amusements, office equipment and financial services increased their share of network buying from 9% in 1973 to 23% in 1983.

The networks' total ad revenues in 1984 have been excellent. Total 1984 ad expenditures on the networks should rise by more than 16% over 1983. Most of this increase comes from higher prices. The number of network commercials sold will be only about 1% more than 1983, so the average cost of all network commercials will be about 15% higher than in 1983. After discounting for the extraordinary increases for the Olympic spots, the other commercials in 1984 cost 12% more than in 1983.

In 1985, the networks will continue to enjoy some of the benefits of their "sellers" market situation, but they also will confront the fact that the large cumulative rise in prices recently may eliminate buyers that no longer can afford network tv. In 1985, consumer prices are expected to rise about 5%, but network tv unit prices most likely will continue to rise at a somewhat faster pace—about 8%.

Spot tv

In 1984, the Olympics, the elections, the spillover or shift from the networks and the improvement in local retail advertising activity helped keep spot demand strong in most markets. Spot rates did not go up as fast as network rates, but a rise of 10% was higher than other media. In 1985, we expect spot prices to moderate and rise about 6%, or just a little more than consumer prices.

Radio

The radio medium is subject to about the same pressures as tv except local market conditions have more weight in determining demand.

In 1984, demand was strong and the indications are that network radio prices rose about 9% and spot 8%. In 1985, we expect to reach a plateau in demand, but we expect network radio prices to move upward 8% and spot 6%.

Newspaper

The newspaper medium is similar to tv because in most markets there is only one major "seller" of newspaper ad space. The newspaper has a monopoly and because space is limited, rates usually rise faster than other prices in our economy, even when newsprint prices fall.

In 1984, newspapers raised their rates in most markets about 9%. Even though the rate of increase will moderate slightly in 1985, we still expect price increases of 8%.

Magazines

Magazines are, in principle, no different from any other medium in their desire to maximize the rates they charge for the space in their perishable issues. The main difference between magazines and other media relates to the supply side of the relationship.

The supply of choices available as advertising options is much greater in the case of magazines than in any other medium, causing magazine rates to move up slower than other media rates. It also explains why the readers of magazines contribute (through subscriptions) much more to total publication revenues than they do in the other media.

Nevertheless, when magazine ad demand quickened in 1984, rates went up about 8% and, although moderation is expected in 1985, it still will cost about 7% more to buy magazine ad pages.

Outdoor

The outdoor media is another classic example of the supply and demand model. In the '50s and '60s, the medium lost many traditional outdoor advertisers to tv, and highway beautification pressures trimmed the supply even further.

By the end of the '60s, the supply of outdoor space had declined to a bare minimum. Then demand jumped sharply when tobacco products left the broadcast media and began to sign up for an increasing number of outdoor boards. For the past 15 years, new cigaret brands helped to swell the demand, while a proliferating number of beer, wine and liquor brands also bid for the space.

The number of locations and the quality of the locations increased slightly, but plant operators maintained a balance that kept outdoor as a sellers' market for years.

For more than a decade, the outdoor medium has obtained double-digit annual increases. In 1984, liquor and cigaret demand cooled, and the price increases for this medium finally are showing signs of moderation. This year, the increases averaged about 8%, and next year we expect price increases to

Sources: BAR, Nielsen, Department of Commerce moderate even more.

In markets with unsold locations, prices may not change much at all next year, but in most markets the prices should be about 6% higher than they are this year.

Direct mail

In recent years, the volume of ad messages distributed through the mail has soared.

Two years ago, the U.S. Postal Service introduced special discounts for mail presorted by carrier routes.

That helped reduce the unit cost of mail advertising.

In 1984, the expansion in unit volume continued and postage cost per piece has been flat, but costs for mail lists, paper, production and handling are higher than they were in 1983.

Despite these other rising expenses, the mail advertiser had a very modest cost increase for each piece in 1984 of only about 3%.

In 1985, the Postal Service will raise postage prices significantly. For the year, the postage portion of mail costs will rise about 12%.

The balance of mailing costs and the other costs are expected to be more in line with the general U.S. inflation rate. The combined cost per unit of mail advertising is expected to rise about 7% in 1985.

This will be the first time in more than three years that the cost of mail advertising has risen faster than most prices in the economy.

Summary

Media time and space are perishable, so prices are influenced by shifts in supply and demand. General inflation correlates with media price change because it influences all business expenses, but if ad availabilities of a medium are limited and demand is high, the ad rates will go up much faster than the general inflation rate.

Good examples of this are the tv networks and the *Wall Street Journal.* These media are convinced that they are indispensable to a large number of advertisers. Many advertisers would agree. As a result, their ad rates have risen much faster than most prices.

Advertisers also help to bid up the price of such media if they think their use will help in the competition for market share. But if they disagree, then the tables are reversed, regardless of the general inflation trends.

In 1984, a coincidence of favorable developments led to extraordinary advertising demand, while the short-term supply of media units remained virtually unchanged.

As a result, the price of most media rose much more rapidly than other prices.

Next year, despite slackened demands, we still expect ad needs to expand more rapidly than the economy.

Ad rate increases will show some moderation, but prices for most media are likely to rise more than other costs of doing business.

Media prices are determined in a free and uncontrolled marketplace, and in 1985 the market will be a little less ebullient than it was this year. ■

Panel qualifies rosy forecast

By Herbert Zeltner

The coming year shapes up as extraordinarily bullish for the world of consumer media, but it is one in which unqualified euphoria is far from the norm, according to a survey of seven leading media directors at ad agencies across the country.

Client demands and agency efforts seem to be more intense than ever in finding better bargains, improving efficiencies, honing in on precise targets and searching for ways to prove effective advertising delivery, rather than relying on raw tonnage, the panelists say.

The experts see budgets for new products as very promising. They prove more grudgingly optimistic toward media budgets for established brands.

They peg budget increases for existing products at about 10%, which puts projections near maintenance level because the cost of media is expected to rise near those levels. On the flip side, potentially explosive growth is in the cards for new product and expansion activity, promising major increases in over-all billings.

Media mavens will continue to be fascinated, and only fascinated, with the emerging, sometimes exotic availabilities on the tv horizon, including cable and its interactive forms.

They will continue to keep a wary eye on the audience encroachment by videocassette recorders, but their interest will chase the increasing versatility of network and local tv through tie-ins that give the colossal audience media greater segmentation capabilities. One panelist calls this the "demassification" of tv.

There is more widespread interest than ever in using radio as a tonnage medium to extend audience reach—achieved, for example, by pulling some tv expenditures out of that medium and inserting them in radio to boost over-all weight—but panelists express nagging anxieties about the need to maintain costs at reasonable levels and the demand for greater accuracy in measuring smaller audiences.

Potentially explosive growth is in the cards for new product activity, promising increases in over-all billings.

Major consumer magazines are more vital and healthy than ever, but growing concerns over the pressure to negotiate rates may weaken and even kill several marginal titles, panel members say.

There is a renewed appreciation of the tried-and-true audience delivery values of traditional media forms such as newspapers and outdoor, but the industry continues to seek nontraditional, innovative approaches for applications of direct marketing, sponsorship of special events and use of blockbuster units in print and broadcast.

These media executives are involved in over-all spending and media strategy decisions across the full spectrum of consumer and industrial ad activity—durables, package goods, high technology and services—in agencies with current media billings in excess of $4.5 billion.

Their comments follow in a succession of stories. ■

Herbert Zeltner, in addition to being editor of the ADVERTISING AGE *Sounding Board, is a New York-based independent marketing consultant to advertisers, ad agencies and media companies.*

Budgets: New products to spur spending

The ADVERTISING AGE panel is upbeat yet restrained about media budget levels for ongoing brands in 1985, but there is no guarded forecasting for budgets for new brands.

Panelists footnote their outlook for ongoing brands by crediting their clients as being "reasonably optimistic." The general pattern for ongoing product spending shows media dollars increasing between 10% and 12% for the coming year.

For the most part, this increase is explained as "just trying to keep up with media inflation" where general cost increases across both broadcast and print are anticipated to be between 8% and 11%.

But this increase in established brand spending is far from routine. "Approval of budgets is not automatic," Herb Gordon of Ketchum says. "Clients are questioning; extensive rationale is needed."

Alec Gerster of Grey explains it as "not a flood of money coming in over the transom."

Paul Benjou of Leber Katz says that during 1985, media plans will take on a new dimension for both clients and agencies. He expects these plans to "become more performance and goal oriented with a serious eye toward accountability."

Others point to harder questioning than ever by clients who want support for media dollar recommendations to justify the sometimes significantly larger sums being recommended.

Ken Caffrey of Ogilvy & Mather emphasizes the intensity of the squeeze involved, saying budgets for many large package goods brands are "relatively flat" and, with expected rate increases, this puts the spotlight on finding ways to minimize losses in advertising weight.

Plenty of aggressive action, however, is expected on the new product and rollout front. One media director termed spending plans in this arena as "nothing short of explosive."

Another indicated two clients, viewed as "sleeping giants," will be moving out smartly in 1985 with expenditures 20% to 50% greater than their corporate ad dollar totals in 1984.

Among reasons for the expected extraordinary increases behind new product introductions and expansion programs are the enormous amount of development and testing over the past several rebuilding years.

There is a widespread belief among major marketers that large sums of dollars should be committed soon, "while funds are still available," in a strenuous attempt to safeguard and enlarge company franchises in the marketplace.

For instance, two media directors say their clients' strategy seems to be one of moving fast in 1985 to beat "the next downturn" in the economy, now being anticipated for 1986.

In regard to strategy approaches, media plans will become more complex and detailed next year. Don Stork of Advanswers terms it a need to "cross over all media lines" to adjust programs to follow changing audience patterns. He says the old traditional formats are breaking down more rapidly now and instead of attempting to dominate a medium, an advertiser is trying to dominate competition.

Peter Triolo of William Esty sees a "need for different scenarios"—a requirement to look at many more alternatives than before—yet with disciplined thinking supported by a solid base of facts and statistics.

Still another aspect of 1985 media planning continues to be a trend spotted over the past years—Mr. Triolo terms it "staying loose," or maintaining a high degree of fluidity in plans to meet changing developments in the marketplace and to provide companies the opportunity to adjust budgets as financial requirements dictate.

A result of all of these evolving forces are media programs that continue a pattern seen a year ago—more fine tooling and use of more selective media. The evolution is rolling out quickly toward making national media planning sensitive to geographic and demographic precision needs. ■

Officers offering outlook

The media officers participating in the ADVERTISING AGE panel on media outlook are:

- Paul Benjou, senior vp-media director, Leber Katz Partners, New York.
- Kenneth Caffrey, senior vp-executive director of media operations, Ogilvy & Mather, New York.
- Alec Gerster, senior vp-director of media and programing, Grey Advertising, New York.
- Herbert D. Gordon, senior vp-media services, Ketchum Advertising/USA, Pittsburgh.
- Raymond A. McArdle, senior vp-media director, D'Arcy MacManus Masius, New York.
- Don Stork, president, Advanswers Media/Programing, St. Louis (joined by John Marlow, senior vp-marketing).
- Peter Triolo, senior vp-media director, William Esty Co., New York. ■

Ad-supported media grow more robust

By John S. Suhler and David C. Lamb

The communications industry is a large and vital sector of U.S. and Canadian business and is becoming increasingly so. These communications companies represented more than $50 billion in revenues in 1983.

Five segments of the communications industry that are either entirely or partially advertising supported accounted for more than half of the communications industry revenues last year. They accumulated an even greater percentage of industry pretax income.

The five ad-supported segments—radio and tv broadcasting, cable and pay tv, business magazine publishing, consumer magazine publishing and newspaper publishing—consistently have outperformed the communications industry as a whole in both growth and performance.

While the communications industry increased revenues at a compounded annual rate of 12.9% over the past five years, the ad-supported sector managed 14.0% annual growth. The contrast is starker if ad-supported media are compared with a composite of the five other communications segments—business information services, book publishing, entertainment programing and distribution, recorded music and miscellaneous—which had a compounded annual revenue growth rate of 10.3% over the five years.

John S. Suhler is president of Veronis, Suhler & Associates, a New York investment banking company specializing in mergers and acquisitions in the communications industry. Since 1983, VS&A has represented clients in 22 investment banking transactions totaling more than $320 million. David C. Lamb is an associate in the company and editor of the VS&A "Communications Industry Report," from which the following material was extracted.

In pretax income growth, the communications industry as a whole and its ad-supported sector performed more closely. For both, pretax income growth has accelerated every year since 1979.

But, the ad-dependent subset outpaced the industry in pretax operating income compounded annual growth, 12.6% vs. 11.6%. The subset not supported by advertising experienced income growth of 9.7%.

Individually, the ad-supported segments generally perform well in comparison with other segments of the communications industry, frequently appearing among the top of the industry's 10 segments on the basis of several standard performance measures.

Four of the five did so, for example, in terms of 1983 return on assets—both pretax income and cash flow—as well as on the basis of 1983 pretax and cash flow operating margins. Three of the five appeared in the top half of the industry when 1983 margins are compared with those in 1979.

The charts and discussion that follow detail the growth and performance of each of the five ad-supported segments over the past five years. Taken as a whole, the performance of these sectors is upbeat, particularly when the effects of the recession are factored in. The segments' performance over that difficult period was admirable and the rebounds that some segments—notably newspapers—experienced in 1983 were encouraging.

The accompanying charts are totals for 250 company segments reported in the VS&A study of publicly-held companies. VS&A reports a company's communications segment, such as consumer magazines, under the VS&A communications category of the same name when the company's consumer magazine revenues are 60% or more of total revenues generated in the corporate segment in which it is placed. Many companies group their communications lines in segments whose over-all revenues may dwarf those of the communications lines. In these cases, where revenues are know, VS&A places them in a "miscellaneous" category.

Radio and tv: Cash cows

Radio and tv broadcasting stations are known as strong generators of cash. Their performance shows the reputation is well earned.

In 1983, radio and tv companies recorded a 12.8% annual revenue growth, which not only equaled their 1982 growth rate but bettered their five-year compounded annual growth rate of 12.3%.

The companies' operating income increased 14.4% in 1983—nearly double 1982's 7.4% annual gain and the five-year compounded annual rate of 7.7%. Annual cash flow growth of 12.3% compounded was also strong.

The operating income margins have remained very stable—about 18%—over the five-year period, after a three percentage point drop in 1980.

The segment also performed well in return on assets in 1983, with an operating income return of 23.1% and cash flow return of 26.2%.

In 1983 pretax operating income margins, Times Mirror, Capital Cities and A.H. Belo led

Robust

(Continued from Page 22)

the radio and tv segments of 59 companies comprising the VS&A radio and tv sector with 53.2%, 52% and 39.1%, respectively. Viacom's five-year compounded annual pretax operating income was heads above all others at 135.3%.

Cable and pay tv: Still superstars

Though profit margins have eroded from their startup days, cable and pay tv companies have performed superlatively compared with other communications industry segments.

No segment grew at a faster compounded annual rate from 1979 through 1983. In revenues, pretax operating income, assets, operating cash flow and 1983 operating cash flow margins, the cable and pay tv segment was No. 1. And its operating income margins in 1983 were the industry's second best.

The only two areas in which cable trails the communications industry are in 1983 return on assets and comparisons of 1983 margins with those of 1979. The relatively low return on assets is attributable to cable's high asset base. The relatively low margin performance stems from cable's rapid expansion.

Cable and pay tv companies posted 45.1% compounded annual revenue growth and 35.3% pretax operating income growth over the five-year period ended in 1983. While pretax profit margins dropped significantly in 1980, they have reached a plateau and are holding steady at about 18%.

The segment exhibits high cash flow strength. Its 1983 cash flow margins were 32.5%; over the five years, they grew at a compounded annual rate of 39.5%. Cash flow return on assets was 17.6%.

In 1983, cable and pay tv companies' revenues grew 31% over the previous year. While the segment recorded the slowest pace in the five-year period, it still is one area that companies operating in other non-ad-supported segments of the communications industry would like to acquire.

In 1983 pretax operating income margins, United Cable Television Corp., TCA Cable TV and Rogers Cablesystems led the cable and tv segments of 37 companies comprising the VS&A cable and pay tv sector with 37.6%, 36.5% and 34.5%, respectively.

Newspaper publishing: An undertold story

Despite publicity given to closings, newspaper publishing is alive and surprisingly healthy.

Newspaper publishing has the third highest operating income and cash flow margins in the industry—18.1% and 21.3%, respectively. And it showed the third best improvement in its 1983 margins over 1979 levels.

Among the ad-supported segments, newspaper publishing ranked second in five-year compounded pretax operating income (14.8%), behind cable and pay tv companies (35.3%). Annual income growth in 1983 of 32.5% paced the ad-supported segments, and its profit margins—both pretax and cash flow—in 1983, compared with those in 1979, showed the greatest growth.

In 1983 return on assets (a measure of pretax operating income and assets), newspaper publishing ranked fourth in the industry and third among the five ad-supported segments, slightly better than its asset turnover would suggest.

In 1983 pretax operating income margins, Thomson Newspapers, Gray Communications and Lee Enterprises led the newspaper segments of 27 companies comprising the VS&A newspaper sector with 33.4%, 30% and 24.9%, respectively. Quebecor and the New York Times Co. were 10 percentage points ahead of the rest in five-year compounded annual pretax operating income with 37.9% and 37.0%, respectively.

Business magazines: Dependably profitable

Business magazine publishers can be counted on to chalk up relatively high profit margins every year, based on results for the past five years.

This communications industry segment ranks fourth in both five-year compounded growth and 1983 annual growth of its operating income. It was also one of the four industry segments to show improved margins for 1983 over 1979.

Another measure of this segment's strength is its small asset base compared with the size of its revenues. In the industry, only consumer magazine publishers operate with a smaller relative asset base.

Business magazine publishers, although experiencing only 8.8% compounded annual revenue growth from 1979-83, achieved 10.2% compounded annual income growth and a 5% compounded annual increase in profit margins over five years.

The publishers' pretax operating margins for 1983 reached 13.9%, a five-year high and up from 11.9% the previous year. Meanwhile, 1983 pretax operating income return on assets stood at 30.8%, and 1983 assets turned over an unusually rapid 2.22 times.

Media carrot may need gilding

Agencies' low pay, lack of training deter many

By Anna Sobczynski

The media department is no longer the refuge for the timid, bespectacled numbers-cruncher. Clark Kent slipped into the phone booth several years ago and stayed there. Media Superfolk have been emerging since.

But according to leading agency media executives, there does not seem to be enough of the Superfolk type, despite the presence of young people clamoring to get in to agency media departments.

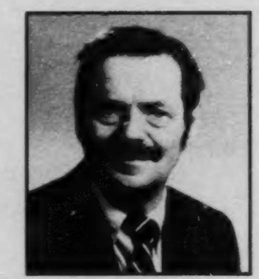
The rub is that young media aspirants are thwarted by a lack of effective training programs at agencies and by low salaries. Some of the cream is taken by media buying services and the burgeoning in-house corporate media departments, headhunters say.

And compounding the problem is a high turnover rate in media departments, note industry executives. They cite low pay and the client list as two reasons. Some accounts burn people out—"hectic accounts that operate very close to the deadline and those in which things are constantly changing," says Edward Weiner, senior vp-media director, Avrett, Free & Ginsberg, New York. Computers also have freed media people from certain automated functions, but they have lowered manpower needs.

There is no shortage of manpower available to media—at least at the front door. At the Chicago offices of D'Arcy MacManus Masius, between 50 and 75 resumes arrive in the morning mail each week. That translates into almost 4,000 inquiries a year. D'Arcy can take in only about two of these media aspirants, says Joseph P. Zeller, senior vp-media director.

Once these two media novices have been singled out to work for one of the top agencies in the country, they can expect to earn between $12,000 and $14,000 a year. "It's the lowest, poorest paying job in the entire world," Mr. Zeller says.

Compared with the entry-level salaries of other agency positions, "the poor media schlepp is at the low end of the totem pole. Those going into account work, for example, can make probably $4,000 more to start," says Mr. Zeller, who refers to this time as the "dues-paying period."



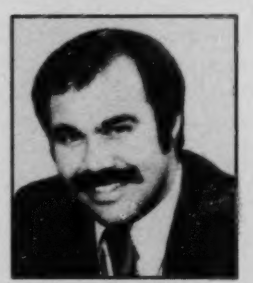
Leo Burnett USA likes to grow its own media talent, according to senior vp Willard G. Hadlock.

Those willing to accept that $12,000 for the next few years can anticipate generous salaries once they attain higher level positions. A second bright spot is the note of optimism voiced by Simmy Sussman, president of Sussman & Morris Associates, a New York-based marketing and advertising agency executive placement company. She says salaries have risen this year between 15% and 25%, including entry-level positions.

In 1979, the beginning assistant media planner was paid between $10,000 and $12,000 annually. This year, those at entry level can ask the moths in their wallet to make room for an additional $1,500 to $3,000, she says.

During that same five-year period, upper-level salaries have been going through the roof, according to Ms. Sussman. A senior vp-media director's annual salary almost doubled, from an upper limit in 1979 of $80,000 to more than $156,000 in 1984. It's worth waiting in the wings as an understudy if you're one of the "bright, shining stars" media directors look to light up their lives, Ms. Sussman says.

But it's difficult to attract stars at disposable lighter prices. Media stars have to compete with account managers and creative directors. "Advertising agencies put a very large emphasis on creative. That's what they win accounts on. So they pay a lot of money to creative people," says Charles T. Scimeca, chairman of Century Media Corp., a New York-based media service.



Terrific creative work needs good media planning, says Charles T. Scimeca, Century Media Corp.

Observers say the employe turnover rate also is higher in creative than in media, which adds to the disparity in salary. Still, Walter A. Staab, president of SFM Media Corp., a New York media buying service, says he is convinced that in terms of contribution, "creative people and account executives command a disproportionate share of the salary funds."

Mr. Scimeca says lack of foresight by agencies will catch up with them. "Because less money goes to the media department, the result is inferior planning and buying. So even if you have all this terrific creative, it doesn't follow through [to the marketplace]," he says. The low salary makes it difficult to attract the special people. Ms. Sussman is trying "to raise the salary level in order to raise the caliber of the candidates."

When Mr. Zeller looks for new media faces for D'Arcy, he's not looking just for a degree, though that's a requirement, and he's not looking just for prowess in the use of numbers, though that, too, is a factor. He's looking for those who are "antsy, cocky, aggressive. For those who did something other than just get a degree, whether they played lead guitar in a rock band, or were captain of the football or debate team. Something that says this person has a deeper dimension. People who have a super-high energy level."

The media person is at the low end of the totem pole, says Joseph P. Zeller, senior vp, D'Arcy.

The prospective D'Arcy candidate who passes the screening test heads for the interview. If it becomes apparent that the interviewee wants to get into account management courtesy of the media department, the candidate is pointed toward the exit door.

Those who are interested in pursuing media as a career find "that creative is not limited to the creative department, and that they can express themselves, generate ideas, and see those ideas become reality," Mr. Zeller says. Unlike the account management person who is usually saddled with one account, the media person often works with all the agency's clients.

There are those who escape even the most watchful media director's scrutiny and reveal that they've been account management devotees in disguise. But for those who do not have master's of business administration degrees, which generally are

(Continued on Page 32)

Anna Sobczynski has contributed stories in the past on media buying as a career.

Robust

(Continued from Page 26)

Pretax operating income increased nearly half again over the five years. In 1983, it surged 25% over 1982, substantially bettering the five-year compounded annual growth rate. The 1983 performance was the best of any in the period for this segment and a recovery from the 3.4% in 1982.

In 1983 pretax operating income margins, United Newspapers (Gralla), McGraw-Hill and Harcourt Brace Jovanovich led the business magazine segments of 11 companies comprising the VS&A business magazine sector with 22.7%, 17.1% and 14.8%, respectively.

Consumer magazines: Efficient asset users

Consumer magazine publishing is a communications industry standout for its efficient use of assets. But in other types of measures, the segment trails the industry norm.

Consumer magazines posted the highest 1983 operating income return on assets (38.9%) and the second highest cash flow return (43.3%), with the highest asset turnover of an industry segment—4.38 times in 1983. This performance is all the more impressive because the segment was one of two in the industry with both operating income and cash flow margins below 10%.

In both five-year and 1983 growth measures, however, the segment performed somewhat below the average of the communications industry. Its best performances came in operating margin increases in 1983 over 1979, on which it ranked fifth. Its best performance on other five-year, as well as 1983, growth measures was seventh.

Among the five ad-supported segments, consumer magazine publishing ranked first in the most efficient use of its assets. It stood in the top three in 1983 margin growth over 1979. It ranked near or at the bottom on the basis of other measures.

Consumer magazine publishers experienced 8.7% compounded annual revenue growth, 7.5% compounded annual income growth and a 4% decline in profit margins over the five years. The segment's pre-tax income margin in 1983 was 8.9% —down from 9.9% in 1982.

Consumer magazine publishers' revenues grew 10.1% during 1983, up from the previous year's 5% annual growth rate. The 1983 result was better than the compounded annual growth rate for the past five years. Pretax margins for 1983 were 8.9% —down from 9.9% in 1982.

In 1983 pretax operating income margins, TL Enterprises, Webb Co. and Times Mirror led the consumer magazine segments of 12 companies comprising the VS&A consumer magazine sector with 45.6%, 15.9% and 14.4%, respectively. ■

Interconnects may be cable's link to ad growth

By Kevin Brown

When 3M turns on its new microwave interconnect on Long Island early in 1985, buying of local advertising on the area's cable systems will become less cumbersome and more like buying spot tv.

The new microwave interconnect, called Metropolitan Transmission Center, will link 17 local cable systems with more than 1 million subscribers. It also will provide direct insertion for spot cable advertising into four ad-supported networks, offer computerized billing and improved picture quality, and provide video recording of the first and last frame of each commercial.

Such so-called "hard" interconnects as the 3M system are helping advertisers eliminate the guesswork in buying cable by providing better ad verification procedures (through the frame recording), cutting the costs connected with dubbing commercials and offering entire markets as a one-buy, one-invoice option.

The $4 million interconnect system in New York replaces a "soft" interconnect in which the member cable systems had a contractual association through which a single commercial tape is dubbed 17 times and "bicycled" to the systems.

"We try to make cable as much like other media as we can for the advertiser," says Tom Sassos, vp-general manager of Cable Networks Inc., a subsidiary of 3M and a national rep company. CNI represents cable systems in 12 of the top 25 tv markets, giving it a market of 4.8 million subscribers reaching 13% of the total cable universe.

It is this type of coverage with just one buy and one tape that should help build spot cable into a stronger medium for national and regional advertisers.

The potential is big. In 1983, for example, spot cable buying of $50.4 million represented 18% of total cable spending of the four dominant networks monitored by Broadcast Advertiser's Reports. And in 1984, total spot spending should rise to $80 million, according to Paul Kagan Associates, cable industry consultants.

Currently, cable systems are pulling in only an estimated 1% of gross revenues from advertising, even though Mr. Sassos at CNI and system general managers say those numbers should be 3% to 5%. The formation of interconnects is seen by many as the means to make up that difference.

But the ad dollars in cable at this point are staying with the ad-supported networks. Part of the reason is that even interconnects are hamstrung by local factors. Channel capacity often is tied up by the number of local broadcast stations for which cable systems are required to reserve channels under the Federal Communications Commission's "must-carry" rule. National networks generally give a system two minutes for each hour of programing for local advertising.

The "hard" Bay Area Cable Interconnect, for example, is far from its ad dollar potential. Not all of the 37 systems in the interconnect carry all the major ad-supported networks available on the interconnect.

"There are as many as 22 must-carries," says Jack Yearwood, vp-general manager of the five-year-old interconnect, who says slightly more than 1% of the anticipated $300 million in spot tv spending in 1985 in the area of dominant influence will channel through the interconnect. "The interconnect intake should be 5%."

Too many reps can spoil the broth, according to Melissa Helms, ad and promotion manager for Prime Cable, part of the Atlanta Cable Advertising Network, a soft interconnect system. Prime is one of eight systems in the interconnect covering 117,300 subscribers.

"The advantage of having an interconnect lies in the use of a single rep firm. Too many rep firms selling ads leads to confusion and a devaluation of a market's ad time," she says.

If several reps are selling spot cable, and one is having trouble selling time, he might offer that time for less money, bringing down the price of spots in an entire market.

CNI is attempting to persuade the Atlanta "soft" system to go "hard." "But none of the systems want the other to own it," CNI's Mr. Sassos says.

Kevin Brown is an editorial assistant for AD AGE.

Franchises group to expand coverage

An interconnect is a group of cable franchises in one major market that join contractually to sell advertising.

Coverage depends on the number of subscribers and the individual system's ability to insert local advertising on national ad-supported cable networks, such as MTV: Music Television, Cable News Network and USA Cable Network. The equipment needed to insert ads costs between $25,000 and $50,000 for each network.

The networks allow an average of about two minutes an hour for local ad insertion. Systems divide that time between their interconnect, which provides national and regional spots sales, and their own sales force.

Some systems may keep as much as 75% of their ad time for local use.

The rest of the time is sold by national sales reps such as Cable Networks Inc. and Nationwide Cable Rep. In most interconnects, ads sold by national reps can be inserted on one or more of the cable systems.

Of the more than 40 operating interconnects, most use two kinds of ad distribution. The first, called "soft," involves copying tapes of commercials and sending them to systems within the interconnect. Commercials are inserted by systems at the same time in what is known as "simultaneous traffic."

"Hard" interconnects use computers through which the ads are microwaved or cabled to members and inserted directly onto national cable networks.

Although some interconnects use a combination of both soft and hard distribution—depending on the capabilities of member systems—more than 20 are hard. A few hard interconnects are separate corporate entities, owned by some or all of the member franchises, or by an outside company.

System owners and interconnect general managers say hard distribution is less expensive. In some soft interconnects, video dubbing, billing and distribution expenses may run more than $750,000 a year, according to one general manager.

Making the transition from soft to hard costs between $1 million and $5 million, depending on the number of systems in the interconnect and the number of cable networks on which ads will be inserted. *—K.B.*

Deregulation may scramble time buying

By Maurine Christopher

The year ahead will be a time of wondering about and watching how the broadcast deregulatory picture in Washington will shape up and what the impact will be on the buyers and sellers of tv and cable time.

Waiting for the next act to unfold on raging controversies held over from this year are the proposed higher ceiling for tv station ownership and must-carry requirements for cable systems. Meanwhile, the Federal Communications Commission's sidetracked, tentative order to repeal the ban against network prime time co-production and domestic syndication languishes in bureaucratic limbo.

Revisions of the status quo on any one of these and lesser issues by the FCC eventually could trigger balance of power realignments that will affect the media buying community.

Generally, a second administration in the White House brings with it a shift in approach, a tightening of established policies or movement to different ones, and cast changes in the cabinet offices and at the regulatory bureaus.

The crucial figure to keep an eye on for media developments is Mark Fowler, the incumbent FCC chairman. He has been a vigorous quarterback and gung-ho cheerleader for deregulation in all areas of communications.

Will he push as hard to keep the "free market" momentum going in a second Reagan term, as he did in the first? Last year, the chairman was reined in by President Reagan after the FCC had voted to let the networks return to domestic program syndication. Later, Mr. Fowler was halted in his tracks by Congress after he and his fellow commissioners voted to raise the limit on tv station group ownership to 12 and to lift any limit by 1990.

Some industry kibitzers speculate about whether Mr. Fowler might follow a well-trodden path and leave his $71,100 government post for a bigger salary in the private sector in 1985. Others say "this good Reagan soldier" may be rewarded with a deputy cabinet post, though Mr. Fowler has told associates he plans to remain as chairman.

Even so, Washington sources already are theorizing about who might be most likely to take over as FCC chief if Mr. Fowler moves. Some FCC insiders would like to see Mimi Dawson, who has been on the commission for 2½ years. However, there is always the possibility that the White House may bring in a new face.

Regardless of who is in the chairman's office in 1985, these deregulatory controversies remain.

Revisions of the status quo by the FCC eventually could trigger balance of power realignments that will affect the media buying community.

Already the single company or individual ownership ceiling on radio stations has been increased from seven to 12 each for am and fm. Gannett Co., which had its full complement of seven am and fm units, jumped ahead of the field to buy KKBQ (am, fm) in Houston for $35 million, thereby becoming the first group owner to advance beyond the previous limit. But radio stations are so plentiful that larger groups will not change life noticeably for time buyers.

In contrast, expansion of tv ownership, especially if ABC, CBS and NBC were allowed to add more stations, could be devastating for sponsors and program suppliers, according to Jack Valenti, president of the Motion Picture Assn. of America, and Ted Turner, chairman of Turner Broadcasting System. Messrs. Valenti and Turner are two of the most spirited opponents of the proposal on the back burner to raise the single owner maximum for tv to 12.

So far, the advertising community has not voiced concern about the proposed limits for tv station ownership.

David Braun, media services director of General Foods and chairman of the Assn. of National Advertisers tv committee, doesn't expect the large station groups to raise any problems for sponsors if and when they are authorized by the FCC to purchase additional stations.

He and other advertisers say they believe bigger, stronger groups might be helpful for them and for tv in general. The groups would have improved resources for program development, and they would provide the facilities for ad hoc networks to help keep the Big 3's sponsor prices in line.

Rates are the name of the game. Traditionally, they are fought eyeball to eyeball almost continuously in the marketplace. Never has this been more evident than in 1984 because of the football free-for-all that followed the courts' dismantling of long-term network tv contracts with the National Collegiate Athletic Assn.

Unless ABC, CBS and NBC flouled the antitrust laws by trying to force tie-in sales for network and spot, an unlikely and impractical event that has rarely if ever happened, this scrapping over rates will continue to be the case even if single owner station lists are permitted to expand.

Further, odds are that the proposed 12-station rule, including a provision to remove all limits within six years, is dead. After several congressional committees acted to halt the implementation of the revised tv station ownership policy, the FCC issued a stay order until April 1 and promised to reconsider.

The staff is struggling through another huge stack of com-

Media budgeting needs creative touch

(Continued from Page 3)

tising productivity as creative and media strategies are improved.

Regardless of which approach budget planners prefer, there is a shortcoming in using any of these devices.

None takes into account the impact of advertising cost changes over time. Linked to this need for a longer term frame of reference is the need to apply the knowledge accumulated over past years about a given brand's response to varying spending levels.

Media price escalation has been more intense than the general consumer price index over the past 10 years, making a longer trend line more important in devising media budgets. Between 1975 and 1984, the consumer price index rose 88%. For that time period, network tv is up about 170%; network radio 185%; magazines have doubled, and newspapers have increased 125%.

Some recent experiences by this writer in working with clients to determine brand spending levels suggest that most ad executives have become numb to price increases, but they sometimes are surprised to see what it takes to buy the same media several years later.

Examining brand budgets over several years and matching them to long-term media cost movements will give the planner an indication of what the correct budget should be, and it will add a new frame of reference from which the adequacy of ad dollars can be tested.

How do we go about an exercise of this sort? The chart illustrates general price trends—all expressed on a current dollar basis (unadjusted for inflation)—for both out-of-pocket costs and estimated costs per thousand.

It takes a representative "market basket" of various popular buys in each of seven significant media categories for national advertisers and estimates price quotation trends using 1975 as a base of 100.

The 1984 figures shown are an index for each of the seven categories nine years later.

The entries factored in for 1984, however, are for the first six months.

The 1985 figure uses anticipated price increases for each category based on a recent poll of top agency media directors.

Naturally, individual media sales representatives or other analysts might have different figures based on other assumptions. Regardless of what each number might be, the general direction remains the same and should be helpful as an indicator.

Using these ballpark estimates—each of which demonstrates a more rapid price increase than for the whole economy—can lead to some dramatic points of comparison. Two examples:

Example A

Assume that in 1975, spending for a nonbroadcast brand was $1 million, half in consumer magazines and half in run-of-press newspapers.

By 1984, total media spending would have to have risen to $2.15 million simply to maintein the composition of the program.

If our estimate of rate increases for these two print categories for the coming year is used to approximate 1985 levels, the budget will have to rise to $2.31 million just to remain even.

Example B

A decade ago, it would have been reasonable to assume that a nationally distributed grocery package goods product heavily involved in broadcast would have been spending at about a $5 million level.

Assuming that half the dollars were spent in network tv and the other half split evenly between spot tv and network radio, the escalation over the next nine years is striking.

Spending totals in 1984 would have to rise to much more than $13.5 million to stay even with the unit cost increases over the nine years.

In estimating what it would take to hold cost increases steady for 1985, media funds would have to rise to more than $14.7 million.

Needless to say, astute media and marketing management can do many things beyond simply "hanging on for dear life" in meeting the insistent cost increases of important media.

Commercial time lengths, space unit size and color treatment can be modified to achieve greater efficiency.

Dayparts can be shuffled or magazine title choices can be rearranged in an attempt to stretch dollars.

Advertising weight can be concentrated more tightly in presumably more responsive areas to get back more sales response.

The fact remains that the cost of advertising—across all categories and in almost all forms—has gone up well beyond the consumer price index. It is essential that serious planners keep in mind the true extent of this erosion when trying to determine the adequacy of a budget.

One way is using the figures that accompany this article as a testing device. If a planner wants to be more specific to his own needs and media profile, he can change the base data or make refinements or adjustments.

Use of the cpm track rather

ments. Before the end of the year, the staff and the commissioners will be working quietly to evolve a compromise to mollify Congress and its powerful committee chairmen. As always, the FCC doesn't want Congress snatching the ball.

Some combination of a numerical and population percentage limit may be voted on early next year, assuming the revamp goes smoothly. Many people believe the population reach is more essential than the number of stations, especially for the more coveted vhf channels.

The Turner request for a retention of the current seven-station cap (five vhf and two uhf outlets) reminds the regulators that there are only 23 markets among the 100 largest that can boast four hometown vhf channels. Turner Broadcasting System executives argue this fact makes a fourth, broadcast tv network physically impossible.

Allowing the Big 3 to buy as many as 12 tv stations "would directly reduce the feasibility of such ad hoc networks by increasing the ability of the major networks to prevent the emergence of such a competitive threat and would increase the incentive of large group owners to behave like the networks," TBS executives say.

Formulas being discussed at the FCC include a 25% population reach nationally for a single group owner in the case of vhfs and 30% if some are uhfs. There is talk of raising the demarcation by another 2.5% for minority owners.

In and out of Congress, most people expect the limit for tv to be modernized somewhat in line with changes in the communications industry.

It is only fair, this theory holds, that broadcast groups get some relief because today they must compete with wired tv, videocassette machines and satellite-to-home delivery.

On the other hand, most observers say they believe that the current form of a new rule that will welcome the Big 3 back into domestic syndication and prime-time program partnerships is in a deep coma from which it will not recover, at least during the current administration, because of lack of support from the President.

Had that order not been stymied by President Reagan, Mr. Valenti and others, independent stations, which heve been made hearty by popular offnetwork reruns, would have gone into decline, many independent general managers say. That, in turn, would have strengthened the network-owned stations and other affiliates in their bargaining with advertisers.

From the sponsors' vantage, the most significant controversy may be the "must-carry" rule. This regulation requires a neighborhood cable system to schedule virtually all local on-air channels with any appreciable reach in its coverage area, even though the channels may be a duplicate or a triplicate of ABC, CBS, NBC or public tv.

Cable operators and programers find this unreasonable, unjust and a potential drain on the budget. They argue the public interest, necessity and convenience would be better served if the system could replace one of the ABC schedules with Cable News Network or one of the CBS schedules with USA Cable Network, for example.

However, if the must-carry rule were loosened to permit cable operators to elect not to carry all of a Big 3 network schedule in favor of samplings from the cable satellite, media buyers and planners would find life more stressful as they try to get the kind of coverage required by big marketers.

TBS has sued to force the FCC to put the must-carry issue on its calendar for rule-making consideration, but this is a slow process. The FCC shows no signs of giving it priority, although the commission is considering whether teletext and other services run during the vertical interval space should be accorded must-carry status along with the main tv station signal.

than out-of-pocket estimates might be preferred if weight maintenance, rather than dollars, is being watched.

The media research units of many agencies as well as the various media promotion organizations all can help with historical data and computations.

Regardless of which yardsticks are used, it seems more necessary than ever that planners acquaint their account people and client marketing executives with the true extent of media inflation when the subject turns to budgets.

After all, these figures suggest that the cost to marketers of advertising in national media forms has doubled or even tripled in some cases over the past nine years.

Obviously, if brands' advertising budgets have been edging up incrementally each year and not holding to this accelerated pace—as many have—marketers have been buying less media exposure than they perhaps thought.

Still, a budget increase is a budget increase—in real terms—after inflation adjustments are made.

A good practice might be to start advertising budget meetings with a reminder of how much less valuable the dollar has become—not only in the supermarket but in the media market.

These longer term trend figures should help in spotlighting the issue. They also should lend more realism to the debate about whether ad expenditures are too high, too low—or just right.

MESH

IT'S THE
MESH
OF EXPERIENCE
THAT COUNTS.

Every promotion company can claim experience, but companies don't accrue experience. People do. At Don Jagoda Associates, the diversity of that experience and the way our people make it mesh is the difference between technical competence and true professionalism.

Some of our peers may not know the difference between markup and margin, or what makes SAMI run. We do. Our staff includes highly qualified experts in food, drug and cosmetics marketing. Ditto hardware, housewares, soft goods, toys, travel and many other categories. We're more experienced at our business than most, but we're also experienced at your business: selling highly competitive consumer products.

Professionalism Pays

We're a tightly knit group of executives who have written copy, conducted store research, helped manage sales forces, knocked out news releases, sat on both sides of the client/agency table, budgeted, made forecasts, shepherded new products to market and thoroughly understand the difference between a plan on paper and a plan in work…the difference between a proposal that doesn't worry about details, and a program that covers them.

In 24 years, Don Jagoda professionals have handled well over 2,000 sweepstakes—often innovating and leading the way for the industry. That experience, and the fact that we are marketing professionals as well as promotion professionals, is the largest single factor in our growth; our clients return again and again. Our job isn't done when we've convinced only you. . .it's when your customers and your consumers, both, also are sold.

It's the Don Jagoda difference. The professional difference.

Morris collared for new drive

By RUTH STROUD

TERMINAL ISLAND, CAL.—Star-Kist Foods has Morris the cat on the prowl again, this time in a $20 million campaign—its largest ever—for two new cat food lines, breaking nationally in April.

It was the finicky feline that helped turn Star-Kist Foods' 9-Lives canned cat food into the dominant brand in the $1.9 billion cat food category. Now Star-Kist is making a more aggressive effort to capture a larger share of the other two segments of the category—soft moist and dry cat foods.

The H.J. Heinz Co. subsidiary is putting the big push—about double what it has spent annually on its 9-Lives brand—behind the introduction of 9-Lives Tender Meals semimoist cat food and 9-Lives Crunchy Meals dry food products. The company, which claims it accounts for one-third of all canned cat food sold, believes these two other segments, which have an annual dollar volume of nearly $1 billion, represent its strongest opportunities for growth in cat food.

Star-Kist already had semimoist and dry items under the 9-Lives name. It apparently plans to absorb these into the new lines. Morris never was used to promote them. Sylvester the Cat, the Warner Bros. cartoon character, appeared on the packaging and in tv spots.

In addition to the media spending, Star-Kist plans an intensive $10

Shulton touts new format for tv spots

By PAT SLOAN

NEW YORK—During the next three weeks, American Cyanamid's Shulton USA division will try to sell the tv networks and major syndicators on five 30-second and 60-second pilot vignettes that would air as lead-ins to commercials for Shulton's women's brands.

Shulton's sales pitch comes as the company, best known for its Old Spice men's products, is trying to increase its appeal to women because of its growing number of women's products, said Jim Gibbs, advertising services director, Shulton USA, Lederle Labs and Jacqueline Cochran Inc.

Shulton, which has introduced Ladies Choice antiperspirant and is adding a styling mousse to its Breck haircare line, also is testing two women's skincare products, Equa-Balance and SanSoucis. But the vignettes, Mr. Gibbs said, also could be used before commercials for Lederle's Centrum vitamins or even some of Cochran's fragrances.

The vignettes, created by Sister's Arts and consultant Darren Kloomack, are not informational but dramatic/comedic soliloquies of women's concerns, such as food binging, reentry into the work force and childbearing versus career choice. At the conclusion of each monolog, a bridge line such as "Intimacies from Ladies Choice" or "Intimacies from Centrum" is used to segue into the appropriate commercial.

Mr. Gibbs said Shulton tried a similar 60-second concept three years ago, called "Portrait of a Woman," but "we never sold anyone on running them."

Mr. Gibbs believes the concept is valid based on the strength of similar sports fillers, such as Seventh Inning Stretch, for the men's market.

With the Intimacies program, Shulton would pay for the production costs of each filler, which came to about $7,000 each, plus the following 30-second commercials. It would be left to the network or syndicator to create time for the "Intimacies" spots, either by using the spot as a filler or taking a minute out of another program.

Given that, Mr. Gibbs is fully aware "that we will have to buy our way in to make them interested. If everyone isn't happy, this won't go. Everyone has to

McGraw rewrites the book along marketing lines

By STUART J. ELLIOTT

NEW YORK—McGraw-Hill will reorganize $400 million worth of operations and recast its top executive lineup to redeploy itself along market rather than product lines.

The realignment, effective Jan. 1, cuts six line units to five operating units and creates three new executive posts. It is extensive enough that even a press release issued Nov. 29 characterized the changes as "sweeping."

In the most significant realignment, Donald Fruehling, 53, president, McGraw-Hill Book Co., will be promoted to a new corporate post, exec vp-publishing operations. Howard Hosbach, 53, president, Standard & Poor's, will become president, McGraw-Hill Financial & Economic Information Co., a new operating unit that combines two of the six old line units—S&P and Data Resources—and the recently acquired Monchik-Weber Corp. Joseph Kasputys, 48, who was Data Resources' president, will take a new corporate post, exec vp-development, and serve as the company's chief economist.

Among the important shifts on the organizational chart, Mr. Fruehling will report to Joseph Dionne, president-chief executive officer, McGraw-Hill, as will Mr. Hosbach, though his new post is an operating, not a corporate, post.

By moving into his new corporate post, Mr. Fruehling becomes a major player in McGraw-Hill's future. He will be the company's fourth exec vp, joining Mr. Kasputys; Brenton Harries, exec vp-corporate development, and John Cave, exec vp-chief financial officer. Industry analysts speculate this could put him in line for the presidency should Mr. Dionne be promoted to chairman when chair-

NBC finds glory, too

Sweeps cheer CBS

By JAMES P. FORKAN

NEW YORK—When the November sweeps period ended last week CBS emerged easily as the victor, but NBC, still relishing its role as this season's spoiler, outpointed ABC.

The ratings period, which ended Nov. 27 in Arbitron's book, the following night in Nielsen's, found NBC as the only network to improve over the sweeps a year ago. ABC was hindered by its poorest November performance since 1968, and CBS suffered its first third-place finish during a regular season week since September '80 (AA, Nov. 29).

ABC's brightest spot came when the $4.5 million "Ewok Adventure" tv movie, co-produced by Lucasfilm, helped lift it to No. 2 for the week ended Nov. 25.

NBC, whose Nielsens in Weeks 8 and 9 were bolstered by the two-part "Fatal Vision" drama, boasted that its ratings were up about 5% compared with November '83. In contrast, CBS and ABC ratings declined by 10% and 15%, respectively.

CBS, hurt by "Vision," "Ewok," a two-hour "Love Boat" and its own unappealing Tuesday and Wednesday tv movies, is sticking by the view that weekly series are the backbone of long-term success. David Poltrack, CBS' vp-research,

A media revolution in the making

By DENNIS CHASE and KEVIN COTE

These two trends—the globalization of media and the globalization of markets—go hand in hand, and together they are changing the shape of our lives—Lee Huebner, publisher, *International Herald Tribune.*

From Hong Kong to Paris to New York, a melodrama is unfolding as media executives try to figure out what media globalization means for them.

What they are finding so far is that it is too soon to tell.

The term "global media" generally refers to those publications that have a substantial circulation on several continents, have global editorial content, are primarily in English and in which advertising in all editions can be purchased from one central office.

It differs from international media, which typically are indigenous publications shipped to foreign markets.

While global media has received most of the attention, so far advertiser interest has focused more on regional markets than global markets. For example:

- When the *IHT* started printing its newspaper in Asia in 1980, Mr. Huebner predicted that 50% of the newspaper's U.S. and European advertisers would add the Asian circulation onto Europe. Instead, 80% did.
- When *USA Today* started distributing in Europe a scaled-down, 16-page version of its U.S. edition, Vincent Spezzano, president of USA Today International Corp., expected to reach mostly U.S. tourists. Instead, he is finding that a surprising number of Europeans are buying the paper as well.
- When the *Wall Street Journal* launched its European edition in January, 1982, many observers predicted that a major circulation victim would be the *IHT*. Instead, the *IHT's* circulation increased faster after the *Journal* arrived in Europe than it had before.

However, there are signs that the market for global media may burgeon at any time:

- When Rupert Murdoch purchased the pan-European tv channel, Sky Channel, many predicted the venture would fail because of language differences throughout Europe. Instead, Sky Channel executives were astonished to find that Europeans are so hungry for tv they will watch drama programs in English even if they don't speak the language.
- Several publications, including the *IHT*, *Financial Times* and *International Management*, are considering publishing U.S. editions. The main reason is to match the discounts being offered by competing media to advertisers who buy space in the U.S. edition and "add-on" foreign editions.

But for every global success, there is disarming news.

The number of U.S. advertisers placing global ads—which appear in every edition of the publication—is small. Both *Time* and *Newsweek* executives say only a few advertisers ran ads in nearly every edition this year.

Both newsweeklies are global publishing pioneers, but, ironically, are now creating regional editions for advertisers who want to pinpoint markets instead of going global.

Furthermore, the global market is unstable, even in the business-to-business category.

Bank ads, normally recession-proof, are off sharply this year because of bank failures and profit declines.

The strong U.S. dollar has wreaked havoc with global publications' media rate cards. Savvy advertisers consider arbitraging British pound sterling and Italian lira rate cards against U.S. rates that don't match and get "discounts." To keep up, media rate cards have to be changed often.

Tv, the logical mass medium for global consumer ads, has problems with a web of idiosyncratic government and cultural restrictions that have given advertisers, agencies and media executives nightmares.

In most countries, tv commercials are not afforded the same First Amendment-type protections that they receive in the U.S. The International Advertising Assn. next year will publish a major study showing that United Nations and other international charters guarantee protection.

So which advertising works globally? Corporate image and product advertising by financial institutions, aerospace and computer marketers, airlines, rental car companies and hotels are hot.

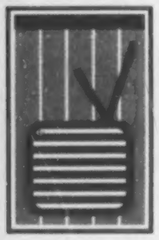
On tv, it seems sports, music and children's programing work worldwide, but advertiser sponsorship arrangements are complicated.

The best advice seems to be that of Lewis Young, president of Diebold Group, international management consultants, and former editor of *Business Week*:

"The trick," he told marketers recently, "is knowing what will work on a global basis—and don't push too hard."#

The identity crisis that bedevils 'WorldPaper'

By MITCHELL LYNCH



BOSTON—Everything's just fine in Nigeria.

At least that's how *WorldPaper's* local correspondent sees things in a dispatch from Lagos, the capital, where the new military government has launched a "war against indiscipline."

The generals are "restoring moral ethos and social values," the article goes on to say.

Some early results: "Rowdy public scenes are fast disappearing. Bus drivers rebuke passengers for rushing. Bank clerks admonish customers who cut in line."

And that's not all: Former politicians are routinely tossed into prison for terms running from 21 years to life.

Two newspaper reporters are sentenced to a year in prison and their paper, the *Guardian*, is fined $66,000 for "publishing false information."

Why, notes the article in obvious approval, even condemned armed robbers have reason for thanks under the new regime. "The trials are faster than before," it says.

The article is written by Abiodun Lewis, an associate editor at the *Guardian*, the Nigerian newspaper fined all that money, whose reporters were imprisoned.

What?

Is *WorldPaper* putting the reader on? Is this stuff tongue in cheek?

No, it's just another article in yet another monthly issue of *WorldPaper*, designed to be no less than "a newspaper for the global community."

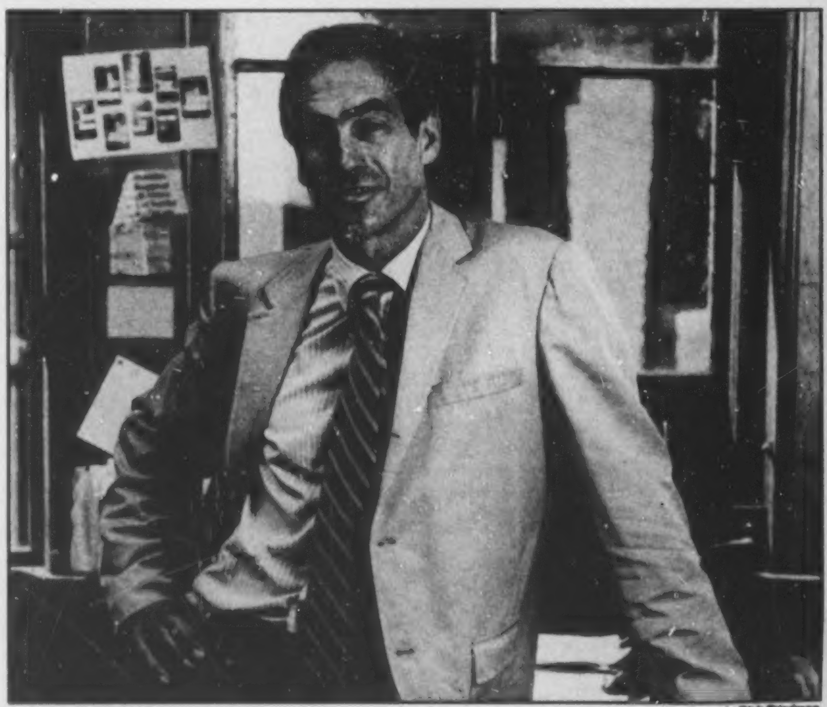
Published in Boston, the newspaper supplement is dedicated to putting the world's events into perspective, thus creating better understanding and global harmony.

While at it, *WorldPaper* is out to make a buck, too.

But five years after it began publishing, *WorldPaper* seems to be having an identity crisis. The tabloid has had to lower the loftiness of its goals, and its circulation sights have shriveled from global to a scattering of 18 countries, mostly in the Third World. It has yet to penetrate and hold distribution in the U.S., Canada and Europe—except for Norway.

Its policy of having news covered only by local editors and reporters often causes far

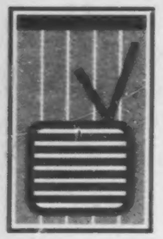
(Continued on Page 59)



Photograph: Rick Friedman

Crocker Snow, *WorldPaper* publisher, says his newspaper is for the "global community," but circulation is limited and some critics say the publication lacks credibility.

Global media: How the giants cope



For global publications, battles in the boardrooms of the companies they cover are nothing compared to their own fights for the global advertising dollar. Like evenly matched boxers, the Wall Street Journal *goes up against the* Financial Times *and* International Herald Tribune; Business Week *takes on* Fortune *and* The Economist, *and* Time *and* Newsweek *export their U.S. battles internationally. Herewith our reports:*

'IHT' battles back against competition

By DENNIS CHASE

New York—There was a time when Europe was wide open territory for anyone aiming to become pan-European media, and advertisers had little choice but to do business with the only player in town, the *International Herald Tribune*.

But like the Wild West in the U.S., those days are long gone. They started eroding in earnest when the *Financial Times*, the leading financial newspaper in the U.K., launched a European edition in 1979. They took another blow when the *Wall Street Journal/Europe*, was launched in 1983, and now face the last roundup when *USA Today*, which is aiming for the expatriate and tourist end of the *Tribune's* readership, starts printing in Europe next year.

The new question that observers are asking is: Can the *IHT* maintain its position as the premier pan-European newspaper in the face of this onslaught?

"I don't see how the *IHT* can keep up [in Europe] unless it gives space away to advertisers," says Mike Wilson, *Wall Street Journal* advertising manager for North America.

IHT publisher Lee Huebner hotly disputes this. "It's like saying that the *Journal* in the U.S. competes for readers with the *New York Times*," he says. "It's not a zero-sum situation."

The fight for global readers and advertisers is not confined to Europe. Both the *Wall Street Journal* and *IHT* have major Asian editions, the *FT* is considering printing an Asian edition in 1986 and *USA Today* is also exploring Asia.

They are moving so quickly because initial growth can be rapid. Since the *WSJ/E* entered Europe 23 months ago, the *Journal* has increased its European circulation from 7,500 to 25,411 in about four years less time than it took to reach that figure in Asia. Advertising is averaging four pages an issue this year, up from three pages last year.

Executives at the *FT* also are happy with worldwide circulation that grew to over 215,000 this year, or 13% over 1981. Advertising volume is up 30% in pages this year over last, partially due to a 10-week printers' strike in 1983.

But the biggest surprise has been the *IHT's* resilience. The *Tribune's* circulation has grown 7% since 1983, to 157,560, including 4% growth in Europe, to 119,769, and 11% in Asia, to 24,103.

"Our fastest growth since 1967 has occurred since the *Journal* arrived in Europe," says Mr. Huebner. Advertising linage is up "slightly," he says, but adds, "We've looked at this campaign by campaign and found we have not lost any advertising to the *Journal*."

One reason may be positioning. The *Journal* constantly stresses the "quality" of its demographic profile, which surveys show is the "highest" in Europe, it says.

Conversely, the *IHT* stresses its broad appeal and bills itself as the "in-flight" newspaper because it is often given away by airlines.

However, all of those in the race for European and Asian readers have had to adjust to the new crowded marketplace, and several problems have emerged:

U.S. edition. Neither the *IHT* nor the *FT* prints in the U.S., which puts both publications at a major disadvantage to the *Journal*, the largest-selling newspaper in the world, largely because of its more than 2 million U.S. circulation.

IHT officials have considered distributing the paper in the U.S., concentrating on New York where the global ad community it is trying to reach will see it. "One of our big problems is that the people who advertise in the *IHT* don't read it every day," said Richard Morgan, *IHT* associate publisher.

The *FT*, with its 6,000 circulation receiving the publication days late in the U.S. now, likely will print a U.S. edition next year.

Add-ons. In the race to see who can offer the best discount and split-run deals to advertisers, all publications are looking to start new editions. Dow Jones is investigating a Latin American edition. The *IHT* has looked at—but is not now "actively" considering—offering advertisers in the *New York Times* and *Washington Post* (two of its owners) the opportunity of "adding on" the *IHT* at a discount.

Publisher Lee Huebner says the *IHT* is flourishing.

For the *FT*, "in the long term we want add-ons [in a U.S. edition], but what's the magic circulation number we need in the U.S. to get them—that's the question," said Laurance Allen, director of FT Publications in New York.

These add-ons can be a saving for advertisers. For example, the cost of a page this year in the *IHT's* Europe and Asia editions is $27,730, or 14% less than if an advertiser bought separately into each edition. Not surprisingly, 80% of all the *IHT's* advertisers buy a "global" ad, compared with a far smaller percentage at the *Journal*.

Tombstone ads. In the race for what had been a big advertiser category, the *IHT* has probably lost some "tombstone" ads—announcements that deals involving public shares have been completed—to the *Journal* and the *FT*. But those have been replaced by corporate and "personal finance" ads from brokerage houses, for example, so the *IHT* now gets only 20% of its ad revenues from financial ads, compared with 30% five years ago.

What will happen if tombstone ads stage a comeback, as some expect? The *IHT's* Mr. Huebner says tombstone ads are less important than in previous years, but the *Journal's* Mr. Wilson expects them to kick up and heighten the competition. "Let's face it, tombstone ads aren't going to run in seven different books," says Mr. Wilson.

News mix. As the only daily international newspaper that tailors its coverage to individual markets, the *Wall Street Journal* still is struggling to get the right mix of U.S. and foreign news.

In Asia, where *Journal*-type news is difficult to come by because most of the local press is government-controlled, the paper has been forced to run some stories from the U.S. edition that have only marginal interest in Asia.

"We still haven't figured out the right mix," admitted one *Journal* executive.

Dow Jones & Co. recently named Robert Keatley, former editor of the *Asian WSJ*, as the third editor of the *Wall Street Journal/Europe* in less than two years.

Mr. Keatley's plan is to increase the European content of the European *Journal* at the expense of some U.S. stories. This is sure to raise howls from many readers who complain they miss the U.S. coverage of the old international air edition, shipped from the U.S.

"We won't drop anything of significance, but there are many U.S. stories that just don't travel well," says Mr. Keatley.

The *IHT* also has added an "American Topics" column, to counter the *Journal's* U.S. coverage, and recently added a "Personal Finance" section, partly because advertising in this category is up 50% this year.#

Why does a Spanish engineer on a management course in Paris order an English-speaking newspaper with his coffee and croissant?

An IHT ad cites survey results to play up the newspaper's status as an "in-flight" publication. The *WSJ/Europe* ad stresses local news coverage while the *FT* touts its pan-European readership.

'Fortune' and 'BW' at global ad impasse

By KEVIN COTE

New York—*Business Week* and *Fortune* are finding the global marketplace is a little like the Tar Baby in the Uncle Remus stories: The harder you hit it, the deeper your fists get stuck.

When *BW* launched its international edition in 1981, two years before *Fortune* did the same thing, the McGraw-Hill flagship magazine was in an enviable position.

The "international" edition was a carbon copy of the U.S. publication, except for the pure gravy of extra ad pages from advertisers wanting foreign circulation only.

This resulted in such curiosities as foreign readers attempting to call "800" telephone numbers originally appearing in ads designed for U.S. readers only, but now also advertised in the "international" edition of *BW*.

Fortune initially tried something similar, and both magazines became so cluttered with ads (only a portion of which made sense to readers outside the U.S.) that each publication was split for the first time into two advertising editions: Domestic and international.

What neither publication counted on was U.S. advertisers who talked a global game but never came across.

"When we offered the international edition and inflated its profile, all of a sudden many advertisers became aware of the fact that it would be easy to buy North America and save a modest amount of money," said Michael Dudler, associate director of the international edition of *Fortune*.

Another problem was that subsidiaries of U.S.-based global companies refused to follow orders from headquarters to buy space in *Fortune*. "There is a resistance to directions out of the U.S.," said Mr. Dudler.

The Economist, rival to both *BW* and *Fortune*, also is hit by this phenomenon of U.S. advertisers opting out of international editions, or letting their foreign subsidiaries make that decision. "Our pricing structure favors the worldwide advertiser," said Sandra Ourusoff, *The Economist's* senior vp in New York.

"They [*BW* and *Fortune*] didn't do their homework," said Filberto Fernandez, an international ad executive with Bank of Boston. "I think they just lifted the publications in the U.S. without being sensitive to cultural differences."

Despite the setbacks, this year for the first time circulation of *Fortune's* international edition—90,000—surpassed the circulation of *Business Week's* edition—81,000.

But the international advertising picture has stayed gloomy, and revenues are flat for both publications this year.

Partly in reaction, both *BW* and *Fortune* have been enticing U.S. advertisers into their international editions with bargain "add-on" rates—discounts for purchases of space in more than one edition.

But those deep discounts are coming down next year.

Fortune's whopping international add-on, which boiled down to a 72% discount for advertisers buying the international edition after paying the full rate to be in the U.S. edition, is going the way of the nickel candy bar.

The add-on for next year will be pegged at 50% off the flat international rate, more in line with the 40% discount available at *BW*.

Steve Klein, a media planner at Grey Advertising, said *Fortune's* international edition has wound up on his schedules simply because the discount was all but a give-away.

On the circulation side, there is some skepticism about the ability of these publications to reach foreign readers.

At a recent New York conference, Lewis Young, former editor of *Business Week*, said, "My experience is that there is a nationalistic pride associated with publications. While we like to talk about international editions of this or that magazine, when you're in Germany, the Germans talk about 'that American publication, *Business Week*.'"

Executives at *Business Week* and *Fortune* insist their international editions are turning a profit, albeit modest ones.

In light of this, *Business Week* and *Fortune* are investing heavily in promotion and beefed-up international editorial coverage.

This comes at a time when the strength of the dollar in Europe, the largest market for both publications, is thwarting gains in ad revenues *(see story on Page 61)*.

As these magazines become less reliant on global U.S. advertisers buying off the U.S. dollar rate cards and more on foreign advertisers buying off foreign currency rate cards, the weak foreign currencies have meant poor results when translated into U.S. dollars.

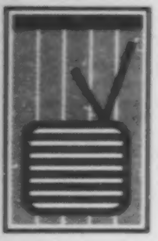
Taking this into consideration, the publications are reexamining their ad rates and taking different tacks. Denis Beran, international publishing director at Business Week, said *BW* next year will increase rates by about 4%.

At *Fortune*, revenues must in-

(Continued on Page 60)

Media giants face off in fight over European ads

By DENNIS CHASE



New York—Battle lines are being drawn in a fierce war for an international media dollar that may be moving to global publications and away from local media.

The battleground is Europe, the slugging probably will start next year and no one is pretending that the fight will be friendly.

In one corner are local newspapers and magazines, published in the language of their countries and reaching impressive shares of their target audiences. These include big European publishers, such as *Frankfurter Allgemeine Zeitung*, the leading West German newspaper, and *Le Monde*, the biggest French newspaper.

In the other corner are "global" publications—all in English and reaching relatively small shares of the same audiences. These include major U.S. publishers—Dow Jones & Co., McGraw-Hill and Time Inc.

At stake is more than $126 million in international media spending (this year's total), or 400% more than 10 years ago. This international advertising pie formerly went completely to local publications, but now is shared with publications that have "global" or pan-regional editions.

Global publishers are offering attractive "add-on" packages in which advertisers buy space in one edition at the full rate and then buy additional space in other regional editions at a discount.

Advertisers also can take advantage of split runs, which allow them to run different ads in different worldwide editions, often at a discount. The issue has come to a head in the last several years with the advent of new international editions of *Business Week* and *Fortune* and with *Wall Street Journal* editions in Europe and Asia.

Urs Wunderli: Global publications pose a threat to local media.

At an international media seminar this fall in Zurich, attended by publishers of both local and global media, "it was all very friendly and polite, but what are we being polite about?" asked an angry Urs Wunderli, president of SFW/PRI International, the largest international publishers representative based in the U.S.

"These [global] guys are trying to take away our business," said Mr. Wunderli, whose company represents *FAZ* and *Le Monde* newspapers and *Der Spiegel* and *L'Expansion* weekly magazines.

Mr. Wunderli and others are complaining that global publications only skim the top of the global business community, yet are gaining advertising revenue.

On the other hand, "purely national advertising is a luxury," said Mike Wilson, *Wall Street Journal* advertising manager for North America. "All the translation and production changes that have to be made from country to country are a waste of time."

How much advertising global publications are taking away from indigenous publications is unclear. Mr. Wunderli conceded that now it is a small amount, for example, only 2% of the total $800 million in annual revenues anticipated by Publicitas this year will be lost to international media. Publicitas is the leading European publishers advertising representative and part owner of SFW/PRI.

But "it's [bad] public relations for our company," Mr. Wunderli said. The worry is that this could snowball into losses of other business, such as market and media research and translation services.

The battle between the local and international sides could kick off in earnest next year. A group of 15 European publishers, who normally meet over cocktails but rarely have any business dealings with one another, are trying to join forces in a unique survey.

This first joint readership survey among indigenous European publications would measure a bigger universe of European readers than any of the existing pan-European surveys—as many as 10 million *(see related story at right)*.

Others doubt the survey will ever get off the ground. "It's like the Common Market—these guys are not used to cooperating with one another," said one U.S. foreign media representative.

Publishers of local media agree that their bottom lines have not suffered yet, but "it's a philosophical question," said Luyte Sieders, advertising director for Bonaventura, publisher of *FEM*, the leading Dutch business magazine, and *Elseviers*, the leading newsweekly.

"Global advertisers should first use indigenous media," he said, "and then if there is any money left over, use pan-European media, not the other way around."#

Key surveys point to successes and flops

New York—The battle for supremacy between indigenous and international publications is being waged largely around readership surveys.

International publishers say the key regional readership surveys—the Pan-European Survey and the European Businessmen Readership Survey—show that their publications are gaining ground.

But Asian and European publishers say the surveys distort the strength of pan-regional publications and underestimate the strength of local publications.

The latest PES, sponsored this year by *The Economist*, *International Herald Tribune*, *Newsweek*, *Scientific American* and *Time*, covered 7,000 "senior executives and professionals."

It found that *National Geographic* and *Reader's Digest* had the highest "average-issue readership" among international publications in Europe, while the *Wall Street Journal/Europe* had the lowest.

But the survey also found that these publications lagged far behind local publications in individual countries.

For example, in the U.K., the *Sunday Times* reaches 42% of the PES audience, compared with 15.8% for the *Financial Times*, the leading international financial publication in the U.K.

The outcome was the same for this year's EBRS, which more narrowly measures business readers. The *Financial Times* is a leading international publication among businessmen in Europe, with a 16.2% EBRS coverage.

But in one private comparison made for a client by Publicitas, the leading European publishers advertising representative, *The Economist* and *IHT* together reached only 1% of the EBRS audience in West Germany, compared with 56% for *Frankfurter Allgemeine Zeitung*, the leading newspaper.

Local business publications in Europe do far better than international publications in nearly every national survey. In the Netherlands, for example, one survey this year gives the national *Financial Economic Weekly* 13% of the survey's average-issue readership, compared with 3% for *The Economist* and 2% for *Business Week*.

Many contend that the international surveys are biased because they are financed by international media.

"The questionnaires are often adjusted from survey to survey, making it impossible to do comparisons and always benefiting the sponsoring media," said a U.K.-based media consultant.

When some U.S. ad agencies tell their clients that international media are a better buy, "we believe this is not systematically correct. . .for the same paid space" because of the additional reach of national publications, said Jean-Michel Graf, director of Publicitas' international division.

U.S. ad agencies are taking heat from critics of the global media trend. Representatives of indigenous media believe the agencies have few international media experts who truly understand local publications.

Victor Webb, president of Branham International, a media representative for such leading financial publications as *Australian Financial Review* and *Les Echos* in France, believes national publications are not getting a fair hearing because of the slick selling job done by international media.

"The indigenous media are losing by default," Mr. Webb said.#

Marketers mixing local and global ads

New York—U.S. global advertisers say global publications are at the fringe—not the heart—of their media buying plans.

"The pan-regional [English-language] publications are really an addition to local media," said Bruce Roberts, Morgan Guaranty vp-advertising.

The bank is spending $2 million this year outside the U.S. on a corporate campaign, and about 33% of that is going to pan-regional publications such as the *International Herald Tribune* and *Wall Street Journal/Europe*.

"Not one penny that we would have spent on local media has been sacrificed," Mr. Roberts said.

Some global advertisers admit that their reasons for choosing global media appear dubious.

"The problem is that many people in the U.S. are not familiar with the [local European] publications," said Nancy Trevino, international marketing communications specialist at Wang Laboratories, Lowell, Mass. "If someone comes to me to talk about, say, a [Spanish-language] computer publication in Latin America, well, a lot of people here don't speak Spanish. So it's a battle."

Last August, Wang launched the biggest international corporate campaign in its history.

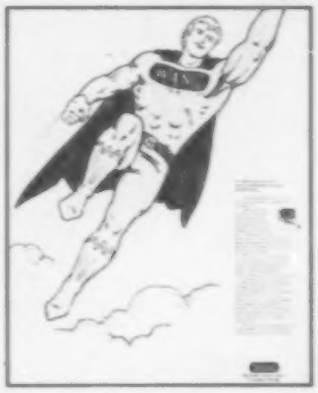
In the U.S., the campaign is based on symbols, such as crossed fingers for keeping up service commitments and a wedding ring for Wang's "partnership" with its customers. The campaign is themed "We put people in front of computers."

But in Europe and Australia, the symbols used in the U.S. campaign—created by Hill, Holliday, Connors, Cosmopulos—are replaced with symbols more familiar or acceptable to local customers. For example, in Germany, a "Superman"-type character is used to show that, by adding components, Wang computers can be made increasingly sophisticated. "You should know what your child can become," the ad reads.

The German ads were placed only in local publications.

Wang is not committed to this approach for future campaigns, however. In fact, the current U.S. campaign appears in pan-regional media in Asia, where English is more common than in Europe. The choice in Europe and Australia was strictly "creative-driven," Ms. Trevino said.

A campaign that began last spring for Pittsburgh-based Rockwell International's aerospace, automotive, electronics and general industries businesses is using mostly indigenous general-business newspapers and magazines.



Wang's German ad says: "You should know what your child can become."

The campaign, created by Campbell-Ewald, is themed "Rockwell International technology: It's in everything we do."

"There is no true pan-European publication that addresses top management people in Europe, because you need to speak to people in their own language," said Thomas Haas, Rockwell's manager for advertising.

But even Rockwell is using the *IHT* and *Wall Street Journal/Europe* for its campaign. "We need them to fill in the gaps," Mr. Haas explained.

McDonnell Douglas Corp., St. Louis, has taken a different tack. For the $1.5 million corporate campaign that it kicked off last January, the aerospace company and its agency, J. Walter Thompson USA, have used a mix of local and pan-regional publications, including *The Economist*, *Financial Times* and *Wall Street Journal/Europe*.

The campaign is appearing in 300 publications in 11 languages.

"It's a big world, and influences cross borders," said John Bickers, McDonnell Douglas director of advertising. "Let's face it. There are some powerful local publications you can't ignore."

But to keep up with competitors, Mr. Bickers is forced to use global publications, too.

"If you're playing a basketball game," he said, "you can't afford to give away points."#

How to read the chart

The global media chart on Page 51 was compiled from a survey of top media, advertiser and ad agency executives who were asked to name the leading global publications that they felt met the following criteria:

- Substantial mass circulation on at least three continents.
- Worldwide circulation of 50,000 with the circulation of its international editions equaling at least 10% of its domestic edition.
- Editorial content global in scope, and primarily in English.
- Advertising in all editions purchased through one central office. Trade books were not included because they are not mass-circulation publications.

Licensed publications also were excluded because, for the most part, they are not centrally controlled either on the advertising or editorial side.#

NOTE: Figures in Parenthesis Denote Reported Newspaper Column Format. For example: (6)—Six Column Broadsheet, (T-7)—Seven Column Tabloid

Source: Media Records

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodology to report comparable figures (1984 month vs. 1983 data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*).

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column formats.

8 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 8 column formats.

9 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 9 column formats.

6 column broadsheet standards or tabloids which have a slight depth change in 1984 but did not change column format are converted back to original depth.

AT&T scatters ad plans

By VERNE GAY

New York—AT&T, convinced it has spent enough ad money in network news explaining the impact of telephone deregulation, reportedly is trying to shift as much as $5 million in first-quarter money out of news and into prime time and sports.

The AT&T request for relief would have to be approved by the networks. If approved, the move could have a significant impact on the first-quarter network scatter market, making available scatter news inventory in what had been a virtually sold-out daypart. At the same time, the spending shift once again could rewrite the list of the biggest spenders in network news. At about $12 million, AT&T this year is network news' largest single advertiser, according to one estimate. A few years ago, laxatives and pharmaceuticals dominated the daypart.

Benton & Bowles senior vp-national broadcast and programing Irwin Gotlieb predicts the total news marketplace in 1985 will be $475.1 million. It was $350 million only three years ago. The B&B forecasts do not include morning or overnight newscasts.

"I don't think they [AT&T] are cutting back dollars," said a source. "They are no longer explaining divestiture so that maybe news is not the best place to tell their story." D'Arcy MacManus Masius handles that portion of the AT&T business. Ray McArdle, senior vp-media director at DMM, said, "We have no knowledge this [shift from news] would happen. We are working on our 1985 plans right now."

While first-quarter scatter activity is brisk in news and daytime, the prime time scatter market is very sluggish, according to sources. However, Louis Schultz, exec vp-director of media at Campbell-Ewald, Warren, Mich., said at least two networks were giving football makegoods in prime time. Those makegoods should eat up some scatter inventory and help maintain pricing strength for the remaining prime time scatter inventory.

"Prime is the slowest of the three dayparts," said B&B's Mr. Gotlieb. "NBC is out of the market, basically [for daytime]. ABC has a lot of inventory and CBS has a little." He estimates that before makegoods are reexpressed at ABC, the network has between 25% and 27% of its inventory available.

The three-network first-quarter scatter prob-

All-Bran ads garner praise of FTC exec

By STEVEN W. COLFORD

Washington—Kellogg Co.'s controversial All-Bran campaign, the target of review at two federal agencies, was held up as an industry exemplar this week by a Federal Trade Commission official who said it was the kind of information vehicle the agency wants to encourage.

By issuing such a ringing endorsement, Carol Crawford, director of the FTC's bureau of consumer protection, may have provided Kellogg and the advertising industry with a catalyst for expanded promotion of foods on the basis of their medical or health benefits.

Still to be heard from, however, is the Food & Drug Administration, where commissioner Frank Young must determine whether All-Bran's medical claim that—as a high-fiber product, its consumption can help prevent cancer—converted a cereal into a drug, based on the FDA's statutes.

Mr. Young's more cautious attitude toward Kellogg's All-Bran claims reflects a concern for the "larger issue" of food promotions with a medical claim, according to an FDA spokesman. That extra helping of caution may manifest itself in an FDA request for a food industry moratorium on promotions with medical claims (AA, Dec. 3).

But at least for the time being, Kellogg and the National Cancer Institute, which cooperated in the development of the All-Bran ads, got a big reward for their advertising bravery.

A Kellogg spokesman said the company is "pleased with the FTC statements." The spokesman declined to speculate on what affect the FTC position may have on similar ad claims in the future.

A spokesman at NCI said the prestigious branch of the National Institutes of Health was "very happy" with Ms. Crawford's comments.

"This should be welcome to other responsible marketers who are looking to take a similar approach," said Paul Nevel, associate director for communications.

At the Center for Science in the Public Interest, a citizen group that had praised the Kellogg

Midweek News Summary

Dataproducts Corp., which claims to be the largest independent manufacturer of computer printers in the world, plans to shift its emphasis from manufacturing for other companies to marketing printers carrying its own name. *See Page 2.*

The National Assn. of Broadcasters for the first time is using a satellite feed to 700 tv stations to transmit public service announcements that caution against drinking and driving. *See Page 2.*

Campbell Soup Co. expects to remain the leader in the condensed-soup market with the help of a new spokesman—the former "world's fastest waiter." *See Page 2.*

Bozell & Jacobs, in a major upheaval only partly of its own doing, lost its top executive and two of its top creative talents in Minneapolis. *See Page 3.*

Marketers of French champagnes, those esoteric bubblies that cost more and supposedly taste better, this year are having their corks popped by more than the tuxedo set. *See Page 3.*

The overwhelming success of the cuddly, pudgy-faced Cabbage Patch dolls has produced another entry in the licensing bonanza: Cabbage Patch Kids all-natural vitamins. *See Page 3.*

The Movie Channel pay tv service will begin its first national consumer campaign in February to distinguish itself as the only pay channel that shows only movies. *See Page 3.*

Michael Omansky, RCA Records' director of marketing since spring, has a background in package goods, so it seemed inevitable that he would try some tricks of that trade on record buyers. *See Page 40.*

DIRECT MARKETING

The demand for direct-response space ads is making a comeback in the first quarter of 1985 after falling off sharply in the second half of this year, according to magazines and mail-order distributors. *See Page 6.*

The Scanticon-Princeton Executive Conference Center and Hotel turned to direct marketing to help fill the center during the normally slow months of December through March. *See Page 6.*

Shops vie for Labatt account

Getting the Blues

By TONY THOMPSON

Toronto—J. Walter Thompson, which last month gained the $60 million Miller High Life account in the U.S., may find it has lost a $15 million beer account in Canada.

That's the size of Labatt Brewing Co.'s Blue account—Canada's No. 1 brew—now with JWT. A decision is expected this month.

Five major U.S. agencies—including JWT—are contending. But JWT's Miller account gain in the U.S., from Backer & Spielvogel,

Shulton sues over English Leather ads

New York—American Cyanamid Co.'s Shulton USA division has filed suit in federal district court against MEM Co. and its agency, MacNamara, Clapp & Klein. Shulton seeks unspecified damages and corrective advertising over MEM's English Leather Spiced men's fragrance. Ads now take direct aim at Shulton's Old Spice with copy such as "If you like Old Spice, you'll like English Leather Spiced even more."

Ponderosa cites expansion in account move

Dayton, O.—Ponderosa confirms that it will move its estimated $15 million account from Avrett, Free & Ginsberg, New York (AA, Nov. 29). An executive with the 650-unit steak house chain said "aggressive expansion plans" necessitate tapping a larger agency with offices nationwide. Finalists were not disclosed. A decision is expected next month. Ponderosa earlier had moved responsibility for its Casa Lupita Mexican chain from AF&G to Geer, DuBois, New York (AA, Oct. 1).

Trump Plaza casino may shuffle agencies

Atlantic City, N.J.—The Trump Plaza casino, which opened last May as Harrah's at Trump Plaza, is reviewing its $5.5 million account. Incumbent agency Trout & Ries, New York, is participating in the review. Trump

CBS game plan skirts 'risky' Olympics bid

By ROBERT RAISSMAN

New York—CBS will bid as agressively for the 1988 Summer Olympics as sound business judgment dictates, says Neal Pilson, the network's top sports executive.

But according to CBS Sports commentator Brent Musburger, CBS Inc. chairman Thomas Wyman says it's "not likely" CBS will win the rights to the Summer Games in Seoul, South Korea.

At a press conference this week announcing the extension of his CBS contract through 1990, Mr. Musburger spoke of a conversation with Mr. Wyman.

At the time, CBS was making Mr. Musburger a counter-offer to a reportedly very lucrative deal from ABC. Mr. Musburger, who was in the final months of a CBS contract that paid him more than $500,000 a year, said his decision to leave or stay with CBS would depend on what assignments he would have.

One plum Mr. Musburger coveted was to anchor an '88 Olympics broadcast.

"Mr. Wyman said he was not going to mislead me," Mr. Musburger said. "He said it was 'not likely' that CBS would wind up with the Seoul Olympics."

In the end, Mr. Musburger's decision rested on something other than the Olympics assignment, namely becoming CBS' headliner on all major sporting events.

CBS also offered lots of money. Although official details on Mr. Musburger's new salary were not revealed, sources estimate the sportscaster may have more than doubled his current income as he masterfully played off ABC against CBS.

But the shocker revelation was that CBS' Mr. Wyman is apparently convinced that ABC, which holds the $309 million rights to the 1988 Winter Olympics in Calgary, Alta., is prepared to go beyond the $400 million ceiling most network sources put on the Seoul games (AA, Oct. 8).

Whether CBS gets the Olympics still depends on the "level" of bidding, said Mr. Pilson, exec vp, CBS/-Broadcast Group.

"As we have demonstrated in the past, we are not going to submit a financially unsound, risky bid," he said. "But we are going to be very competitive at what we consider to be sound financial levels for the event."

Rights could go as high as $700 million, Barry Frank said. Mr. Frank is group vp at Trans World International, a unit of International Management Group and the company that the International Olympic Organizing Committee has appointed to sell U.S. tv rights.#

J. WALTER THOMPSON NEW YORK

Finding the write stuff

If you can describe, in fewer than 100 words, the plot of the last episode of "Dynasty," you may be on your way to becoming a copywriter at J. Walter Thompson USA, New York. The challenge is part of JWT's unusual recruitment ad in the *New York Times* (AA, Dec. 3).

NAB sends liquor psas by satellite

Washington—The National Assn. of Broadcasters for the first time is using a satellite feed to nearly 700 tv stations to transmit 25 public service announcements that caution against drinking and driving.

Broadcasters are stepping up their good citizen role in at least partial reaction to the grass roots public campaign against drunk driving. That campaign has raised industry fears of a public backlash against beer and wine advertising on tv.

NAB collected the psas from the Ad Council, American College of Emergency Physicians, Mothers Against Drunk Driving, National Institute of Drug Abuse and others. Most had aired previously. By using a satellite feed to all major markets and the tv networks, NAB hopes to reach stations that wouldn't normally get the material.

There's no conflict between the association's fight against drunken driving and increased tv advertising for beer and wine during the holidays, contended Andy Ockershausen, vp at Washington's WMAL and chairman of the NAB task force that put together the psa feed.#

Thompson weighs in ads for diet aids

By LISA PHILLIPS

New York—Thompson Medical Co. has declared February "National weight-loss month" to push its top-selling Dexatrim and Slim-Fast diet aids—possibly for those who end up fudging their New Year's resolutions to lose weight.

National tv and print ads will support in-store displays and 90 million consumer coupons and rebate offers. Saatchi & Saatchi Compton, New York, handles both lines.

The special-event promotion is a new tack for Thompson, said pr director Dean Siegal. "We've just started getting into it, and we find we're good at it," he said.

This is the first time both No. 1-selling brands have been positioned together, he said, adding that each appeals to a separate market—one as an appetite suppressant, the other as a meal replacement—with very little consumer crossover.

Thompson plans a $30 million ad budget next year for all its diet aids, which include Prolamine capsules, Appedrine tablets, Control capsules and Aqua-Ban tablets, handled by Marschalk Co., New York.

Dexatrim appetite suppressant capsules, with line extensions into extra-strength and caffeine-free extra-strength capsules, receives the largest ad spending from Thompson, totaling nearly $9 million during the first six months of this year. In 1983, spending reached $19.5 million.

Slim-Fast meal replacement is being revitalized, with ad spending going from $4.5 million for all of 1983 to $7 million for the first six months of 1984.

Ad spending had plummeted earlier during the '80s, following the roller-coaster effect of the liquid protein supplement craze of the late '70s.

But following the success of the Cambridge Diet, a meal replacement chiefly sold door-to-door for about $18 a can, Thompson decided to resurrect Slim-Fast, which sells for $8-to-$9 a can.#

Dataproducts now wants name in print

By CLEVELAND HORTON

Dataproducts Corp., which claims to be the largest independent manufacturer of computer printers in the world, plans to shift its emphasis from manufacturing for other companies to marketing printers carrying its own name.

To assist in the new retail push, Dataproducts recently named Ammirati & Puris, New York, to handle what the company says will be at least a $12 million account. Former agency is John Corey Advertising, Woodland Hills, Cal. New creative work is due in January.

Founded in 1966, the Woodland Hills-based company gained prominence as an original-equipment manufacturer of high-speed computer printers, selling its products to IBM Corp., Wang Laboratories and other computer marketers that, in turn, marketed the machines under their own names.

Four years ago, Dataproducts began selling its printers under the Dataproducts name. However, the effort was "half-hearted," according to a company spokesman. Only 10% of the company's $400 million

Waiter, fly with my soup

By LISA PHILLIPS

Campbell Soup Co. expects to remain front-runner in the condensed-soup market with the help of a new spokesman—the former "world's fastest waiter."

Roger Bourban, now a restaurateur and chef in his native Switzerland, will be featured in commercials for Campbell's condensed red-and-white label soups next year. He qualified in 1981, 1982 and 1983 for the "Guinness Book of World Records" by running 26 miles while balancing a tray and an open bottle of mineral water without spilling a drop.

Pierce Pelouze, Campbell's promotions director, explained that in Mr. Bourban the company found a spokesman "emphasizing our concern for product excellence and our concurrent thrust into the area of over-all consumer well-being." Backer & Spielvogel, New York, handles the red-and-white line.

Campbell, Camden, N.J., also will sponsor a series of 26 "Sports Capsules," written in Spanish and profiling famous Hispanic sports figures from all over the world. Five-minute segments will air twice a week on the 120 tv stations of the Spanish International Network.

On Christmas Eve, Campbell will begin promoting the "Campbell Family Movie" package, a special lineup of children's movies to air on daytime tv throughout the holiday season in 32 major U.S. markets. Promos will run on participating tv stations, in local newspapers and *TV Guide*.

Campbell is the exclusive sponsor of "CFM" and will promote red-and-white label soups, Franco-American pasta products and JuiceWorks beverages.#

Community channels cause controversy

By Don Veraska

When cable tv arrived on the national scene some years ago, it promised to be more than just another commercial tv system.

Cable, as an industry, promised excellent service, the latest in technical quality and programing reflecting the needs and desires of the communities that granted cable companies local franchises.

Today, cable tv is providing some of what it promised, but local programing is far from a national success story. Programing varies from very simple "home movie" type shows to highly sophisticated programs that proponents say are as good as or better than anything on public tv.

Shows include local newscasts, sports specials, previews of city council meetings and an eighth-grade academic tournament.

In some places, local programing adds to cable's value as a marketing tool, and in others, it is just another expense.

"But we are seeing more and more places where it is working, a lot more success stories," says Sue Buske, executive director of the National Federation of Local Cable Programers in Washington, a cable activist group.

Local programing falls into two categories: Local access and local origination.

Local access is defined as programing produced and controlled by groups or individuals within the community and includes shows of local governmental and educational organizations, such as school board and city council meetings.

Local origination is programing produced and controlled by the cable system, although local groups and organizations may be involved in production.

Public access channels generally carry no ads, but local origination channels seek ads. The boundaries between the two, however, often are blurred and what one cable system calls local or public access, another calls local origination.

Almost everyone agrees that local origination and public access are akin to motherhood and apple pie. Everyone says they believe that locally produced cable tv programs are a potentially valuable asset.

But there isn't agreement between cable tv consumer groups and operator groups on whether too much is demanded and expected of local cable programers.

"We believe strongly in access," says Ed Dooley, vp-public affairs, National Cable Television Assn., an operator and supplier group. "They [the National Federation of Local Cable Programs] believe in access, access, access."

The NCTA, founded in 1952, represents more than 2,100 cable systems, equipment manufacturers and distributors.

The NFLCP, with an annual budget of $300,000, is an eight-year-old organization founded to foster citizen participation in community programing.

Both organizations strongly support local cable programing, and both have annual awards for local programing.

"Local origination and access is good if it can deliver what the subscribers want," Mr. Dooley says. "But it can be an intolerable burden to tie up 15 or 20 channels that could be used for other programing."

Mr. Dooley cites examples, such as Dallas, where the city government required 17 channels be set aside for local programing, a requirement that later was eased.

NFCLP's Ms. Buske, however, says the problem is not generally the requirements for local programing channels, but the failure of cable companies to provide not only sufficient equipment and money for local programing, but also the expertise to help the public produce quality programing.

"The channel is doomed if the cable company hires a 'producer' rather than a community facilitator—a person who knows how to make it work," Ms. Buske says.

However, Mr. Dooley says the success of an access station isn't entirely dependent upon the station's commitment, but it requires a degree of local activism, "some spirit, some driving community force, like a university campus," for instance.

The history of local origination and public access programing on cable is not well documented, according to both the NCTA and the NFLCP. Neither is sure when the first such stations went on the air.

In the early 1950s, some cable systems were set up to pull in distant commercial station signals. Some of these stations decided it might be good business to put the mayor on one of those channels or broadcast a community bulletin board.

Public access and local origination channels began full-scale operation in the 1960s, and by 1972 the Federal Communications Commission required that cable franchises in the top 100 markets provide at least three access channels—for the public, government and education.

It also required that cable systems with more than 3,500 subscribers provide some channel capacity for public access or local origination programing.

The U.S. Supreme Court overturned this regulation in 1979, holding that the FCC did not have authority to issue it. But by that time, cable systems were proliferating to such an extent that potential cable companies competed for local franchises with promises of access channels, equipment, tv studios and mobile vans.

Today, both organizations estimate that of the nation's about 6,500 systems, between 800 and 1,000 have one or more access or local origination channels.

Although a 1979 Supreme Court decision gave jurisdiction over cable systems to local governing bodies, federal statutes gave this authority in the cable tv deregulation act just this year. This act, which takes effect Dec. 29, gives those governing bodies the right to require new cable franchises to provide access channels.

Another section of the deregulation act allows the governing body to permit the cable company to put other programing on public access stations that are not being used for that purpose.

The law specifies, however, that there must be a provision for reclaiming that time should public groups request it.

The alternative programing provision of the act was endorsed by the NCTA and was not opposed by the NFLCP.

"If 3,000, 4,000 or 5,000 hours a year are lying fallow in an unused access station, it is a tremendous loss to the community," NCTA's Mr. Dooley says.

However, if channels designated for access are not used, subscribers could lose interest in both the stations and the cable company.

Ms. Buske says her organization's primary responsibility is to ensure the continued availability of access channels.

"We think it is appropriate for the city to set up procedures for these channels' alternate use," she says. "But we don't want to see any of these channels lost or taken away without procedures for their being reclaimed."

Ellis Woodward, an aide to Rep. Timothy Wirth (D., Colo.), chairman of the subcommittee on telecommunications and finance of the House energy and commerce committee, says the primary congressional concern on access is availability.

"We're not in the business of programing. We want to ensure that access is available. That's our main concern," he says.

Mr. Woodward says the quality of access channels varies considerably from municipality to municipality. "In Reston [Va.], where I live, access is very popular. More and more groups are getting into it."

Availability and diversity are also the major concerns of Rep. Wirth, Mr. Woodward says. "He sees it from the standpoint that when there are that many channels available, you don't want one person as the editor of all of them. You want diversity."

Both Mr. Dooley and Ms. Buske see successful access channels as meeting that standard as well as providing a positive marketing tool for cable companies.

Ms. Buske agrees. "Public access is beginning to catch on. People are seeing the benefits. There are audience surveys that show local programing channels in some markets have higher ratings than the local public broadcasting station," she says.

Both Ms. Buske and Mr. Dooley warn that it is difficult, if not impossible, to determine ratings of individual cable programs in a multichannel environment.

"You're making a mistake if you judge access by ratings," Mr. Dooley says.

"It's an opportunity for citizens to put on something good. You measure success by quality of the programing."

However, the future of local access is uncertain unless it receives additional commitment from cable companies and the franchising municipal bodies, Ms. Buske says.

Mr. Dooley agrees, but says cable operators have their limits. "We support and believe in access and local origination programing. But there ought to be some sort of pragmatism involved in how much cost is borne by the community," he says. "If a cable company makes its best effort and it doesn't seem to generate interest, I think we can assume they are getting some message from the consumer."

Cable deregulation

(Continued from Page 3)

that a cable network is pulling such and such a share, and Madison Avenue buys in proportion to the subscriber base."

Mr. Rosenberg says there are too many questions about the ramifications of some of the act's provisions to say how it will affect cable advertising.

"Cable TV Advertising," an industry newsletter published by Paul Kagan Associates, predicts substantial ad growth for cable, but not because of deregulation. The newsletter estimates that 1984 cable ad revenues of $462 million will exceed $1.1 billion by 1986, $2 billion by 1989, $3 billion by 1991, and reach almost $4.6 billion by 1993.

Larry Gerbrandt, associate editor of the newsletter, says the cable deregulation act does not appear to change those projections.

Cable advertising, he says, is tied to three factors: Subscriber growth, ratings growth and cost per thousand subscribers. Of those three factors, the legislation potentially will affect only the first.

The NCTA's Mr. Dooley says provisions of the legislation, which limits the franchise demands local governments can put on cable systems, help speed the expansion of cable service to major markets not yet wired, including some parts of New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Baltimore and Washington.

When these systems are complete, Mr. Dooley says advertising will be attracted through greater penetration of networks such as Entertainment & Sports Programming Network, Cable News Network, USA Cable Network and MTV: Music Television.

Wiring these cities for cable will increase the subscriber base, estimated this summer at between 30.7 million and 36.1 million homes.

But all large metropolitan markets may not be wired, according to some in the industry. A spokesman for American Television & Communications

Local ads hit the spot for operators

By Sharon Donavon

Large multiple cable system operators and networks care about selling local spot time, but desire isn't always enough, executives say.

"It reminds me of trying to sell fm radio in the old days when you just couldn't give it away in New York City," says Allan Eisenberg, corporate manager-ad sales at American Television & Communications. Like cable tv today, fm radio then was too new and too small to attract advertisers.

But all that changed very quickly when U.S. auto makers began equipping cars with fm radios. Similarly, he says, "As cable penetration grows and the broadcast networks' audiences continue to erode, advertising on cable will increase dramatically."

Looking for new revenue sources to offset increasing development costs, most major cable operators agree that local advertising is in the embryonic stages of becoming an important focal point of cable marketing.

"Local advertising is an extremely exciting subject for local system operators," says Robert Alter, president of the Cabletelevision Advertising Bureau. "They see it as one of the best immediate sources for revenue income and potential growth. Every major system is now gearing up for local ad activity."

This was not always the case. Years ago, Mr. Alter says, cable companies were banking on pay services to generate revenues. As the emphasis shifted to marketing improved basic programing and as audiences increased, cable created a market for local advertising.

"At Cox Cable, local ad sales have so far proved to be the most effective and efficient way to generate revenue," says Arthur A. Dwyer, senior vp. After launching local ad sales programs three years ago, the sales in 1984 will hit $10 million, representing about 2% of Cox's annual revenue and about 5% of its annual operating income with the remainder generated by subscriber fees.

At Group W Cable, Thomas McKinney, vp-ad sales, foresees local ad sales representing frosting on the cake.

"Currently," he says, "ad sales in 60 of the company's 135 systems are generating about 4% of the company's revenues." He expects that figure to double by next year.

At Tele-Communications Inc., Scott Weeker, director-marketing, says local ad sales have the potential of generating an additional $10 in net profit for each subscriber.

While many cable companies have made major strides to equip systems for local ads, some are just on the brink of moving in that direction.

For example, TCI, which ranks No. 1 with 3.5 million subscribers nationally, according to the CAB, is entrenched in developing routes to capture local ad sales markets.

Mr. Weeker says his cable company, which owns, operates or is affiliated with more than 700 systems nationwide, has only 12 systems with local ad sales. Until this year, gaining ground in this arena was not a priority, he says.

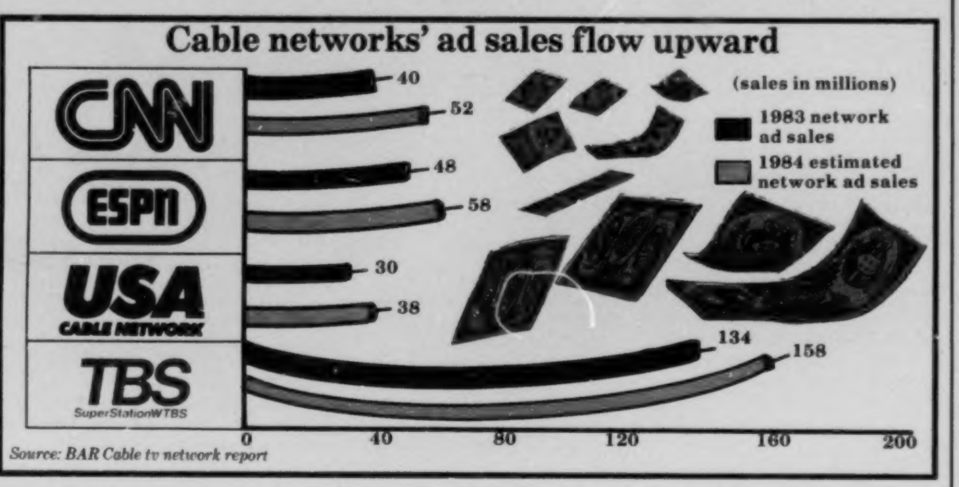
Company officials are studying a number of routes, including a system that would be able to insert an ad into all 700 systems from the company's Denver headquarters. After 1½ years of study, that project is still in the research and development stages, he says.

"The heavy costs of such a program would necessitate a heavy subscriber base to make it pay out," Mr. Weeker says, adding that most of TCI's systems are in small markets—between 5,000 and 8,000 subscribers.

As interest in local advertising increases, Mr. Weeker says his company is considering more immediate ways to tap into the local ad revenue stream. The company's 10 groups operate independently, but they recently were given the green light to consider contracts with outside companies that handle systems' local ad sales.

Also, TCI systems in San Francisco and Philadelphia agreed recently to an arrangement by which interconnects will handle ad sales.

"From these steps, we'll see where it goes. The reality is that the business is out there," Mr. Weeker says, "but we are waiting for the business to develop further before we take further steps with our own national insertion capability."



Cable networks' ad sales flow upward

Source: BAR Cable tv network report

For many cable companies, next year appears to be the pivotal year in which to make strides in local cable sales.

"Early on, there was a lot of money put into ad sales and there was a negative return. Previously, we had to concentrate on keeping the signal on rather than marketing," Mr. Weeker says. "But it's time to get smart about ad sales. Basically we are at the takeoff stage and we expect to make a greater leap toward that revenue stream."

Warner Amex Cable Communications has enjoyed a surge in local ad sales. In 1982, its first year of local ad sales, Warner Amex reported $3 million in ad sales from five systems. That total is expected to reach $8 million in 1984 from 13 systems. The 140-system company is attacking the prospects on three fronts with a number of experimental arrangements, says Larry Zipin, director-ad sales.

Eight of its systems—with subscribers ranging from 500,000 to 800,000—are outfitted with ad sales departments. And in its Tidewater, Va.-system, Warner Amex is involved in an interconnect joint venture that includes Cox Cable Communications and Newport News Cable, targeting a total subscriber base of 100,000.

In 15 other markets, Warner is subcontracting local ad sales to advertising rep companies.

For ATC, local ad sales "represents one of our biggest pushes," Mr. Eisenberg says. While only 20 of ATC's 125 systems are selling local advertising, that represents nearly half of the cable company's 1.3 million subscribers, he says. Within the next two to three years, he says, the company expects to have all its cable systems with commercial insertion capability.

Many cable companies have concentrated their local ad sales efforts in large markets. At Cox, for example, the 20 systems capable of generating video advertising income represent less than half of Cox's 54 systems, but about 70% of the operator's 1.5 subscribers.

While most of ATC's ad sales projects have been targeted at major markets, the company is experimenting with local ad sales in smaller markets.

One of the company's most successful test markets has been Birmingham, Ala., where ad sales have jumped 125% in the two years local ads have been offered.

"That city was not considered the best market. It had a poor economy and high unemployment. We figure that if it worked there, it would work anywhere," Mr. Eisenberg says.

Despite the potential for ad sales in medium markets, few cable operators believe that ad sales will materialize in small markets and, consequently, few operators expect to see all of their systems develop local ad sales capability. By the end of the 1984, CAB officials expect half of the cable subscribers in the nation will be in systems where local advertising is available, up from about 40% in 1983 and about 10% in 1982.

According to Mr. Alter, penetration of local ad capabilities is unlikely to reach 100%. He says outfitting and staffing smaller systems to enable them to offer local ads probably will be too expensive; however, he predicts that within two to three years, 70% to 80% of the cable subscribers will be in systems featuring some ad capability.

Mr. McKinney predicts Group W will peak in the next two years with 75% of its systems having local ad sales potential.

At ATC, Mr. Eisenberg predicts that 1985 will be a breakthrough year for national spot advertising prospects. "Up until now, that market has been very soft. Cable networks charge such low rates and have made advertisers think they don't need to buy spot ads. But as the network rates increase, the national spot market will open up," he says.

Although local ad sales have been a pleasant surprise for some, "national advertising is not growing as fast as we would like it," Mr. Dwyer says.

According to Group W's Mr. McKinney, "National has simply not grabbed hold yet. The major markets are just not wired for it and ad agencies complain that it's a difficult buy until interconnects become commonplace."

Educating the ad community about the benefits of cable marketing has been tough, cable operators say. "Teaching the ad community what a cable ad is all about and finding a niche in the market has been time-consuming," Mr. McKinney says. "It took all of us time to learn how to package it and use it."

It's been a gradual process, Warner Amex's Mr. Zipin says. "In the minds of buyers, there was some question of perception of cable. Until recently, local agencies and advertisers didn't feel the impact of cable strongly enough to consider it," he says. "But for the future, rather than perceive cable advertising as taking away a line from their budgets, they must see it as a right medium with a page all its own." ■

Sharon Donavon is ADVERTISING AGE'*s New Orleans correspondent and a frequent contributor to cable tv publications.*

Corp., the Time Inc. subsidiary and the nation's second largest multiple system operator, argues that restrictive franchising requirements—limited under the act—are only one factor in a company's decision to seek a franchise in a major market.

The legislation authorizes franchising authorities to charge up to a 5% annual franchise fee from the cable operator, based on gross revenues. For some cable companies, this means increased fees. The Federal Communications Commission now sets a maximum of 3%, but allows up to 5% if the franchising body shows good cause for a higher rate.

For others, the new rule means an end to franchising surcharges, which some municipalities have imposed in addition to franchise fees.

Based on this rule, "I don't see any great rush into the major markets. Five per cent of gross is 40% of the net of a healthy cable system," the spokesman says.

However, the ATC spokesman says the cable deregulation legislation will help advertising in at least one important way.

Cable advertising, he says, is most profitable when commonly owned cable systems are clustered in contiguous markets, allowing advertisers to reach subscribers most economically.

The law's refranchising provisions will reduce that problem, he says. "The clustering concept makes cable a more viable advertising medium for a market."

Even if cable companies do penetrate the remaining large urban markets, Paul Schonewolf, vp-marketing for General Electric Cable, Schenectady, N.Y., says cable service to big new markets will not necessarily increase advertising.

"What cable offers is not numbers. Commercial television is always going to have the numbers. Cable offers the demographics—MTV to reach the teen for example."

But Mr. Schonewolf does say that with the deregulation of basic cable rates, many cable systems that now charge for the four major ad-supported services (ESPN, CNN, USA Cable and MTV) will include them in basic service.

This will increase the numbers of subscribers, which will attract more ads, he says. ■

Nets out to bring barter back in line

Growing $500 M market threatens sales

By VERNE GAY

NEW YORK—Network tv, which has long dismissed barter syndication as a nuisance for spot tv, is conceding for the first time that the growing $500 million barter market poses a most pressing threat to national tv sales.

ABC-TV's marketing development department has produced an extensive three-part primer on barter and how advertisers are using the medium. The primer, which ABC says is intended to educate top network sales personnel on barter and how to blunt its acceptance with advertisers, includes a long diatribe on the drawbacks to syndication, according to sources who have seen the report. The primer has been making the rounds at ABC for six weeks.

ABC is following CBS-TV's lead, which in October made a barter presentation to several agencies. Those presentations resulted from a CBS Sales internal study of advertiser-supported barter last February in what it described as a fact-finding mission. Sources said the CBS presentation was not well received by agency executives.

It's not known whether ABC plans to make its antibarter primer public. However, sources speculated that if the manual receives a favorable response from key members of the advertising community, ABC may build a new marketing program around it.

"The internal presentation was created to build on an account exec's knowledge of syndication, and we may be doing an adaption of it," said Chuck Gabelmann, vp-sales development and affiliate projects, ABC. "Barter is certainly growing. I don't want to say that it's full-fledged competition, but it's certainly something we have to keep an eye on."

Mr. Gabelmann did not reveal the conclusions of the ABC presentation. Based on the CBS presentations, however, the network probably criticized syndication for its lengthy delays in audience measurement and the great variance of syndi-

LA
Sometimes it's the perfect thing to say.

Never too old

"My idea of a good time is not sleeping with the coats," says well known party animal George Burns in an upcoming campaign explaining why he drinks Anheuser-Busch's LA low-alcohol beer. But when a fur-coated temptress arrives he says, "Maybe I'll change my mind." *(See story on Page 10.)*

Manufacturer/retailer power balance is the target

O&M now a 1-stop shop

By STEWART ALTER

Ogilvy & Mather International disclosed last week it has been working for two years on a comprehensive strategy to restore leverage lost by manufacturers to retailers.

A key element in O&M's strategy, outlined at meetings with institutional investors, is the coordinated use of advertising, public relations, direct marketing and other services that Ogilvy has been marshalling under its banner.

O&M was one of three publicly held agencies that discussed growth strategies before gatherings of blue-chip investors organized by Wertheim & Co., a New York securities company.

Wertheim sponsored two days of presentations—one day in Boston and the other in Chicago—in which the managements of O&M International, Saatchi & Saatchi and BBDO International each made an "invest-in-us" pitch.

Those presentations offered some marked contrasts between the organizations and strategies of these three major multinational agencies.

Saatchi's intention to expand the scope of its services already has become evident through its recent whirlwind acquisitions of the Hay Group management consulting company and the Yankelovich, Skelly and White research company.

But O&M, with less fanfare, apparently also has been hatching a major, if dissimilar scheme, to expand its mandate as a communications company. Unlike Saatchi (but like BBDO), it plans only to stay in advertising and related fields.

O&M maintained in its presentation

Carbide deals with disaster

By GAY JERVEY

Top Union Carbide Corp. officials were meeting at their Danbury, Conn., headquarters Dec. 7 with Marsteller Inc.'s Burson-Marsteller crisis communications unit—the public relations group that two years ago helped Johnson & Johnson deal with its Tylenol poisonings crisis.

The scope of Union Carbide's problem became more pronounced with each passing hour last week, as a poison gas leak at its plant in Bhopal, India, killed nearly 2,000 people and injured tens of thousands of others.

The Bhopal disaster, called the worst industrial accident in history, led India's government to arrest Carbide chairman Warren Anderson on "negligence and corporate liability" charges when he arrived at the stricken city. He was later released.

The chaos at company headquarters was exacerbated by several bomb threats during the week. UC was unable to implement an immediate plan of action.

According to Tom Mosser, president of Burson-Marsteller's New York office, the agency's crisis management group—which recently worked with Great Adventure following a tragic fire at its Jackson, N.J., amusement park—is studying the problem from all possible angles.

"They're doing all the right things—looking into the possibility of research to determine public opinion, to find out what people are saying and thinking," Mr.

Bucks balloon in big burger battle

By SCOTT HUME

The so-called "Battle of the burgers" has become the "Battle of the network stars."

Network tv ad spending by the Big 3 burger chains—McDonald's, Burger King and Wendy's—totaled $189.4 million during the first nine months of this year, a whopping 94% increase over the $97.5 million spent by the hamburger giants during 1983's first three quarters, according to figures from the Television Bureau of Advertising and Broadcast Advertisers Reports.

The largest dollar increase came from McDonald's, which nearly doubled network spending and is well on its way to becoming one of the largest network advertisers. Big Mac's bill was $60.8 million above what it spent during the first nine months of 1983 for a total through September of $122.3 million.

When McDonald's last year urged its franchisees to raise from 25% of sales to 2% their contribution to the Operators National Advertising Fund (used to buy network time), one fast-food chain executive charged Big Mac with attempting to "drown out" all competing advertising (AA, Oct. 3, '83).

That may have been McDonald's goal, but Wendy's and Burger King franchisees also have upped their network contributions to keep their shares of network time.

Wendy's more than doubled its network spending from $11.1 million to $24.4 million. Burger King's network expenditures were $42.7 million, up 71%.

The adjusted franchisee contributions account in large part for the double and triple-digit increases registered this year in network spending.

But this battle of network budgets isn't over yet.

"You'll see our network spending rising at a faster rate than it has in the past," said Wendy's exec vp William Welter. "In addition to the increased contributions, there's the double effect of our faster rate

(Continued on Page 82)

Fast-food chains' tv spending

Burger King and Wendy's continue to increase over-all tv spending by larger percentages than McDonald's, but they still can't match Big Mac's budget. At its current rate of increase, McDonald's may spend $250 million on tv advertising this year, two-thirds of it on the networks. Wendy's has increased network buyr 120%. ***Source: Television Bureau of Advertising from Broadcast Advertisers Reports data.***

IBM's portable out to lap field in pc market

By BRIAN MORAN

IBM Corp. is preparing to invade another segment of the fiercely competitive personal computer market with a powerful 10-lb. portable, 20 lbs. lighter than its smallest current model.

The new briefcase-size Personal Computer, which industry sources said could be unveiled as early as this week, seems certain to spark a bruising new battle for Big Blue rivals Data General Corp., Hewlett-Packard, Texas Instruments and dozens of other brands.

A string of other companies is lined up to climb into the ring next year.

Though IBM's Entry Systems division, Boca Raton, Fla., would not confirm the existence of the lap model, sources said several prototypes have been developed.

Next to the IBM name, the new machine is expected to boast a significantly easier to read screen.

The lap machine will herald an anticipated flurry of personal computer product upgrades from Big Blue. Analysts expect IBM to unleash faster versions of the PC and PCjr machines by February.

More than 100 portable models are competing for shelf space in what's become one of the fastest growing personal computer segments, and the field is expected to swell even more with the anticipated arrival next year of machines from Japanese companies.

The IBM machine will be pitted directly against similar 10-lb.

Sunlite brand gets a new ray of hope

By RUTH STROUD

FULLERTON, CAL.—Beatrice/Hunt-Wesson Foods has renamed and repositioned its ailing Sunlite sunflower oil in an effort to make it shine again as part of a family of Wesson oils.

At the same time, the company is expanding the Wesson oil line with a new corn oil, taking on the category king, Englewood Cliffs, N.J.-based CPC International's Mazola corn oil. Until now, the Wesson line consisted only of vegetable oils.

In changing the name to Sunlite Wesson 100% sunflower seed oil, the company is attempting to cash in on the well known Wesson brand name.

"If that doesn't work, I don't see much hope for it," noted one observer. (The name Sunlite has been reduced in size on the label and gradually will be eliminated.)

National tv and print ads reassure consumers that despite the new name and plastic bottle, this is the same 100% sunflower oil they're accustomed to. Dailey & Associates, Los Angeles, is the agency. Ketchum Advertising, San Francisco, handles Wesson vegetable oil, plus the new Wesson corn oil.

Once the rising star in Hunt-Wesson's oil business, Sunlite's market share has dropped dramatically from a peak of 5.1% (pound share) in 1980 to 2.3% in recent months.

By all accounts, its decline has been expensive for the company. One competitor estimated Hunt-Wesson has poured $40 million into tv advertising on the brand since its inception, not to mention ex-

(Continued on Page 82)

Castor big winner for Hispanic efforts

New York—Castor Spanish International emerged as the big winner in the recent El Cervantes Media Awards presentation.

This is the third year that the nonprofit Hispanics in Communications has made the presentations, which recognize advertising efforts aimed at Hispanic consumers.

In the outdoor-transit category, the El Cervantes client-agency winners were Heublein-CSI for regional and OTI Song Festival-Spanish International Network for national.

The winning combination in the newspaper category was Lite beer from Miller and its agency, Mendoza, Dillon & Asociados, Newport Beach, Cal.

In magazines, Belleza Internacional-Les Pinto & Co. was the national winner and Heublein-CSI was the local winner.

In radio, Dr Pepper Co.-Zubi Advertising Services, Miami, won for the local 60-second spot category, and Stroh Brewery's Schaeffer beer and agency, Badillo-Compton, Caparra Heights, P.R., won for best regional 60-second spot.

In other radio categories, Fabulous Diamonds-ZAS won for the best local campaign. The best regional campaign belonged to Zayre Corp.-Ingalls Associates, Boston. The best national campaigns were Anheuser-Busch's Budweiser and CSI and Coca-Cola Co.-CSI.

In public service radio, the winners were Museo Cubano de Arte y Cultura-ZAS, and United Way of Dade County-ZAS.

Cervantes tv winners were Stroh's Schaeffer-Badillo-Compton for regional campaign, and A-B's Budweiser-CSI and Ford Motor Co.-J. Walter Thompson-Hispania for national campaigns.

Budweiser and CSI also were the client-agency winners in the best multimedia national campaign.#

Retail continues surge in papers

New York—Retail ad spending in daily newspapers continues surging, with department stores leading the way, according to the September Flash Report of Newspaper Advertising Investments.

The report, prepared for Advertising Age by Media Records, tracks newspaper retail advertising in 15 markets.

The department store category, the largest user of the newspaper medium, showed a 26.4% increase in September, 1984, over the same month in '83, with total expenditures for the category exceeding $88 million.

Among other categories posting gains were food stores, up 1.7% to $23.5 million; radios, tvs, phonographs and records, up 16.1% to $14.3 million; publishing and media, up 21.5% to $13.5 million; new passenger cars, up 35.3% to $10.9 million; cigarets, up 42.6% to $5.6 million, and cosmetics, makeup and manicure products, up 16.9% to $395,110.

Ad spending for headache remedies and sedatives sprouted from nearly nothing in September, 1983, to $161,801 in September, 1984.

Among categories posting losses were alcoholic beverages, down 17.7% to $2.2 million; airlines, down 1.3% to $9.8 million; sporting and leisure-time equipment, down 65.1% to $353,354; cameras, photo supplies and services, down 29% to $341,699; beverages-soft drinks, down 41.8% to $203,505; soaps, cleansers and polishes, down 5.8% to $199,811, and beverages-coffee and tea, down 14.8% to $84,723.#

Tv, admen stay with boxing

By ROBERT RAISSMAN

New York—The tv networks and agencies involved in boxing telecasts took the American Medical Assn.'s roundhouse punch at the sport last week and shrugged it off.

The AMA called for the abolition of both amateur and professional boxing, citing its adverse effects on the health of participants. Ironically, if the AMA's action leads to legislation, the networks might be the only organized force to lobby in boxing's favor.

"So long as boxing is a lawful, licensed, sanctioned sport [and] so long as a substantial number of our viewers want to watch boxing and demonstrate that interest through the ratings, we will broadcast the sport," said Neal Pilson, exec vp, CBS/Broadcast Group.

Conceding that the AMA has the right to urge states to ban the sport, Mr. Pilson said, "I don't think it's up to the networks to set the law and the tastes for the American sports viewer."

NBC boxing consultant Dr. Ferdie Pacheco said the AMA resolution could affect boxing, "but just how much, I don't really know."

An ABC spokesman said the network will continue to air the sport and "report" what's going on during the event rather than get involved in making any moral judgment concerning boxing or any other sport it covers.

Agency sources maintained that advertisers would continue to put their dollars into boxing. "We are looking at the audience it [boxing] generates," an agency exec said. "But we're looking at the audience any event generates, regardless of what sport."

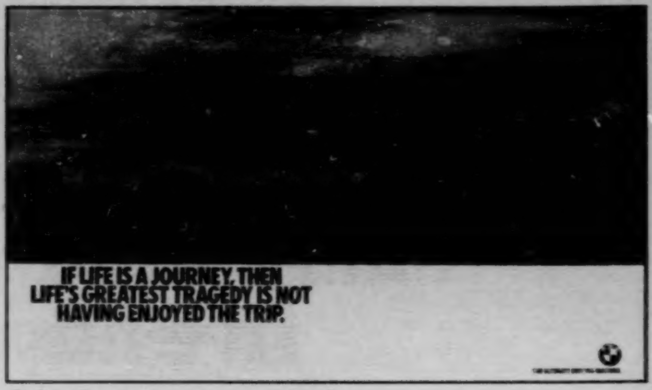
In most cases, advertisers purchase boxing inside a sports anthology program. They don't know specifically when boxing will be on the schedule but are aware that anthologies with boxing as the main event get higher ratings than anthologies without boxing.

If boxing were to be pulled from an anthology, ratings likely would slip, especially in the key male 18-to-45-year-old group.

"If the AMA is against boxing and the public agrees, that's one thing," said Steve Leff, exec vp, Backer & Spielvogel, "but if the public doesn't agree and the sport continues, that's something else."

The boxing industry has never looked to a situation in which members might have to lobby to keep the sport alive.

"Boxing is the safest target in the sports establishment to attack because it has positioned itself that way," a network source said.#



It's how you get there

Print ads now breaking and tv starting in mid-December for BMW retain the auto maker's "The ultimate driving machine" theme line via Ammirati & Puris, New York. The heaviest push starts in January, to avoid pre-Christmas advertising clutter. BMW is offering a larger six-cylinder engine in larger models, such as the 635CSi shown here.

1-stop

(Continued from Page 1)

that its strength lay in its being "one agency indivisible" that offered a "complete range of communications services, integrated and controlled from a central point," said Graham Phillips, chief financial officer at O&M International and managing director of the agency's New York office.

Mr. Phillips asked, "What is the ultimate benefit of this?" He then disclosed that "all clients have a great deal of trouble dealing with the trade. By putting all these services together, we can give them stronger consumer pull so that they will become less dependent on the trade down the road."

In an interview afterward, Mr. Phillips described this as the "much greater hidden agenda" behind O&M's development of its system of integrated, coordinated communications services. He explained that "one of the greatest concerns clients have today is the amount of money they have to spend to maintain distribution."

As factors contributing to that growing retail trade strength, Mr. Phillips listed such factors as the growth of store brands, including premium ones; scanning, which is making retailers more knowledgeable about brands than manufacturers, and the increased growth and concentration of some chains.

Mr. Phillips, however, would provide no details about how O&M plans to translate this into action.

Martin Sorrell, Saatchi's group financial director, provided some additional insight into that company's growth strategies. "We see an opportunity to expand from a strong base in marketing services to broaden the scope of the advisory services that we offer clients."

Saatchi is much less interested in centralization, coordination and integration of its services and intends to proceed cautiously in bringing them together. Asked about plans to turn management consulting or research clients into advertising ones, or vice versa, Mr. Sorrell said, "We're into new territory. We're going to take a slow and steady approach."

The Saatchi executive also gave an outline of the company's acquisition goals. He showed a chart that presented Saatchi's ranking in the U.S., U.K. and worldwide in a number of service areas, including advertising, direct marketing, management consulting, market research, pr and sales promotion.

Using this as a guide, the holes in Saatchi's network are pr, where it has no major presence on either side of the Atlantic; direct marketing, where it is No. 10 in the U.S. but not a factor at all in the U.K.; sales promotion, particularly in the U.S.; market research, especially in the U.K., and advertising in the U.S., where it will try to improve its No. 10 ranking.

The chief goal for BBDO, a relative latecomer to the international scene, is overseas growth, including specialized agencies, said Steve Kahler, BBDO exec vp and president of its Doremus & Co. subsidiary. "We are now beginning to attract the multinational clients," Mr. Kahler said, referring to recent European assignments from Apple Computer, Gillette Co., Kuwait Petroleum and Wm. Wrigley Jr. Co.

There also are three major markets where its general agencies are not in the top 10—the U.K., France, and Brazil—and where it may concentrate its efforts.#

Burgers

(Continued from Page 2)

of new-store openings and rising average unit sales."

Those same factors will keep other chains' network spending spiraling up next year.

Trying to make the "burger battle" a four-way race is Rocky Mount, N.C.-based Hardee's, which this year made its first network buys (AA, March 19). TvB put its network spending at $4.7 million for the first nine months.

But Hardee's is heavily advertising a pre-Christmas Disney toy promotion, and exec vp-marketing Ron Wertheim said its network spending for the year will be closer to $10 million. The chain is committed to a network schedule at least through September.

Despite the challenges, McDonald's has managed to widen the gap between it and its major competitors. The nine-month McDonald's network spending is 182% of BK's and Wendy's combined spending. For the first three quarters of 1983 it was 170%.

If McDonald's network expenditures continue at this pace through yearend, its total 1984 network bill should top $160 million, putting it comfortably among the top 10 spenders in the category. Last year, the chain spent $80 million on the networks, placing it 22nd.

McDonald's total tv spending, combining network and local buys, could be nearly $250 million. That would be more than was spent on tv in 1983 by any company except Procter & Gamble, the perennial multibrand advertising champion.

From April to September, McDonald's spent $97 million on network buys, $16 million more than in all of 1983.

Sources estimate that McDonald's may have spent as much as $60 million in the third quarter alone, a period that included heavy spending during and before the Olympics, as well as the launch of the "It's a good time for the great taste ot McDonald's" campaign.

Leo Burnett USA, Chicago, has McDonald's national account. J. Walter Thompson USA, New York, is BK's agency; Dancer Fitzgerald Sample, New York, handles Wendy's, and Benton & Bowles, New York, has Hardee's.

Burnett's network-billings windfall has come partly at the expense of agencies handling local co-op assignments. McDonald's local tv spending during the first nine months totaled $65.9 million, nearly 13% below the $75.5 million spent during the comparable period in 1983.

Burger King and Wendy's have continued to increase local tv ad spending while beefing up their network buys. For the first time, their combined local tv spending of $87.3 million exceeds McDonald's $65.9 million expenditure.

Network spending by the top 15 restaurant chains was $267.8 million through September, a 70% increase over the same period last year. Local tv spending rose 16%, to $304 million.#

Tv travel ads sail up

New York—Spending for travel promotion ads on network and spot tv rose 35% for the first nine months of 1984, the Television Bureau of Advertising reports.

U.S. and foreign travel promoters spent $241.4 million on U.S. tv advertising from January through September, TvB says.

Passenger travel ad spending hit $155.9 million in the nine-month period, 34.2% above the total for the same point in '83.

United Airlines' tv ad spending soared 78.8% to $35.7 million. American Airlines' spending was up 43.2% to $29.9 million.

Australia leaped to the top of the tv ad category for country-state-local tourism, with $3.5 million spent versus none in '83.

Canada also showed a fat increase in spending. It placed third in '84, with spending of $3.1 million in the first nine months, versus only $12,000 spent a year earlier on U.S. tv ads.

The hotel-resort-tourist promotion category was up 35.8% from the first nine months of '83, with tv ad spending rising to $80 million. Ramada Inns was the largest spender at $4.8 million, up 20%. The travel-tour category increased its tv ad spending by 66% to $5.5 million. American Express Travel Stores spent $1.8 million in tv advertising, almost 18 times the total for a year earlier.#

Taxes

(Continued from Page 3)

20% of all ad expenditures to the normal 43.3% corporate tax rate. Ad spending is deductible now.

Such a tax would bring in more than $520 million a year to offset a swelling budget deficit.

A government decision on the ad tax is expected Dec. 20. "There are some who are pessimistic about defeating the ad tax this year, although I am personally optimistic we can kill it," said Satoshi Watanabe, executive director of the Japan Advertising Federation.

In Australia, admen are gearing up to challenge a possible tax following the reelection this month of Prime Minister Bob Hawke.

"We should be aware of the danger and start preparing our case against it," said Fred Benchley, general manager of John Fairfax & Sons, one of Australia's most powerful media groups.

In the U.K. the Treasury Department last month leaked reports it may impose a value-added tax on newspapers and magazines—possibly as much as 15%.

"If the government increases taxes on publications, many publications will close and advertising will fall," said Mike Waterson, director of research for the British Advertising Assn.

The Indian government in 1983 eliminated some tax deductions for ad spending—in effect, imposing a tax on the industry.

The trend is hitting smaller markets, too. Advertisers and agencies are lobbying against an advertising tax in Finland. The Korean advertising industry successfully lobbied against a tax on foreign marketers' advertising last July and convinced the government to rescind an existing tax.

But perhaps the greatest fears are in Ireland, where the Assn. of Advertisers last month ran a three-page insert in Irish newspapers opposing a proposed 2% tax on some promotional expenses of tobacco marketers.#

Chain offers burger truce

San Diego—Jack in the Box fast-food chain is spoofing the so-called "burger wars" of its competitors in a new commercial introducing its latest product, the Ham & Swiss Burger Classic.

In a 30-second spot that broke last week, the restaurant chain says "When you get tired of the burger wars," Jack in the Box is the place to go.

The commercial opens on a battlefield. A young man who looks as if he could appear in a McDonald's commercial pops up and says "two all-beef patties." He is followed by a young woman (wearing a hat that resembles those of Burger King employes) who remarks about flame broiling, then throws a grenade. In the third scene, an old lady in a trench (with a slight resemblance to Wendy's spokeswoman Clara Peller) asks, "Where's the. . ." but her question is interrupted by an explosion.

The new tv ad is the first of several introducing new products. Wells, Rich, Greene/West, Los Angeles, is Jack in the Box's agency.

Jack in the Box, a division of Ralston Purina Co. with some 800 units, is continuing to test a new name, Monterey Jack's, at outlets in Seattle, Albuquerque and Beaumont, Tex. (AA, Nov. 12).#

Sunlite

(Continued from Page 2)

pensive couponing efforts.

Procter & Gamble's Puritan brand, a blend of sunflower and soy oils, cost a great deal in advertising with little return for several years, but has stablized at between 3% and 4% share, sources said.

For the new corn oil, literature sent to brokers indicates that the Beatrice Cos. subsidiary is positioning the product squarely at Mazola users. The company tells brokers it is prepared to promote the product heavily—dispensing 20 million coupons to stimulate consumer trial between January and November. Product is becoming available in the Northeast, but Ketchum sources say the agency is working on a budget and tv spots.#

Nynex leading 'Magnificent 7' into computers

By BRIAN MORAN

Nynex Corp.'s opening of its first two computer stores last week is bound to unleash a stampede to computer retailing by the seven "Baby Bell" regional telephone companies.

The Nynex computer store chain, operating under the Datago name, starts with units in Albany, N.Y., and Springfield. Mass. The Datago debut had been blocked by the Justice Department since March.

Justice's approval of Nynex's application is expected to help clear the way for all the Bell spinoffs to grab a share of the blossoming computer retail market. Pacific Telesis, San Francisco, has set its sights on opening a national chain of computer outlets next year (AA, Nov. 15), and Bell Atlantic, Philadelphia, has similar plans. Other Bell operating companies say they are studying the matter.

Although their impact on the computer retail business will be negligible at first, the regionals pack plenty of potential clout through their Ma Bell heritage, high-tech know-how and financial strength, analysts say. ComputerLand, Hayward, Cal., and Tandy Corp., Fort Worth, Tex., dominate the $4.7 billion computer store

DMA to let consumers hang up on pitches

By PAUL L. EDWARDS

NEW YORK—If you're tired of unsolicited telephone sales calls, help is on the way.

The Direct Marketing Assn.'s board of directors next month will consider implementing a Telephone Preference Service (TPS) that would give consumers a way to cut down on the number of those phone calls they receive.

The service would be analogous to DMA's Mail Preference Service, established in 1971, which enables consumers to eliminate receipt of most direct mail. To date, more than 944,000 people have requested inclusion in the mail service. Specific details of the proposal, including funding, remain to be worked out, but a DMA spokeswoman said none of this "should be too difficult to arrange."

Assuming the board ratifies the proposal when it meets here Jan. 9 and 10, she said it is likely TPS will be operating within the first half of 1985.

Telemarketers appear to be solidly behind the proposal. "I think it's wonderful," said Eva Roman, chairman of Campaign Communications Institute, a New York-based telemarketing service bureau. "This will give consumers the privacy that they want. They should be protected."

Peg Kuman, chairman of DMA's telephone marketing council and director of Publisher's Clearing House Telephone Marketing Services, Port Washington, N.Y., said TPS will make telemarketing more efficient. "People doing telemarketing only want to reach people who are interested," she said. "We don't want to spend money calling people who don't want to be called."

The proposal to be considered results from nearly two years of test-marketing by DMA to determine whether there was sufficient consumer interest in such a program.

The test began in Rochester, N.Y., with an envelope stuffer included in local telephone bills. Consumers who wanted to be deleted from telephone lists were asked to send back

Out of the mouths of babes

Antismoking ads ill-conceived?

By WILLIAM F. GLOEDE

NEW YORK—As antismoking tv spots go, this one is a gut-wrencher

A fetus exhales cigaret smoke. A voiceover warns: "Would you give a cigaret to your unborn child? You do every time you smoke when you're pregnant. Pregnant mothers: Please don't smoke."

The "fetus," depicted as actually smoking a cigaret, is a sculpted model imbued with life by computerized camera work.

The American Cancer Society public service announcement is the product of a youthful and relatively inexperienced special-effects film team, two of whom work for George Lucas' Industrial Light & Magic unit of Lucasfilm.

The ACS spot has been accepted by ABC and Turner Broadcasting System. ACS is still negotiating with CBS and NBC. Also, copies of the psa have been dispatched to all regional ACS offices for distribution to local tv stations.

Antismoking spot talks tough.

"This is one of the most impressive, effective spots ever done in the antismoking campaign," said Irv Rimer, vp-public relations at the cancer group's headquarters here.

Mr. Rimer said he has no idea when the spot may begin running, but he speculated that the networks could start airing it in Jan-

Commodore commands search for 2nd agency

WEST CHESTER, PA.—Commodore International is searching for an additional ad agency. The shop would handle a possible major expansion into new microcomputer product lines late next year. Anametrics, New York, is Commodore's agency of record and is expected to retain responsibility for the current product line.

Ted Bates bags $22 million Olivetti pc acount

MILAN—Ted Bates Worldwide will announce this week it has won the $22 million Olivetti personal computer account for all of Europe. D'Arcy MacManus Masius and Ogilvy & Mather also pitched for the account, previously in-house (AA, Dec. 3).

'Differences' end Romano's 21 years at Bates

NEW YORK—Ronald Romano, an exec vp-executive creative director and onetime co-creative director at Ted Bates Advertising/New York, is leaving the agency after a 21-year career there. Michael Becker, vice chairman-chief creative officer, cited "philosophical differences" in confirming the departure. Mr. Becker has been restructuring the Bates creative department.

Leber Katz prize-winner Linder gets ax

NEW YORK—Lou Linder, creative director and copywriter for one of this year's biggest award-winning ad campaigns, has been let go from his vp-associate creative director job at Leber Katz Partners. "There's some irony in losing my job in the same year I've won all these creative awards," Mr. Linder said. His U.S. Department of Transportation anti-drunken driving campaign won several awards, including a Clio for best campaign.

Retailers trimmin' more than trees

By PAT SLOAN

With Christmas sales in many major cities still more ho-hum than ho-ho-ho, some stores are slapping together unusual and unanticipated promotions to ensure that Christmas does indeed come by Dec. 25.

In Seattle, Frederick & Nelson turned a previously planned 16-hour Saturday sale into a three-day event.

Fearing a sales sack from armchair quarterbacks, Frederick & Nelson sent out a promotional blitz announcing that areas in its stores had been set aside for football tv viewing, replete with free beer, popcorn and peanuts.

The success of the Seattle Seahawks this season has intensified local interest in the National Football League. A month ago, a football telecast seriously affected Frederick & Nelson sales for the day. "It's tough," said a Frederick & Nelson spokesman. "People wouldn't be doing all this promoting if it weren't."

Retailers generally resist the kind of unplanned pre-Christmas sales and promotion that Frederick & Nelson is holding. Markdowns and expenses related to these efforts come directly off the bottom line, and Christmas volume traditionally accounts for 50% of a retailer's annual profit.

But as shoppers seem to have developed a

Net blockade may preempt affiliate flight

By VERNE GAY

New York—December, the first post-sweeps month, also is prime time for preemptions by network affiliates—and the problem this year is worse than normal in some dayparts, according to at least one top-level network executive.

"If you're trying to introduce new programs, it [preemption] can be devastating, and that's exactly what's been happening," said Ray Timothy, group exec vp at NBC. "We have suffered an inordinate amount of preemption. There's no question about it, and it's happening across the board. We're talking about it in January at the regional affiliate meetings."

NBC and CBS will unveil elaborate presentations at regional affiliate conferences in January and February. While each will add new twists to some of the themes used in presentations earlier this year, the plea will remain essentially the same: Every time the network is preempted the affiliate is hurt and, ultimately, so is the bread-and-butter national advertiser.

It is unclear whether preemptions of network programs are increasing. Each network claims that more than 90% of all programing is cleared during all dayparts and that certain dayparts actually have improved clearance levels. NBC, for example, has built its daytime clearance levels compared with last year.

However, a new urgency has been attached to the problem. An axiom is taking shape that says, as the barter syndication market grows, so will preemptions of network programing. "Certainly the availability of such product is one of the things which causes preemptions to happen," said Mr. Timothy.

No one disputes the growth of

(Continued on Page 52)

John Boy wedges into Bing's shoes

By TOM BAYER

Houston—If the Minute Maid name connotes speedy action, it doesn't apply to its orange juice endorsement advertising program.

The Coca-Cola Foods unit announced last week that it had signed actor-director Richard Thomas and his family to replace the Bing Crosby family—seven years after the death of "Der Bingle."

The o.j. marketer's rivals used those years to move into a market once virtually owned by Minute Maid.

Eugene V. Amoroso, Coca-Cola Foods president, would not say Minute Maid's return to wholesome spokesmanship was precipitated by the stiffening competition, but he conceded "it cannot be ignored." Michael F. Lesser, chairman of Marschalk Co., New York, Minute Maid's agency, said the new open-ended alliance with the Thomas family is definitely recognition of that competition.

The Thomases' role, which begins next month, ends the seven-year period during which Coca-Cola Foods coasted on its Bing Crosby legacy for the Minute Maid brand.

In that time, Minute Maid had become a sitting duck for swiftly moving competitors. The brand received ad support, but Coca-Cola Foods hadn't settled on a successor to the Crosby family or even whether to have a successor family until now.

The company asserts that Min-

CORPORATE CLOSEUP

Fotomat: Someday, its prints will come

By LISA L. TREISTER

FOTOMAT
FOTOMAT
Preferred Customer Card
Fotomat

A new holiday tv spot, breaking this week, focuses on the struggling Fotomat's Preferred Customer Card, which gives customers a choice of a free roll of film or free second prints. Henderson Advertising, Greenville, S.C., is the agency.

St. Petersburg, Fla.—In three days, Fotomat Corp. will begin airing its annual Christmas and New Year's promotion and pray that holiday sales will bring plenty of much-needed good cheer in 1985.

The struggling photo-finisher, two-thirds its former size and barely hanging on, nevertheless is a company whose name still is etched on the American psyche. Consumer surveys bear out that name recognition; so does Johnny Carson. He kicks around the Fotomat name often.

Example: One night in October, Johnny and sidekick Ed McMahon offered remedies for boredom.

One particularly raunchy suggestion caused Johnny to pause. Ed looked at the cue card Johnny had handed him and gave his boss the go-ahead.

Johnny: Do you like to take off your clothes?

(Hoots and whistles from the audience.)

Johnny: Well, take off your clothes and walk up to your nearest Fotomat window. Press yourself against the glass and shout, "Enlarge this!"

(Audience roars.)

Fotomat thinks it's funny, too. The joke keeps the company's name before the public, at no cost. And with sales at an all-time low and more losing quarters in the past two years than profitable ones, Fotomat can use all the free advertising it can get.

More significantly, there is pressure throughout the photo-finishing industry. Camera sales have slowed from their 1978 peak of 20.4 million units to 16.9 million units in 1983, with annual increases expected to be from 5% to 7%.

Videocamera sales are picking up, and newer technologies are being refined. Price competition isn't expected to ease, and minilabs are still on the rise.

It wasn't always this difficult. At its peak, Fotomat's 3,850 kiosks and stores covered 63% of all U.S. households, and its stock traded at $21 per share. Today, one share goes for $1.50 or so.

But poor business decisions, overexpansion and the advent of new technologies, particularly minilabs that provide one-hour turnaround on prints, sent company profits tumbling. As early as 1978, operating income dropped to $15.9 million from $20 million the year before.

By 1982, the company was in the red, with a $10.9 million loss, followed the next year by a $38.3 million loss on revenues of $236.5 million.

For fiscal 1985, which ends Jan. 31, the company has rebounded, reporting gains of $1.5 million and $252,000 in the second and third quarters, respectively. These results follow an $8.9 million loss in the first quarter.

Though chairman Ross Roeder would be the first to admit that the battle for profitability is not over, he is relieved there are other signs of progress.

Last month, Tokyo-based Konishiroku Photo Industry Co. Ltd., the maker of Konica cameras and other photo products, signed a letter of intent to invest $10 million in cash in Fotomat and increased its stake in the company from 20% to 60%. The final agreement is expected to be signed in February.

"We're not out of the woods yet, but this was the major piece," Mr. Roeder said.

The Fotomat chairman prefers to call Konishiroku's bailout a "friendly investment" rather than a takeover, and he confirmed that the Japanese company will be sending two or three people to St. Petersburg.

Company observers said the Japanese photographic supplier had to provide the necessary cash because it had too much to lose had Fotomat gone under.

"This might give them [Fotomat] what they need. I find it encouraging for Fotomat," said Edith Gordon, who writes about the industry for *Photo Weekly*.

Added industry analyst Eugene Glazer of Dean Witter Reynolds, "It is a friendly takeover as opposed to an unfriendly takeover. By and large, it's a positive for Fotomat."

The depth of the 17-year-old Fotomat's difficulties goes even beyond what Mr. Roeder anticipated when he assumed leadership of the company in January, 1982. Mr. Roeder, 46, is former president-chief operating officer of Winchell's Donut Houses and a former exec vp of Winchell's parent, Denny's Inc., La Mirada, Cal. He also was a member of Fotomat's board.

One of the first things Mr. Roeder did was consolidate Fotomat's headquarters, at that time split between La Jolla, Cal., and Wilton, Conn.

St. Petersburg, ironically where Fotomat traces its beginnings, wooed the failing business back with a good deal on an old Sears store. The move was expensive—an estimated $7 million—but the company proved able to slash its corporate staff from 500 to

Net tv ad slowdown seen

By STEWART ALTER

With 1985 a post-Olympics year, Robert Coen is predicting network tv ad sales to be up only 5.5%. But stronger-than-expected network tv sales took the industry forecaster by surprise in 1984.

A year ago, the McCann-Erickson senior vp-director of forecasting predicted that national ad spending on network tv would rise 12% to 13%. But the resistance to rising time prices he expected never fully materialized. "The networks were able to sell at premium prices and sales only slowed down at the end of the year," said Mr. Coen, noting that actual 1984 network tv ad sales were 20% higher than in 1983.

Mr. Coen, who made his predictions at Paine Webber's Conference on the Outlook for the Media in New York last week, projected that total U.S. advertising will slightly outpace the growth of the economy and be up 9.7% to $95.9 billion next year.

National broadcast should be up 6% (with spot tv and radio up 7% and network tv 5.5%) to $17 billion; cable and syndication tv should be ahead 20% to $960 million; national print ahead 9% to $8.6 billion, and local advertising up 10.3% to $38.5 billion.

He also predicted that next year for the first time since 1980 overseas ad increases in dollars should be higher than U.S. ad growth. He predicted a 10% increase to $70.4 billion in overseas ad expenditures. With the $95.9 billion projected for the U.S., that should bring worldwide ad expenditures to $166.3 billion in 1985, a gain of 9.8%.

In 1984, worldwide ad expenditures came to $151.4 billion, an 11.4% increase from 1983. Overseas expenditures were up 6.5% to $64 billion, and U.S. ad expenditures up 15% to $87.4 billion.

In the U.S., the biggest media ad growth in 1984 came for national broadcast, up 16.8% to $16.1 billion. Within that, network tv was up 20% to $8.4 billion, spot tv up 11.8% to $5.4 billion, radio up 12.8% to $1.5 billion, cable tv up 25% to $400 million and syndicated tv up 33.3% to $400 million.

Total national print in 1984 was ahead 13.6% compared with 1983 to $7.9 billion, with magazines up 16% to $4.9 billion and newspapers up 10% to $3 billion. Direct mail was up 14% to $13.4 billion. In local advertising, newspapers rose 16.7% to $20.8 billion and local tv 15.7% to $5 billion.

Looking at the product category expenditures in network and spot tv and magazines for the first nine months of 1984 compared with the comparable period in 1983, restaurants were up a whopping 34%. Mr. Coen said, "The battle for the burger market was intense."

In other categories, foods rose 23%, autos 19%, drugs/remedies 18%, candy/soft drinks 14% and toiletries 10%.#

Ad spending

Grand total	+13.8	95,860

HBO cuts net spending

New York—Home Box Office will shift to a localized ad strategy in 1985. The move means network tv ad spending, expected to reach $10 million this year, will be slashed in 1985.

The New York-based Time Inc. subsidiary plans to mount local ad blitzes in target markets for limited periods (AA, Dec. 10). HBO will coordinate its localized ad surges with cable systems located in target markets that will attempt to strengthen sales service for the duration of the drive.

John Billock, HBO senior vp-marketing, explained that in addition to creating demand with advertising, cable operators need to have a system in place to handle the flood of inquiries that follow a promotional period.

The shift away from broad image-building advertising to a strategy linking advertising with sales comes as HBO's growth has slowed dramatically.

Mr. Billock said HBO's ad theme, "There's no place like HBO," probably won't be changed. But ads "will be more programing oriented rather than user-imagery oriented," he said.

BBDO handles HBO's $20 million account. Ted Bates Advertising/New York is the agency for HBO's sister service, Cinemax, a $7 million account.#

Quick, easy meals see sales cooking

By JOHN C. MAXWELL JR.

The purchase-meal industry continued to show good sales growth through 1983; the industry posted a gain in sales of approximately 13.2%, or $38.66 billion versus $34.16 billion.

One reason for the gain was continued economic strength through 1983. We see growth continuing strong through 1984 and 1985, on the order of 12% to 14%.

Another reason for the success of the purchase meal industry is demographics. We are now dealing with smaller families, more working women and a larger percentage of the population that is single (about 23%). We do not see any slowdown of these trends and, in fact, believe they will continue to gain momentum. All this bodes well for the industry.

In today's fast-paced world, working people have more of a need for quick, easy foods they can pick up during lunch hours, on their way home from work in the evening or when they go out to eat. We see more of a trend in the fast-food business toward more wholesome eating, since the '80s seem to be the health decade—chicken and fish entrees are gaining importance. Two other indications of this healthier-eating trend have been the major success of salad bars (in many concepts) and the inclusion of mesquite-grilling facilities in many restaurants—the newest industry money-maker.

Another constant has been the ability of companies to correctly interpret trends. A case in point is the chicken chunks market, which has provided the industry with a new product to fuel further growth through menu expansion.

As indicated by the Gallup Poll and other surveys, there has been a significant rise in the number of meals being eaten out. This relates not only to fast-food restaurants, but also more upscale concepts. The increase in eating out is based on two facts: People now have less time to prepare meals but more disposable income. As a result of social and economic trends, there are many two-career couples, particularly in the cities and suburbs, who may eat out four to five times a week. The average percentage of eating out over the years has risen in direct correlation with the increase in the number of women in the labor force—except during certain recessionary periods.

McDonald's continued to maintain its lead in market share in 1983, though its share dropped slightly (from 18.6% to 18.3%), with Burger King picking up the slack (rising from 6.4% to 6.7%). Kentucky Fried Chicken maintained its third-place position, but only by a hair; Wendy's is quickly closing the gap. Otherwise, the order of the top 10 was basically unchanged. Sales increased across the board. The best sales increases among the top 10 came from Hardee's, up 32%; PepsiCo's Taco Bell, up 22.3%; Pillsbury's Burger King, up 18.7%, and PepsiCo's Pizza Hut, with an 18% gain. As a whole, the top 10 accounted for $19.69 billion—more than half of total industry sales.

Market share by segment for hamburgers, franks, roast beef and other mainly red-meat concepts fell slightly; steak and full-menu restaurants also declined. Over-all, there was a general expansion of ethnic and specialty foods. The pizza segment of the restaurant business grew 17.1% year-to-year in terms of sales. Mexican food maintained almost a 4% share of the market, but we feel it still has quite a bit of growth potential, as do the chicken and seafood concepts—now accounting for 10% and 4.4% of the market, respectively. The last three segments mentioned also had three of the largest year-to-year percentage gains in sales: Chicken up 23.5%, seafood up 19.9% and Mexican up 15.6%.#

Mr. Maxwell is with Laidlaw Ansbacher Inc., New York.

Big Mac biscuits move

OAK BROOK, ILL.—Add to the list of untrue marketing rules of thumb the belief that you can't sell biscuits north of the Mason-Dixon line.

McDonald's is introducing freshly baked biscuits to the breakfast menu at selected stores in Chicago, which joins Boston and Denver as test markets (AA, Oct. 29) for a product conventional foodservice wisdom said wouldn't sell outside the Deep South.

Sources say McDonald's already has proved that wrong. Biscuit sales in Boston have been surprisingly strong.

Biscuits have been on the McDonald's morning menu for years in the Southeast, where the assumption was that you couldn't sell English muffins. But sell them in the North? Never.

When Rocky Mount, N.C.-based Hardee's made breakfast biscuits a required item, consumers in the snowbelt were slow to warm to the product. But their resistance wore down, and Hardee's biscuit breakfast has established itself even in such markets as Minneapolis.

The "civil war" between the two products appears to be ending. Biscuits—with sausage or with egg, cheese and bacon—coexist with their Yankee cousins, the McMuffins, in the three markets. A national pairing of muffins and biscuits could begin next year.

Wendy's and Burger King continue to skirt the issue. The breakfast menu Wendy's has been rolling out market-by-market for the past two years is built around good old nonregional toast. BK has put its money on croissants for its breakfast sandwich.#

New Swiss Miss the 'berries'

By JULIE FRANZ

BRENTWOOD, TENN.—Beatrice Cos.' Swiss Miss subsidiary hopes to pluck a new share of the milk-additive market with Sugar Free Strawberry Milk Maker, trade sources report.

The product, an extension to Swiss Miss' Chocolate Milk Maker line, is expected to enter markets nationally in January, and will be targeted heavily to Hispanics.

All Swiss Miss Sugar Free products are sweetened with 100% NutraSweet.

But Swiss Miss may not find the market ripe for its new product. Grocers are reluctant to carry strawberry milk additives because they "historically sell lousy," one industry source said. "People just like chocolate better."

"If all three of my competitors carry [Strawberry Milk Maker], I'll carry it," one buyer said. "But they don't, so I won't."

Swiss Miss did find a strong market for strawberry milk additives among Hispanic consumers, said Greg Ostrander, director-advertising.

The company will target Hispanics with its tv and print campaign for Strawberry Milk Maker. That effort is still under development by Bozell & Jacobs, Minneapolis. The campaign will focus on Chicago, Miami, New York and San Antonio—cities with large Hispanic populations, Mr. Ostrander explained.

Tv spots for the product may resurrect the animated Swiss Miss character. But the company won't use former spokesman Judd Hirsch of tv's "Taxi" fame. Swiss Miss is looking for someone more easily identified with its brands, Mr. Ostrander said.

Tv spots, themed "Great Swiss Miss taste and sugar-free," will run in conjunction with 20¢-off coupons via freestanding inserts in Sunday newspapers.

Strawberry Milk Maker is packaged in 14-envelope cartons for about $1.89 or 30-serving cans for $2.89.

Swiss Miss also is planning a regional debut early next year for Sugar Free Malt Milk Maker, buyers say.

Nestle's Quik holds the majority of the strawberry milk-additive market, industry analysts say.

White Plains, N.Y.-based Nestle Co. will jump into the fray in January with its national rollout of Quik Sugar Free with 100% NutraSweet (AA, Oct. 22). It will retail for $2.89 for a 30-serving canister and $1.79 for a 14-envelope carton. Quik Sugar Free will be available only in chocolate flavor.

McCann-Erickson, New York, handles.#

McCann's milk campaign quells fear of fattening

By JANET MEYERS

ARLINGTON, VA.—The dairy industry will spend $13 million early next year in an effort to convince women that milk and cheese are not high-cholesterol fuel on the road to becoming a "chubbette."

The message, financed through the National Dairy Promotion & Research Board, consists of a $9.5 million network tv campaign and $3.5 million in print, both handled by McCann-Erickson, San Francisco. The board administers funds from a federally authorized assessment on dairy farmers to market dairy products (AA, June 21, *et seq.*).

The tv effort breaks nationally in January, and the print campaign will kick off a month later in *McCall's*, *Seventeen* and other women's magazines.

Because of milk's image as a high-fat food, the campaign will stress exercise, sleekness and the health aspect of calcium in its three tv spots.

The accent on calcium will not be the hard sell used in a recent American Dairy Assn. campaign by D'Arcy MacManus Masius, Chicago (AA, Nov. 15). That effort promoted the calcium in milk as a way to help prevent bone degeneration.

Bill McEwen, McCann senior vp-director of strategic planning and research, said he wanted a different approach.

"We were trying to address the user-image problem," he said. "Women say, 'I don't want to drink milk. I don't want to be a chubbette.'"

Because Mr. McEwen believes milk carries a "square" image, McCann's three 30-second spots will feature attractive, modern women, regardless of age.

Women also are the target in another dairy promotion. The Mid-Atlantic Milk Marketing Assn. in February will spend some of its $1.5 million budget on a new tv spot featuring an older woman athlete, gymnast Helen Sjyrson, drinking a glass of milk.

The spot falls into the athletic pattern set by the association's agency, W.B. Doner & Co., Baltimore. Other commercials have used Cal Ripken Jr. of the Baltimore Orioles and Mike Schmidt of the Philadelphia Phillies to catch the eye and palate of youngsters.

McCann's research showed women identify more with ads depicting a slice of life. So all three spots—one for the 13-to-24 group, another for those 25 to 49 and another for the 50-and-over crowd—feature women relaxing alone after exercising.

In the first spot, a young, leotard-clad woman returns home and reads a letter from her boyfriend while savoring a tall glass of milk. The second spot opens with a woman resting alone in an exercise studio after a tiring workout, nibbling cheese and fruit. The third depicts an older woman snacking on cheese after an invigorating swim.

Through all the spots there is a common theme—"softly she moves, graceful and free"—while a background voice explains that milk, cheese, cottage cheese and yogurt can satisfy daily calcium requirements.

All three spots fade out after a montage of dairy products, with the same tag line that appears in print—"Dairy foods: Calcium the way nature intended.".

McCann began the campaign as part of its work for the California Milk Advisory Board to counteract ad claims by calcium pill marketers that tout their products as a no-fat way to satisfy daily calcium requirements.#

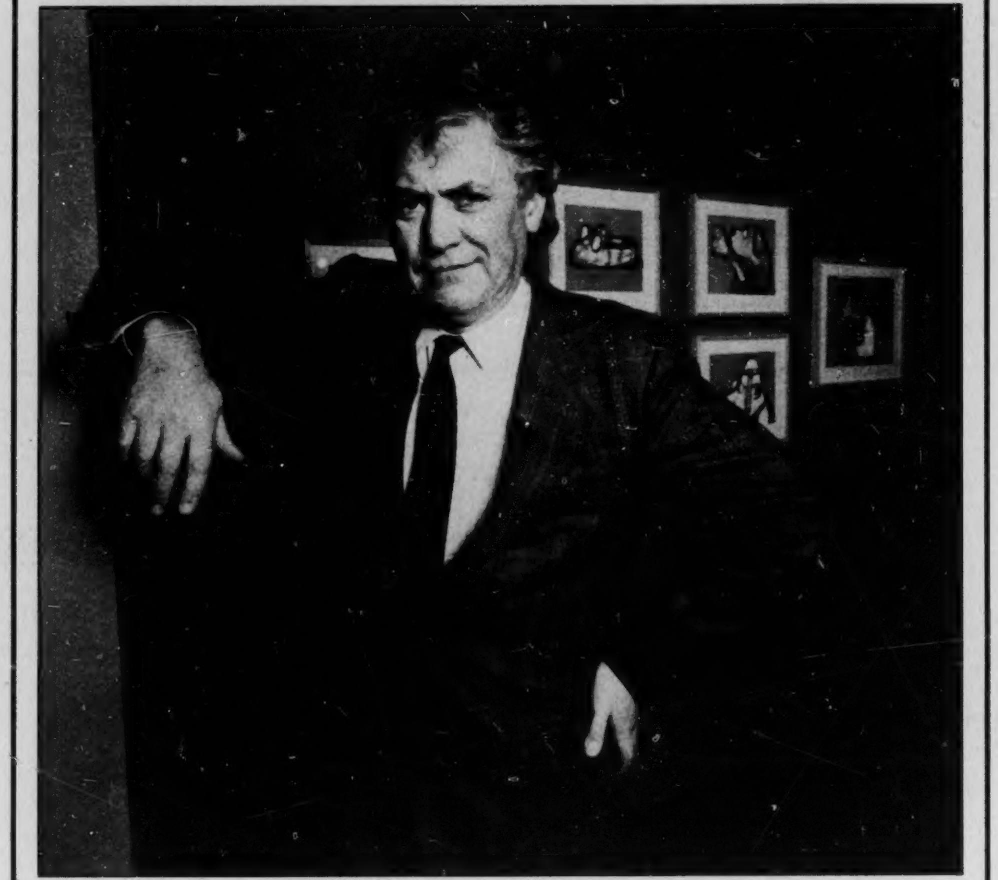
The prodigious growth in Yellow Pages directories this year—some 400 new books were piled atop the existing 5,800—is causing considerable consternation among national advertisers. *See Page 6.*



"I'm not loved for what I do," says Edward Booth-Clibborn, chairman at London's Design & Art Directors Assn., who is currently touting his European illustrations exhibition around the U.S.

Booth-Clibborn: DADA speaks

By ANN COOPER

There is a general air of chaos surrounding Edward Booth-Clibborn, chairman at London's Design & Art Directors Assn., and he clearly enjoys it.

Passionate, enthusiastic and articulate, with a shock of unruly, graying curls and the twinkling smile of the miscreant, he gives the impression he is never happier than when creating artistic tidal waves.

His current obsession is the decision by New York's posse of art critics to ignore his exhibition of European illustration, currently on show at the Cooper-Hewitt Museum in Manhattan.

"I phoned up the *New York Times*, and they said they never cover illustrators. I was amazed," he says, gesticulating madly against the Cooper-Hewitt's potted plants. "If you look at newspapers like the *Boston Globe* and magazines like *Esquire* and *Rolling Stone*, they contain some really amazing illustrative work.

"The images being created are much more exciting than in most New York art galleries. If you think back to the '30s, they didn't have any film critics. Film wasn't seen as an art form then. It'll be just the same with illustrations. I think we're way ahead of our time."

Apart from chairing DADA, the group said to have so greatly influenced standards of creativity in Europe, Booth-Clibborn is publisher-editor of *European Illustration* and *American Illustration*. These annuals feature the year's most outstanding illustrative and photographic images, drawn from competitions on both sides of the Atlantic.

Booth-Clibborn's exhibition is based on the con-

Stroh to nets: Fight off ad ban

By VERNE GAY

New York—Stroh Brewery Co. last week staged an unprecedented series of meetings with top network tv executives to measure the networks' resolve to stave off the movement to ban beer and wine broadcast advertising.

In the meetings, Stroh executives said the Detroit-based brewer would refuse to match its own product ads with public service spots advocating moderation in alcohol consumption. Failing to prevent a ban on the unrestricted advertising of a legal product, Stroh maintained, could have dramatic spillover effects for other network tv advertisers, such as marketers of over-the-counter pharmaceuticals that also have harmful effects when abused.

The meetings—the first between a major brewer and the networks—were initiated by Stroh out of a fear that "legislative hearings re-

James rises to McCann's top spot

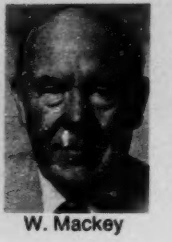
By STEWART ALTER

Robert James will take over next year as chairman-ceo, McCann-Erickson Worldwide, in a predictable line of succession.

Mr. James, 48, who has been president-chief operating officer for the past 18 months, will succeed Willard Mackey Jr., 62. Mr. Mackey will relinquish the ceo post March 1 and the chairman's post July 1, when he will retire. No successor to Mr. James has been named.

The top post at McCann is important in the world of multinational advertising. The agency, with $1.4 billion in non-U.S. billings in 1983, is the largest U.S. shop in overseas billings.

R. James



W. Mackey

Mr. Mackey was head of McCann's international division at a time when the U.S. and international divisions reported directly to Philip Geier Jr., chairman-ceo, Interpublic Group of Cos., McCann's parent.

In January, 1981, the U.S. and overseas agencies were brought together for the first time as a single operating company, and Mr. Mackey became ceo.

"At any point we are talking to two or three major advertisers about the possibility of taking on new multi-country assignments in the $50 million-to-$100 million range," said Mr. James.

Mr. James, who joined McCann in 1981 as vice-chairman, U.S. operations, has played a key role in building domestic billings from $430 million when he started to $750 million today.

But while global advertising is becoming more important in the marketing world, Mr. James also believes it has become too oversimplified. "The terrible thing about globalization is that people have tended to portray it either as good or bad," he said. "We knew for a long time that it's not all black and white."

Mr. James first started in the business on the client side, in sales for Procter & Gamble. After becoming a sales manager, he left to join Colgate-Palmolive as product manager.

He moved to Ogilvy & Mather and then Marschalk Co., which he joined as a senior vp in 1968. He became president of Marschalk in 1975 and vice-chairman of parent Interpublic in July, 1980, where he first became exposed to the international advertising area.

In addition to his regular duties, Mr. James has been acting as general manager of McCann's New York office, following the departure of Jim Kuras to Needham Harper Worldwide.

Mr. James worked under Mr. Mackey both at Marschalk and McCann. Mr. Mackey played a key role in McCann's Coca-Cola account.

He was manager of McCann's Atlanta office in 1963, joined Coca-Cola itself as international marketing director in 1968, moved to Marschalk as president in 1970 and in 1975 took over McCann's international division.#

Outdoor ad bureau freshens up audits

By WILLIAM F. GLOEDE

New Canaan, Conn.—The Out-Of-Home Measurement Bureau has revamped its audit statements and added an annual update to the audit reports, in an effort to provide marketers with more and fresher information.

OMB, the advertising auditing organization for eight-panel, backlighted, painted poster and bus shelter advertising, will phase in the new audit statements during 1985. They will report the number of outdoor ad unit locations by both county and major city.

Formerly, the locations were lumped into a metropolitan area according to the media company's definition of the market. The new statement will also report more complete information on circulation values.

"This will provide advertisers with much more useful information than has ever been available," explained managing director Julian Sloan. Advertisers will be able to better use demographic information in placing eight-panel or shelter advertising, he said, once they know where outdoor units are located within the market.

Special Report on Outdoor Advertising begins on Page 11.

The outdoor industry has traditionally reported audit data once every three years. OMB's move to include annual updates to the three-year audit reports is an effort to keep audit data current.

"In markets that are building or expanding, it's going to be an excellent tool," said Connie Barry, president of the Shelter Advertising Assn., the trade group of bus shelter owner-operators.

The annual updates will be based on samples of traffic recounts selected within a market by OMB. Inventory and population estimates will be furnished by individual outdoor companies.

To date, most major-market outdoor companies have subscribed to the OMB audits.#

Pay service tests campaign to attract subscribers

HBO hurls a direct pitch

By SUSAN SPILLMAN

New York—Home Box Office will test—for the first time—a national direct-response tv campaign in order to woo new subscribers.

The test, which begins Dec. 31, will consist of two separate 30-second spots to run at least 50 times a week for four weeks on each of 10 cable networks, including Lifetime, USA Network and the Arts & Entertainment channel.

HBO expects 20 million potential subscribers to see at least one of the spots during the four-week period.

The test comes at a time when the Time Inc. pay cable service is finding problems attracting subscribers at its former robust rate. HBO is expected to add only 1 million new subscribers this year, half as many as it hoped, according to Tony Hoffman, an entertainment analyst at Cralin & Co.

The first spot was made in-house, using outtakes from HBO's "There's no place like HBO" commercial created by BBDO.

The second commercial, called "The nosy neighbor," was created totally in-house; it shows a couple watching HBO while a neighbor spies on them, enviously, through a window.

Both spots will offer viewers a premium and a toll-free number to call. HBO then will turn over all leads to the respondents' local cable operators.

In the past two years, HBO has conducted several co-op direct-response campaigns ~~on a~~ spot market basis ~~(AA, Aug.~~ 30), with an average 2.1% response rate. But this marks the first time the network will air direct-response commercials nationally, footing the entire bill—less than $1 million in this case.#

Outdoor boards get down to business

Spending in some categories skyrockets

By Kurt Hoffman

In some industries, outdoor advertising of business-to-business messages is emerging stronger than ever. While business-to-business represented only 5% to 10% of the $1.02 billion outdoor experditures in 1983, with an approximate 8%, or $85 million, rise in 1984, the growth rates for some industries are staggering.

"No one is wasting ad dollars anymore," says Jack Donohue, vp of the Institute of Outdoor Advertising. "Everyone's looking at the effective and efficient use of their media dollar. They're using our medium to pinpoint specific demographic or geographic needs."

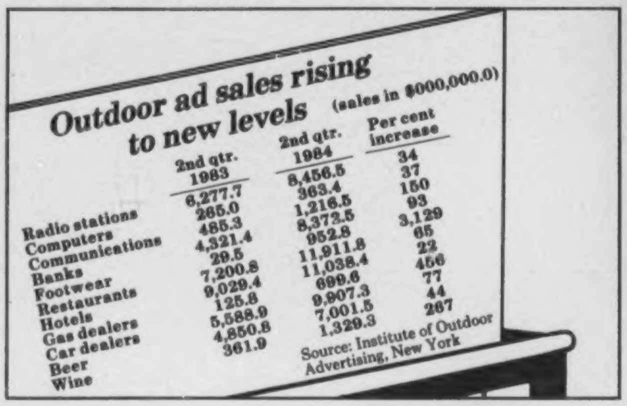
Take for example computers and other electronic products for the office. Driven by fierce competition within their own circles, companies marketing these products are funneling more money than ever into outdoor business-to-business communications.

IOA statistics show that from 1982 to 1983, expenditures of this sort leapt 194%, for office machines, fixtures and accessories, and a whopping 164% to $615,300 for computer and data processing companies.

"It's a real struggle for individual companies to dominate in other media," Mr. Donohue says. "If you look at a recent issue of *Inc.*, there probably are no fewer than 58 computer ads, plus a multipage, four-color pullout. If you represent a smaller company, how are you going to achieve any dominance?"

Strategic use of outdoor may be the answer. "Companies are realizing that they can go into individual markets with a solid, well thought-out outdoor campaign and really give the impression that they are larger than they really are," Mr. Donohue says.

This saturation also gives smaller or newer companies a leg up in the competition for top-of-mind awareness. "When you think personal computers, which companies come to mind? IBM? Apple? Even the top two companies only have a small share of the market. And if you happen to be a smaller company, how are you going to budge Apple or IBM? You're going to have to do something a little more creative than going in the same media they use with an average advertising message."



Outdoor ad sales rising to new levels (sales in $000,000.0)

Hidden Creek Condominiums. Shedding new light on affordable prestige.
Right on Hoya. Follow the signs.

Lighted interiors and shadowy figures are part of an outdoor board from Reed, Ham & Jackson.

Another big plus of saturating individual markets is the accompanying ability to tie in with local retailers. These same retailers, however, probably will be less than enthused with your company's ad on Page 200 of *Inc.*. "These retailers expect you to help push the product, and an ad on Page 200 won't push much," Mr. Donohue says. "If you're a smaller company, the market leaders are going to bury you in the print and broadcast media."

The logical solution, he says, is strategic use of outdoor to establish your company in select markets.

"As an industry, we're pursuing the computer and electronics companies very aggressively," Mr. Donohue says. "They are spending a lot of money, and it's

CERTIFIED CERTAINTY
FOR 50 MARKETING YEARS

For over fifty years, The Traffic Audit Bureau has been verifying outdoor advertising circulation. It is supported by major advertisers, advertising agencies and outdoor plant operators within a nationwide scope.

The TAB seal of authenticity provides confidence for all buyers and sellers of outdoor with certified facts that assure a standardized quantitative base. In effect, TAB figures provide both buyers and sellers of outdoor with an essential marketing tool.

Learn more now about our service and membership benefits by writing or calling Ken Sammon, TAB, 708 Third Ave., N.Y., N.Y. 10017. Also, why not join us at the TAB Annual Conference on February 10-13, 1985 at the Royal Plaza Hotel, Lake Buena Vista, Orlando FL.

The Traffic Audit Bureau, Inc.

Business

(Continued from Page 16)

tough for them to pick up a share of that market. We're matching our benefits with their marketing needs, and it's proving to be a very nice marriage."

Other industry groups making greater use of outdoor for business-to-business messages include transportation companies and overnight delivery services.

"With outdoor advertising, the bottom line for us is a long-lasting presence in a given market," says Greg Conville, regional planner-advertising for Amtrak.

"We're primarily using outdoor in markets where we have frequent service—mostly in the short-haul markets of the northeast corridor between Washington and Boston."

99.5 KISS
The Home of Rock 'n Roll

Reed, Ham & Jackson is known for using innovative and bizarre 3-D art.

Mr. Conville says Amtrak faces a frustrating situation regarding business passengers along these heavily traveled routes.

"We need to get business travelers to realize that we have an alternative that can get them to their destination comfortably and in a reasonable time frame.

"But air transportation is a tough habit to break. A lot of business travelers use us during inclement weather, but when the sun comes back out, bingo, most of them go running back to the airlines."

In the endless quest for greater market share, Amtrak has its ad agency, Needham Harper Worldwide of New York, design and produce outdoor messages that focus on various aspects of Amtrak service, and it supplements the outdoor efforts with complementary print advertising.

"Whether the outdoor message is Amtrak's convenience, cost or first-class service, we run print ads that play off and amplify the outdoor theme," Mr. Conville says. "The harmony factor is very key to a successful message."

While Amtrak competes for business travelers, other railroads such as Union Pacific, CSX Corp. and Conrail as well as some of their counterparts in the trucking industry—Consolidated Freightways and Overnite Transportation—use outdoor messages in manufacturing areas, port cities and at other centers of origin for high-volume freight.

Image, market presence and quality of service are common messages in these efforts. According to IOA, outdoor ad expenditures by steamship lines, trucking companies and railroads jumped 90% from 1982 to 1983.

Indispensable

When saturating individual markets, companies can tie in with local retailers.

Outdoor business-to-business expenditures for industrial and agricultural development companies rose 76% to $238,700 and 1,623% from $9,200 for packaging and paper products companies during the same 1982 to 1983 period.

Mr. Donohue says the drastic jump in outdoor use by certain industries in part reflects the fact that many companies traditionally have overlooked the inherent advantages of the medium, which creates a challenge for IOA.

"We don't try to convince advertisers to radically change their media plan. Our objective is to educate them as to how outdoor really becomes an essential element in that media plan—how it can extend the life of a broadcast campaign and add reach and frequency to a print campaign," Mr. Donohue says. "It's an often overlooked medium that can really help acknowledge certain marketing objectives."

Another problem is that some agencies just haven't mastered the medium. Common problems include attempting to apply print ad concepts to outdoor, and underutilization of board space.

"Agencies shouldn't take a magazine ad and try to cram all the elements onto an outdoor board, where the viewer has an average of six to ten seconds to see it.

"You have to pick out one focal point of the print ad and match it with an effective graphic," he says.

"Another general rule to remember is to use the bigness of the medium. It's larger than life, and that's how it should be used. Big letters. Big graphics." Not a whole body, he says, perhaps just a head with a bit of shoulder.

This is not to suggest that vast majority of outdoor efforts are bungled by inept agencies. On the contrary, many have artfully mastered the outdoor medium. Foote, Cone & Belding of Los Angeles consistently produces superior outdoor creative. Chiat/Day has chalked up a string of successful campaigns for Nike. Coons, Corker, Sullivan & Associates of Spokane, Wash., has designed some highly effective business-to-business creations for Lippencott-Interconnect, a business telephone service.

And there is Reed, Ham & Jackson of San Antonio, Tex. If, on your next drive through San Antonio, you should venture upon a giant lampshade—lighted at night, of course—jutting forth from a 14-by-48-ft. board or a huge telephone receiver similarly situated, fear not the coming of the Jolly Green Giant. This is the work of Reed, Ham & Jackson.

"It's our demonstrative feeling, and we've proved it over the years, that one great piece of outdoor is worth about a hundred showings of a 30-sheet in one corridor," says David Ham, one of the agency's principals. "It just re-creates excitement."

Known as an agency that begins its creative thinking with outdoor campaigns, Reed, Ham & Jackson has achieved a string of successes through the use of innovative and occasionally bizarre 3-D art on outdoor boards.

"The potential of outdoor is basically infinite," Mr. Ham says. "The thing that print will do for you every time is provide direction and detail, which is something that neither radio or outdoor can accomplish. Nothing sells like print when you get

Business

(Continued from Page 18)

down to the nitty-gritty of providing details.

"But it's my contention that first you have to get people's awareness before they'll be willing to read the print. To do that, you've got to stand apart from the relative field of competition."

"Standing apart" is a mild way of describing the agency's creations.

"What's Black, White and Read all Over?" one board asks. "The *Express News*."

A rolled up newspaper is gently clenched in the teeth of a giant 3-D dog head protruding from the board.

Creatives for other clients have featured scaled down 3-D townhomes (replete with lighted interiors and shadow figures at night) perched on boards for real estate clients, and a mannequin brick mason (dressed as Santa Claus during the Christmas season) putting the final touches on a chimney for a local builder's promotion.

Use of the mannequin created some problems. According to Mr. Ham, a group of local high school students formed a club—a cult of sorts—and one of the membership requirements was that you had to steal a mannequin from one of the outdoor boards.

"We had to start bolting them down," he says.

However, one afternoon an aspiring cultist managed to detach all but one fastener. "So there the mannequin was, dangling by an arm.

"The kid climbed behind the board, unscrewed the bolt, and the dummy crashed to the ground.

"A guy at a mechanic's place a few blocks away happened to see it fall and figuring that somebody had bought the farm, he called for an EMS [emergency medical service] unit." The rescue unit was not amused.

The costs for producing these unusual visuals are considerably greater than production costs for a conventional 30-sheet. For example, Mr. Ham estimates that two fairly exotic boards the agency recently produced for ComputerLand cost about $4,500 each, compared with about $1,000 for a straight presentation. "Our clients are more concerned with performance," he says.

That performance record

Trucks keep messages on the move

Next time you're cruising on the interstate, take a closer look at the tractor-trailer traffic. A quiet revolution is taking place as truck fleet managers, realizing the golden potential of these moving message boards, shun the traditional steel gray of the past in favor of colorful, high-tech fleet markings that do their companies justice.

The fleet marking phenomenon extends well beyond trucking companies merely announcing the existence of their services. Nontransportation companies that own their truck fleets (known as private carriers), such as Levi Strauss & Co., San Francisco, and Safeway Stores Inc., Oakland, Cal., are latching onto the graphics movement in record numbers.

"After decades of running nondescript gray trailers up and down the highways, more and more private truck fleets are using this free advertising space to plug their own products and services," says Jack Rosenbaum, managing director of the Private Carrier Conference of American Trucking Assns., Alexandria, Va.

He says more than 100 private carriers entered the conference's 20th Annual Fleet Marking Contest this year. Similar fleet marking competitions are held by *Commercial Carrier Journal* in conjunction with the Private Truck Council of America, and by *Fleet Owner*.

The investment pays in a variety of ways. Research conducted by the ATA Foundation indicates that the average over-the-road tractor-trailer makes about 10.1 million impressions annually, while its city delivery counterpart is seen about 16 million times.

It's largely up to the individual fleet owner to decide whether those impressions will

Truck fleet managers are decking out their vehicles in bright colors and designs.

lures new business through the agency's doors. Just four days before the interview, Mr. Ham was approached by a local real estate developer with marketing problems.

After having completed a development in San Antonio, the man sought financial marketing support from a local savings and loan, which suggested stretching the $450,000 ad budget evenly over the two years of interim financing.

732-7111

Reed, Ham & Jackson's creative outdoor campaigns are heavy on the unusual.

His original ad agency ran a lot of small newspaper ads and erected some signage at the property site.

After months of minimal sales action, the developer changed agencies. The second agency produced some four-color brochures and more newspaper advertising, but few sales. Onwards to Reed, Ham & Jackson.

"He's come to us now, a year and a half into his project, with his budget down to $100,000," Mr. Ham says.

"He's paying $150,000 a month for interim financing, and he hasn't sold a unit in four months.

"Now our contention and experience is that if you go ahead and frontload the project and make the biggest splash possible, then you'll generate the momentum to turn sales," he says. "And nothing sells like people buying. When you get a bunch of people and they start to buy, it's like a feeding frenzy in a duck pond."

Does the new client have any particular approach he'd like them to pursue?

"He knows our track record," Mr. Ham says, "and he's expecting something unusual. We won't let him down."

---

be negative, neutral or positive.

Because three out of four survey respondents indicated they develop an impression of the company, its products or services from the appearance of the vehicle, the stakes are a lot higher than they initially appear.

Technological advancements in the materials and procedures used in fleet marking deserve the lion's share of credit for the growing use of the medium.

They also have allowed longtime users of fleet graphics to achieve significant fleet marking savings. For example, Giant Food, a regional grocery store chain based in Landover, Md., has reduced its fleet marketing budget by two-thirds after switching from fiber glass signs to vinyl decals, according to Bill Hefferin, general manager-fleet maintenance.

The screen-printed process-color decals were designed and produced by Creative Screen Print, Richmond, Va. Decals making up the Giant logo are produced from 3M Co. Controltac material and are permanently applied to the trailer sides.

"Not only are the decals less expensive then the embedded fiber glass, but they take only about four man-hours to apply per trailer, and they don't require riveting the trailer body," Mr. Hefferin says. Giant Food marked about half of its 900-unit fleet and plans to finish the project at the rate of about 30 a month, he says.

Digital Equipment Corp. of Maynard, Mass., decided to use its highway fleet to carry a business-to-business message about the company's personal computers and office machines. Stressing that the personal computer is an office solution, the Digital marking includes a very bold logo and the company's toll-free number (1-800-DIGITAL) on the trailer door.

"The personal computer had just been announced, so it made sense to go ahead and plug our most recent product," says Bob Dobinski, a Digital industrial designer and creator of the decal.

The company spent about $250,000 marking its fleet of 106 trailers and 26 tractors, which spend most of their time on New England highways.

Although it's difficult to measure the direct success of the marking program, Digital is confident that the move was the right way to go. "Certainly from an image and public relations perspective, it has paid off very well," says John Gwinn, manager-executive programs. —*K.H.*

CO-OP ADVERTISERS CAN DO IT OUTDOORS.

IT'S EASY WITH UNITED'S UNIQUE "TURNKEY" SERVICE.
That's why national and regional advertisers like the ones you see below are using United to handle their co-op or advertiser sponsored outdoor poster programs. The United list also includes Datsun, Goodyear, McDonald's, Wrangler, Cinemax, Toyota, GMC Trucks, B.F. Goodrich, Chevrolet and A&W Restaurants.

NO MANAGEMENT REQUIRED.
United does it all. We can help with the creative, produce the posters, handle administration, control inventory, and computer-audit your program. We even do all the merchandising and promotion — including mailings to your outlets or dealers. That's "turnkey" service. You or your agency can now use United's co-op space consolidation program.

INCREASED LOCAL PARTICIPATION.
Because United aggressively merchandises and promotes a program, local dealer or outlet participation is increased from 50 to 100%. Our track record proves it!

YOU'RE IN CONTROL.
With United, you're in control of your outdoor program. Through United's counselling and computerized monthly reporting system, there is little — if any — waste. You always know how your outdoor program is doing — every month — because we do more than just print posters!

PROOF OF PERFORMANCE.
Even though United is a poster production company, and not involved with space, we require affadavits of performance — with photos — for all posters we ship. We make sure you know that your program is being used.

GET OUR FREE KIT.
If you would like to know more about a "turnkey" co-op or advertiser sponsored outdoor poster program, send for our free information kit titled: "Out-of-Home Media Programs." Or call toll free 800-334-1986 and ask for Mary Lynch or Bill Porter.

PEOPLE PATTERNS

Santa will be carrying a big bag of toys

By PETER FRANCESE

Christmas would hardly be Christmas without a few toys. A few? How about $5 billion worth? That's how much I estimate Americans spent on toys for Christmas, 1983. And this year they should spend even more.

According to the toy marketers trade association, its members shipped toys valued at $7.5 billion in 1983. That translated into $10.4 billion in retail toy sales, about half of that at Christmas.

After five years of fairly spectacular growth, toy shipments declined slightly from 1982 to 1983. Perhaps it was only a coincidence, but the number of births also declined about 1%. A more likely reason for the lack of growth in toy shipments is that the value of electronic games dropped more than $200 million.

But shipments of baby dolls increased 50% last year. Some of those dolls are almost human. They walk, talk, perform various bodily functions and even have demographic characteristics. Dolls are designed to have specific racial or ethnic characteristics, and some are clothed for a particular occupation.

We don't have a census of dolls or other toys, but we do know who buys the toys and who gets them. Grandparents can be counted on to buy lots of toys at Christmas for their grandchildren, but it's the parents who really get shaken down. The average parent probably will spend between $150 and $200 for toys this year.

The people who buy them may get to play with them briefly, but four out of every five toys are bought for a child younger than 10—and half of all toys are for children 5 to 10.

From 1977 to 1982, the number of children younger than 5 increased 12%, while the number of those 5 through 9 declined 9%. At the same time, toy shipments increased 121%. Clearly, something besides the number of toy consumers is driving this industry.

During the next five years, we expect the number of children younger than 5 to increase 4%, while those heavy toy users 5 to 10 will grow 12%. If current patterns persist and the economy remains strong, toy marketers can look to another doubling of business in the next five years.

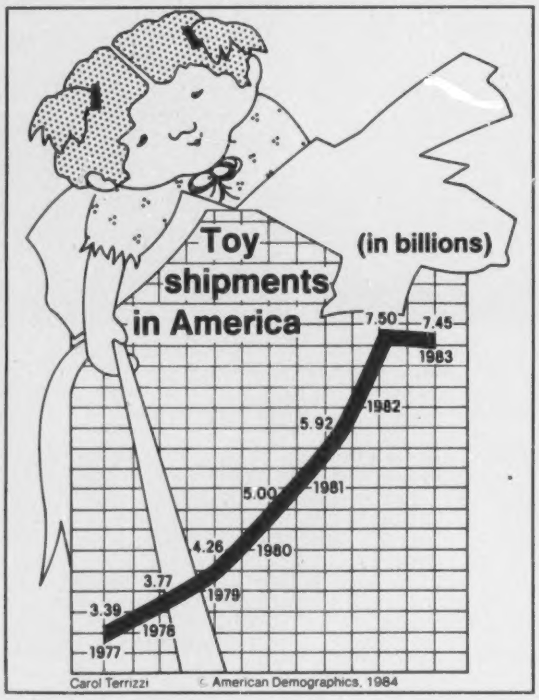
Three factors that drive this industry all look positive.

First is more grandparents, each of whom has fewer grandchildren but more discretionary income to be captured by the Christmas spirit.

Second is the preponderance of working mothers. Because more than half of all mothers of preschoolers are in the labor force (and two-thirds of those with school-age children), there is more money available in the household to be spent on the children.

Third, almost half of all babies born today are first babies. According to a new book by Thomas Espenshade, in which he estimates parental expenditures by order of birth, the average middle-income parent spends 52% more from birth to age 5 on the first child than on the second.

All these factors are expected to continue boosting the toy business in general, but not necessarily specific toys. Things that go flash, whiz, bang, whir and grind—and require a fortune in batteries—appear to be on the wane.



Carol Terrizzi © American Demographics, 1984

Simple, basic toys that are built to last beyond Dec. 26 continue to sell well and probably will do so for many holiday seasons to come.

Grandparents, in addition to toys, play a special role at holiday time. Because of dropping birthrates and rising longevity, there are only half as many grandchildren per grandparent as there was a generation ago.

The Census Bureau estimates that there were nearly 40 million grandparents in 1983—21.5 million grandmothers and 17.5 million grandfathers. That's only an estimate because the family relationships asked about in questionnaires rarely extend beyond one generation.

One way to look at the trends in gifts and pinched cheeks at Christmastime is to find out how many children younger than 10 there are in relation to people older than 65. I call this the grandchild-grandparent ratio, or the grand ratio for short.

We can speculate that as this ratio falls, the presents under the tree will get bigger and children will see more of their grandparents.

In 1950, the grand ratio was 2.4—pretty high. There were not very many elderly people then and the baby boom had been exploding for several years. The ratio stayed high until after 1960. Then with the end of the baby boom and the beginning of sharply rising longevity for the elderly, the grand ratio fell precipitously for 20 years. Today it is only 1.2.

This means there are more children today who will benefit from knowing their grandparents without so much competition from cousins. Grandpa and Grandma are better off, too. Social Security payments have been adjusted for inflation, and pension benefits are more generous.

Not all the elderly are well-to-do, but according to a study by the Census Bureau and the Conference Board, people older than 65 have the highest per capita spendable discretionary income of any age group. And where do discretionary dollars go at Christmas? Into presents, of course. Discretionary money also helps the entire family of the grandchildren. I met a grandfather the other day who told me he was part owner of two houses besides his own. He had put up the equity so two of his children could buy homes for their families.

The transfer of money from parents to children and to grandchildren has been going on for a long time. The phenomenon is not well-documented, but I suspect it is growing and may be the only reason many young families can afford to buy a house at today's prices and interest rates.

In the future, the grand ratio is projected to continue falling, so by the year 2000 there will be only one child younger than 10 for every person older than 65. Perhaps by then we will see the return of the extended family.

Years ago, elderly people lived in or near the house of their children and helped out. With more than half of the parents of preschool children in the labor force and so many fewer grandchildren predicted, maybe it would be better for everyone if grandparents were around all the time. Then grandparents could give their grandchildren the biggest and best present of all—themselves.

Parting Shot / *BY RANCE CRAIN*

Ad club could polish Chicago's image

I gave a talk to the Chicago Advertising Club the other day suggesting that the city's advertising community had the right stuff to help repair Chicago's tarnished image.

Too many people—visitors from the Midwest, other parts of the country and abroad—would just as soon skip a visit to Chicago. A city with a negative image discourages tourism, but even more important, it discourages growth—and that has an impact on all of us. When Chicagoans feel they have a city running in neutral, or worse, it's a mood that helps to discourage business from considering a move to the city. Worse, it encourages business to think about moving away.

Chicago is a city in transition, and the jury is still out on whether we'll emerge in better or worse shape. The council wars have taken their toll, of course, and they vividly show the debilitating effects of what happens when the old coalition among government, labor, finance, business and religion finally and irrevocably breaks down. To those of us outside the city council boxing ring, it seems as if the city is what's getting beaten up, rather than the boxers.

It also might be fair to blame the council wars for the decision of city business leaders to keep their relatively low profile. You could argue, however, that the current political stalemate actually may have been encouraged by the lack of business involvement.

During the last mayoral election, business seemed to keep its profile as low as possible while waiting to see what would happen. When the election resulted in a division close to a stalemate, business continued to sit it out.

In any case, the older business leaders who were committed to civic leadership as a way of life in the days of Mayor Daley gradually have faded from the scene, and young business leaders eager to make their presence felt have not yet emerged to replace the old guard.

A city with a negative image discourages tourism, but even more important, it discourages growth.

That's not to say they're not there. Men such as Quaker Oats' Bill Smithburg, Helene Curtis' Ron Gidwitz and Commonwealth Edison's Jim O'Connor show great leadership potential for the city. But right now, they are too busy building their companies—and their own careers—to have the time for intensive civic involvement.

Maybe, just maybe, we've hit rock bottom. In the final hours of the last Illinois General Assembly, legislators cleared the way for a long-sought expansion of McCormick Place and approved funding for a $10 million Illinois tourism campaign. The McCormick Place expansion enabled the city to keep the giant Consumer Electronics Show.

The tourism campaign is the first really effective effort I've seen for Chicago. It cleverly promotes the city as a "hot" place to visit during the Christmas season, using a Bahamian guy with the same kind of laugh and white suit as the spokesman touting caffeine-free ("ha-ha-ha") 7UP.

The Chicago spot will appear in 16 midwestern tv markets from Detroit to St. Louis, and it's backed by print and radio. The Illinois Office of Tourism has set up a special toll-free number, 1-800-HOT-TOWN, that viewers already are calling for brochures and additional information. Zechman & Associates, a Chicago agency, created the ads.

The Chicago advertising community, it seems to me, can play a major role in the city's turnaround. With momentum finally on the upswing, it makes sense for ad people not only to get on the bandwagon, but also to help lead it. What I suggested in my talk is that the Chicago Ad Club take the city's image problem on as a "client" and come up with plans to keep beating the drums for the city in all kinds of ways.

The International Advertising Assn. is holding its congress here in 1986, drawing ad executives from more than 70 countries. What an opportunity for Chicago's advertising community members to make *their* ad group feel welcome—and to go home enthusiastic boosters of Chicago.

Inaugural spot buys gala night

By VERNE GAY

The hottest question on Madison Avenue this week is: What would you pay to have dinner with Cary Grant or Elizabeth Taylor, drink Chateau Margeaux 1972 and be catered to by the finest chef in the nation's capital?

Before answering, consider this: You also get to see a live performance by Frank Sinatra, with Wayne Newton appearing as a warm-up act.

A good deal at any price, you say? Well wait, there's more! Within hailing distance of your table will be none other than President Reagan himself.

Welcome to the Jan. 19 White House Inaugural Gala, where all

(Continued on Page 39)

P&G pins strategy on super Pampers

By LAURIE FREEMAN

Competition in the disposable diaper category is heating up as Procter & Gamble prepares to deliver a counterpunch against Kimberly-Clark Corp. with new superabsorbent Pampers.

The P&G entry challenges K-C's Huggies, the premium diaper that continues to build up marketing clout.

Cincinnati-based P&G, which still leads the over-all disposable diaper category with a 52% share, may introduce the new Pampers nationally by the end of 1985, sources indicate.

P&G's answer to Pampers' share decline, new Pampers with concentrated absorbency, has been in Kansas test markets since early November. The new premium diaper may well be the marketing edge the company is seeking.

The restaged Pampers diapers resemble Luvs, with elasticized legs, refastenable tapes and an hourglass shape.

"New Pampers is a full-shaped disposable diaper that's more absorbent, leaks less and fits better than

(Continued on Page 34)

Stores fight for market share

Price-cuts fuel late yule push

By PAT SLOAN

New York—Santa may be dashing, but retailers are still slashing their way through Christmas.

J.C. Penney Co. last weekend pulled its image ads, via N W Ayer, New York, and aired a tv spot created in-house offering 25%-to-50% off in various departments, including jewelry, linens and sweaters. Although the sale had been planned in advance and advertised through preprints, the national spot was an 11th-hour decision.

"It was added on to draw added attention to the sale," said Terry Prindiville, director of corporate marketing. "The retail environment has been very promotional this Christmas, and we felt Penney had to communicate it had a lot of good values."

Only days before, B. Altman & Co. popped an ad in the *New York Times* announcing "Surprise savings. Two days only—25% off ticketed prices." Key to the ad was the reminder "Come wrap up your shopping, and remember, you'll be saving an additional 25% on many already reduced items."

Faced with heavy promoting from its competitors, explained George Hanley, vp-sales promotion director, Altman's sale was an add-on, "part of the whole process going on across the country to maintain market share."

Nor are the promotions likely to abate. Said William Davidson,

(Continued on Page 39)

O&M gets a kick out of Santa

Ogilvy & Mather's annual staff meeting at Carnegie Hall included "Miracle on 48th Street," a staff-written musical in which the agency wins the Santa Claus account. The finale's chorus line included (l. to r.) Keith Bainbridge, Jonas Wagner, Kelly O'Dea (in Santa costume) and John Farr.

A-B clicks off radio ads, beefs up tv for LA push

By VERNE GAY

Anheuser-Busch has pulled $1.5 million in radio time for its "The way you live today" LA low-alcohol beer campaign and plowed the money into tv to back its new LA effort featuring George Burns (AA, Dec. 10).

In total, the LA brand will be backed by an estimated $10 million media budget in 1985, with almost all of the spending going into tv. A-B initially had applied 15% of the brand's budget to radio.

The reason for the switch is the same one that besets many advertisers: A-B was unconvinced its radio ads had nearly the same creative clout as its new tv spots.

"There have been no major media cuts on LA," said a spokesman for the St. Louis-based brewer. "There have been reassessments. The brand has no strong radio creative but it does have strong tv creative, so we shifted previously placed radio budgets to tv."

D'Arcy MacManus Masius, St. Louis, is the agency.

The new tv campaign features George Burns in a variety of

Cigaret companies lock horns in price war

Durham, N.C.—Liggett & Myers Tobacco Co. is offering "sizable discounts," says Steve Cohen, manager of generic and private-label brands, in what is shaping up as a price war over that segment. The move is in response to Louisville, Ky.-based Brown & Williamson Tobacco Corp., which is offering $1 off per carton to consumers and is allowing retailers a $1-per-carton sales incentive. L&M is the leading marketer of generic and private-label smokes. Separately, cigaret marketers last week hiked prices 3% to 4% on all branded items.

Opposition to Nicklaus leaves Chiat in rough

Huntington Beach, Cal.—Uniden Corp. of America has dropped Chiat/Day, New York and Los Angeles, from its review because the agency insisted that the company drop golfer Jack Nicklaus as its spokesman. Still vying for the communications equipment company's $14 million account are Laurence, Charles & Free; Compton Advertising, and Ally & Gargano, all New York. DYR, Los Angeles, is the former agency.

Metzdorf-Marschalk wraps up TG&Y account

Oklahoma City—Discount merchandiser TG&Y Stores Co. has moved its $6 million broadcast advertising account to the Metzdorf-Marschalk Co. from Intermedia Time Buying, Sherman Oaks, Cal.

(Continued on Page 8)

Nabisco shakes units, rattles shops

By NANCY GIGES

Nabisco Brands, flush in the middle of an annual agency review, dropped some fireworks into its marketing operation.

The East Rutherford, N.J.-based company used the setting of the review to shake up its corporate structure, put a new product up for agency competition and pronounce itself satisfied with its in-house shop.

Nabisco conducts the review each year at this time as plans for the coming year are prepared, sometimes resulting in realignments.

This year, the company consolidated several units into three operating divisions—biscuits, Planters/Life Savers and grocery.

It also asked three New York shops not now working for the biscuit division to compete for an unidentified snack product to be introduced next year. The three—Bozell & Jacobs, Dancer Fitzgerald Sample and J. Walter Thompson USA, New York—are agencies of record for products from other company divisions.

As to its in-house shop, Ohlmeyer Advertising, Nabisco attempted to squelch reports that the company is unhappy with the agency's work.

The consolidation move brings together Planters and Life Savers, which share many distribution outlets, and combines margarines and desserts under the grocery division, along with cereals, bread mixes and pet foods. The third division, biscuits, remains unchanged. The groups all report to Peter Rogers, exec vp-operations, Nabisco Brands USA.

John Greeniaus becomes president of the biscuit division, a post held by Mr. Rogers. Mr. Greeniaus had been ceo, Nabisco Brands Ltd., London. Larry Kleinberg, formerly president, Life Savers, has been named president, Planters/Life Savers. William McKnight, formerly president, grocery products group, will add the margarine and desserts division to his unit.

Ellen Marram, formerly vp-marketing, margarine, has been named vp-marketing, grocery products. A new sales and distribution division will be formed to combine those functions for the grocery products and Planters/Life Savers units.

Mr. Rogers said the reorganization is an attempt to capitalize on the leverage and economies of scale gained from consolidating like businesses.

He pointed out that only 40% of the Planters and Life Savers business comes from grocery stores, while the remainder comes from other classes of trade.

In defending Ohlmeyer Advertising, Mr. Rogers said there has been no more friction than the normal agency-client relationship.

Ohlmeyer, a unit of Ohlmeyer Communications, New York, handles Triscuits, Wheat Thins, Better Cheddars and snack crackers. Nabisco holds a majority interest in Ohlmeyer Communications, a programing and production company.

Sources close to the agency say the shop has had difficulty coming up with commercials within the brands' budgets and with acceptable creative.

"From a corporate standpoint, it wouldn't make sense for us to take business from a house agency," he said. "One is much less likely to fire a house shop since we still have the rent to pay whether we give them business or not. One tends to work harder with an in-house agency."

Nabisco has been trying to build up the ad agency division of Ohlmeyer, which also does work for Stroh Brewery Co. and Times Mirror Magazines.#

'CR' suit nicks Remington's ad for shaver

By GAY JERVEY

Consumers Union is suing Remington Products and two department stores in a new attempt to keep marketers from exploiting the product ratings CU publishes in "Consumer Reports."

The lawsuit against Remington, R.H. Macy & Co., and Gimbels renews CU's long-standing contention that advertisers have no right to use its rating or the trademark "Consumer Reports" without its permission.

That position was shaken last October, however, when the U.S. Supreme Court declined to review a lower court decision that allowed Regina Corp., Rahway, N.J., to use in ads excerpts from a "Consumer Reports" review that favorably rated a Regina vacuum sweeper (AA, Oct. 4).

According to court papers filed last week in New York state court in Manhattan, the Remington ads violate CU's policy barring commercial use of its findings and ratings. CU also prohibits any such use of its trademark.

CU is asking for an injunction to halt the ads as soon as possible.

Mount Vernon, N.Y.-based CU said the legal action follows repeated requests that Remington stop the ads and packaging that describe Remington's XLR-3000 shaver as the "top-rated shaver in 'Consumer Reports.' "

CU also maintains that the print

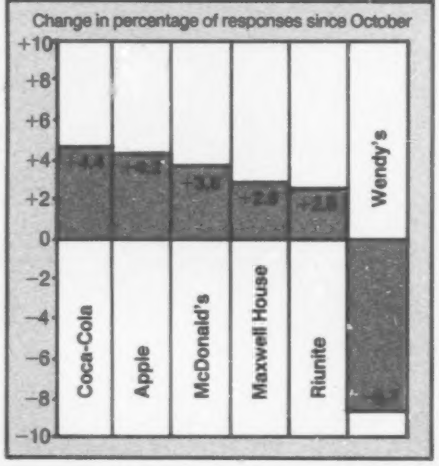
ADWATCH

Nov. winners & losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Note:* A change of plus or minus 2.8 percentage points is statistically significant. Source: SRI Research Center Inc., Lincoln, Neb.



Coke scores extra point in cola ad wars

By SCOTT HUME

The stakes were high, the competition fierce and the final score close. But what really decided the contest was the victor's home-field advantage.

No, this isn't a recap of the NFL playoffs; it's an update on the Great Cola Advertising War.

For the first time since it was overtaken by Pepsi-Cola in January, Coca-Cola advertising recall share once again sits atop the soft-drink category.

Asked to name the first soft-drink ad that came to mind, 30.6% of the 1,254 adults polled last month in ADVERTISING AGE's adWatch survey named Coke; 30.1% said Pepsi. Certainly that's sweet news for Coca-Cola, whose ads have been featuring Bill Cosby telling consumers that Coke is less sweet than Pepsi.

Before the celebration starts at Coca-Cola Co.'s Atlanta headquarters, it should be noted the national recall-share figure doesn't tell the whole story.

Actually, Coke's ads came to mind more often

Vol. 55, No. 86—ADVERTISING AGE (ISSN 0001-8899) is published twice weekly except three times a week the last week in March, the second week in September and except once a week the third week in November and the fourth week in December at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing offices. Send address changes to ADVERTISING AGE, Circulation Department, 740 Rush Street, Chicago, IL 60611.

'Hammer' falls

By JAMES P. FORKAN

NEW YORK—Criminals must love the irony: Mike Hammer, who on his weekly CBS-TV series has put so many crooks into the slammer, is now languishing in a jail cell, in the person of actor Stacy Keach.

Another ironic touch can be found in CBS' tune-in ad campaign for the Saturday series, themed "Nobody nails 'em like Hammer!"

For those in the tv business most directly involved in the series, however, the mood was one of concern. And when a London court refused to free Mr. Keach from a nine-month jail sentence on cocaine-smuggling charges, CBS decided to put the Saturday series "on hiatus" after its Jan. 12 telecast. Future plans are to be announced.

Given Mr. Keach's jail term, however, some CBS sources hinted the future for "Mickey Spillane's Mike Hammer," as the show is called, appeared dim. Another factor working against "Hammer's" renewal is the so-far sluggish ratings. The series has averaged only a 23 share in the 12-week Nielsens through Dec. 16, a level it held from the November sweeps into this month.

CBS and the show's co-producers, Jay Bernstein Productions and Columbia Pictures Television, were forced to halt production this month, following Mr. Keach's imprisonment in England on the drug charges.

Thus far, 14 episodes have been finished, with eight yet to be shot (AA, Dec. 17). Of the 14 originals,

(Continued on Page 37)

Issue schedule for the holidays

There will be no Thursday issues of ADVERTISING AGE Dec. 27 or Jan. 3 because of the holidays. This issue includes the Special Report on International Marketing. Our annual Forecast & Review issue, which includes our selection of Adman of the Year, will be published Monday, Dec. 31.#

Philip Morris gives Marlboro 25s more country

By WILLIAM F. GLOEDE

New York—Marlboro smokers will get a "lot [more] to like" as Philip Morris USA takes the 25-pack version of its flagship brand into a national rollout.

Marlboro 25s will enter 46 states on Jan. 1, backed by a heavy print and outdoor campaign via Leo Burnett USA, Chicago.

The advertising will not use the familiar Marlboro Man, though it will capitalize on his image by picturing the new packaging beside a pair of spurs. Marlboro Red and Marlboro Lights soft packs will be included in the introduction.

Marlboro 25s will not be available in the District of Columbia, Montana, Nevada, New Jersey and New York. PM believes that tax laws in those jurisdictions disproportionately increase the price of a 25-pack.

Unlike competing brands, Marlboro 25s will not be sold at a discount; the 25-pack will sell for 25% more than the 20-pack. Cartons will contain eight packs of 25, or 200 cigarets—the same number as in traditional cartons.

The national rollout comes after six months of successful testing—first in Atlanta; Hartford, Conn., Indianapolis and Spokane, Wash., and then later in six southeastern states.

Observers believe PM's strategy in developing a 25-cigaret pack version of the Marlboro brand is to increase share by increasing consumption.

Trade sources say that where the 25-pack has been in test, 70% of its sales have been to regular Marlboro smokers.

"I think they're taking a page out of drink [alcoholic beverage] marketing—the idea that consumption goes up to availability," said John C. Maxwell Jr., tobacco industry analyst for Laidlaw-Ansbacher, New York.

Marlboro is the nation's largest-selling cigaret. Mr. Maxwell's yearend analysis of the cigaret market reveals that the brand has a 21.4% share of the market, up more than a full percentage point from '83.

The rollout of Marlboro 25s is the first U.S. introduction of a regular-price (per unit), branded smoke in the 25 configuration. But the 25-count is the norm overseas and in Canada.

R.J. Reynolds Tobacco Co., Winston-Salem, N.C., has successfully rolled its Century 25s national (minus the same five areas as Marlboro 25s), but it is sold at the same price as 20-to-the-pack brands.

Mr. Maxwell's yearend analysis puts Century's share at 0.9% of the market; a 0.5% share usually is enough to guarantee brand success in the cigaret business.

Brown & Williamson Tobacco Corp., Louisville, Ky., also is testing 25-cigaret packaging in its Richland brand.

Like Century, it sells for the same price as traditional 20-smoke packs. Richland is available in 20% of the country.#

B&W promotes 3 execs

Louisville, Ky.—Three top executives at the Brown & Williamson Tobacco Corp. are climbing to the upper rungs of the corporate ladder.

John Alar, 58, has moved to the new post of vice-chairman from president-chief operating officer. Succeeding him is Thomas Sandefur, 45, formerly exec vp. Richard Blott, 42, formerly senior vp-corporate marketing, succeeds Mr. Sandefur.

B&W is the nation's third-largest tobacco marketer.

The appointments come at a time when it has adopted a more aggressive marketing strategy in introducing new cigaret brands into test markets and developing a complete line of generic and private-label products.#

adWatch

(Continued from Page 2)

than did Pepsi's only in the South Central states. Its whopping 42%-to-24% lead over Pepsi in that "home-field" area was enough to give it the national title.

Purchase, N.Y.-based Pepsi-Cola Co. remained the recall-battle winner in the Northeast (32% for Pepsi versus 26% for Coke), North Central states (37% versus 24%) and the West (29% versus 26%).

Over-all, however, it came up 0.5% short of Coke.

Perhaps Pepsi should book Michael Jackson for a free concert in Atlanta.

The soft-drink category is only one of several where shares of advertising recall vary significantly from region to region.

Anheuser-Busch's Budweiser, for example, is the national king of beer advertisers. Last month, its advertising came to mind first for 15% of the sample, compared with 8.4% for No. 2 Miller, 8.2% for No. 3 Lite beer from Miller and 7.7% for No. 4 Coors.

In the Northeast, Miller is No. 1 with Bud second. In the South, recently introduced Coors is a close No. 2 behind Bud. Miller Lite is second to Bud in the North Central states, with Coors No. 3.

Airline advertising is even more prone to regional favoritism. The national order of finishes last month was American (13.5% of first mentions), United (13.3%), Eastern (9.3%), Trans World Airlines (7.3%) and Delta (5.7%).

Regionally, recall of those carriers' advertising varied according to the strengths of their schedules in those areas.

In the West and North Central states, United's recall score was highest. In the South Central states, American and Eastern are deadlocked for the No. 1 spot, with Delta close behind

American rules in the Northeast, followed closely by Eastern and then United.

A similar pattern of regional differences surfaces in the hotly contested coffee category. The share of recall for General Foods Corp.'s Maxwell House rose 2.9 percentage points nationally to 23.1% last month, pulling it almost even with the category leader, Procter & Gamble's Folgers (23.9%).

Maxwell House already is the leader in the Northeast, where it came to mind first for 36% of the sample, compared with 13% for Folgers.

But the tables are turned in the West: 28% for Folgers versus 7% for Maxwell House.

What these regional peaks and valleys amount to is reaffirmation of a basic marketing tenet: Every marketing war really is the sum of skirmishes for consumers' attention fought daily in every region.

AdWatch is a joint project of Ad Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising in several product categories that first comes to mind from all seen, heard or read in the previous 30 days.

Last month, 1,254 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variations.

Among other changes last month:

- Regional variations aren't a factor in the **fast-food** category. McDonald's Corp. is No. 1 everywhere. Still, the Battle of the Burgers has resulted in steady ups and downs in ad recall for the major chains. Last month, it was Wendy's International's turn to suffer a decline.

Caught in an advertising valley between the phaseout of "Where's the beef?" Part III and the beginning of the "Parts is parts" Challenge of the Chicken campaign, Wendy's share of first mentions dropped 8.7 percentage points to 18.7%. McDonald's increased its share, to 39.7% from 35.9%.

Burger King Corp.'s share of first mentions inched up to 13.2% from 10.5% in October.

- Apple Computer again is widening its lead in the **computer** category. Last month, its share of first mentions rose 4.2 points to 37.5%. No. 2 IBM Corp. lost some of the ground it had gained in October, falling to 13.7% from 16%. Commodore International held the No. 3 spot with 7%.

By the way, NCR Corp. quietly has slipped into the No. 5 spot with a 2.8% share of first mentions. "Surprised?" as spokesman Dom DeLuise asks.

- Villa Banfi USA's Riunite, which has increased its tv exposure lately, has regained the top spot in the **wine** category with a 2.8-point gain to 10.2%. Gallo, from E. & J. Gallo Winery, falls to No. 2 with 8.9% of first mentions. Taylor California Cellars' ad recall is third at 3.3%. Gallo's advertising remains the best recalled in the West, however.#

'Hammer'

(Continued from Page 2)

nine already have aired. To give itself some planning time, CBS earlier had slated one repeat episode for Dec. 15 and inserted one of last season's two "Hammer" tv movies ("More Than Murder") into the Dec. 22 lineup.

As if the production and scheduling woes were not enough, sponsor pullouts were said to be another possible headache for executives at Black Rock. Some industry sources said some advertisers, not wanting to be tarred by Mr. Keach's drug problems, are said to have asked to have their spots shifted elsewhere between now and "Hammer's" finale.

However, a CBS spokesman said the network was unaware of such requests, and a couple of major agency executives said they had heard of no such plans at their shops or others. Prudential Insurance Co., Newark, said to be one sponsor planning a quick exit, declined to comment.

Meanwhile, Coca-Cola Co., Atlanta, as the parent of Columbia, "Hammer's" co-producer, is said to have been fretting about its own image and how it might be tarnished by even an indirect association with Mr. Keach's cocaine use.#

AT&T dials up shop shootout worth $50 M

By STEWART ALTER

New York—AT&T in February will stage a $50 million winner-take-all creative shootout for its entire consumer-products account, now split between N W Ayer, D'Arcy MacManus Masius Worldwide and Foote, Cone & Belding.

Only the three incumbents have been invited to pitch the AT&T Information Systems Group business. DMM, the current agency for AT&T consumer sales and service, and Ayer, which handles AT&T brand telephones, have the most at stake: More than $20 million each in billings. Ayer, however, also handles corporate and U.S. residential long-distance advertising, which will not be affected by the consumer-products consolidation.

FCB clearly has the most to gain, since its current AT&T assignment for cellular phones is a growing but still small account. The half-day presentations begin Feb. 7.

In recent months, AT&T has reorganized its Information Systems Group, including placing all consumer-product advertising

Landau ponied up cash for horses

By ROBERT RAISSMAN

New York—Testifying at a creditors' hearing last week, Robert Landau, chairman of the bankrupt Robert Landau Associates, a sales promotion/sports marketing company, said he took a cash advance of approximately $1 million from the company to purchase—as an individual—a partnership interest in thoroughbred racehorses.

Mr. Landau's revelation concerning the investment in the horses came during questioning concerning cash advances Mr. Landau had taken from his company. Mr. Landau said one cash advance was for about $1 million and was used to purchase the horses. He did not specify when he had taken that cash advance. He took additional cash advances through the course of 1983 and 1984, according to his testimony.

RLA filed a petition for reorganization under the Federal Bank-

Last Minute News

'Sensational offer' draws Ward's ceo Pistner

Chicago—Stephen Pistner, 52, ceo of Montgomery Ward & Co., has resigned, *Crain's Chicago Business* reports. Richard Tucker, a top executive of Mobil Corp., Ward's parent, will take the post temporarily. Under Mr. Pistner, Ward's returned to modest profitability earlier this year, but reported a $15 million net loss for the third quarter compared with a $2 million profit a year earlier. "A sensational offer somewhere else" is Mr. Pistner's primary reason for leaving, sources say.

John Sculley

Marketing methods bring Apple back

By BRIAN MORAN
and CLEVELAND HORTON

When he took on the top marketing mantle at Pepsi-Cola Co. back in 1970, 30-year-old John Sculley's first assignment was one that had confounded predecessors for years: Develop a bottle that was snappier than rival Coca-Cola's.

Millions of dollars were poured into the effort, but Pepsi's packaging mavens continually came up dry in attempts to top Coke's unique hourglass bottle. Meanwhile, Mr. Sculley thrust the company into its first massive consumer research study and found there was no limit to how much Pepsi people would guzzle once they had it.

With that discovery, Mr. Sculley was inspired to abandon the Coke bottle-buster effort and introduce large-size plastic containers and multiple packs of bottles and cans, innovations that rallied Pepsi's independent bottlers and went on to revolutionize the soft-drink industry. Mr. Sculley's decision to carve out a new "heavy users" market and to unite Pepsi's 400 franchisees catapulted the company to unprecedented growth in the battle against Coca-Cola Co.

As president-ceo of Apple Computer for the last 20 months, Mr. Sculley has borrowed a few pages from his Pepsi book and brought Apple back from the brink of extinction in the personal computer market.

Recognizing that dealers account for some 80% of the industry's sales, Mr. Sculley scuttled Apple's network of outside reps and marshaled a 350-person sales force to blunt IBM Corp.'s mounting domination. He expanded Apple's retail network by 33%, to 2,000 dealers; tripled Apple's advertising budget to $100 million, and supported new products with attention-grabbing campaigns like the Macintosh "1984" tv commercial and sole sponsorship of *News-*

Hot new items light fire in food, haircare

By ALAN B. MILLER JR.

SAMI retail food store figures have identified the product categories with the highest growth rates for 1984.

Mr. Miller is vp-sales service for SAMI (Selling Areas-Marketing Inc.), New York.

Within each product department we have pinpointed the five categories with the most significant jumps in volume for the year ending Nov. 9 versus the corresponding year-ago period.

In several instances, the expansion has been the result of new products. These include the beverage and frozen-food categories as well as hair-setting needs, with new hair-styling mousse products, and oven cleaners, where new items in pad form have generated new sales volume.

In a number of instances, new-products growth has led to the establishment by SAMI of entirely new categories. The frozen single-dish category volume approached $2 billion in annual sales and became a product group, subdivided into seven different categories of entrees. Frozen quiche and pancake batter became important enough to qualify as a category, as did frozen sandwiches, corn dogs, frozen seafood cocktails and frozen microwave oven popcorn.

In the nonfrozen area, sales growth led to the new categories of mildew removers, plastic storage bags, fruit rolls and bars and refrigerated bread dough, pie crust and Mexican foods.

Dry grocery: Food

Excluding the low-volume miscellaneous fruit juice category, which had a high percentage increase, the highest rate of growth in the food categories was diet miscellaneous foods, where the new Carnation and Slim Fast diet lines are found. Aseptic packs, which over-all passed the 1 billion-a-year unit sales level during 1984, contributed to the growth of blended fruit juices.

Bottled water has been on a roll ever since Perrier passed the Statue of Liberty and became an American household word.

In 1984, sales of fruit rolls reached the $100 million level and then passed it, and as the year drew to a close, products in bar form rather than rolled fruit became the next stage of evolution.

Prepared rice, particularly flavored casseroles, with Lipton as a new entry, grew 19% and the category was nearing $200 million at yearend.

Dry grocery: Nonfood

There were no outstanding high-volume innovative new products to push volume ahead in the nonfood sector. The highest growth rate was achieved by the commodity rock salt category—the result of

From heroes of summer to a fallen queen

The past 12 months overflowed with newsworthy events. Here are 10 marketing-related events ADVERTISING AGE *feels were the most noteworthy.*

The 1984 Summer **Olympic Games** in Los Angeles shaped up as a triumph for American commercialism. Despite the withdrawal of the Soviet Union and other Eastern-bloc nations, the first-ever privately financed games not only paid for themselves, they made money. Sponsors and licensees—Coca Cola Co., Anheuser-Busch and Levi Strauss Co. among them—contributed 30% of the games' $500 million budget. The Los Angeles Olympic Organizing Committee ended up with a surplus most recently estimated at $215 million.

ABC-TV, which broadcast the games, also made lots of money. When the Soviets pulled out of the Los Angeles Olympics, tv executives feared they might have to make restitution to advertisers if

Tales of '85: What to buy —and why

Many of the categories that will make marketing news in 1985 already created a stir in 1984. Here are 10 areas the editors of ADVERTISING AGE *think will be especially active next year.*

Detergents

This year's "Battle of the burgers" may give way to the "Battle of the soaps" in 1985.

After years of relative quiet, laundry detergents—especially liquids—are poised for their biggest sales push ever.

Procter & Gamble's $50 million national introduction of liquid Tide is expected to prompt ad spending retaliation from Colgate-Palmolive and Lever Bros.

In addition to P&G's liquid Tide, Colgate is preparing to introduce Dynamo II, reformulated and packaged in neon green containers, said an industry source. And Lever Bros. is preparing an estimated $50 million ad campaign for its Surf laundry detergent.

"There's been nothing like this [activity] since the innovations with lower phosphate levels several years ago," said Drexel Burn-

(Continued on Page 24)

Events

(Continued from Page 2)

ratings didn't live up to expectations. It didn't happen. As the U.S. teams continued to win—and win big—an estimated 180 million people tuned in to watch some of the network's 180 hours of coverage. During prime time, the games achieved a whopping 45 share of the viewing audience.

The success was particularly welcome by ABC since the ratings for its coverage of the Winter Olympics in February fell far short of expectations.

Tv coverage of the winter event in Sarajevo averaged an 18.2 rating, well below the 23.7 average posted for coverage of the 1980 winter games in Lake Placid.

ABC's February telecasts were hurt by the time difference (people knew the outcome before the delayed telecasts were aired), weather problems that prevented showing some popular events live on weekends and the poorer-than-expected showing of some U.S. participants. ABC-TV offered make-goods to winter games advertisers who complained of the viewer shortfall.

Commercials accompanying the games were uncommonly tasteful and well done. Nike, the Beaverton, Ore.-based sportswear company, turned Randy Newman's spunky "I Love L.A." video into a commercial for its apparel, placing Summer Olympic hopefuls in the paean to Los Angeles. Levi Strauss presented its 501 jeans in subtle, urbane and daring commercials that entertained as well as moved merchandise.

While some criticized the chauvinistic spirit of the Olympics coverage, the games did spark genuine patriotism within the U.S. population. Without Russian competition, U.S. teams pulled in 170 of the total 1,511 medals awarded—80 gold, 61 silver and 29 bronze.

While many of the Olympic athletes had great expectations that Olympic gold would be their ticket to endorsement heaven, only a few have hit it big so far. Mary Lou Retton, the diminutive gymnast who scored perfect 10's in competition, was among the first, signing a four-year promotional deal with haircare marketer Vidal Sassoon Inc., along with swimmer Steve Lundquist.

Others, such as runner Mary Decker, who seemed a sure bet for lots of promotional work going into the games, lost out. She and South African runner Zola Budd played footsie on the course, forcing Ms. Decker out of the race. Then, in a postrace press conference she displayed a lack of character that may have harmed her reputation permanently.

LAOOC chairman Peter Ueberroth received much of the credit for the games' success. He moved on to a bigger challenge, becoming commissioner of Major League Baseball.

The year's biggest advertising account—in impact, at least—had to be the one that gave this country "four more years." About $22 million worth of Tuesday Team-created **election** ads helped push President Reagan to a historic landslide victory in November.

Walter Mondale spent even more, an estimated $25 million, or about $5 for each person who lives in Minnesota and the District of Columbia, the only jurisdictions he carried.

Elections

More ads than ever

But advertising was just part of a more significant phenomenon—the "media events" that have emerged as the core of political campaigns, presidential or otherwise. In 1984, the media, through advertising and news coverage, reinforced their position as a premier participant in modern-day elections.

Although the networks scaled back on-air coverage of the Democratic and Republican national conventions this year, the quadrennial meetings still managed to rake in an estimated $30 million in ad revenues. This is not to mention the working journalists at the conventions, who outnumbered the delegates by 10 to 1 in Dallas.

The presidential debates, with one vice-presidential squareoff tucked between, also captured their fair share of attention—on tv, of course. The President's performance during the first match appeared just bad enough on the tube to make the race more interesting as the Nov. 6 election approached.

But in the end, a President who is possibly the most adept of media handlers in high-level politics won more than handily. It was a victory that, for most part, won the plaudits of those in business.

The confluence of politics, media and advertising invaded more than the presidential race in 1984. In fact, a list of campaign issues across the country appeared at times to be headed by the issue of dirty advertising.

The race for the U.S. Senate in Texas, for instance, ended up with the candidates asking voters to judge whose ads were dirtier. In North Carolina, the senatorial candidates spent in the neighborhood of $25 million and traded charges over each other's ads.

Perhaps foreseeing this state of affairs, the American Assn. of Advertising Agencies in the spring set up a program to issue citations to campaigns found to be unethical. The Four A's did not formally cite anyone this season, but it could probably rest assured that, if political trends continue, it will do so in elections to come.

Company-sponsored concert tours came of age this year, when Pepsi-Cola USA shelled out $10 million to link up with rock superstar **Michael Jackson** and his brothers in what may be their last group appearances. The Jacksons' Victory Tour, as the concert series was called, paid off in just five weeks, according to Pepsi. The

(Continued on Page 27)

Two-bit papers disappearing

By WILLIAM F. GLOEDE

The 25¢ newspaper may make the endangered species list in 1985, but it probably won't disappear, according to newspaper executives.

The consensus: The number of dailies selling for a quarter probably will fall precipitously during the next 12 months as prices move toward the 35¢ level. But some publishers are reluctant to raise prices, at a time when a 20-year downward trend in circulation is showing signs of reversing.

The American Newspaper Publishers Assn., Reston, Va., reported 1,306 newspapers cost 25¢ at the end of 1983, another 80 were 30¢ and 16 cost 35¢. The ANPA's 1984 survey won't be completed until late Februry, but it expects to find a shift away from 25¢ toward at least 30¢ and probably 35¢.

"If the economy holds, I think [papers] will go toward 35¢," said William Keating, senior vp, Gannett Co. and president of its newspaper division. "I find it difficult to believe that they're not all already moving toward 35¢—I think they're missing a lot of revenue."

Mr. Keating represents one side of an issue that is dividing newspaper executives pretty much along the lines of their markets. Robert Johnson, president-chief operating officer, Times Mirror Co.'s *Newsday*, represents the other side.

"I don't think you're going to see wholesale price increases across the country," said Mr. Johnson. "I think it really depends on where the [newspaper] markets are."

Mr. Keating's newspapers are usually the only papers serving a market. Mr. Johnson's newspaper, though entrenched in its primary marketing area of Long Island, is doing battle with the New York dailies for city sales.

Newspaper executives are debating the merits of raising prices at a time when circulation among morning newspapers has increased at least 1% a year for the past two years. Traditionally, a newspaper that raises its price expects a 4%-to-5% decline in circulation. It is believed that the paper regains the lost circulation over time.

Besides increased circulation, newspaper ad revenues in 1984 also have risen—by 15% over 1983 —according to preliminary estimates.

Next spring, though, newspapers are expecting a 6.5% increase in the price of newsprint, which accounts for roughly 29% of publishing costs at the large metros and about 10% at smaller dailies. A projected 8% rise in ad rates will offset the newsprint price increase in 1985, but publishers have heard advertisers complain about increasing ad rates.

Industry analysts and observers have predicted that newspapers, in order to remain competitive with other media, will have to begin shifting more of their costs to readers from ad revenues.

Among major metro newspapers, three of the four New York dailies —the *Times*, *News* and *Newsday*—do not plan to raise their 30¢ (daily) newsstand prices. This would leave the *New York Post* alone at the 35¢ level. The *Times* plans to raise the newsstand price of its Sunday paper to $1.25 from $1, effective Jan. 6. The paper's national editions will remain at 50¢ daily and $2.50 Sunday.

In Philadelphia, Knight-Ridder Newspapers' *Inquirer* and *Daily News* are "seriously considering" raising newstand prices from 25¢ to 35¢. Carleton Rosenburgh, vp-circulation for both papers, said he believes the higher newsstand price may increase home-delivered circulation, the audience advertisers desire most.

Gannett plans to increase the newstand price of 22 of its newspapers to 35¢ (AA, Dec. 17); it already has 22, plus *USA Today*, at 35¢.

The *Los Angeles Times* plans to remain at 25¢ through 1985, said Vance Stickell, exec vp-marketing.#

Landau

(Continued from Page 1)

ruptcy Act Sept. 14 (AA, Sept. 20). Mr. Landau said he used most of the $1 million advance to invest in the racehorses.

Mr. Landau, who did not need the approval of any other RLA official to secure the cash advance, said the racehorses were located in Kentucky. He did not say how many horses were owned by the partnership, nor did he identify the participants in the partnership.

Mr. Landau did not return phone calls last week.

During his testimony Mr. Landau also touched on why in 1983 he borrowed about $1.5 million from Dittler Bros., an Atlanta printing concern, and what he did with that money. Mr. Landau said he secured the loan from Dittler a year before the 1984 Summer Olympics, which RLA catered for ABC-TV Network. RLA needed the money, he said, to make deposits for a variety of essentials—including tents—for the ABC Olympics assignment.

When Mr. Landau was asked what he did with the money secured from Dittler Bros., he said it went into the general accounts of RLA and was separate from the $1 million cash advance. In order to acquire the loan from Dittler, Mr. Landau persuaded John Lazarus, then vp-sports marketing and sales at ABC, to sign a letter assigning payment of the RLA account directly to Dittler Bros.

Mr. Lazarus resigned his post at ABC last October following an internal investigation by ABC of the network's dealings with RLA (AA, Oct. 1). ABC said Mr. Lazarus resigned because he and ABC could not agree on an employment contract. Mr. Lazarus is now a principal in Dexel Corp., a sports and entertainment marketing company.

Dittler Bros. also has filed suit against ABC Inc. seeking repayment of its loan to RLA. ABC maintains it is not liable for the repayment, saying it paid the money it owed directly to RLA.

During the hearing Mr. Landau said he was looking for additional funds to support a reorganization of the company. He indicated that it would be difficult to reorganize if these funds were not acquired.

Since RLA filed the petition to reorganize, it has acquired one new account, Kukje, an importer/exporter. A spokesman for Kukje said RLA was acting as a consultant on a sports footwear product. The assignment is worth approximately $30,000.

Mr. Landau also testified that Albert Spevak, vp-general counsel, RLA, received a letter of resignation from Nathan Unger, senior vp-chief financial officer, RLA, in mid-December. Mr. Landau said he had not seen Mr. Unger's letter of resignation. Mr. Unger's attorney, Jeffrey Zivyak, did not return phone calls.#

SAMI

(Continued from Page 2)

a lot of snow early in the year.

Sales of convenient fireplace logs and bricks grew 30%, but on a relatively small volume base. That also was true for upholstery cleaners, where vinyl cleaners showed growth, and for soaps and bubble baths for children, a modest volume category in which a 13% gain in tonnage does not convert to a significant number of sales dollars.

Among oven cleaners, the S.O.S pads offered by Miles Laboratories, and Easy Off, marketed by American Home Products, continued to provide additional unit sales in this category.

Frozen

If one were to single out a section of the store with the best track record of growth in 1984, it would have to be frozen foods.

Each of the five categories with the highest growth rates has been aided by new-product launchings. Four out of the five frozen-food categories with high growth in 1984 did not even exist as a SAMI category as the year began. Spawned by the success of Stouffer, Campbell Soup and Conagra high-quality entrees and dinners, new-product activity was at a fever peak in these new universes.

Only frozen hors d'oeuvres was classified as a SAMI category as 1984 dawned. The growth in this category may be a reflection of a "good times" increase in home entertaining.

Refrigerated foods

Much of the growth among refrigerated foods comes from the expansion of beverages. The attention paid to Procter & Gamble's buildup of Citrus Hill orange juice appears to have focused attention on the potential of other juices and drinks, since three of the five top gainers were beverages.

A small part of the 17% gain for refrigerated yogurt is the result of a change in distribution method of Dannon from store delivery to warehousing in 14 SAMI markets, but most of the vitality is found among leading brands as well as new specialty items such as Kellogg's Whitney's.

The year saw a continuation of the long-term trend toward refrigerated salad dressings, although the current volume of $67 million pales in comparison with shelf-stable products, with 10 times the annual volume of refrigerated.

Health & beauty aids

During the first 9½ months of 1984, unit sales of all health & beauty aids tracked by SAMI combined advanced 2.5% compared with the corresponding 1983 reporting period. The focus of attention in this product department was among the hair-styling mousse products, which proliferated as the year progressed.

Eyecare products, particularly those used in conjunction with contact lenses, can be counted on to grow in food stores at a double-digit rate, and 1984 was no exception.

Unit sales rose 20%, and this was on top of an increase of 18%, pitting 1983 against 1982.

The increase in the sales rate of appetite suppressants may correlate with consumer interest in reduced-calorie, high-quality convenience foods, touched on earlier. Unit sales of sleeping aids grew 16% in 1984, and lipcare products enjoyed a bounce of 12%.#

Retail shops nibble at Detroit

GM shift cheers specialists

By JESSE SNYDER

DETROIT—Auto marketers, led by General Motors, may be calling in specialist retail agencies to pump more life into local efforts.

At stake is about $200 million spent by factories on dealer ad associations and dealer advertising.

The new agencies would supplement traditional image advertising by coordinating special sales and regional marketing, presenting further evidence that the old ways of selling cars are changing dramatically.

GM is at the forefront of this change from heavy reliance on big national ad dollars, but others are stepping up local marketing. GM's actions are a reflection of its "historic" realignment into big and small-car groups (AA, Dec. 19, '83).

"General Motors is actively considering outside agencies for special assignments or more narrowly targeted markets," disclosed Robert Stempel, vp and head of the Buick-Oldsmobile-Cadillac Group.

The additional GM agencies would typically be small and highly specialized and could be hired directly through car divisions or indirectly through existing agencies, Mr. Stempel said.

The impact on agencies will vary. Chevrolet's longtime agency, Campbell-Ewald, missed out on $10 million the car maker awarded this fall to Vic Olesen & Partners, Los Angeles, for a California campaign. As to incumbent dealer ad association agencies, the hiring of national retail agencies could hurt business, said Dave Murley, co-director of the Kelling-Murley retail automotive division of W.B. Doner & Co., Southfield, Mich.

"Some could continue as they are, but it could create substantial competition for other agencies," he said.

The first retail-oriented agency for an auto maker will come in 1985, and by the end of this decade virtually all auto marketers will use one to supplement conventional advertising, predicted Lee Galles, chairman of Galles Advertising and its subsidiary, Competitive Edge.

Mr. Galles said he wants his agency to be the leader in the shift, and he has opened a

(Continued on Page 62)

Lady's junk is Goldleaf booty

By LISA PHILLIPS

NEW YORK—The Statue of Liberty is for sale, albeit in bits and pieces.

Goldleaf Corp., headquartered in another New York landmark, the Empire State Bldg., holds exclusive rights to market materials discarded during Miss Liberty's face-lift. The company, formed expressly for this purpose, is the brainchild of John Stocks, a real estate developer based in Tallahassee, Fla.

Last spring, Mr. Stocks discovered that no plans had been made to salvage materials—scraps of metal, rivets, stair treads and the like—cast off in the restoration project for the famous statue. He negotiated a contract with the National Parks Service and the Statue of Liberty/Ellis Island Foundation, headed by Chrysler Corp. chairman Lee Iacocca, to purchase what in most construction projects amounts to garbage. Now Mr. Stocks wants to sell it to corporations and the American public.

John Roarty, vp-marketing at Goldleaf, says the company at this point has a twofold strategy for marketing the scraps in "an attactive and dignified manner." Goldleaf will offer some of the scraps to corporations for use in promotional tie-ins and as giveaways. The Miss Liberty refuse will also be sold directly to consumers through department stores and mass merchandisers, Mr. Roarty said. He added that no firm orders have been made. Delivery of the items is scheduled for mid-March.

A few of the more marketable products may be made available through direct-response advertising, Mr. Roarty said. The size of the retail advertising budget will depend on how extensively the media covers the restoration and rededication events, and whether co-op advertising can be arranged. Corporations purchasing products

'Get me a refund or give me a refund'

Chip off the old Block?

By GARY LEVIN

H&R Block's traditional list of 17 reasons "why you should let us prepare your income tax returns" boils down to only one big reason this year: Larger refunds from the government.

The 30-year-old Kansas City-based company will test a guaranteed highest-refund offer beginning today in selected markets. The offer promises a free tax return if Block doesn't deliver the largest IRS refund available.

The promotion will be offered at both company-owned and franchised locations in Chicago, Miami, Syracuse, N.Y., and in smaller Texas markets, said Harry Buckley, Block's director of marketing and new service development.

Separately, Block this year will experiment with ad schedules that exclude newspapers to test that medium's ad efficiency. Though Block's ratio of broadcast to newspaper spending already is 6-to-1, said Mr. Buckley, broadcast-only schedules will be used in Atlanta, Baltimore, Denver, Memphis, Philadelphia, Phoenix, Tucson and other markets to see how newspaper ads affect the seasonal service. Block devotes only about 10% of its broadcast budget to radio.

Block also will test Spanish-language broadcast spots in Miami, joining those previously aired in Chicago, Los Angeles and New York.

The new campaign—minus the by-now-familiar face of company president Henry Bloch—features testimonials from satisfied customers saying, "We couldn't have done it without you," in 30-second spot tv and radio ads.

The company's 1985 ad budget is $7 million, up from $6.5 million last year.

It spent $26.2 million for all businesses on advertising and market-

(Continued on Page 64)

Seven-Up food unit tries Nouvelle idea

By SCOTT HUME

Seven-Up Co. is taking a major step toward becoming a serious player in consumer-foods marketing.

The St. Louis-based soft-drink bottler's Foods Group is introducing to selected Northwest test markets a line of freeze-dried soups under the Nouvelle name.

The five-item line—beginning to appear now on retail shelves—includes lobster bisque, cream of asparagus, cream of broccoli, potato-leek and clam chowder.

Sold in single-serving, 1.2-oz. foil packs, the Nouvelle soups will be backed by heavy local advertising that includes tv, magazine and newspaper buys. Tv spots are to begin this week. Print ad copy proclaims "Soup so delicious you won't believe it came from a package."

Doyle Dane Bernbach, Los Angeles, which this summer was assigned several new products from Seven-Up's Foods Group (AA, Aug. 6), handles.

Seven-Up Co. officials declined comment on the test, and the initial ad budget is not known. However, when DDB was awarded the Foods Group account, annual billings were estimated at $4 million to $6 million.

The 7UP Foods logo, similar to the familiar soft-drink logo, appears on the soup packages. Also included is the toll-free Consumer Hot Line number the company includes on its soft-drink cans.

The soup test represents Seven-Up's most serious attempt to enter a retail food category since it began reorganizing its Foods Group. Last summer it began testing JuiceUp lemonade and lemon-limeade frozen concentrates in Erie, Pa., and Phoenix (AA, June 18). Earlier it tested cello-packed fresh lemons carrying the 7UP Foods logo. Those items are the products of Ventura Coastal, Ventura, Cal., a Seven-Up subsidiary that produces private-label processed citrus products. The Foods Group's other units are Chef Master, Irvine, Cal., which produces flavorings, and Freeze Dry Foods, Albany, Ore.

A patented dehydration process called Flash Fresh developed by the Freeze Dry unit (now rechristened the Flash Fresh division) persuaded Seven-Up to make freeze-dried soups its first major noncitrus-foods endeavor, sources say.

The $420 million dry-soup category is not considered a strong growth market. It is dominated by Thomas J. Lipton's Lipton brand, which has a 53% sales share. But if Seven-Up's Nouvelle brand can grab a reasonable share of that market, more freeze-dried products are expected to be tested later this year.#

Kidding around with Sunkist

Sunkist Growers aims at children in two new spots breaking this week. In one, an older boy, under the pretense of showing a younger tyke how to pitch, steals his orange and devours it. Foote, Cone & Belding, Los Angeles, handles. *See story on Page 62.*

Seniors sure cure for Puris

By STEWART ALTER

New York—Marty Puris faced a problem that could be devastating for an ad agency president.

Two of three top creative managers at Ammirati & Puris have just left to start their own agency, Angotti Thomas Hedge, leaving A&P to wrestle with account reassignments, promotions and hirings.

But the problem is not disruptive said Mr. Puris, because "the concept of this place is to have senior people, and it is easy to shift one team of senior people to another team's job."

"Senior" in this sense refers to a level of experience. A senior creative person is someone "who can do television advertising by himself," Mr. Puris explained. A medium-level creative person—the agency's minimum hiring level—is "someone with limited exposure in television."

A "seniors-only" policy is not a common one in the industry. But it probably helps explain why midsize agencies such as Ammirati & Puris can continue competing in a world increasingly dominated by

Reruns redux: Oldies hit vcrs

By SUSAN SPILLMAN

New York—Videocassette recorder owners can start collecting cassettes of their favorite old tv series as a growing number of studios are opening their vaults for such shows as "Topper," "Mary Hartman, Mary Hartman" and "Death Valley Days."

And the list is growing. In March, Paramount Home Video will release 10 episodes of the "Star Trek" series on cassette. The studio also is considering marketing cassettes later this year of the classic cop show "The Untouchables" and the short-lived ABC series "Working Stiffs," which starred the now more famous Michael Keaton and Jim Belushi. Meanwhile, Embassy Home Entertainment will bring out three more episodes of "Mary Hartman, Mary Hartman" in March and plans to release in 1986 two other Norman Lear cult series, "Fernwood 2-Night" and "All That Glitters."

Tv shows are "the newest emerging market for videocassettes," said Nick Santrizos, president, Thorn EMI, which last month released on cassette 14 episodes of "Upstairs, Downstairs." "Now that about 20% of all tv households own vcrs, it makes sense to sell such targeted programing."

Currently, fewer than 5% of all

Cigaret ads gains lead the pack

New York—Cigaret ad spending for October surged $4.4 million in the nation's major-market daily newspapers, says Media Records' Flash Report prepared for Advertising Age.

The cigaret category was the biggest percentage gainer among the categories surveyed. Its ad spending rose to $9.3 million, up 91.2% from October, 1983.

Department stores, newspapers' largest advertising category, increased ad spending 6.5%, to a total of $84.2 million.

Among other national categories boosting their ad spending, food stores were up 8.5% to $26.5 million; tv, phonographs and records, up 30.5% to nearly $15.5 million; publishing and media, up 24.1% to $14.4 million; airlines, up 13.7% to $14.2 million; new passenger cars, up 6.7% to $12.9 million; alcoholic beverages, up 14% to $3.7 million, and cosmetics, makeup and manicure products, up 61.3% to $374,120.

Categories that posted losses from October, 1983, levels were cameras, photo supplies and services, down 40.7% to $388,104; beverages-soft drinks-diet and non-diet, down 45.2% to $165,566; beverages-coffee and tea, down 45.6% to $87,985; sporting and leisure-time equipment, down 72.4% to $83,464; soaps, cleansers and polishes, down 59.9% to $82,219; headache remedies and sedatives, down 79.2%, to $4,741, and cold, cough and sinus remedies, down 99.8% to $460.#

FLASH REPORT: Newspaper advertising investment for October

Computer software sales boom through bookstores

Larchmont, N.Y.—Software sales through bookstores have jumped 60% this year to an estimated $30 million and should double in 1985, according to a market study published by Communications Trends.

About 2,500 bookstores carry software, up from 300 in 1983. Highest sales per outlet occur not in chains such as Waldenbooks or B. Dalton Bookseller, but in large independent and college stores, says the report, "Software and Bookstores, 1984-85: The Market Develops."#

S&I group invests in print ads

By JANET MEYERS

Washington—The Foundation for Savings Institutions this year will be banking on print advertising to accomplish what tv ads could not.

Mike Stevenson, FSI president, said goodby to the electronic medium that for years has absorbed the bulk of the foundation's multimillion-dollar budget.

Next month, he takes his $4 million 1985 budget to Sunday newspaper magazine supplements, relying on research that says he'll reach 73% of his over-45 audience that way. Last year, almost all the foundation's $4 million budget went for tv.

"We're reaching four times as many people in *Parade* as are watching the Super Bowl," he said. "We feel our message will not be lost in a lot of clutter."

"The foundation has been totally overwhelmed in tv," said Jacquie Ottman, senior account exec at Backer & Spielvogel, New York, the foundation's agency since 1980.

Mr. Stevenson is making the media switch at the same time he's changing the direction of the foundation's advertising—from image enhancement, such as making consumers aware that their deposits are federally insured, to product promotion.

If s&ls can attract more consumer dollars into Individual Retirement Accounts before the Internal Revenue Service's April 15 cutoff this year, the ailing industry will realize a much-needed cash infusion. The ranks of savings institutions have dwindled from 5,500 in 1980 to 3,200 in 1984, and few operate in the black, he said.

Mr. Stevenson believes effecting a change in investor thinking requires an advertising medium that gives people the opportunity to think. "We want to get them in an environment that offers them the time to read and discuss."

After concentrating $1 million in the first three months of the year-long campaign on wresting IRA business from mutual funds—a major IRA competitor—the FSI campaign will shift gears and start plugging services traditionally offered by commercial banks.

Not only will ads in *Family Weekly, Parade* and independent magazines be cheaper, he said, but he will reach more of his audience—older, more financially secure men and women. He can also promote each of his foundation's 2,000 members by listing local savings institutions on each ad.

The foundation and its members together will spend up to $14 million on the first-quarter IRA campaign, including local ads, direct mail and posters. That campaign breaks Jan. 27 in 587 Sunday magazine supplements with the message "Why have a retirement plan that's speculative when you can have one that's guaranteed?"

The gray 7-by-10-in. ad—not quite a full page—depicts a montage of newspaper articles from *Barron's*, with headlines from commodity futures, government bonds, money-market funds and stock-market indexes.

Copy in a white box reads "If your IRA is in a mutual fund, you might actually end up with less than you put in," adding that mutual funds are based on stock-market performance, making them too risky.

This year's roller-coaster market should work in the foundation's favor. Many funds had poor showings, and Mr. Stevenson hopes the magazine ads will hit soon after disappointed mutual-fund investors receive their depressing annual statements—making them prime candidates to switch IRAs to savings groups.

After April 15, the foundation will spend $3 million more for Sunday magazine advertising to win over business from commercial banks. The ads will focus on savings institutions' services such as checking accounts and small loans.#

NOTE: Figures in Parenthesis Denote Reported Newspaper Column Format. For example: (6)--Six Column Broadsheet. (T-7)—Seven Column Tabloid.

Source: Media Records

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodology to report comparable figures (1984 month vs. 1983 data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*):

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column formats.

8 column broadsheet/standards which have adopted a 6 column broadsheet/standard format are converted back to the original 8 column formats.

9 column broadsheet/standards which have adopted a 6 column broadsheet/standard format are converted back to the original 9 column formats.

6 column broadsheet/standards or tabloids which have a slight depth change in 1984 but did not change column format are converted back to original depth.

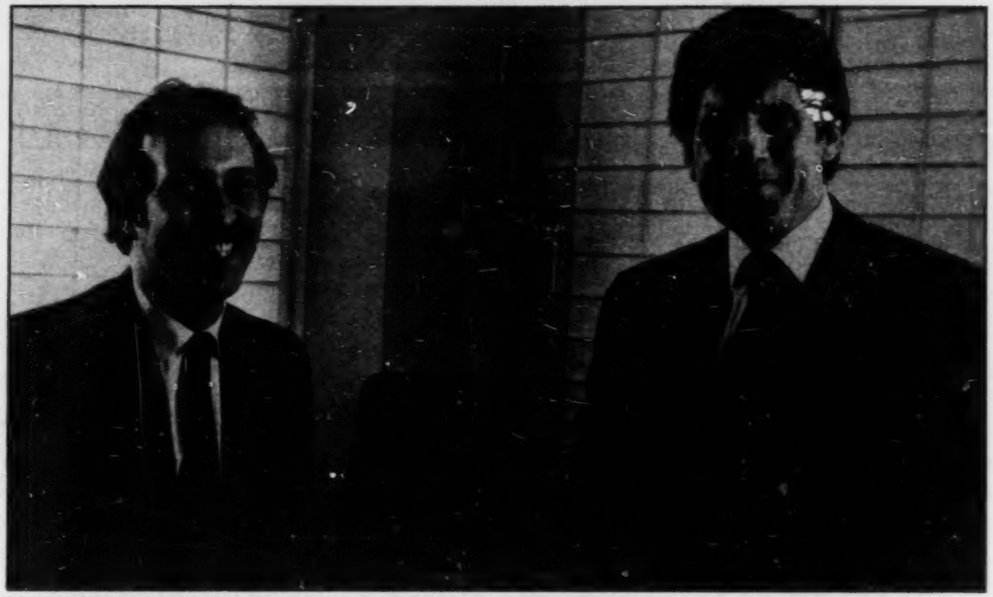
Chelsea execs snap at opportunity

Two 'risk takers' abandon security of their corporate nests

By CRAIG REISS



The principals of Chelsea Communications, Michael Yudin (l.) and Jeff Lawenda, left the security of their high-level positions at Reeves Cable and USA Cable Network, respectively, to strike out on their own.

Everything should have been perfect for Jeff Lawenda.

He was on the deck of a cruise ship, extra-dry martini in hand, peering out at the Atlantic vastness through dark-colored glasses, letting the hot sun off the Bermuda coast fill in the pin-stripes of his tan.

Mr. Lawenda had become a master salesman and programer in the button-down corporate world of broadcasting. He was the sales and program chief at USA Cable Network, a growing $40 million enterprise. The three-piece suit, the Windsor knot and the starched shirt collar were his coat of arms.

Everything about him spoke of success, from his understated confidence to his hair that had not been mussed in 20 years. Corporate life had been good to him. It was all breaking his way.

And yet there was something terribly wrong, something totally missing from his life.

Without warning, he turned to his wife on the chaise lounge beside him and uttered, "Michael's right. I should do it. I'm going to quit."

"Michael" is Michael Yudin, who at the time was exec vp at Reeves Cable, the New York production company that has produced more hours of basic cable programing than any competitor.

It was Mr. Yudin who had first approached Mr. Lawenda with the crazy idea that the two of them should chuck their security and strike out on their own, even though the world showed no glaring hunger for another barter-syndication and program development company.

Like anyone else who had left the corporate nest seeking fortune in the business of dreams, Mr. Yudin was convinced he and Mr. Lawenda could simply do it better.

Their plan was an update on one of the oldest practices in tv. They would create programing for a particular advertiser. The client would pay part of the production cost and take some of the commercial time in the show or series. The two men would barter syndicate the programing to tv stations, networks and cable channels.

They had all the necessary underpinnings in place. Mr. Lawenda had cable network contacts. Mr. Yudin had a good production record and an agency background. Before joining Reeves, he had worked in media at Backer & Spielvogel and before that at McCann-Erickson.

They also had director Bob Giraldi and his business partner, Phil Suarez, as programing and financial partners. Mr. Giraldi's fame had grown since he directed the highly acclaimed "Beat It" music video for Michael Jackson. It left Mr. Giraldi with an image as a breakthrough idea man and state-of-the-art director.

With a few clients already in hand, Messrs. Lawenda and Yudin last spring hammered over the door the sign reading Chelsea Communications. They had become co-founders of the newest barter programing shop in New York.

Chelsea's first few deals were immediate spinoffs from their previous lives at USA and Reeves.

They sold to NBC a series of pre-World Series vignettes that Mr. Giraldi would produce for Hitachi Corp.

But perhaps the clearest example of using old contacts was their sale to USA Network of a series of one-minute children's briefs backed by Nabisco Brands via its Ohlmeyer Advertising.

Mr. Lawenda had been the program developer for USA, and one of Mr. Yudin's mentors, Phil Howort, was president of Ohlmeyer Advertising.

Chelsea's latest project kicks off Jan. 14 on Lifetime Cable Network. "Hot Properties," produced by Mr. Giraldi, is a live prime time pop culture show that, like several programs being offered in syndica-

P&G hits record clip in coupons

CINCINNATI—Procter & Gamble has boosted by 50% the number of coupons it is mailing this year in its Special Olympics promotion. Its drop of 1.7 billion coupons through the Publisher's Clearinghouse sweepstakes makes the coupon promotion P&G's biggest.

Coupons for 30 brands, worth $10 in all, have been mailed to 56 million households nationally through the annual sweepstakes, P&G said.

For each coupon redeemed by Jan. 20, P&G will donate 10¢ to the Special Olympics. The company expects $1.2 million to be raised through the promotion, a spokeswoman said.

Trade ads and tv spots, themed "Send someone special to the Special Olympics," will promote the effort. W.B. Doner & Co., Southfield, Mich., handles trade ads. Tatham-Laird, & Kudner, Chicago, handles P&G's tv campaign.

The tv spots feature a "kid with the winning spirit," a mentally handicapped child who, while practicing his jogging, gives the thumbs-up sign to the different people he passes.

P&G also is sponsoring a trade mass merchandising tie-in, in which the store redeeming the most coupons will have an additional $1,000 donated in its name to the Special Olympics. The Special Olympics spots are running while Publisher's Clearinghouse, Port Washington, N.Y., is airing spots promoting its sweepstakes.#

Uniden taps 2 N.Y. shops

By CLEVELAND HORTON

Uniden Corp. of America, a rising star in consumer telecommunications, has called on two New York agencies to help establish Uniden as a brand.

The subsidiary of Uniden Corp. of Japan split its account between Ally & Gargano and LCF&S, a division of Laurence, Charles & Free. The account was held by DYR, Los Angeles.

For the two winning agencies, the assignments come as Uniden, which markets an assortment of telephones and other communications products, doubles its ad budget to $14 million this year.

Ally will handle Uniden's telephone, cb, marine radio and mobile telephone accounts, while LCF&S will take on the company's satellite home earth stations.

In addition, the Huntington Beach, Cal.-based company said it is dropping all of its individual brand names and replacing them with the corporate moniker. Brands such as Extend-A-Phone and President will be replaced by the Uniden name immediately; the company's cb line, Bearcat, will carry the Uniden name in about four months. Bearcat advertising will continue to be handled by Grey Advertising, Chicago, during the transition. Later, it will be added to Ally's accounts.

Mark Bilfield, vp-director of advertising, indicated that DYR's unwillingness to accommodate Uniden's requests to adequately staff the growing account and transfer the account to New York led to his decision to "quietly" undertake the agency review. Also pitching the business was Saatchi & Saatchi Compton, New York.

Mr. Bilfield, who last April left DYR as vp-account supervisor on the Uniden business, said DYR top management's proposals were "unsatisfactory" and that their response time was "terrible."

Uniden, which survived the boom and bust periods of citizens band radios to dominate that field, is ranked second in the sales of both cordless and corded phones. With a market share of 12%, Uniden trails AT&T in the field, which claims a 24% market share.

Calling home earth stations a "booming industry," Mr. Bilfield indicated that the largest single portion of Uniden's $14 million advertising budget will be devoted to that business.

"The only thing that separates us from Sony and Panasonic is image," Mr. Bilfield said. He added that Jack Nicklaus will continue to act as company spokesman. The company's unwillingness to drop Mr. Nicklaus as spokesman led Chiat/Day to withdraw from the review.#

GM orbits new Saturn unit

By RALPH GRAY

WARREN, MICH.—General Motors Corp.'s creation of a new car division opens the sweepstakes for a big, new ad agency assignment.

Saturn Corp. becomes GM's sixth car division and the first since GM formed its Chevrolet unit in 1919.

The new division takes over the Saturn Project, a lower-price domestic compact that is the third leg of GM's small-car strategy. The GM-Toyota joint venture and the importing of small cars from Japanese subsidiaries are the other two legs.

The Saturn, unofficially due in 1987, will have its own ad agency, said GM chairman Roger Smith.

The agency could come from existing GM shops or outside but will be one that offers "the best value," Mr. Smith said.

The selection process probably will not start for a couple of months.

GM's agencies are Leo Burnett USA (Oldsmobile); Campbell-Ewald (Chevrolet); D'Arcy MacManus Masius (Pontiac and Cadillac), and McCann-Erickson (Buick).

Saturn Corp. is headed by Joseph Sanchez as president. He formerly was general manager of GM's Oldsmobile division.

The new unit will handle its own engineering, finance, manufacturing and marketing.

Although Saturn will handle its own development and marketing, it will report to the GM's small-car group.#

Living and succeeding by the rules of the game

By John Campbell Collins

It is somehow appropriate that the top-rated syndicated program is a game show. In fact, many practitioners often are thrown by the fast-changing rules of tv syndication and the obstacles strewn along the divergent paths to success. So here is Advertising Age's *guide to "The Ratings Game"! (Applause.) Check for it soon in your local listings.*

> **Program Directors, along with their allies the General Managers, can at any time be as much friend as foe to competing players.**

Location: Video arcade.

Scene: Everyone is crowded around the machine called "The Ratings Game."

Objective: Get your program on the air without getting zapped.

Obstacles: Many (as listed).

Gnarly Nielsens: A cosmic, intangible force (also known as The Eliminators) that soullessly zaps programs from the game using the ultimate weapon—numbers.

Program Directors (pds): Perhaps the most powerful players in the game. These pivotal characters, along with their allies the General Managers (gms), can at any time be as much friend as foe to competing players (it just depends on if they treat your program as a "go" or a "no"). Players need lots of pds as friends before getting a program on the air.

Penetration: This is a method used in scoring the condition of a program during the game. A perfect score is 99%.

For barter programs, this is a particularly significant hurdle because a score of less than 60% can be fatal. If, however, barter programs reach this percentage in penetration (of the national market), they usually will gain a very powerful ally known as the Sponsor. A go on the program is all but guaranteed with this combination.

The Conventions: These are battlegrounds where respectable scores must be achieved to gain the momentum necessary to catapult the program past obstacles. A bad convention or a careless pilot can get a program zapped faster than a speeding "Supertrain."

"Wheel of Fortune" has cleared 99% of the U.S. and is the No. 1 syndicated show in history.

Ammunition: As in any exciting videogame, players of the syndication ratings game need ammunition. Some of the game's previous big winners have used all or combinations of the following: Tenacity, bad taste, resilience, research, timing, star power, creative accounting, an unrelentless love of winning, entertainment and a cigar smoking won't-take-no-for-an-answer sales force.

Playing the game: One of the best ways to develop a strategy for playing the game is to identify the target. Fortunately, in this game the primary target, the pd, falls into a very narrow category and can be isolated easily for coordinates (needed when on the offensive).

One such strategy was divulged by a major game player and the reigning champion (both in clearance and ratings for a syndicated program—the No. 1 "Wheel of Fortune"). Michael King, president of the King World team, outlines the three-pronged plan used for successful game playing:

Research: Find out what elements are involved in a successful program launch by studying programs that have achieved on-the-air status. Analyze time periods against available original or syndicated programs.

In the case of "Wheel of Fortune," the company first researched which time slots would provide the best niche. It came up with access, the half-hour immediately before prime time. It then decided to develop a high-quality game show program, choosing "Wheel of Fortune," Mr. King says, "because it skewed younger and broader than other available programs."

Considering that "Wheel" has cleared 99% of the U.S. and is the No. 1 rated syndicated show in history, it could be said that King is an exemplary player.

Target: Right Time/Right Station: "Wheel" made its premiere in syndication against several returning access programs. King World chose to sell the program on a cash basis instead of bartering it because, Mr. King says, "We knew we couldn't get a 70% clearance the first year, and we didn't want to hurt the program by putting it in the wrong place—just to get a guaranteed percentage of clearance."

Playing the barter-against-guarantee game can be risky and compromising. Some players liken the experience to a cold shower: It serves the purpose but . . . . Syndicators often find it necessary to clear stations and time periods just to meet advertiser guarantees. But if a program ends up on a station or in a time period that is difficult to promote, it quickly will be zapped by the pd.

Promotion/Station Involvement: Many syndicators "partner" promotional strategies with their client stations and demand a participation in the form of a gross rating point guarantee. In this way, the station commits to run whatever promotional inventory necessary to deliver the grp numbers.

King World vp-promotion David Sams, offers his client stations an arsenal of promotional ammunition.

"Used to be, a syndicator would provide a station with a promo kit that included a slide, a bio of the executive producer and a coffee cup with the show logo on it," Mr. Sams says. But the sophistication of promotional materials and the cooperation between the syndicator and the station have come a long way since then.

Don Taffner, founder of D.L. Taffner Ltd., also says promotional ammunition is the key to syndicated market growth. "Part of the reason the syndication programs are so often behind in the ratings is because the national media pay more attention to the three major networks," he says. "Their major promotional efforts are able to create instant program awareness on a national level—immediately."

Mr. Taffner, who syndicates "Too Close For Comfort," "Three's Company" and "Benny Hill," says his game plan is goal oriented. "We clear stations and guarantee that we'll reach advertisers' required numbers," he says. "We give ourselves a deadline at which time we see where we're at with regards to per cent of clearance. If we're close enough, then we'll commit to production. If not, it [the program] gets scrapped."

"Programs can come from any of several places," says Don Till-

---

John Campbell Collins is a Los Angeles-based free lance writer and producer whose recent foray into the syndication game was zapped. He is looking to join a team for the '85 games.

Answers on Page 31

man, program director of KTTV, a Metromedia station in Los Angeles. "I don't think there is any magic to where they come from. It could be from advertisers, from offnetwork, from syndicators, station groups, producers or combined efforts. The syndication business is opening up mainly because of the proliferation of new independent stations [read buyers] on the air."

One such source of programing comes from the production division of Procter & Gamble, the nation's largest advertiser. Jack Wishard, vp, outlines P&G's strategy as two-fold. "We get into programing in two ways, from the ground up as producers or packagers, or from a traditional buyer-sponsor perspective," he says. P&G is involved in several network projects, including full-sponsorship of the biblical epic five-part miniseries "A.D.," which will air on NBC March 31 through April 4.

One strategy on the upswing for syndication players is that of forming co-venture partnerships among integral players.

Things are not always what they seem to be in this often flashy syndication game. Some players don't think the once mandatory Assn. of Independent Television Stations and National Assn. of Television Program Executives conventions are as crucial to players as they used to be.

The conventions' thunder is being stolen as a result of the trend at tv stations (and especially station groups) of buying programs *before* the gatherings. Creating clearance momentum before INTV and NATPE is becoming a key strategy to winning an on-the-air game position.

When the syndication (and especially barter) games were played by much smaller teams, a "hands-off-until-the-upfront-buying-season-is-over" attitude was unofficially in effect between the barter sales organizations and the agency buyers and planners. But in 1982, when Television Program Enterprises, the syndication arm of TeleRep, and Paramount Television Domestic Distribution premiered "Entertainment Tonight" with 52 weeks sold and national clearance in place, those rules were zapped.

Former syndication program producer Jerry Frank, now with LBS Communications, points out another new twist to the old game. "At one time, you had to clear the o&os [stations owned and operated by the three major networks], but now, with so many independents, that is no longer the case," he says.

One strategy on the upswing for syndication players is that of forming co-venture partnerships among integral players such as station groups, studios, producers, syndicators and barter sales companies. Through these joint efforts, major market clearances, guaranteed ad commitments, production and distribution costs are shared and a "go" signal is all but guaranteed.

The result is generated pre-convention momentum and program exclusivity to station group players. Such superstar teams include Operation Prime Time, a consortium of tv stations that syndicate "Solid Gold" and first-run miniseries; Metromedia's New Program Group, and co-ventures such as LBS Communications and Columbia Television's Colex.

The 1983-84 syndication season saw a new wrinkle in strategy with the revival of both MGM/UA Television's "Fame" and D.L. Taffners' "Too Close For Comfort" in first-run syndication after the networks canceled these series. In both cases, LBS Communications provided production money in exchange for selling barter ad time.

Program players also can find their way to "go" by packaging specials, miniseries, seasonal programing and tv movies. Such is the case with Columbia Television's made-for-syndication tv movie "It Came Upon the Midnight Clear," Camelot Entertainment Sales' "Rose Bowl Preview," Blair Entertainment's "On the Road to the Super Bowl" and Young & Rubicam's "Christmas in America" sponsored by the U.S. Postal Service.

"It's easier to get an advertiser directly involved in a special because the dollar commitment [risk] is much less than it would be in a series, for example," says Joseph Schrier, vp-program services, Young & Rubicam. In the case of Y&R's seasonal Christmas program, the agency not only conceived and sold it to the client, but also cleared the programs in 58% of the U.S.

The program features celebrities who narrate the different ways the holidays are celebrated throughout the U.S. It is 100% bartered and opens with a three-second billboard followed by the 30-second opening and 30-second closing spot for the Postal Service. Featured are Tom Bosley, Ben Vereen, Vincent Price and others.

Another example of smart packaging is compatibility—marrying advertisers' product target demographics to appropriate dayparts and suitable programs.

"Advertisers recognize the increased viability of syndication because it provides the selling environment that they used to enjoy on network but has since eroded over the years," says Roger Lefkon, exec vp of LBS Communications, a Grey Advertising subsidiary. "Now they are getting those benefits back, including price protection. Syndication is not just a viable alternative to the major networks; in some cases it pulls better audience shares with more cost-effectiveness."

Program players also can find their way to "go" by packaging specials and miniseries.

Another compatibility strategy successfully used by LBS is its placement of the French-produced animation programs by DIC Entertainment. LBS cleared "Inspector Gadget" and "Heathcliff" in the 3 p.m.-to-5 p.m. time period, which gives advertisers a viable alternative to the Saturday morning children's show buys on the three national networks.

Yet another inventive strategy in time placement positioning is demonstrated in the newly offered "Headline Chasers" program from Merv Griffin Productions and King World. This informational, question-answer game show created by quiz program veteran Wink Martindale is positioned as a series that will provide a natural lead-in to local news.

All in all, winning and getting on the air should be reason enough to play the sometimes treacherous syndication game. Good luck this season, players.

No '1985' Super Bowl for Apple

Will halftime stunt replace ad?

By CLEVELAND HORTON

Apple Computer has pulled the blockbuster commercial it planned to air during the Jan. 20 Super Bowl as a sequel to its highly acclaimed "1984" on last year's telecast.

The new, somewhat surrealistic commercial was produced in London, with a cost running into six figures. Although Apple had not purchased time during ABC-TV's coverage of the Super Bowl, it had intentions to do so until deciding otherwise last week.

The No. 2 personal computer marketer apparently decided its 1985 marketing goals would not be served by head-to-head comparisons with last year's spot.

The Cupertino, Cal.-based company will not abandon the Super Bowl, however. The National Football League licensed it to distribute seat cushions bearing the Apple name and logo to the 85,000 spectators. Sources predict an Apple halftime event in which spectators will hold up the cushions to spell out a message. Apple denied any such plans.

If Apple stages a halftime demonstration, it would fit with company philosophy on "event marketing" as well as place the company's name squarely in front of Super Bowl XIX's tv audience.

Discussions about airing the sequel to the '84 superspot took place at the highest executive levels within Apple.

As recently as Christmas, the computer company appeared to be leaning toward airing the new commercial.

Although the decision to broadcast the "1984" spot also came after a debate that lasted almost up to airtime, that argument was forgotten when the dramatic commercial attracted worldwide publicity for Apple and its new Macintosh computer. The spot depicted a woman eluding guards to smash a screen filled with the face of a Big Brother figure, reprising the theme of the novel "1984."

This time around, it was argued, an attempt to top "1984" could divert attention from the purpose of Apple's 1985 strategy. Media and industry analysts, it was believed, would discuss whether Apple had succeeded in creating another masterpiece, and the impression would be that Apple was interested only in a creative competition against itself.

In addition, Apple sources indicate the new commercial, again created by Chiat/Day, contains a theme that might offend prospects Apple wishes most to attract: Business executives. According to sources, the commercial shows blue-suited businessmen marching in lockstep, singing, *a la* Walt Disney's ditty from "Snow White,"

Hardee's, B&B part ways

Special orders upset shops

By BRIAN MORAN
and SCOTT HUME

Another bout of creative turmoil has hit agencies serving national restaurant chains, with Hardee's Food Systems becoming the latest chain to shop its account—a $35 million chunk of business exiting Benton & Bowles, New York.

Hardee's dissatisfaction with B&B's copy strategy and lackluster consumer response to B&B's 1984 campaign for the hamburger chain triggered a "joint decision" to sever the 10-year relationship, according to a Hardee's executive.

Hardee's informed B&B of its decision during a monthly meeting with franchisees, attended by B&B, last week at the chain's Rocky Mount, N.C., headquarters.

"The relationship had grown somewhat stale," said Ron Wertheim, Hardee's exec vp-marketing. "Through the years they supported us very well, but we just couldn't agree on where to go from here strategically."

Benton & Bowles announced Jan. 11 that it had "mutually agreed" with Hardee's to terminate their relationship.

"We and the Hardee's people have been unable to come to agree-

New year leaves top execs basking in happy pay daze

By STEWART ALTER

New York—Senior advertising and marketing execs scored salary gains of 35% to 45%, or more, last year. That's double the hefty 15% increase over 1983 salary levels recorded last year by advertising and marketing execs as a whole.

In addition, advertiser salaries continue to outstrip agency salaries for comparable posts.

These conclusions come from figures compiled by Judd-Falk, a management consulting and executive recruitment company, as part of its annual advertising and marketing compensation study.

The average senior vp-management supervisor, for example, made $95,375 in 1984, a 45% boost over his '83 salary.

A vp-marketing made an average $105,367, up 35% from '83.

"Advertiser salaries still lead comparable advertising agency position salaries by a significant margin," a difference of 30% at senior levels and 60% at more junior levels, said Judd-Falk president Eugene Judd.

Salary increases seemed to be slim or nonexistent for some job titles, which reflects another trend, Mr. Judd added.

"A client may be looking for a marketing director and be willing to pay $75,000. When they learn that someone with that title typically earns $100,000, they'll agree to look instead for someone to call marketing director but without the same depth of experience," he said as an example.

Mr. Judd also observed, "Entry-level marketing positions are almost $35,000, due in great part to heavy on-campus recruiting at top-tier graduate schools by consulting firms, bank and investment companies and the major consumer package-goods corporations."

New spots spice up Bowl ad watching

An Advertising Age roundup

Super Bowl XIX is expected to attract the largest tv audience in football history, and that should take some of the cost pressure off the media mavens who agreed to give ABC-TV $1 million of their clients' money for a fleeting minute in the Jan. 20 game.

But for some of the creative types at the agencies representing the 27 advertisers in ABC's broadcast, the pressure won't subside until the Miami-San Francisco matchup is turned over Jan. 21 to an anticipated 120 million Monday-morning quarterbacks.

The Super Bowl coverage, including pregame and postgame shows, has become one of the preeminent showcases for advertising creativity. Several major marketers, including McDonald's, Sony, ITT, ComputerLand and Cullinet Software, will be breaking new campaigns. Others, primarily the traditional big sports advertisers, plan new executions of existing campaigns.

ComputerLand, the leading computer store franchisor, will shift the emphasis of its advertising away from the store to focus on the chain's sales staffs.

The move by the Hayward, Cal.-based company is seen as an attempt to combat its image as a low-price computer vendor offering little or no customer support. During the hectic Christmas season, many ComputerLand franchises slashed prices of popular computers to build volume.

The new campaign features the first creative for ComputerLand from Foote, Cone & Belding, San Francisco, since it acquired the business late last year from J. Walter Thompson USA. A new tag, "ComputerLand—the one thing to know about computers," replaces "There's only one No. 1," introduced in August.

Fred Whelan, ComputerLand's director of advertising, admitted that the Super Bowl buy is expensive, adding that "if we weren't breaking a new campaign we wouldn't have made this buy."

Cullinet Software will break its first tv ad campaign on the Super Bowl in a spot featuring ex-hockey star Bobby Orr. Cullinet, Westwood, Mass., will highlight its roots as a marketer of software for large IBM mainframe computers in a pitch for the company's growing presence in the microcomputer software market.

Cullinet's tv spot, created by Rizzo, Simons, Cohn, Boston, is designed to alert corporate executives to

Coke: 'Hi' time for new shops

By NANCY GIGES

Two top Coca-Cola Co. marketing executives are talking to New York ad agencies in what is described as "getting acquainted" sessions.

Ira Herbert, exec vp-corporate marketing director, and Sergio Zyman, senior vp-marketing, Coca-Cola USA, the marketer's domestic soft-drink division, already have met with Doyle Dane Bernbach and Chiat/Day. They also have a meeting slated with Ogilvy & Mather and may seek to meet with a fourth agency.

Both Mr. Herbert and a corporate spokesman emphasized that the meetings are "not unusual" and have nothing to do with current agency assignments or relationships.

Atlanta-based Coca-Cola has a long-established relationship with the Interpublic Group of Cos. and does not shift agencies capriciously. Yet, for several months there have been reports that Coca-Cola is not entirely satisfied with its agency lineup.

Reports have circulated that some executives want more unconventional creative as well as a strong relationship with an agency outside Interpublic.

Interpublic shops Marschalk Co., McCann-Erickson and SSC&B handle the lion's share of Coca-Cola's business.

This round of meetings with other agencies is not seen as a review in the usual sense. Mr. Herbert said he "periodically though not regularly" picks three or four agencies and meets with them.

"The intent is to build a backlog of familiarity with what's out there," he explained. "It has nothing to do with any dissatisfaction with our current agencies. We are happy with them.

"But you never know when a project might come up. So we like to keep our fingers on the pulse of the agencies that would be available to us."

The meetings will not result in a specific assignment—either new-

City and regional publications continue to sprout in the U.S., illuminating their strength as an ad medium and as integral elements of their communities. How they pursue national advertisers will be included in next Thursday's Special Report: City & Regional Magazines.

Women in Japan: A growing force

Studies cite role changes

By JACK BURTON

Tokyo—Japanese women dominate consumer markets here, and their influence will grow as more and more women enter the job market, according to two new studies.

This is the latest evidence that Asian markets, such as China *(see story below)* and Japan, are developing along U.S. lines.

In Japan, young unmarried women, who live with their parents, have disposable incomes that can amount to $750 to $1,000 a month, according to a survey by the Japan Newspaper Publishers and Editors Assn.

The survey also showed 28% of these young "office ladies," as they are known here, are able to afford fur coats, while about 50% say they own a dressing table, stereo and color tv.

Because Japanese husbands are accustomed to handing over their paychecks to their wives, women entirely control about 80% of all household budgets in Japan, the survey showed.

And the economic power of Japanese women is likely to grow as more housewives enter the job market either full or parttime, according to Mariko Fujiwara, editor of a new study called "Japanese Women in Turmoil," published by the Hakuhodo Institute of Life & Living.

The institute is a research group affiliated with Hakuhodo, Japan's second-largest ad agency. The study will be released this fall.

Ms. Fujiwara said that, until recently, most married women chose to stay at home and raise a family. But an emerging trend among housewives to divide their time between home and work reflects "their dissatisfaction over their conventional role," she said.

Going to work is "part of a search for a life style that will provide them with some sense of having better control over their lives," she said. "Japanese women are feeling restless and confused. They want more than material goods and are searching for outside experiences."

Because of the market clout of women, Dentsu recently established an affiliate called Dentsu Eye to concentrate on advertising and marketing to women.

The changing role of women also will have several major ramifications on the Japanese market, according to Ms. Fujiwara.

She said marketers are trying to develop services that will fulfill females' quest for experiences outside the home, including health and sports programs and more forms of entertainment.

The JNPEA survey found that 90% of female office workers participate in some type of sports.

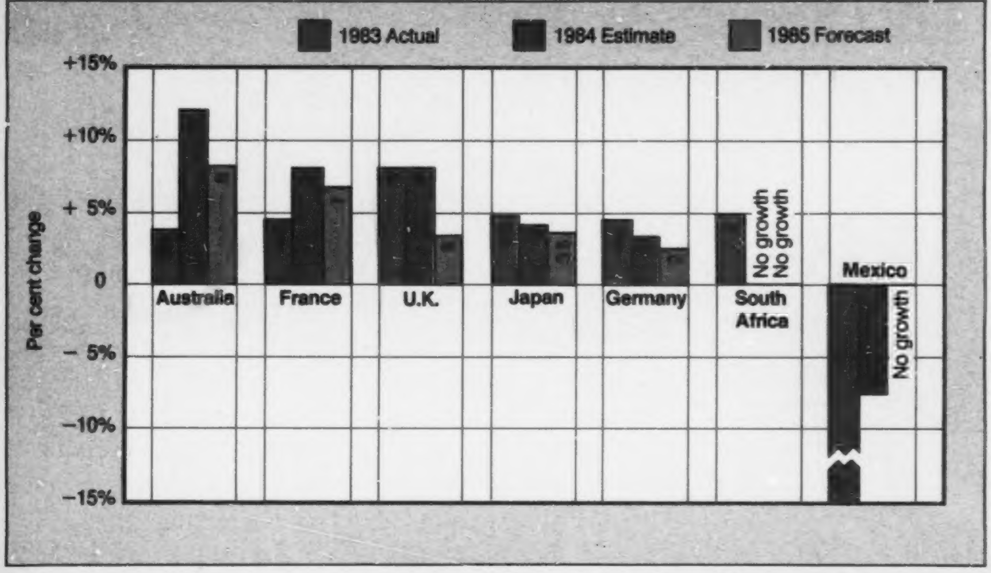
Also, Ms. Fujiwara projected an increase in the purchase of high-quality products ranging from sports equipment to home computers. Also high on the list are electronic devices, such as microwave ovens, that will permit women to spend more time outside the home.

Ms. Fujiwara also noted that women are becoming more selective about product quality as their sources of information expand through their increased outside activities. At the same time, they are more willing to buy "generic" products for everyday household use to keep the family budget in balance.

But she also said marketers should expect a lower rate of growth for other household items.

"The market is already reaching the saturation point, since most homes have such basic appliances as tv sets and refrigerators, and there is not space for much more in the typically small Japanese houses," she said. "Manufacturers of household goods are acknowledging that the days of 'hit products,' when the appearance of a new appliance swept the population, are over."#

Worldwide ad spending growth



Foreign growth matches U.S.

Ad spending hike predicted for '85

An Advertising Age roundup

The long-awaited upswing in international advertising expenditures—matching or surpassing growth in U.S. expenditures—is finally taking place.

That's the major conclusion of an Advertising Age survey of marketing, media and agency executives in eight countries and the U.S. The survey measured the growth of advertising expenditures in 1984 and projected growth for this year.

While these sources agree that growth in overseas ad spending in 1984—an average of 6.5% in major markets—cannot compare with the banner year in the U.S. (where advertising expenditures grew 15%), many predict the story will be different this year with international advertising expenditures surpassing the U.S.

Robert J. Coen, senior vp-director of forecasting at McCann-Erickson, reports overseas ad expenditures could reach 10% next year compared with 9.7% for the U.S. as overseas economic conditions improve and the U.S. economy weakens in the second half of 1985.

Because he converts overseas spending into dollars, the percent-

(Continued on Page 42)

Western products score hit in China

By SUE GIRDWOOD

Consumers in the People's Republic of China have become increasingly materialistic ever since the country adopted its "open door" policy in 1978, according to a recent survey.

In the survey, interviews were conducted with a representative sample of 800 adult residents of Guangzhou (Canton), population 3.1 million. It was conducted by Hong Kong-based Walmsley Ltd. for 10 international and multinational companies.

The survey studied ownership levels of household durables, including both b&w and color tv sets, refrigerators, washing machines and cassette recorders. It also examined tv and radio audience levels and readership characteristics.

The survey showed that consumer purchases in Guangzhou have increased significantly over the past two years, and that a sizable market for imported goods has been created, said Walmsley's managing director, Loretta Lee.

The research revealed that prior to 1978, when China began its open door policy, which encouraged investment by foreign companies and relaxed restrictions on tourism, ownership of consumer durables was restricted to sewing machines and electric fans.

But now almost every household owns a tv set, 83% own rice cookers, 73% own cassette recorders and 50% own refrigerators, according to the research. Also, almost 65,000 households will buy an imported brand of color tv set during the coming year, and at least 35,000 plan to buy a foreign-made refrigerator, the survey said.

Foreign brands enjoy leading positions in the coffee, infant formula, milk powder and full-cream powdered milk markets.

The survey also showed that of Guangzhou's estimated 600,000 smokers, 66% purchased an imported brand of cigaret during the previous six months and 25% smoke a foreign brand regularly.#

South Africans pushing for U.S.-style tv programing

By DES KILALEA

Johannesburg—A battle for control of a new commercial tv station is raging in South Africa, where pressure is building for more entertaining, U.S.-style programing.

The government-owned tv monopoly is planning to strengthen its hold over the nation's tv channels, but the move is opposed by several newspaper groups.

The tv monopoly, South Africa Broadcasting Corp., has proposed the creation of a new "entertainment" channel called TV Four. The new channel, if approved by the government, would be in addition to SABC's three other channels.

A group of newspaper publishers favors the idea of a new channel, but opposes letting SABC control it. Instead, publishers want to run the channel themselves.

Their reasoning is simple: SABC's three other channels accept advertising and have been eating away at the print media's advertising revenues. If SABC were allowed to have another channel, the newspaper group's ad revenues would suffer additional losses.

The government is investigating whether SABC should be allowed to operate the new channel or whether the channel should be independent.

The newspaper groups, which include SA Associated Newspapers and rival Argus Printing & Publishing, have put together a proposal to take complete control of the channel if it gets the green light, believing it to be their salvation from failing advertising revenues.

Advertisers also have welcomed the new tv channel. "Any new advertising medium is interesting to us, particularly if it is in tv, where demand is high," said a spokesman for Checkers, a leading supermarket chain.

The ad industry also is interested in seeing tv increase its share of the national ad market, said Dick Reed, media director at J. Walter Thompson Co. here.

He said that in the 12 months ended last October, tv held a 26% share of the total ad market and that a 29% share has been forecast for 1985.

If the forecast is true, the losers certainly will be the newspaper groups, whose share of the total ad market has fallen from more than 63% two years ago to between 58% and 60% now. That's why print executives are keen to grab the burgeoning tv ad revenue pie.

If newspaper groups are granted authority to run the new channel, it would mark the second recent attempt to break SABC's tv monopoly.

On Jan. 1, 1984, Bophuthatswana Broadcast TV, the first black-controlled tv station in South Africa, was launched in Bophuthatswana, a "nonrecognized nation" within the boundaries of South Africa.

The station initially was restricted by SABC to two residential black townships, but the station's signal began spilling over into nearby white areas and became surprisingly popular with white viewers because of the station's mix of mostly U.S. shows.

As a result, SABC blocked out the spillover and limited viewership to black regions, even though the move prompted a protest campaign from white viewers, who enjoyed such programs as "Streets of San Francisco" and "Ironside."#

Ads for British professionals stir furor

By SEAN MILMO

LONDON—British lawyers and accountants are bombarding the media with controversial ads, prompting charges that these ads violate self-regulatory codes.

The controversy stems from the British government's decision last fall to permit the two professional groups to advertise for the first time.

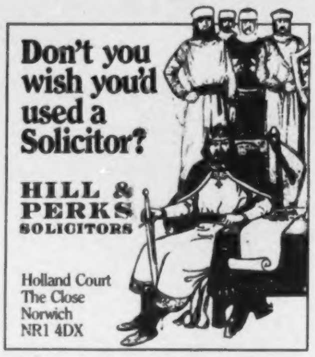
So far, the biggest response to the ads has come from lawyers and accountants themselves, who have attacked their colleagues for allegedly breaking rules drawn up by each group to replace the self-imposed advertising ban.

In the U.K., there are two kinds of attorneys. One is the barrister, who only practices in court and is not allowed to advertise. The others, who work outside the courtroom, are known as solicitors and are now allowed to place ads.

"The number of solicitors advertising has been higher than anticipated," said Brian Copper of the Law Society, the lawyers' professional association. "But we also have a lot of other solicitors claiming that the rules have been broken. We've had to warn some advertisers who seem to have gone a little over the top."

The society has forbidden tv spots, comparisons with other lawyers' services, any quotation of fees and has demanded that all ads be in good taste.

One of the more creative campaigns was for the law firm of Hill & Perks. Print ads asked, "Don't you wish you'd used a solicitor?" and showed cartoon drawings of historical figures such as King John being forced to sign the Magna Carta and Anne Boleyn about to be beheaded at the behest of King Henry VIII. Publicity Plus handled the campaign.



Don't you wish you'd used a Solicitor?

An ad for a U.K. legal firm features a cartoon of King John.

But despite the spate of ads, lawyers admit it will take some time to learn the impact of their efforts.

"We haven't had people streaming through the door," said a partner at one law firm.

Meanwhile, accountants have advertised so much that sources say they expect the group to spend as much as $12.7 million annually on advertising, an amount equivalent to about 5% of the U.K.'s total advertising for financial services.

But, like lawyers, accountants are also criticized among their own ranks for breaking the rules, and the Institute of Chartered Accountants has had a flood of protests about allegedly unprofessional ads.

For example, Coopers & Lybrand, the nation's second-largest accounting firm, was criticized for breaking a regulation that restricts print ads to a quarter-page.

Through its agency, Leagas Delaney Partnership, C&L ran full-page ads which it claimed were exempt from the restriction because they were recruitment ads.

The quarter-page rule is to protect smaller accounting firms from being outgunned by larger, wealthier competitors, but has aroused a furor.

"We've taken care to ensure our ads keep to the quarter-page limit to the nearest millimeter," said Geoffrey Parker, advertising manager of accountant Touche Ross & Co. "But some of our competitors have taken no notice of the rule. I've seen ads covering two-thirds of a page. It's absurd to allow full-length tv commercials but only quarter-page ads."

The institute also barred advertising that makes "odious comparisons" or is "strident in tone."

Norman Barton, secretary of the institute's ethics committee, admitted, "Some of our members have gone close to the edge."#

Spending

(Continued from Page 40)

age in local currency terms would be much higher.

"The economy and consumer markets have been down so long, but now we are starting to see more competition, more investment and more marketing," Mr. Coen says about overseas spending.

Leading the upswing in 1984 was Australia, where spending soared 12% in local currency with inflation factored out. That figure is much higher than the earlier outlook of 4%.

"That's the result of a very good economic and political climate, like the U.S., which makes consumers want to spend," says Willi Schalk, president of BBDO International Group. It's the first time in several years Australia has seen significant real ad growth.

The financial sector has seen the greatest growth, about 17%, says Peter Long, federal director of the Australian Assn. of National Advertisers. Automobile marketers also have boosted spending considerably, some as much as 30%.

The outlook for ad spending in 1985 is 8%, somewhat lower than 1984 because of fears of a downturn in the U.S. economy, which some say could adversely affect the Australian economy.

France also had an outstanding year, with ad spending rising about 8% in real terms in 1984, double the increase in 1983. Lower inflation levels and increased advertising opportunities on tv and radio helped lead the upswing.

The biggest growth sector in 1984 was computers, up 33% over 1983, and health & beauty aids, up about 20%.

The outlook for ad spending in 1985 continues to be strong, up 7% or more.

The U.K. had a rosy year, too, with ad expenditures rising 8% in real terms. Ad spending in the last three years has gone up about 20%, a figure that astounds many people in the advertising industry.

"We have, in particular, been surprised by the amount of money that continues to go into tv," says Andrew Roberts, market services director of D'Arcy MacManus Masius. In the summer, the commercial tv network recorded revenue increases of up to 31%, he says.

A new commercial tv channel, Channel 4, and the growing acceptance of breakfast tv, helped beef up the spending here. But in autumn it dropped off, leaving some to speculate that business confidence was beginning to wilt.

Growth is expected to slow down significantly in 1985, maybe to 3%. "Corporate profitability is slowing down, which affects advertising expenditures," says Mike Waterson, research director at the Advertising Assn.

Ad spending in Germany is slightly better than was forecast this summer, when the industry turned pessimistic because of long metalworking and printing strikes. The German Advertising Federation says total advertising outlays reached $5 million in 1984, a 3% increase over 1983.

Japan is in the same boat as Germany, where steady growth has been the standard for five years. Ad spending is up about 4% in 1984, according to a Dentsu executive.

Despite the increase, two groups significantly cut back their spending in 1984.

The candy industry curtailed advertising after extortion attempts against Ezaki Glico and Morinaga. And personal loan companies, traditionally big ad spenders, were hit by a wave of bankruptcies, which caused their spending to drop 40%.

Ad spending in 1985 is expected to grow between 3% and 4%, according to the Japan Advertising Federation.

It looks like Mexico may get out of its negative ad spending cycle this year. Spending in 1984 is expected to be down only 8%, but this is a considerable improvement over its 40% drop in 1983. The outlook for 1985 is an inspiring zero growth. "It's a reflection on the improving economy," says Mr. Coen.

Advertisers in Brazil are hopeful that 1985 may develop into a positive year, pointing to the heavy ad spending increase in the last quarter of 1984 following the satisfactory outcome of the government's debt negotiations with the International Monetary Fund. However, for the whole of 1984, spending fell between 20% and 30%.

Ad spending in South Africa was flat in 1984, and some estimates put it as low as -4%. The country has been hard hit by media inflation, which is running at about 17%, and a new 10% ad tax. The outlook for 1985 again is zero growth, but this could turn out differently, some say, if new tv channels open up and lure advertisers into increasing their budgets.#

McCann's James names two to new deputy slots

By STEWART ALTER

McCann-Erickson was expected to name a new general manager for its New York office. Instead, it named two deputy managers.

Promoted to the deputy manager posts are senior vp-management reps John Dooner Jr., 36, and Michael Sennott, 43 (AA, Jan. 10).

In a related move, senior vp-management rep Ian Hooper, 43, has added responsibility, with McCann's March Direct Marketing subsidiary reporting to him.

The new dual leadership arrangement is not unusual at McCann/N.Y., which also has two creative directors, Ira Madris and Bruce Nelson. What is unusual is that neither Mr. Dooner nor Mr. Sennott has run an office before.

Robert James, president and ceo-designate, McCann-Erickson Worldwide, said the two deputy managers "will be more than directors of account service. We do look to them to provide leadership in the New York agency."

But at the same time, Mr. James has not fully relinquished the acting general manager role he took on when James Kuras left in August to join Needham Harper Worldwide as president of its New York office.

These are the first personnel moves Mr. James has made since becoming chief executive officer in March (AA, Dec. 20).

Some observers interpret Mr. James' caution as allowing him to establish leadership in the $280 million New York office while also leaving his options open. It is known that finding an operational head for the U.S. agency is one of Mr. James' top priorities.#

News Summary

Things were not normal at this year's NATPE syndication convention, where advertisers in far greater numbers than ever before descended on the convention floor in San Francisco. In addition, almost all of the top 20 ad agencies were represented. *See Page 2.*

Aerostar will be the last domestic minivan to roll out, but Ford executives say the "yuppiemobile" is right on target for a faddish market. *See Page 3.*

Foote, Cone & Belding's much-heralded takeover last year of NCK Organization is running into rough spots in Europe. *See Page 3.*

Tv networks around the world have decided if you can't beat CBS' "Dallas," rip it off. In France, the U.K., Italy, Switzerland, Germany, Brazil and Peru, new "Dallas"-like programing has started or is in the works. *See Page 3.*

Montgomery Ward & Co.'s licensing of Radio City Music Hall Productions' Rockettes name may set the stage for other licensing ventures by both companies. *See Page 9.*

Procter & Gamble's Citrus Hill Select frozen and chilled orange juice isn't selling well in its West Coast test markets, buyers say. It has been available since fall in California, Idaho, Montana, Oregon and Washington. *See Page 32.*

DIRECT MARKETING

Executives from a group of telemarketing service bureaus plan to meet this month in Chicago to create a trade association to represent the telemarketing industry exclusively. *See Page 6.*

What is believed to be the longest-running relationship between a direct-marketing agency and its client ended last week. After 51 years at D R Group, Pitney Bowes has moved its account to the Direct Marketing Group. *See Page 6.*

SPECIAL REPORT

City and regional publications continue to sprout throughout America, illuminating the magazines' strength as an ad medium and their position as integral elements of their communities. Now they are working to convince advertisers they are a viable national buy. *See Page 11.*

Both the 49ers and Dolphins downplay Super Bowl XIX as a duel between Dan Marino (l.) and Joe Montana. . .but the public isn't biting.

Super Bowling for dollars

Marino, Montana throw for off-the-field gains

By ROBERT RAISSMAN

San Francisco—As Larry Muno, Joe Montana's agent, left a restaurant near Candlestick Park here following a postgame dinner celebrating the 49ers' win over Chicago—the victory that moved the team into the Super Bowl Jan. 20—a fairly outrageous thought passed through his mind.

Wouldn't it be nice, he thought, if Mr. Montana, the 49er quarterback, could reach the Super Bowl on a cyclical basis. The Super Bowl "really completes the cycle again," Mr. Muno explained. "It would be nice to get on this two or three-year cycle," he continued, half kidding, half serious. "You get the ultimate in exposure, and when you need another shot you're there again in another two years."

Even though the observation was made half in jest, it is probably one of the more honest statements being made here this week. Both camps are playing down the duel between Mr. Montana, 28, who is making his second Super Bowl appearance in four years, and Dan Marino, the 23-year-old quarterback of the Miami Dolphins who shattered a number of National Football League passing records this season.

But the media have put a spotlight on it and the public is biting. If Aunt Irma doesn't know who Messrs. Montana and Marino are, she will by the time ABC's pregame show—which just might last longer than the game itself—is over.

The two quarterbacks take it in stride. Mr.

Showtime eyes Qube root

By SUSAN SPILLMAN

New York—Showtime/Movie Channel president Neil Austrian is negotiating to take over programing for Warner Amex Cable Communications' interactive Qube system. Such a move would pave the way for the first national pay-per-view movie service.

Neither Showtime nor Warner executives would comment, but sources confirmed that the plan could be completed soon. WACC is a joint owner of Showtime/Movie Channel with Warner Communications and Viacom Enterprises.

Qube currently is programed locally with videotapes and offers movies, along with other programing, on a pay-per-view basis to about 270,000 subscribers in seven cities. Subscribers can pay to see movies six months before their release to pay tv services such as Showtime or Home Box Office.

Showtime would transmit Qube programing via satellite, and once on the satellite, the programing could be transmitted to any cable systems using interactive technology, whether Qube's system or not, sources speculate.

In the last four years, individual movies, sports events and concerts have sporadically been distributed to cable subscribers on a pay-per-view basis. Results have been mixed.

But in recent months, industry executives have been rallying for a rebirth in the technology, heralding it as their best hedge against mounting competition from videocassettes.

The growth of pay-per-view has suffered primarily from the lack of adequate distribution of the special converters that consumers need to order the programing. Also, the existing converters have often failed to work satisfactorily.

Showtime could make the Qube programing more readily available to systems, but there is still a

NATPE: Lots of flash, little ad cash

By VERNE GAY

San Francisco—It's 6 p.m. and a moment of repose has settled over this city by the bay that for five days this week was transformed into the game-show capital of the world.

After a frantic day of sifting through an endless skein of shows at the National Assn. of Television Program Executives International syndication convention, BBDO media director Arnie Semsky finally has a minute to sit back and reflect on the status of the not-ready-for-network tv industry.

"You have to put the syndication marketplace in perspective," said Mr. Semsky, who directs more than $500 million in network tv billings from his perch at BBDO. "From an advertiser sales standpoint, this is only a $500 million marketplace. Network news is $800 million. Prime time is $2 billion. For all the hoopla, syndication isn't that big."

But for all his protestations, Mr. Semsky is here at the head of a contingent that includes about a dozen BBDO executives. He also is playing host to officials from about 15 of BBDO's clients.

The presence of Mr. Semsky and his agency people and clients is indicative of one of the themes at NATPE this year. Advertisers in far greater numbers than ever before have descended on the convention floor of Moscone Center. Almost all of the top 20 agencies have representatives here. Executives from Procter & Gamble, General Foods, Bristol-Myers, Block Drug, Richardson-Vicks, Anheuser-Busch, Stroh Brewing and Eastman Kodak have maintained a far more visible profile at NATPE than in prior years.

NATPE is primarily a convention for station managers and their program directors. The goal of the syndicators is to clear their shows on enough stations to attract national advertisers. Selling to advertisers comes later in the normal scheme of things.

But clearly, things are not normal. Barter syndication this year has come of age. First-run syndicated shows more and more are turning to advertisers for support before they approach the station groups. And advertisers are looking at barter as an upfront commitment, rather than an add-on buy after all the other tv money has been spent.

Still, NATPE remains a kind of hall of fame for slick, fast-paced salesmanship. The hype is frenetic, although this year the emphasis is more on the programing than on t-shirt giveaways. Besides the presence of almost every game-show host that has ever been on tv, NATPE features a broad cast of characters walking the convention floor. There are robots galore, women in the scantiest bikinis, lady wrestlers as warmups for tag-team bouts between midgets and the casts from many syndicated shows.

Keeping a perspective in this carnival setting is an overwhelming assignment. But it is the advertising community that casts perhaps the most cynical eye on the flying promises and ephemeral dreams presented here. It is the advertiser who must foot the bill for the hype and hoopla.

Few advertiser deals are made at NATPE. The convention is more a reconnaissance mission for the admen, although P&G's media chief Jim Van Cleave did sign on for Paramount's "Small Wonder," a first-run show about a robot girl. Seven-Up Co., via N W Ayer ABH, also signed on as a sponsor for

(Continued on Page 33)

Tribute offered to syndie's new King-pin

By BOB MARICH

San Francisco—It was befitting that Roger King, the burly chairman of King World, hosted the opening-night festivities at the National Assn. of Television Program Executives International syndication convention here this week.

Mr. King and his family-owned company, which recently went public, are on a roll. Theirs is the house that "Wheel of Fortune" built, a game show not unlike the hundreds of others that preceded it in tv's "off-peak" hours.

King World's sudden and outrageous success speaks volumes about the fickleness of tv fortunes. King World's kingpin position in the syndication arena also demonstrates that ratings remain far more important than a Hollywood mailing address.

Mr. King, who runs the Summit, N.J.-based company with his two brothers, King World president Michael King and the younger Richard, spent the convention capitalizing on its position as the distributor that finally took down the heavyweight champ of syndicated game shows, "Family Feud." The knockout punch was so severe that Viacom, "Family Feud's" manager, announced "Feud's" retirement, even though for year after year no challenger had been able to draw blood from, let alone knock down, the almighty "Feud."

The ABC network morning version of "Feud" will continue in production.

Now Mr. King owns the undisputed champion of tv syndication. "Wheel of Fortune's" success with viewers is remarkable. It averages close to a 17 rating nationally, a number many network prime time shows would kill to attain. "Wheel" also has beaten all comers, including "Feud," "Entertainment Tonight" and many of the highly rated and high-priced off-network sitcoms and series that come from the traditional program powerhouses, the Hollywood studios.

Mr. King ran his exhibition booth at Moscone Center here like it was his own game show. Station programing chiefs and advertisers swallowed their sophisticated pride and curried the favor of Mr. King and his minions.

Steve Cohen, general manager of CBS-owned WCAU-TV in Philadelphia, emerged from a King World screening booth where he had just seen rushes for a new game show called "Headline Chasers" and said, "I love it. I want it now."

"Headline Chasers," bought by WCAU-TV and ABC-owned stations in New York and Chicago, is expected to be among the few series pilots that will gather enough station interest to air in September.

Phil Howort (l.), president of Ohlmeyer Advertising, New York, discusses the rapid growth of barter syndication with Henry Siegel, chairman of LBS Communications at the NAPTE convention.

Mr. King turned immediately to other station programers in his booth and asked if they concurred with Mr. Cohen. One programer said he did not.

"Well, hell, that's why you're only a program director at a dinky little station," joked Mr. King with a broad grin. It is the kind of joke that is funny only when the comic holds title to the hottest show in syndication.

King World is not alone in the circle of new titans in syndication. The other contenders also have quite different styles, and it is this variance in approach that adds to the vagaries of syndication.

Henry Siegel is the hard-driving chairman of LBS Communications, the Grey Advertising subsidiary that spearheaded the rapid expansion of barter in syndication. Mr. Siegel holds an iron-clad grip on LBS and runs it in no-nonsense fashion. His smile never reaches the dimensions of most of the gladhanders who dominate NATPE. In

Research, marketing shortchanged

By Sherry Siegel

The city and regional magazines have arrived! At least according to their proud publishers and ad directors.

However, once you look beyond the bluster, you're likely to find these same people wearing hair shirts, doing penance for being so slow to attract national advertising. While the bigger, more cosmopolitan city and regional magazines have enjoyed a number of recent breakthroughs—particularly on the national ad front—many media executives say research remains inadequate and marketing efforts still are unfocused.

As the magazines band together, positioning themselves as a national buy, their research, which for the most part reports that city and regional readers are upscale, well-educated professionals, is plagued by the wide disparity between the top magazines and those in smaller markets. There are city magazines, and then there are city magazines, critics of the group concept say.

"Another way to say that is that the magazines are different," says Jack Higgons, marketing director of New York-based City & Regional Magazine Assn.

"These magazines to the best of their abilities reflect the needs and life styles of their communities."

The lack of adequate, believable research continues to cast a shadow over the group's marketing intentions, even though the CRMA-commissioned studies by Don Bowdren Associates, Huntington, Conn., have gone a long way toward closing the information gap. Mr. Higgons anticipates that all 39 CRMA members, which are monitored by the Audit Bureau of Circulations, will participate in the 1985 study, up from the 24 magazines that participated in the last study in 1983.

Still, the vast majority of city and regional magazines are too small to be audited by Schaumburg, Ill.-based ABC. This leaves agencies and advertisers with publishers' sworn statements as their source of hard data. While local research sometimes is used to fill the gap between these statements and syndicated research, some publishers almost would rather it wasn't.

"*Wyoming Monthly* puts out a report, and it turns out that Cheyenne Junior College did the research," one city magazine publisher says. "The guy at Philip Morris says, 'Come on, give me a break.' And a little bit of that rubs off on me. When the dinky ones use their own research, that's what gets us in trouble."

One agency executive says less-than-perfect research should not be an automatic disqualifier, however. "If a client lives or dies by national research," says Chuck Cohen, vp-media director for New York-based Peter Rogers Associates, city and regionals will not be considered. "But conceptual media does have a place alongside quantitative media." Mr. Cohen recently has placed ads for Grey Flannel, La Prairie, Cannon Mills and Blackglama in city and regional books for the first time.

As the magazines band together, positioning themselves as a national buy, their research is plagued by the wide disparity between the top magazines and those in smaller markets.

In addition to research woes, magazines that are not affiliated with networks or rep companies are criticized for their lack of promotional skills and helter-skelter marketing efforts. American International Group, New York, for example, is considering using city and regional magazines, says Robert McCourt, AIG's director-advertising and sales promotion. But he questions the uncoordinated approach taken by most magazines.

"The sales effort collectively or in small groups is sporadic. I'll get *Florida Trend* for a few months, then it will disappear," he says. "I don't know why I'm getting it, and then I never hear from space reps."

Similarly, when asked why First Boston doesn't use general-interest city and regional magazines, Joe Fashano, vp-corporate finance, who handles ad responsibilities, says: "Why don't they call?" While First Boston uses a number of local business books and occasionally a general-interest city and regional publication, Mr. Fashano says that for the most part, the life-style city and regional maga-

PUZZLED BY THE PIECES?

You know your best markets. But do you know the way to the top of each one?

The surest route is through the magazines they call their own, the city and regional books represented by Metro Magazines. We offer you readers with average household incomes of $75,000 or more. Plus lively, local editorial: Food. Fashion. Culture. Business. Politics. Entertaining. To support your message in style—while delivering higher concentrations of upscale readers than you get from the national media—or even their local newspapers.

Metro Magazines will help you maximize individual markets, or build the most efficient national network you can buy. Call our nearest office and we'll help you get started.

Research

(Continued from Page 16)

zines have not approached him. "I'm not aware of them, I don't get comp copies, I don't get media kits," he says.

Terry Murphy, publisher of Dallas-based *D*, admits some of the blame should be placed on his publishing brethren. Too often, he says, city and regional sales staffs take the Willie Sutton approach—go where the money is and go there often. "Neiman-Marcus is right here and they buy two ads an issue," Mr. Murphy says, "so let's go back to Neiman. But it's time to break new ground—we have to call on the wineries, the furniture companies, the computers."

Mr. Murphy says he and his fellow publishers are promoting themselves more aggressively, both individually and through the CRMA. He says that on a trip to the Hawaii Visitors Bureau, he wore two hats—one as *D's* publisher and another as a representative of city and regional magazines in general. Apparently he wore the second hat with more panache. "When the publisher of *Philadelphia* got the ad, he should have bought me a Mai Tai," Mr. Murphy says.

Perhaps the blame for these magazines' dearth of national advertising should be assigned not just to the magazines' lack of promotional savvy, but also to agencies and advertisers' shortsightedness. Bob Zach, media director for Chiat/Day, New York, long has been a believer in city and regional magazines, which he used in the early 1970s for Perrier and Heublein. If advertisers are missing out on the value of local and regional advertising, he says, it's the agencies' fault for not being more aggressive.

Editorial content occasionally is singled out as a problem. More than one magazine executive complains that big city media types don't realize the editorial that may cause them to sneer is read avidly in a midwestern town.

More media directors are getting this message. "These magazines aren't uniform, but I trust their editorial approach—it's germane to their region," says Leo Scullin, vp-director of print media for Young & Rubicam, New York. "Granted, they may not be as attractive as *New York* magazine, but they don't have to be."

As editorial matter is tailored to the area, so is advertising, including national advertising. "As big as we are, as well as we're doing, if you're making a call and the advertiser says, Los Angeles is not a market for us, you might as well pack up," says Nicki Campbell, director of advertising for *Los Angeles*.

Andrew Petkun, president of Allen Furniture in Needham Heights, Mass., says that despite

>
> *—Leo Scullin*
> *Young & Rubicam*

Adding to ad mix

Major-market city and regional magazines are doing a much improved job of attracting national advertisers, according to most media executives. However, some notable gaps in the advertising mix persist.

Terry Murphy, publisher of *D*, Dallas, ticks off his magazine's promising attributes: Visually compelling, attractive demographics, plenty of local retail support in addition to national ads for fragrances, liquor, tobacco and expensive cars. But where, he asks, are the computer ads?

Every publisher has a wish list—oft-mentioned entries include wineries, stereos, furniture, corporate and personal finance ads—and the past year has seen city and regional books welcome new product categories to their pages.

A notable new entry is advertising for food—both gourmet and not-so-gourmet. General Foods, Kellogg, Land O'Lakes and Pepperidge Farm all started advertising in scattered city and regional publications. "Two years ago, you just wouldn't have thought that unsalted butter would come in," says Bill Barber, *Boston's* ad director.

Fashion advertising, mostly for local retailers, long has been a source of ad revenues for these books.

However, upscale national clothing marketers now are buying space without hooking into co-op arrangements with local stores. Notable among this group are Ralph Lauren and Blackglama.

According to media buyers, the economic upturn has led former supporters, most notably jewelers and travel companies, back into city and regional pages.

In addition, some financial and nonfinancial service companies are turning to city and regional publications for the first time as they expand their sales territories. Motorola Inc. has used them to promote cellular phones as cellular capability spreads geographically, says Leo Scullin, vp-director of print media, Young & Rubicam, New York. Similarly, the *New York Times* has advertised in city and a long advertising relationship and personal friendship with the people at *Boston*, he sees pros and cons about *Boston's* "editorial competence. Some things are very objective, other things are incredibly biased," he says. "But it's the only game in town. If we really want to do fine institutional advertising"—and Allen Furniture has won numerous industry awards for its advertising—"*Boston* magazine is where we do it."

Another problem city and regional books still face is getting the message out about their readership, which is skewed toward the monied crowd. "The biggest misconception about these books comes from our titles," says Bill Barber, *Boston's* ad director.

"They think we're read just in the Back Bay and Beacon Hill, but 83% of our circulation is in the suburbs," he says.

If that's not enough, the city and regional group faces increasing competition from similarly positioned ad vehicles. "Clients are more interested [in advertising locally], but there's more media available," Y&R's Mr. Scullin says.

Local business magazines are sprouting wildly, threatening to skim the cream of the city and regional's readership: Highly educated, affluent, professional males. And newspapers are overhauling their Sunday magazine sections, turning them into slick, glossy supplements.

But for some of the magazines, perhaps the most difficult battle is one of image—not necessarily theirs but their city's. Faith Gallo, publisher of *Pittsburgh*, says that although Pittsburgh's transformation into a service-based city has been well publicized, agencies and advertisers still consider Steel City a soot-covered, blue-collar town.

"They know U.S. Steel is here, they know Alcoa is here, they knew Gulf was here before the takeover," she says. "Yet when I tell them that Pittsburgh is the country's third largest corporate headquarters city, they're surprised. It doesn't sink in." She says some media planners have "never been west of Philadelphia and think Pittsburgh is a crummy place."

To them she points out that *Pittsburgh's* circulation has gone from 53,000 a year ago to nearly 60,000. January to June, 1984, ad revenues were up 11% over the similar period for 1983. The magazine is well accepted by local retailers, whose ranks include Gucci, Ralph Lauren and Saks Fifth Avenue, she says. "You really don't mind something if it's deserved, but it's so unfair. We merit more national advertising than we get," Ms. Gallo says.

"The biggest misconception about these books comes from our titles . . . . 83% of our circulation is in the suburbs."

—***Bill Barber***
Boston

City and regional magazines are working hard to sing their tune to the agencies and to make sure Ms. Gallo's plaint doesn't become their own melancholy theme song.

---

regional books as its circulation reach broadens, says Joel Kushins, senior vp-media director at New York-based Bozell & Jacobs.

Another indication that city and regional magazines are getting their messages out to advertisers and agencies is the debut of multiple-page ads and preprinted inserts.

The California City Group—*Los Angeles, San Diego* and *San Francisco Focus*—ran its first catalog section, about four pages, together with an insert card in September.

But most exciting to many city and regional promoters is the recent Walt Disney buy. This month, Walt Disney World Co. ran inserts in all 36 magazines in the City & Regional Magazine Assn. network.

According to Bernie Bullard, ad manager for Walt Disney World Co., the creation of the CRMA network was a major influence on Disney's decision. The company began investigating city and regional books about two years ago because the readership—white collar, upscale—"fit almost like a glove," he says. Before the network, it was too difficult to buy into each magazine individually, Mr. Bullard says.

The CRMA will work actively to entice some heavyweights, including International Business Machines and American Telephone & Telegraph, to advertise in the magazines, according to Jack Higgons, marketing director.

But the association is not the only organization winning praise for upgrading the advertising. The rep companies are "packaging these magazines for the first time," Y&R's Mr. Scullin says.

But Mr. Murphy's question—"Where are the computers?"—remains. David Yoder, media director for Chiat/Day, San Francisco, and a member of the Apple Computer team, says: "We provide a national umbrella and do things dealers can't do themselves, like go into the Super Bowl or '60 Minutes.' We can't be all things to all people."

And neither can the magazines. In the long run, these publications must come to terms with what they are: Magazines that independently serve a limited market. Depending on their goals and the advertiser's attitude, this characteristic either will continue to haunt or help their ad efforts. —*S.S.*

CNN: Features in the future

Net to soften its hard-news image

By SUSAN SPILLMAN

In a major promotional shift, Cable News Network next month will begin repositioning itself as "'Good Morning, America' 24-hours a day."

Without changing its on-air rotation, CNN will attempt to repackage its public image from an around-the-clock, hard news service to a broad-appeal news, information and entertainment channel. The image revamp, which is being applauded by agency executives, is a response to a research study that revealed that CNN subscribers "didn't understand [the] service."

It is also viewed as the only option left to CNN's owner, Turner Broadcasting System, to widen CNN's viewer base and attract greater ad revenues.

It is the first repositioning of the cable news channel since its inception in June, 1980.

"In the past, our advertising has been directed to the person who just wants to sit down and watch hard news," said Ron Harris, TBS director of advertising. "But we're more than that. We're sports, weather, interviews and entertainment shows. We want to be known as 'Good Morning, America' 24 hours a day."

To that end, the network has already dumped its slogan "CNN: Anything else is old news." In late February, the CNN slogan will become: "Experience life on CNN." The new theme will provide the core for all on-air promotion, as well as cable tv, network radio and national print advertising. Cable and radio spots will break next month, with print support following in March.

The new campaign, being handled in-house, will emphasize CNN's variety in programing. Each advertisement will tout several shows, such as the interview program "Freeman Reports," the debate show "Cross Fire" and its new "Entertainment Tonight" clone "Show Biz Today." Clips from these shows will be interspersed with closeups of viewers giving their reactions to the segments. No budget was disclosed.

CNN execs "realize that they're at a new plateau of maturity," said Ron Kaatz, senior vp-U.S. director

Third and two

Can Rozelle save tv deal?

By ROBERT RAISSMAN

PALO ALTO, CAL.—When Super Bowl XIX ended yesterday, Pete Rozelle knew football's most important game wasn't over. The National Football League commissioner for the past 25 years knew it was really third down and a long two to go.

The Super Bowl capped the third year of the NFL's five-year, $2.1 billion tv deal with the Big 3 tv networks—a deal that has not worked the way anyone expected.

The first year there was a players' strike that shortened the season. During the next two years, tv ratings were down. And, Mr. Rozelle says, if the ratings don't rebound in the next two seasons, the NFL cannot expect the networks to top or even match that $2 billion plateau.

"We have to tailor our thinking to what the situation [will be] after two more years of ratings," Mr. Rozelle said. "I don't expect to get 2½ times more in quantum escalations that we've had in the past, based on what's happening now."

The value that the tv nets will place on the next NFL contract will be based on their projections of what advertisers will pay to appear in the games and the number and types of advertisers that will be attracted to the premium-price programing vehicle.

The networks will bring to the table their sense of advertiser attitudes toward the intangibles that make pro football a unique marketing vehicle in tv sports. Among the most important of those intangibles are football's demographics, the impression that its audience is composed of multiple viewers

(Continued on Page 82)

ABC's Roone Arledge says the networks must fight moves to ban beer advertising. See Page 3.

Pete Rozelle says advertisers may "choke" on higher NFL tv ad costs some day. But not yet.

RJR puts on the Ritz; PM goes to Rio

By WILLIAM F. GLOEDE

The cigaret market is headed for further segmentation as the two giants of the industry roll new products in coming months: The first designer name brand pitched at upscale, fashion-conscious women and an Hispanic smoke.

R.J. Reynolds Tobacco Co., Winston-Salem, N.C., will introduce Ritz, a 100mm, low-tar regular and menthol smoke carrying the Yves St. Laurent logo, into four markets March 4. Ritz will be tested in two markets at regular, branded prices and in two others at premium prices.

Industry leader Philip Morris Inc., New York, is gearing up for a test of a new brand called Rio, a full-flavored menthol (16mg tar, 1.1mg nicotine), aimed at Hispanics.

PM would not comment on Rio. Sources could not pinpoint test markets, but the new smoke is expected to appear soon in what was described as "red hot packaging." Wells, Rich, Greene, New York, is the agency.

The Hispanic market already has been mined by Liggett & Myers Tobacco Co., Durham, N.C., with its L&M Superior and Dorado

P&G pampers diaper brands

By NANCY GIGES

New York—Procter & Gamble demonstrated last week that it intends to wear its disposable-diaper crown regally.

The intensity of P&G's all-out effort to regain a stronger position in the $4.7 billion worldwide disposable-diaper category (AA, Dec. 24) was highlighted when the company held a rare press conference, its second here in less than a month, to proclaim a $500 million capital investment plan for those products.

Over the next two years, Cincinnati-based P&G will spend more than a half-billion dollars to retool its plants worldwide and will commit at least $100 million to advertising in the U.S. to tell the story of "new, improved" Pampers.

Benton & Bowles handles Pampers in the U.S. The domestic market for diapers totals $2.7 billion at retail.

P&G has concluded that success in the disposable-diaper market lies in the premium-price segment, which now includes Kimberly-Clark Corp.'s Huggies and P&G's Luvs.

The new Pampers being rolled out this week in Florida and South Georgia has been redesigned and upgraded to a premium-price product. It is similar, but not identical, to the diaper P&G is testing in Wichita, Kan.

Some of the features that P&G claims will make it the best product by far in the marketplace in-

Geo's last hurrah: The 5-year-old slick, general-interest magazine folds with its February issue.

'Geo' goes off without a niche

By WILLIAM F. GLOEDE

The death of Knapp Communications' *Geo* brought forth expressions of sorrow from readers and advertisers alike, but industry analysts believe the decision to fold the book was inevitable (AA, Jan 17).

An expensive folding it was. Between Knapp and Gruner & Jahr, the company that launched *Geo* in the U.S., more than $70 million was spent trying to turn the magazine's balance sheet from red to black. It was, according to highly placed trade sources, one of the most expensive magazine failures in history.

"It never had a targeted audience that was definable, attractive and American," said J. Kendrick Noble, publishing analyst for Paine Webber in New York.

"It never really found its niche," said Paul Zuck-

'Lemmings' spot hits sea of hype

By CLEVELAND HORTON

Apple Computer's 11th-hour turnabout decision to air its costly "Lemmings" commercial during the Super Bowl carried the blessings of the company's top managment, though it aired against their better judgment.

The sequence of events surrounding Apple's "go-no, go-go" debate appeared to many in the advertising community to be Madison Avenue's contribution to Super Bowl XIX's fabled media hype.

One tv commercials producer familiar with the Chiat/Day-created "Lemmings" work said there was "no way" Apple would skip putting the commercial on the Super Bowl. He added that some promotion-inspired misdirection about the spot's future role had to help Apple in its battle against giant IBM Corp., as well as Chiat/Day's creative cachet.

As the story goes, it seems that neither Apple chairman Steve Jobs nor president John Sculley wanted to run "Lemmings" during Super Bowl XIX. Both men felt that the commercial paled by comparison to "1984," the Apple spot that stunned many viewers of last year's game (AA, Jan. 14).

However, the two ultimately left the final decision to Mike Murray, marketing manager for Apple's Macintosh line, after hearing impassioned pleas from Chiat/Day. And it was Mr. Murray who de-

Yes, they'd go this far in fare fight

American takes flier

By TOM BAYER

Dallas—American Airlines last week trumpeted slashed fares in ads asking "Whoever thought we'd go this far?" as competing carriers and their agencies scurried to go just as far.

American, the nation's No. 2 carrier, announced Jan. 17 it would offer "Ultimate Super Saver" fares next month on more than 2,400 routes. The highly restricted, mileage-based structure drops one-way fares to between $39 and $129, or about 70% below regular full-fare coach rates.

Competitors reacted quickly. Within hours of American's announcement, most other major carriers grudgingly agreed to match the special fares, which require 30-day advance purchase.

Staffers on the United Airlines account at Leo Burnett Co., Chicago, worked through the night after American's announcement, sources said.

As a result, Elk Grove Village, Ill.-based United placed its own ads Jan. 18 for what it called "Ultra-Saver fares."

"We really had to hustle," admitted a United spokesman, "but we knew that American was going to announce lower fares. Once we decided that we would match them, it was only a matter of seeing what their fares were and then going to work."

American's campaign, created by Bozell & Jacobs/Southwest, included heavy newspaper and radio buys in 92 cities, with spot tv in its

Thursday:

Sunday newspapers are prospering, reporting more than six times the circulation growth of weekday papers in the past decade. The Sunday paper's role in the U.S. newspaper industry will be examined in Special Report: Newspapers in next Thursday's edition of Advertising Age.

Nike weighing ad, promo budget cuts

By RUTH STROUD

Nike Inc., recovering from its first-ever quarterly net loss, is expected to prune its advertising and promotional budget by 10% this year.

The Beaverton, Ore.-based athletic shoe and apparel company made marketing news last year with its first corporate campaign by Chiat/Day, Los Angeles. The campaign was noteworthy for its all-art, no copy approach.

It reported a $2.2 million net loss for the second quarter ending Nov. 30, however, although revenues increased 9% compared with the same period in 1983.

Nike blamed a 34% increase in sales and administrative costs (of which promotional/endorsement costs are said to be a large part), plus lowered margins on its athletic shoes, for the loss. Orders for domestic footwear due to arrive during the next six months were down 31% compared with the previous year, primarily because of an enormous backlog of shoes piling up on store shelves.

The surplus, which has reached as many as 22 million pairs of shoes in recent years, has been whittled down to what Philip Knight, chairman and president-ceo, calls a manageable level of 11 million-to-12 million pairs.

Chris Van Dyke, a Nike spokesman, said the company is "tossing around" 10% as an amount by which it may cut its promotional expenditures. The 13-year-old company reportedly spent more than $53 million for advertising, publicity, athletic sponsorships and payments to its stable of athletes in fiscal 1984. An estimated $16 million to $20 million was spent in advertising during calendar 1984, including the corporate—and widely publicized—Chiat/Day campaign.

The company has six and seven-figure contracts with many prominent athletes, including Chicago Bulls' rookie basketball player Michael Jordan, tennis pro John McEnroe and marathon runners Joan Benoit and Alberto Salazar.

Nike isn't expected to scuttle its 1985 advertising plans, but simply spend its promotional dollars differently, Mr. Van Dyke said. At least two promotions breaking this spring will center around two star athletes and new apparel and shoe lines carrying their names. Other apparel and/or shoe lines are available or in development.

Mr. Jordan will appear in ads for his Air Jordan apparel and basketball shoe lines (AA, Oct. 18); Mr. McEnroe will tout a line of tennis apparel.

A running line for women bearing Ms. Benoit's name also is in development.

Mr. Salazar's autograph has graced his "PR" (for "personal record") line of running wear since last fall, and he has appeared in print ads.

In both its promotions and its new-products ventures, the company clearly is seeking to broaden its image beyond its roots as a running-shoe company.

Capitalizing on the fitness boom, Nike plans to introduce its first aerobics shoe, the Air Conditioner, and its first bicycling shoe, the Velo, at the National Sporting Goods Assn. meeting in Dallas this month.

Most of Nike's current troubles can be traced to flattening of the running-shoe market, the major portion of the company's one-third share of the $2 billion U.S. athletic shoe market.

Sales of running shoes in the U.S., once the key growth factor in Nike's business, were down 28.7% for the quarter, while sales of its court shoes (basketball and tennis) were up 4.7%.

Sales in international and apparel, areas on which Nike has placed more emphasis since the running boom began to lose its luster, grew 42.2% and 51.6% respectively, still not enough to brighten the over-all profit picture for Nike.#

CORRECTIONS & CLARIFICATIONS

- The correct Consumer Magazine Ad Linage listing for *Town & Country* (AA, Dec. 24, P. 35) should have read: December, 1984: 195.6 ad pages; 1,893 pages for the year 1984, making '84 the 138-year-old publication's most successful ad page/revenue year. The correct 1983 ad page total for *T&C* is 1,814. The figures published in the AA chart were for the second half, rather than for the full year.
- Chesebrough-Pond's Rave conditioner is handled by Ogilvy & Mather (AA, Jan. 7, P. 56).
- Del Monte Corp.'s Sunkist Drinks unit's reformulated diet Sunkist orange soft drink will use 100% aspartame, not a saccharin-aspartame blend as reported (AA, Jan. 14, P. 8).
- The correct name of E. & J. Gallo Winery's new wine cooler is Bartles & Jaymes (AA, Jan. 14, P. 8).
- Advertising for Volkswagen's Jetta model was created by Doyle Dane Bernbach's Troy, Mich., office (AA, Jan. 14, P. 34).
- The Sugar Assn.'s proposed 60% ad budget increase is expected to be approved March 1. The group's new campaign will include network radio and national print buys and a test of tv, not network tv as reported (AA, Jan. 14, P. 8).#

"IT'S LIKE HAVING A STAT HOUSE IN THE HALLWAY."

–Alex Stefanishin, President
Anders Advertising, New York City

Anders Advertising used to spend a lot of money on photostats. From their own stat machine and from outside stat houses.

"Then I heard about Minolta's Beta 450Z copier," says Owner/President Alex Stefanishin.

The Beta zoom lens can reduce and enlarge originals to a virtually limitless range of copy sizes. From almost 50% larger than the original to 50% smaller.

"I wanted the 450Z for the time it would save us in preparing artwork for layouts and mechanicals," says Stefanishin.

"It was only later that I realized how much money we were saving.

"70% or so of our work is routine sizing. And that's where the 450Z's speed, convenience and cost savings beat the pants off a stat machine."

Your Minolta dealer can show you how the Beta 450Z can save you time and money. Look in the Yellow Pages under the Minolta trademark. Or call toll-free 800-526-5256. In New Jersey, 201-342-6707.

The Minolta Beta 450Z. Because life gets a lot easier when your copier can double as a stat machine.

U.K. software to drop U.S. price

By CLEVELAND HORTON

A British company that says it has captured 30% of the U.K. market for game software in less than a year will try to export its success to the U.S. The software publisher will use K mart stores as its port of entry.

London-based Mastertronic in late January will introduce 10 rock-bottom-price software games in the U.S. They will be sold in 60 Detroit-area stores owned by K mart Corp., Troy, Mich.

If the test succeeds, it might touch off a price war in the U.S.' estimated $1.5 billion home software market.

Mastertronic gained almost instant market share in the U.K. and more recently in Canada. Now it is establishing a joint venture with Bullock Industries, its Toronto-based partner for the Canadian market, to enter the U.S.

That joint venture, New York-based Mastertronic International, will position the games "as package goods and impulse items more than software" in cooperative print ads it hopes to start sometime in the first quarter of 1985, said Bullock president David Harding.

The company has no ad agency.

Mastertronic has sold 1.5 million units of software in the U.K. since the line was introduced last April, Mr. Harding said. In Canada, it has shipped about 150,000 units in four months. Mastertronic anticipates it will sell 2 million units in the U.S. this year.

The company believes its low-price strategy will satisfy an unfilled niche in the U.S. Most game programs here currently sell for $25 or more, but the Mastertronic disc-based titles—including "Chiller," "1985—The Day After" and "BMX Racer"—will sell for $9.99 each.

The software initially will be compatible only with Commodore International hardware but later will be expanded to other marketers' computers.

Perhaps the biggest task for Mastertronic will be establishing the quality of its programs. Closeout sales already have lowered the price of some game software, and consumers may interpret Mastertronic's low prices as a sign of financial trouble.#

Nintendo seeks U.S. videogame revival

REDMOND, WASH.—Nintendo Corp. of America, a subsidiary of the Japanese consumer electronics company, plans to introduce a home videogame console and 25 game cartridges to this country in June.

No prices have been set.

Interest in videogames faded almost as fast as it appeared earlier this decade.

The emergence of the low-price personal computer, which can act as a videogame player, brought growing console sales to an abrupt halt.

U.S. shipments of videogame consoles to dealers are declining, down from a 1982 high of 8.2 million units to 3 million in 1984 and 2 million projected for 1985.

In the U.S., Nintendo has concentrated on coin-operated videogames, where it lays claim to 50% of arcade-game sales.

The AVS model, equipped with an optional typewriter-like keyboard, resembles many lower-price personal computers. However, the company stresses that it is designed strictly for entertainment. No agency has been selected to handle the AVS introduction.#

Jess Korman, senior vp-creative at Benton & Bowles, New York, is an advocate of "image transfer"—putting the images of tv spots into radio ads—which is rekindling advertiser interest in an ignored medium. "One objective is to re-create exactly what you've got on tv," he says.

'Image transfer'

Radio ads making aural history

By VERNE GAY

It was 1969 when Henry Ford II was riding in his limousine and reached a conclusion that would influence Jess Korman's career for years to come.

Thirtyish and soft-spoken, Korman had just returned to the agency scene in New York after a writer's sojourn in Southern California. He had been milling jokes for an unlikely client roster that included David Susskind, Victor Borge and Alan King. Now he was back East writing tv spots at J. Walter Thompson when word came down that he would be heading up Mr. Ford's brainchild: The special radio account.

"Mr. Ford used to travel to work in his limousine every morning and decided Ford wasn't getting the kind of radio creative that Chevy was getting," says Korman. "So my job was to write better radio for Ford. Basically, we were producing for Henry riding in the back of his limo."

Mr. Ford soon was hearing comic skits featuring talking Pintos, and Korman never heard from Mr. Ford again.

The experience taught Korman something about the potential power of radio creative, a lesson that still is paying off for him at Benton & Bowles, New York, where he is senior vp-creative for clients

'Lemmings' didn't take off

By STEWART ALTER
and CLEVELAND HORTON

To many agency creative executives, Apple Computer's much-touted "Lemmings" was a lemon.

The spot aired during the fourth quarter of Super Bowl XIX, after a buildup that included a raging debate among Apple execs on whether to use the spot at all and culminated with an innovative print campaign in Jan. 20 newspapers that warned viewers "If you go to the bathroom during the fourth quarter, you'll be sorry."

As a followup to last year's wildly successful "1984" commercial, "Lemmings" heralded the Cupertino, Cal.-based company's plunge into the office-computer market with Macintosh. Both spots were by Chiat/Day, Los Angeles.

Some of the agency world's top creative directors, all of whom were impressed by "1984," registered doubts about "Lemmings."

Said Michael Tesch, exec vp-associate creative director at Ally & Gargano, New York, "If '1984' was a breakthrough, this was kind of a breakdown."

"I don't think the new commercial lived up to the last one," said Charles Moss, vice-chairman-corporate creative director at Wells, Rich, Greene, New York.

Mr. Moss felt the commercial was "effective," since he wanted to learn more about Macintosh's Office line, but he observed a credibility problem. "The first commercial had a positive and uplifting ending and was far more philosophical about what Apple would do in 1984. This one had a down

Carnation sweet on Bon Bons ice cream

By JULIE FRANZ

Los Angeles—Carnation Co. in March will introduce its Bon Bons brand Ice Cream Nuggets specialty ice-cream product to New England and midwestern markets, with an $18 million ad campaign, industry sources disclose.

Carnation, a recently acquired division of Nestle Co., White Plains, N.Y., would not comment on the budget figure. A Carnation spokesman did admit that the product will bow in selected states around March 1. Nationwide distribution is not in the cards, at least for this year.

Shaped like candy bon bons, the new freezer-case product is made from chocolate ice cream with vanilla coating or vanilla ice cream with chocolate coating.

It comes in two sizes—a 20-count tub priced at $1.98 and a 35-count tub priced about $2.98. Foote, Cone

Presstime

McCann sizzles for Ponderosa

Dayton, O.—Ponderosa has awarded its $15 million-plus account to McCann-Erickson, New York, succeeding Avrett, Free & Ginsberg (AA, Nov. 26). Other finalists making presentations last week were HBM/Creamer and Kenyon & Eckhardt.

DDB expects earnings to post '84 gain

New York—Doyle Dane Bernbach International projects 1984 pretax and after-tax earnings will increase over 1983, reversing its downward earnings trend of the last two years. In a meeting with securities analysts, Robert Pfundstein, exec vp-chief financial and administrative officer, projected pretax earnings would jump 30% to $19.2 million and net income would rise 15% to $8.5 million.

'Life' to fire off special WWII edition

New York—*Life* will publish a special 13th issue marking the 40th anniversary of World War II's end. The Time Inc. magazine is seeking a single sponsor for the WWII issue, due May 6. If one isn't found, multiple advertisers can buy space at $37,600 for a b&w page and $49,770 for a color page, on a 1.5 million rate base.

Serious on series

P&G turning away from tv specials

By BOB MARICH

Los Angeles—Despite a full slate of network tv specials and miniseries, Procter & Gamble Productions' top executive says the company will begin shifting its development efforts away from tv movies and into regular series.

Jack Wishard, vp in charge of P&G Productions, said the anticipated switch to series production has been prompted by the fact that multi-episode series are of much greater value as repeats in the syndication market versus tv movies.

Already, P&G produces two original half-hour series for Ted Turner's superstation WTBS: "Down to Earth," a family sitcom, and "The Catlins," a dramatic serial (AA, April 2).

"These shows [miniseries] are becoming increasingly expensive," Mr. Wishard said. "As the network share of audience goes down, it is conceivable that we could get to the point where nobody, networks or advertisers, can afford these kinds of shows."

Not that it will be an immediate changeover. P&G Productions has placed yet another beauty pageant special on network tv and has bought into a CBS miniseries with the hope that the production will become a perennial.

The "Miss Hollywood" pageant, a P&G production, has been placed on ABC-TV as a sponsored two-hour special. No air date has yet been set. "Miss Hollywood" joins five other network tv specials—including "Miss USA" and "Miss Universe"—as a P&G-sponsored vehicle and gives ABC its first pageant-type show.

Separately, tv's largest advertiser is providing partial funding for "Alice in Wonderland," a four-hour CBS-TV miniseries being produced at Columbia Pictures Television by Irwin Allen.

Cincinnati-based P&G is hoping that Mr. Allen's production of the Lewis Carroll fantasy becomes a network tv classic that will air repeatedly over the years, Mr. Wishard said. If so, it will be a P&G-sponsored vehicle in repeats on the network.

Mr. Wishard, a 28-year veteran of P&G, said P&G Productions' strategy is to become one of several partners in tv projects. Thus, it shares the cost and gets an ad sponsorship position and creative input when the program is being fashioned.#

Airlines' saver ads fly furiously

United strikes back

By SCOTT HUME

United Airlines had its chips ready. When American Airlines last week upped the ante in the air-fare game by drastically lowering prices (AA, Jan. 21), United saw and raised without even a blink.

American's first print ads announcing its new Ultimate Super Saver fares appeared Jan. 18, a day after they were unveiled. But they shared space in Chicago newspapers with ads from United for its equally low UltraSaver fares.

United then raised the pot by airing network tv spots for its new fares two days later during the Super Bowl pregame show.

Behind United's calm poker face was some fast and furious work by the airline and its agency of 20 years, Leo Burnett Co., Chicago.

In less than 24 hours, the team revamped United's tv, radio and print advertising to reflect the new fares.

Anticipating American's fare-cut announcement, United alerted Burnett late on Wednesday, Jan. 16, to be ready to move quickly.

"Thursday morning, every group involved in the United account was mobilized," recalled account director Jim Thompson. Also readying their troops were creative director Bud Watts, media supervisor Nick Luciano, broadcast supervisor Pat Donlon, broadcast producer Ken Gilberg and print production manager Lew Nowlan.

The green light flashed at 10 a.m. Jan. 17 when American made its announcement in Dallas.

"The first thing we did was huddle with the creative team to dis-

(Continued on Page 50)

Blakemore opens up shop

By STEWART ALTER

New York—Charles Blakemore, who left Benton & Bowles as its top creative executive late last summer (AA, Sept. 3), has opened his own ad agency.

Mr. Blakemore has formed Blakemore & Killough with temporary offices at 1180 Avenue of the Americas.

James Killough, the other principal, has been a consultant the last five years, primarily in the political arena.

Five years ago, he was director of the Republican National Marketing Group. He was previously an executive at Compton Advertising, where he and Mr. Blakemore worked together in the mid-1960's.

Mr. Blakemore went on from Compton to Leo Burnett Co., Chicago, where he rose to be one of three chairmen of the creative review committee. Major Burnett food accounts like Green Giant, Star Kist and Kellogg were his responsibilities.

In 1980, Mr. Blakemore moved to the top creative post at B&B, which made him one of the major agency creative officers directing Procter & Gamble's advertising.

Since the fall, Mr. Blakemore and Mr. Killough have done consulting work for Sanus Health Systems, a McDonnell Douglas Corp. healthcare subsidiary, which has introduced its healthcare plan into Dallas-Fort Worth and Houston. Sanus is their new agency's first client.

Mr. Blakemore left B&B, saying that he wanted more of a hands-on role in creating advertising, something he no longer had as the top worldwide creative executive at that agency. And that remains his philosophy with his new agency.

"We want to make sure we're very much involved in the work ourselves and have some fun," he said. "It's so much more fun to write advertising than administer it."#

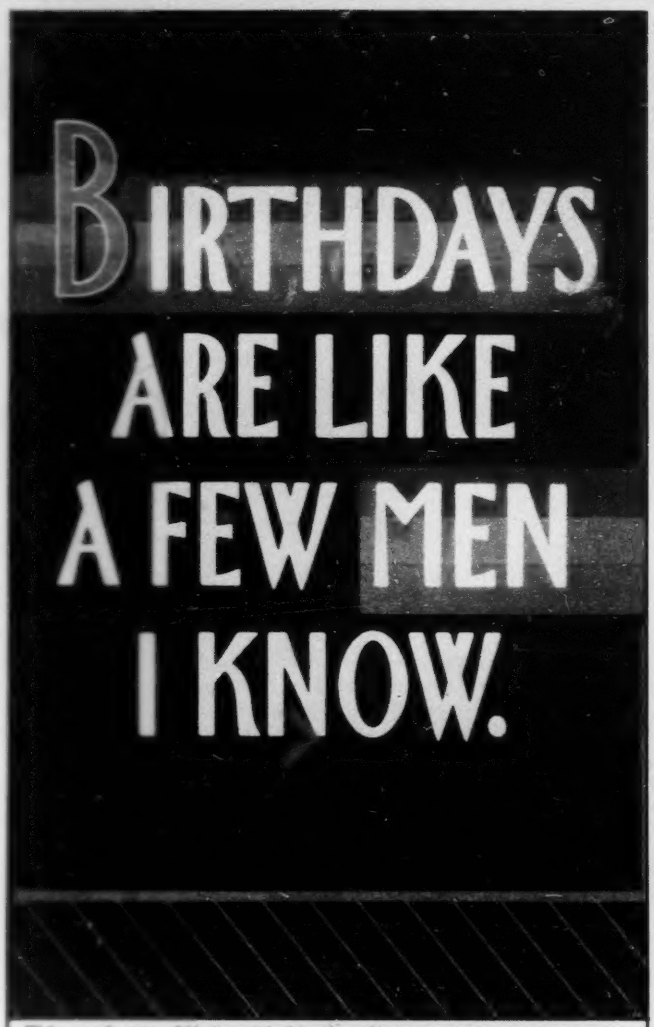
Agency Income response deadline

Deadline for submission of questionnaires for Advertising Age's 41st annual U.S. Agency Income issue was Jan. 24.

Questionnaires were sent to agencies last month.

If you have not received your questionnaire, contact Ellen Herring or Craig Endicott at the Chicago office of AA (312-649-5395). An extension will be made for agencies that have not received the questionnaire.#



This card, one of Hallmark's Modern Woman series, opens to say "Put a bag on 'em and they're all the same. Happy day!"

Hallmark asks women: Can we talk?

By LENORE SKENAZY

Aging. Birth. A divorce. A date. A diet.

Is this life on daytime tv? A list of *Cosmo's* cover stories? A choice of one-minute how-to guides?

No, these are the topics women want to talk about through greeting cards—or so Hallmark Cards is betting. Without any retail test-marketing, the Kansas City-based greeting card giant this month premiered a 99-card Modern Woman line.

Hallmark's no-fret go-ahead attests to its conviction that women in the 22-to-40-year-old bracket are ready for "a strong voice through such a card line," said Rachel Boulton, a Hallmark spokeswoman.

"Your pregnancy will be such a special time in your life," coos one card. "When else would perfect strangers pat you on the stomach and comment on your ankles?"

Continuing through the life cycle, another card features mom and dad dressed for success at the breakfast table with baby sitting between them. "Now you'll really have it all! A wonderful husband, a brilliant career and a brand new baby. . ." Open up the card, and the message continues, ". . .bags under your eyes, pacifiers in your briefcase, oatmeal on your blazer. . .Congratulations!"

Each of the cards costs 90¢. The designs vary from photographic to Sunday comics, sentimental to frankly bitter. "If you need a shoulder to cry on," soothes one, above the photo of a huge hanky, "I have two available, no waiting." Another card, eschewing pictures, decries, "Birthdays are like a few men I know. Put a bag on 'em and they're all the same. Happy day!"

Hallmark plans to add another 100 cards to the series. But Modern Woman will remain a separate line from other Hallmark cards.

And separate they should be. What man would send his son a card reading, "I like you. You don't do crafts"? What grandma would admit to grandpa, "You think you've got problems! My living bra just tried to commit suicide!"? What proud high school graduate wants to hear, " 'D-I-V-O-R-C-E.' Someday you'll be able to sing about it"?

No, this is girl talk. And if Hallmark is right, it'll spread.#

Looking at some Sunday statistics

By Kevin Brown

Sunday hasn't been a day of rest for the newspaper business for more than 100 years. Although some weekly newspapers were issued on Sunday in the late 1700s, the first U.S. daily to regularly print a Sunday edition was James Gordon Bennett's *New York Morning Herald* in 1841, according to "The Press and America," by Edwin Emery and Michael Emery (Prentice-Hall, 1984).

Kevin Brown is an ADVERTISING AGE *editorial assistant.*

In 1889, Joseph Pulitzer's *New York World* became the first newspaper to use color in its Sunday comics. Mr. Pulitzer is noted for establishing the Sunday newspaper as an entertaining, money-making medium. He most likely is responsible for publishing the forerunner of the 5-lb. Sunday package found on readers' doorsteps.

Sunday World, which had a circulation of more than 250,000 by 1887, included sports stories, humorous illustrations and features appealing to the female reader.

In the U.S. today, Sunday newspaper readers have their choice of 772 papers with a combined circulation of 56.7 million, according to *Editor & Publisher Yearbook.*

Twenty of those papers have a circulation of more than 500,000 and a combined circulation of 16.6 million.

Sunday readers in Texas have the most variety to choose from. The Lone Star State is home to 96 Sunday newspapers—more than any other state.

If your Sunday edition is not independently owned, chances are fairly good you're reading one of 57 Gannett Co. papers. Gannett owns more Sunday newspapers, with a combined circulation of 3.9 million, than any other company.

New York News is the Sunday circulation leader, with 1,721,441, according to Audit Bureau of Circulations. But the *New York Times*, which boasts a Sunday circulation of 1,553,720, has a far broader national readership.

Reading the Sunday paper is a popular activity among adults; 65.7% of them are readers, according to a 1983 Simmons Market Research Bureau study.

Sunday newspaper readers are thrifty, too. Of those who read a Sunday newspaper, 73.8% use cents-off coupons more than once a week.

Perhaps coupon clipping saved some readers enough money to buy personal computers, which 5.4% of Sunday paper readers own.

Sunday newspaper readers are not sitting around. To work off Sunday brunch, more than 12% of Sunday newspaper readers jog and more than 9% play tennis. Naturally a strong arm is required to lift the Sunday package—perhaps that's why 18.6% of Sunday newspaper readers bowl.

Another favorite activity of Sunday newspaper readers is attending movies, which 46% did during a three-month period.

In between all this activity, 21.5% of all Sunday newspaper readers are sipping imported wine, while 36.8% drink domestic wine. A larger percentage of Sunday newspaper readers (40.6%) drink domestic beer than drink imported beer (17.7%).

If they're not at home stretched out on the sofa, Sunday newspaper readers might be on vacation—40.7% took domestic trips last year. And with 38.3% reporting an annual household income in excess of $30,000, perhaps some traveled via foreign automobiles, which 12% bought new and 9% bought used.

And whether it's before breakfast, after church or during "60 Minutes," the voluminous Sunday newspaper—with its large circulation and ad linage to match—is being read all over.

Sunday readers in Texas have the most variety to choose from. The Lone Star state is home to 96 Sunday papers—more than any other state.

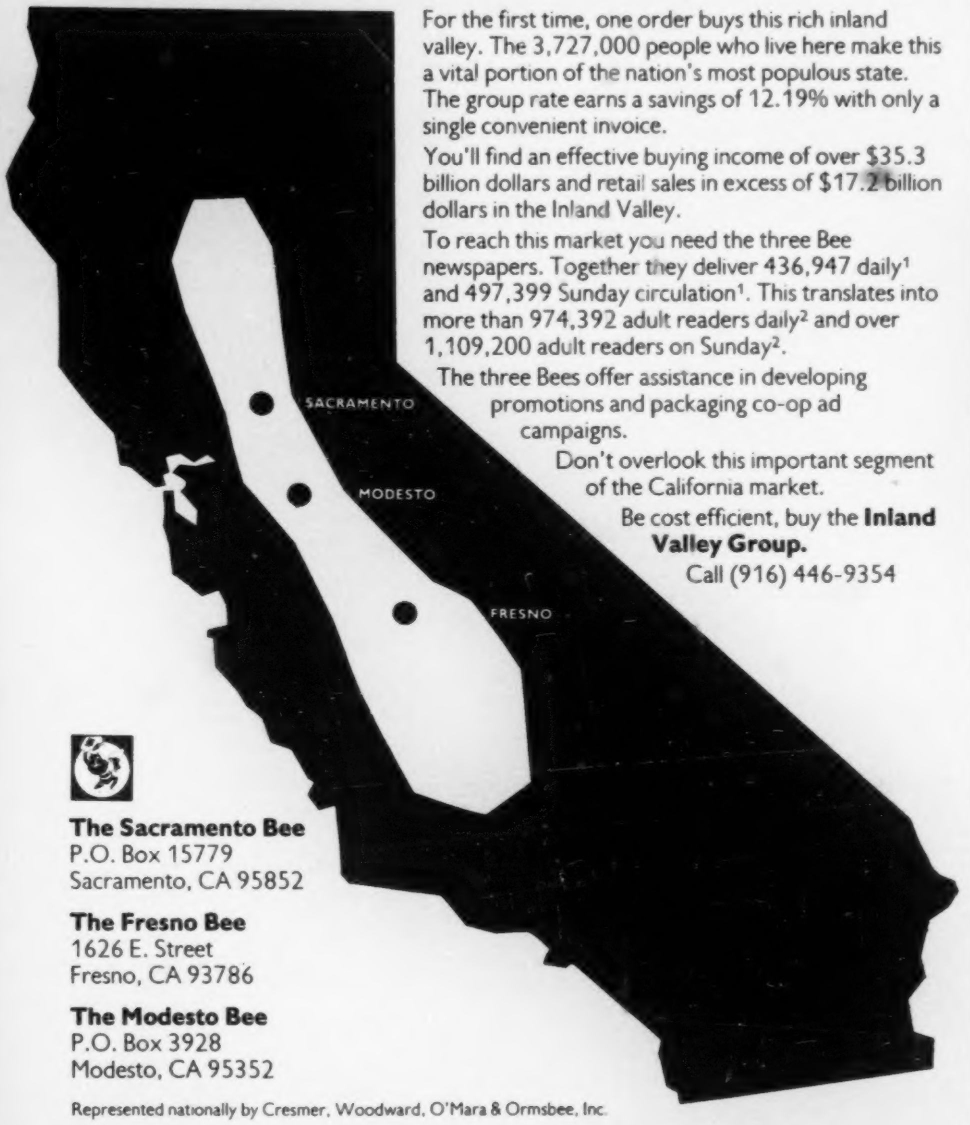
A Golden Opportunity

Now, Reach California's Prosperous Third Market, The Inland Valley, with The Bees' Inland Valley Group Buy!



For the first time, one order buys this rich inland valley. The 3,727,000 people who live here make this a vital portion of the nation's most populous state. The group rate earns a savings of 12.19% with only a single convenient invoice.

You'll find an effective buying income of over $35.3 billion dollars and retail sales in excess of $17.2 billion dollars in the Inland Valley.

To reach this market you need the three Bee newspapers. Together they deliver 436,947 daily[1] and 497,399 Sunday circulation[1]. This translates into more than 974,392 adult readers daily[2] and over 1,109,200 adult readers on Sunday[2].

The three Bees offer assistance in developing promotions and packaging co-op ad campaigns.

Don't overlook this important segment of the California market.

Be cost efficient, buy the **Inland Valley Group.**

Sunday magazines feel ad pinch

By William Gloede

The Sunday newspaper magazine business, 88 years old in 1984, probably would just as soon forget the year.

For *Parade* and *Family Weekly*, owned by Newhouse Newspapers and CBS Magazines, respectively, 1984 brought with it a double-digit decline in advertising pages. For most of the 52 locally edited Sunday magazines represented by Metropolitan Sunday Newspapers, 1984 was flat at best when compared with the banner year enjoyed by the newspaper business.

The newspaper industry is hampered by Sunday magazines' inability to share the wealth of advertising growth enjoyed by mail-delivered magazines.

"It's a question of how they fit into marketers' plans," Phil Guarascio, senior vp-director, media management, Benton & Bowles, New York, says of newspaper-delivered magazines. "The basic inhibitor is a very high out-of-pocket cost."

However, Sunday magazine executives say their products, when bought together, deliver an audience about the size of tv's Super Bowl audience—60 million households.

A page color ad scheduled in *Parade, Family Weekly* and the 52 independents costs about $500,000, minus discounts. A 10-page color schedule in *Parade* can cost between $1.7 million and $1.8 million.

With this price tag comes a sizable audience. Even advertising media people who are not predisposed to using Sunday magazines acknowledge that the only other place an agency can get that kind of reach is in tv.

"The numbers are staggering," says one agency media executive, who would not speak for attribution. "If you're looking for mass reach with newspapers, the Sunday magazines are out of sight in terms of mass coverage. There's no other print medium that offers that mass. But when you start talking about huge numbers, you're also talking about huge expenditures."

Magazine executives interviewed by ADVERTISING AGE agree that the high cost of advertising in the Sunday magazines does scare advertisers.

"The Sunday magazine field is looked upon as being huge, and we are huge," says Sterling Dimmitt, president of Metropolitan Sunday Newspapers. "I think that's one of our problems. People look at our size and they look at the numbers, and they say, 'Oh-oh.'

"This is, I think, the most difficult sell in the media field, though maybe radio would say that too," Mr. Dimmitt says.

In 1984, *Parade's* ad pages slipped about 15%, compared with 1983, according to Carlo Vittorini, the magazine's president-publisher. *Family Weekly's* pages were down 12.1%, says Patrick Linskey, its president-publisher. And, according to Mr. Dimmitt, magazines represented by Sunday Mag Net were up about 1%.

"We had a lousy first half" of 1984, Mr. Linskey says. *Parade* was off 21% and *Family Weekly* was off 23%.

However, the second half produced more positive results, partly because of a new spirit of cooperation among the individual players—once fierce competitors—in the Sunday magazine field.

This new spirit was evidenced by Mr. Vittorini, who says, "The broad reach coverage of non-television viewers is better done by *Parade, Family Weekly* and Sunday Mag Net than any other combination."

According to Mr. Linskey, "The Sunday magazines mix and match with tv like no other media. For the advertiser who has to keep the weight of his audience reach and frequency in the marketplace that he used to enjoy in 1980 [in the face of declining network ratings], there's only one way to do it, and that's with the combination of *Family Weekly, Parade* and Sunday [Mag Net]."

The Sunday free-standing coupon insert, which since 1975

No, we're not selling correspondence courses. Or matchbooks. We're selling advertising. And the "big money in advertising" we're talking about has to do with getting the most out of your advertising dollar. That means, in large part, choosing the right market and, of course, the right medium in that market.

Which brings us to us. The Pennysaver. Southern California's Direct Advertising System. Of course Southern California is one of the nation's premier "big money" markets. And The Pennysaver Direct Advertising System is one of the smartest ways to penetrate that market.

THERE'S BIG MONEY IN ADVERTISING

At the center of our system is The Pennysaver weekly shopping publication, which reaches almost two million households in Los Angeles, Orange, Ventura, Riverside and San Bernardino Counties with guaranteed direct mail delivery and 98% saturation in its covered market areas. Add the versatility and cost-efficiency of zone buying for geographic and demographic targeting as well as a complete set of direct marketing services—including research, mailing lists, and inserts—and you have a product that will both **make** and **save** you big money.

Call us today for a complete Pennysaver Direct Advertising System media kit.

Magazines

(Continued from Page 28)

has become the dominant medium for package goods advertisers' promotional efforts, has hurt Sunday magazines perhaps more than any other factor.

Mr. Vittorini sees some light on the horizon thanks to the recent Procter & Gamble decision to use Sunday magazines to introduce Always, a new line of sanitary napkins. Although P&G used the magazines to introduce the product, it shifted advertising to mail-delivered magazines as soon as the introduction was complete. The Sunday magazine executives are trying to counter the logic that says to use the magazines' mass for introduction, then move into other books for the sustaining effort.

One category the Sunday magazines are targeting is the automobile business.

"All of us feel that we're being underutilized by the automotive market," Mr. Vittorini says.

The Sunday magazines recently broke ground in another major field—retail. However, they must tread lightly, because the field represents the major advertising category of the newspapers that distribute the magazines.

On Dec. 9, J.C. Penney Co. ran its first ad in the Sunday Mag Net books, which have a circulation of 22 million, and *Parade*, with 16 million.

Sunday magazines also are tying national advertising more closely to local retailers. "Regionality is becoming more and more important as the years go by," Mr. Linskey says.

> **"All of us feel that we're being underutilized by the automotive market."**
>
> —*Carlo Vittorini*
> Parade

Mr. Vittorini concurs. "The Sunday magazines put the readership closer to the retail outlet. Your traditional magazine is spread across the population, wherever the mail goes."

To accommodate readers and advertisers, *Parade* is running its PLUS program, which gives the local newspaper several pages to use for locally oriented editorial and locally sold advertising, in the *Chicago Sun-Times*. The *Houston Chronicle* recently began running its Sunday magazine inside *Parade*.

Parade and *Family Weekly* this year will begin a major effort to get package goods marketers, once a mainstay of the Sunday magazines, back into the books. The SMART program, a fold-down, center spread coupon page, will use the synergy of display advertising and couponing to attract package goods' advertising and promotional dollars. Sunday Mag Net also will be running a coupon program tied into the SMART program, called SUPERSAVERS, but production constraints will not allow for a fold-down coupon page.

According to Mr. Vittorini, General Mills used to run 60 to 70 pages a year in *Parade*. "That has just disappeared," he says, because of the "fsi [free-standing insert] diversion from our field."

Two serious problems with Sunday magazines are their editorial content and advertising environment, according to the media executive, who would not speak for attribution. "The editorial environment is no great shakes," he said. And the advertising that the magazines do sell sometimes does not work well with a national advertiser's goal. "They've got to keep us away from the hemorrhoid sufferers, the ways to catch mice in your house. That doesn't go very well next to a fine food ad."

Mr. Vittorini disagrees. "I think all of us [magazine executives] have made a conscious effort to upgrade our editorial, for the reader as well as the advertiser." There has been a move toward advertising of more expensive, quality items in the direct reponse category, one of Sunday magazines' largest revenue sources.

"The traditional lower price item does not appear to be doing as well," Mr. Vittorini says. "You have a much higher price, higher quality item being offered."

All three of the magazine executives cite the *New York Times Magazine* as the standard of the industry. "They probably are the most unique magazine in the world," Mr. Vittorini says. The *New York Times Magazine* is one of the "four independents" that do their own selling, along with the Sunday magazines of the *Los Angeles Times, Newsday* and the *San Francisco Sunday Examiner and Chronicle*.

An increase in ad sales is in sight, according to Mr. Linskey.

Mr. Vittorini says, "All indications are that we'll have an up quarter in the first quarter of '85."

"In order to really grow, they're going to need more display advertising schedules," Mr. Guarascio says. And that isn't going to be easy.

"They don't compete for most magazine dollars," he says. "They have almost been forced to compete with television for the advertising dollar, and print always has a tough time competing with network."

On the positive side, Mr. Guarascio believes "very firmly they have become more marketing oriented." And that gives them the opportunity to better sell their "strategic and tactical advantages.

"My prognosis would be that things are going to get better for them," he says.

Mr. Dimmitt says, "We're going to have to sell better. The Sunday magazine field is one of the best kept secrets in media."

The challenge, it would appear, is to give away that secret.

WILD TURKEY

Wild Turkey wings it

Grounded lo these many years in previous ads, the familiar symbol of Wild Turkey premium bourbon takes flight (first class, of course) in a new campaign from Austin, Nichols & Co., New York. Campaign by Nadler & Larimer breaks during February in 40 magazines, as well as newspapers and outdoor.

Seoul sings Sept. song for '88 games

By JAMES P. FORKAN

New York—A Summer Olympics in the fall?

That's what the Seoul Olympic Organizing Committee has planned for 1988. The reason is that during the traditional months of the quadrennial games, July and August, South Korea tends to be belted by monsoons, which could disrupt the competition.

With that in mind, Seoul has told the three major U.S. tv networks the tentative 1988 Olympics schedule will stretch from Sept. 17 through Oct. 2, network officials here said. The Oct. 2 closing ceremonies would fall on a Sunday night, as usual.

That unusual timing, however, raises still more problems for ABC, CBS and NBC, whose top brass already have been cool toward bidding for rights to televise the '88 games due to the committee's seeming unwillingness to slate events so they would air live on U.S. prime time tv.

One ABC official said, "It brings up questions about how the new fall ['88] prime time tv season may

As Gillette goes bi. . .

Good News! for all

By GAY JERVEY

Gillette Co. will lend one of its better known razor names—Good News!—to a new line of unisex toiletries due this spring.

Sources say the Boston-based company is readying a Northwest regional test of the products. The line initially will include a regular and a concentrate shampoo, deodorant stick, antiperspirant, hair conditioner and shaving cream. A national rollout may come sometime next year.

Gillette declined comment on the line.

Although advertising has yet to be developed, Gillette and Young & Rubicam—the agency that worked on the relaunch of Right Guard deodorant/antiperspirant and Silkience haircare line—plan to stress the message that Good News! will deliver Gillette quality at an affordable price.

Ad and promotional spending will be at an annual rate of $30 million for the test, according to a source.

Scheduled to begin on the day Americans love most, April 15, the campaign will pound away on quality and value, themes consistently nurtured by the nine-year old Good News! name. Pricing strategy calls for the items to appeal to consumers who don't wish to pay

Apple fails to register

Viewers flunk quiz on 'Lemmings'

By JOSEPH M. WINSKI

A lot of people *think* they saw an Apple Computer commercial during the Super Bowl—but few can remember just what they saw or what product was being advertised.

Those conclusions emerge from a special Advertising Age survey of public awareness of Apple's controversial "Lemmings" commercial, a single 60-second spot aired during the Super Bowl to introduce the Macintosh Office computer system.

The survey indicates that the commercial clearly failed to register with most viewers. It tends to confirm the opinion of agency creative executives who have expressed doubts about the commercial's impact, especially in comparison with last year's widely acclaimed "1984" spot (AA, Jan. 24).

In the survey, researchers at SRI Research Center, Lincoln, Neb., interviewed a national sample of 300 people 18 or older who said they had watched the Super Bowl's fourth quarter, during which the Apple commercial was shown.

Recall

300 viewers of the Super Bowl's fourth quarter were asked: Do you recall seeing a commercial for the Apple Computer company? *Source: SRI Research Center, Lincoln, Neb.*

Response	Mentions	Per cent
Yes	162	54
No	138	46

Only 31 respondents, or 10.3% of the total, described the commercial correctly.

About 60% of the sample were men and 40% women, the same male-female makeup as the viewing audience.

The sample survey was conducted by telephone Jan. 22 and 23. It has a margin or error of plus or minus 5.7 percentage points.

Of the 300 people interviewed, 162, or 54%, answered yes to the question: "Do you recall a commercial for the Apple Computer company?" But only 31 people—19% of those claiming to have seen an Apple commercial and 10% of all the respondents—were able to describe the commercial correctly.

Fifty-five per cent of those who said they had seen an Apple commercial said they couldn't describe it; the remaining 26% simply described it incorrectly. Robert Nielsen, SRI vp and analyst who directed the study, said interviewers were instructed to be "generous" in deciding which descriptions were accurate, and that those reported by SRI as incorrect "were clearly wrong."

Among the incorrect responses were those saying the commercial showed "an apple with a bite out of it," "a big computer" and "a guy who looks like Charlie Chaplin" (the character used in IBM personal computer commercials), Mr. Nielsen said.

The commercial showed business-suited men and women marching single-file off a cliff, whistling the Disney tune, "Hi-ho, hi-ho," in a funeral tempo.

Respondents performed even more poorly in identifying the

Last Minute News

RKO Radio has ear for buyout offers

New York—RKO Radio Networks, still reeling from an advertiser billing scandal last year, is "listening" to various offers to sell the networks, an RKO spokesman says, though no sale is imminent. RKO Radio Networks has reached only 20% of its advertising sales goal for the first quarter, the spokesman said.

'U.S. News' publisher Dunn to leave post

New York—William Dunn is leaving his post as vp-publisher at *U.S. News & World Report*. Once his successor is chosen, which Mr. Dunn expects "in the next couple of months," he will become senior vp, U.S. News & World Report Inc. His agreement with new owner Mortimer Zuckerman calls for him to continue as senior vp through 1985; in September, he will add duties at the University of Massachusetts, teaching in the business and journalism schools.

Chiat tests jump to defense of 'Lemmings'

Cupertino, Cal.—Apple Computer's controversial "Lemmings" Super Bowl spot scored well in day-after recall tests commissioned by Apple agency Chiat/Day. Apple said of 127 respondents, screened by Chiat to exclude nonprofessionals and nonmanagers, 73% recalled the spot, 68% could articulate its main message, 80% could describe the action in detail, 79% believed it was targeted at business, 23% spontaneously mentioned the Macintosh Office, subject of the ad, and 59% expressed an interest in

Passport to $20 million

Six agencies apply for Visa

By RUTH STROUD

Visa USA, after several management changes, is searching for a full-service international agency to handle its estimated $20 million U.S. account.

The U.S. arm of Visa International, San Francisco, the world's largest bank-card organization, is talking to six agencies headquartered in New York or Chicago to replace Visa Communications, its in-house agency for the past decade. Among those believed to be on the list are: Young & Rubicam; BBDO International; Dancer Fitzgerald Sample; Leo Burnett USA; Foote, Cone & Belding, and one other agency.

Visa's decision to seek an outside ad agency follows recent change in management and direction of the company. Charles Russell became president-ceo of Visa International and Visa USA, after D.W. Hock, who had held the post since Visa was founded in 1970, announced his retirement. In October, John Bennett, a former vp-marketing at Merrill Lynch, Pierce, Fenner & Smith and, before that, a product and marketing executive with Citibank and American Express Co., became the new director of marketing and product development.

The search for an outside agency is really Mr. Bennett's decision and that of top management, according to company spokesman Richard Rossi. "Because of deregulation, [they feel] there will be much tougher competition and that [Visa] needed the additional resources that a larger international agency could provide," Mr. Rossi explained. "We need a lot more capability than it would make sense for us to build into an in-house

Software discs lure Woolworth

By BRIAN MORAN and PAT SLOAN

New York—A chain of computer software stores is believed to be one of three specialty retailing formats F.W. Woolworth Co. is expected to announce soon.

Reports of Woolworth's intent to further expand in specialty stores surfaced last week amid increased trading of its stock. The heavy trading revived speculation that a Canadian investment group or Rapid-American Corp. chairman Meshulam Riklis might be orchestrating a takeover.

At press time, Woolworth executives would not comment on the nature of the new stores. A spokesman, attributing the stock's activity only to a surge in the over-all market, indicated the company will reveal the identity of the stores within a week.

The new stores are part of Woolworth's previously announced strategic plan to internally develop or acquire new specialty stores. Woolworth first confirmed late last year that it was looking at three additional formats for 1985 (AA, Dec. 10). Woolworth previously had announced plans to test deep-discount drugstores with two outlets in metropolitan Philadelphia. The stores, scheduled to open early this year, will be called the Rx Place, a Woolworth spokesman said last week.

The specialty store offensive is considered key to Woolworth's plans for long-term growth. Woolworth management also has been trying to revive its variety store business, the oldest and largest segment of the retail company that began as a 5¢ & 10¢ store.

Woolworth's software stores re-

New roles at rechristened parent

O&M name game

By STEWART ALTER

Kenneth Roman, Graham Phillips and Norman Berry were named to major new management roles at a reorganized, renamed Ogilvy & Mather. Jay Schulberg has been tapped for a key creative role.

The Ogilvy Group is the new name for the parent O&M company, previously called Ogilvy & Mather International. It had 1984 billings of $2.9 billion.

O&M International chairman-ceo William Phillips, 55, retains that title at the Ogilvy Group.

A key promotion involves Mr. Roman, 54, who moves to president of O&M Worldwide from the same title at O&M-U.S. William Phillips remains O&M Worldwide chairman.

Graham Phillips, 45, has been named chairman at O&M-U.S., while retaining responsibility as chief financial officer at the parent Ogilvy Group. He had been managing director of O&M, New York.

Mr. Berry, 53, was named president of O&M, New York, while retaining the post of O&M Worldwide creative director. Replacing Mr. Berry as creative director, O&M, New York, is Mr. Schulberg, 45, who has been senior vp-deputy creative head.

Michael Ball, 48, vice-chairman at O&M International becomes vice-chairman at Ogilvy Group and adds the new title of vice-chairman, O&M Worldwide, in charge of worldwide development.

James Benson continues as vice-chairman, O&M Worldwide.#

Ralston summons salmon

By JULIE FRANZ

St. Louis—Ralston Purina Co.'s new Chicken of the Sea brand canned pink salmon may "change the way everybody's packing salmon," industry sources say. The new product marks the first time salmon is packed skinless and boneless.

"Ralston is going big into seafood," one industry insider said. Ralston has been telling grocery store buyers the company wants to be known as "*the* canned seafood company, not just a dog food company," buyers report.

MAVERICK IDEAS
can become thoroughbreds. Let us corral and develop your new product concepts while you do what you do best. Find out about our track record and real-world marketing philosophy.
Call and let's talk
Bernstein • Beckerman
Consulting Group
A Professional Corporation
Los Angeles: 818-905-6666
New York: 212-319-1633

It also has hinted it may add canned shrimp and canned crab to its Chicken of the Sea line, sources say.

Ralston refused to comment on its new pink salmon or rumored expansion plans.

The company's pink salmon began testing Jan. 1 in Buffalo, Houston, Kansas City, Miami and Pittsburgh. The product is backed by a $7 million campaign by TBWA, including $4.2 million for tv spots and print ads breaking March 1.

Ralston is applying its tuna fish-cleaning technology to its salmon product, seafood industry sources say.

It has a temporary patent on applying the cleaning process to salmon that should keep competitors at bay for at least 15 months, sources say.

Traditional methods of packing salmon with the skin and bones give a 68% to 70% yield from a salmon, those sources said. Chicken of the Sea's new packing method gives only a 40% to 45% yield from each fish, they said, adding four to six cents to the retail price of each packed ounce, they added.

The product comes in 6.5-oz. cans priced between $1.31 and $1.75.

It also comes in a 12.5-oz. can, but none of the buyers interviewed said they'll stock the larger size. Grocery shoppers are more likely to buy the smaller-size can because it resembles a can of tuna, they point out.

The product's physical likeness to canned tuna is the pink salmon product's biggest selling point, test market sources agree. "If you make it look like tuna, people will buy it," one said. Skinning and deboning the salmon adds to the convenience and eliminates much of the "fishy" odor of canned salmon, he added.

To introduce the product, Ralston is selling a 3.25-oz. trial size for between 41¢ and 59¢; it is available through February, market sources report.

The sample comes in a 144-can pink point-of-purchase display with 25¢-off coupons on the label. Free recipe books for consumers unfamiliar with salmon are part of the display.

On-pack coupons for 15¢ off the 6.5-oz. can and 30¢ off the 12.5-oz. can also run through February and again in September.

Tv spots, with 1,024 gross ratings points guaranteed during the test, will run through the first week of June.

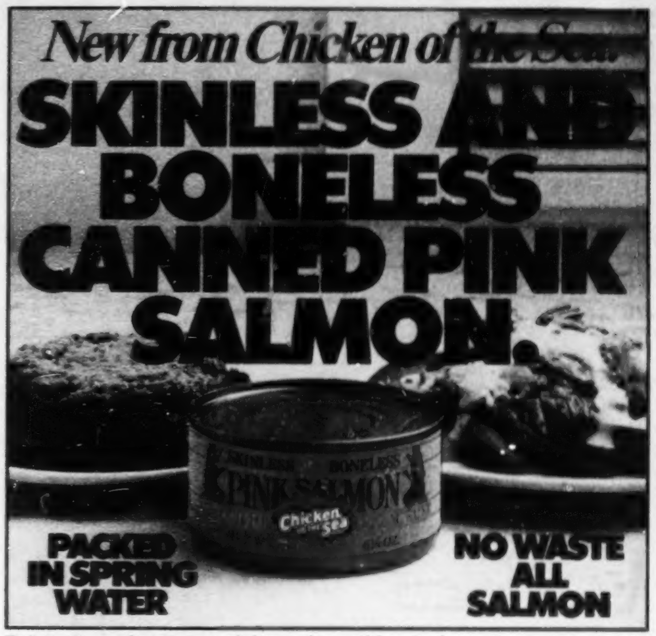
Print ads in women's magazines—themed "No waste. All salmon."—with 15¢-off coupons will run through June 30 and again in September.

Ralston plans two-for-the-price-of-one coupons the first week in March.

Also planned for that week are cents-off coupons with total distribution of all three to 657,000 households.

Another 587,000 coupons for 20¢ off any size or buy-one-get-one-free are set for the first week of May and the first week of September.

With magazine and freestanding insert distribution, Ralston is guaranteeing circulation of 300 million coupons, product literature asserts.#



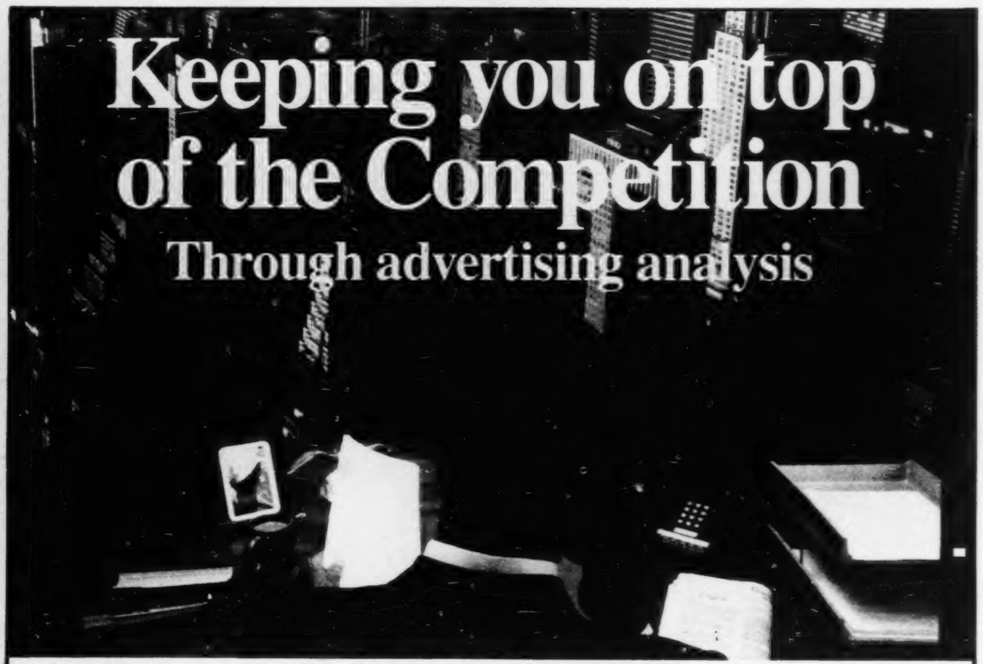
Point-of-purchase materials such as this stack card are included in Ralston's support for Chicken of the Sea brand canned pink salmon as part of a $7 million ad campaign by TBWA, St. Louis. The product marks a major Ralston commitment to the canned seafood business, industry sources say.

Alcohol ban bill killed

Atlanta—A bill to ban alcohol advertising in Georgia was overwhelmingly defeated, 118-46, last week in the state's general assembly, with most opponents arguing against it on constitutional grounds.

CORRECTIONS & CLARIFICATIONS

- Procter & Gamble did not agree to sponsor the Metromedia program "Small Wonder" as reported in a story on the National Assn. of Television Program Executives International syndication convention (AA, Jan. 17, P. 2).
- By transposing 1984 and 1983 ad page figures, a chart headed "How the top 25 line up [Monthly metropolitan magazine ad linage]" that appeared in the Special Report on City & Regional Magazines (AA, Jan. 17, P. 16) incorrectly positioned *Ultra* as No. 23 on the list. Since the Houston-based publication reports that it carried 1,055 ad pages in 1984, or 28% more than the 824 in 1983 (not the reverse), it finished 1984 virtually tied with *Houston City* in 13th place. (The latter reported 1,054 ad pages for 1984.)



Keeping you on top of the Competition
Through advertising analysis

Positioning.
You are probably spending a large portion of your advertising budget to create an image for your product or service, to position it where it will be most effective.

To do that properly, you must know what the competition is doing. How they are positioning . . . where and how they are advertising. Think about all the information you need to know concerning your competitors advertising strategies. For example,
. . . how much your competition is spending on advertising
. . . in what publications do your competitors advertise
. . . with what frequency does the competition advertise
. . . what is the content and composition of their advertisements
. . . which competitive products are being advertised most.

With Burrelle's Advertising Analysis reports you will be sure to get all of this, and more. Our research can help you determine where and how you should be advertising. It can also help you select the media you need to reach markets that are important to you, as well as markets that are being overlooked by your competitors.

With nearly one hundred years in the business, you can be confident that Burrelle's is the right source for this valuable information. As the world's foremost media monitoring service, we research more than 10,000 daily, weekly and Sunday newspapers, and more than 6,000 trade and consumer publications, offering you a breadth of media coverage unequaled in the industry.

To learn more about Burrelle's Advertising Analysis Service call 1-800-631-1160 (in New Jersey 201-992-6600). Ask for Greg Cuccinello or Al Hudson.

New Indian Prime Minister Rajiv Gandhi, receiving the accolades of voters who elected him last month, has vowed to open India to foreign marketers.

INDIA

A sleeping giant finally opens door to the West

Editor's note: The prospect of a new "open door" policy in India is as exciting to many Western marketers as the opening up of China. The late Indian Prime Minister Indira Gandhi was in the midst of a program to emphasize free enterprise within India—and also to attract new, foreign competitors—when she was assassinated last year. Mrs. Gandhi's son, Rajiv Gandhi, elected India's prime minister last month, said he will continue lifting barriers to foreign marketers. But now he is preoccupied with the aftermath of 1,300 deaths in riots following the assassination of his mother, and of 2,000 additional deaths following the escape of poison gas from a Union Carbide pesticide plant in Bhopal. Before these tragedies occurred, some Western marketers and media targeted India for products and programing. They still do, and the reports that follow tell why.

By MICHAEL BALL

It was a year—1984—in which one political event shook India: The assassination of Indira Gandhi.

The strength of India's institutions, however, enabled a smooth transition of power. And that implies the shift toward pragmatic economic policies will gain momentum.

One result of the shift has been an increase in private enterprise and a substantial transfer of technology from abroad, especially from Japan. The potentially huge Indian market attracted the Japanese, despite import restrictions on goods and technology.

Another encouraging trend has been the gradual urbanization of rural India. New products and services are reaching the rural rich, who have been helped by growing literacy, an exposure to urban life styles and exposure gained through the spread of tv, video and the ever-present Indian films.

This has created an awareness and acceptance of technological innovation. As a result, there has been a reduction in the sociocultural gap between what one commentator has termed "the two Indias."

Along with this, there has been the gradual increase in disposable income, and a resultant improvement in living standards. India is now entering a consumer age, with consumers demanding more products and services. Simultaneously, they are demanding more value for their money.

Naturally, manufacturers are trying to meet these new needs. An enormous number of new products and services have been introduced into the Indian market, as have new brands in categories that were dormant until now. Some of the important ones are motorcycles, cooking ranges, food and beverages, expensive fashion fabrics, tvs, hi-fi/-video systems, office equipment—including computers and word processors—and state government tourism.

The future probably will see growth in four basic product areas: Electronics, convenience, health and self-fulfillment.

Obviously, the task of placing these products in front of at least 100 million consumers is one that 200 ad agencies accredited by the Indian media look forward to.

In this, Indian agencies are helped by the explosive growth of tv. It reaches 70% of the country. In a largely illiterate country, audiovisual media are effective in reaching consumers, and so there has been a shift in budgets to tv, which now offers color.

In addition, Indian tv allows advertisers to sponsor complete programs, an advertising technique new to India.

Advertisers also are proving more willing to increase expenditures. In 1984, estimated spending will be $461 million, up 14% from 1983, despite a disallowance of 20% on all advertising expenditures for computing corporate taxes. About 65% of all spending is channeled through the top 10 agencies.

Intensified activity in the marketplace has forced Indian agencies to achieve new levels of professionalism. This is exemplified by the Third National Readership Survey, which is the largest of its kind in the world, polling 55,000 respondents.

Finally, one phenomenon worth noting: The large number of foreign collaborations in Indian industry, including advertising. Only three agencies have foreign equity participation, but at least six others have associate relationships. These should prove catalysts to increasing the rigor in Indian advertising, and providing greater visibility worldwide.#

Mr. Ball is vice-chairman and director of Ogilvy & Mather International and was in India when Indira Gandhi was assassinated.

Agencies seek tie with U.S. shops

Goal is to snare global accounts

By VALERIE MACKIE

Leading Indian agencies in Bombay and New Delhi are bombarding U.S. multinational shops with proposals to affiliate.

"In the last three to six months, we have received letters from independent Indian agencies which are rushing to get an international agency affiliation," said Willi Schalk, president of BBDO International Group. "They believe they need international connections," Mr. Schalk said.

Jerry Roberts, chairman of DYR Inc., said, "We have received some letters, some of them very formal. . .They want our name and expertise." DYR is a 50-50 joint venture between Dentsu of Japan and Young & Rubicam.

Indian agencies want international affiliations to gain an edge with global clients thinking of entering India now that the country is opening up to foreign marketing.

Michael Ball, vice-chairman and director of Ogilvy & Mather International, predicted the "Indian end to multinational clients" will grow.

India's sixth-largest agency, Chaitra Advertising Private Ltd., is looking to link with a U.S. agency "to offer some of our export-oriented clients an opportunity to understand sophisticated marketing and research techniques for specific international market segments," said Walter Saldanha, Chaitra chairman.

Much of this optimism hinges on whether the new government of Rajiv Gandhi keeps its promise to continue Indira Gandhi's policy of opening up the nation's restrictive trade practices before she was assassinated last year.

The most restrictive law to date is one limiting foreign equity ownership to 40%, a rule that induced IBM and Coca-Cola to shut down their Indian operations in the mid-1970s and O&M and Lintas to reduce their holdings from 100%. All other multinational agency agreements in India are nonequity.

But not having an equity position has its advantages, too. J. Walter Thompson Co., the largest agency in India, has attracted a high percentage of public sector (government) advertising. Public sector advertisers, by law, can only hire Indian-owned agencies.

At this point, neither BBDO nor DYR has taken any of the local Indian agencies up on their offers to affiliate, preferring to see what happens in India.

"We have decided to look into India in 1985 and try and understand the market. We don't plan to rush," Mr. Schalk said. One BBDO client, Gillette, already announced it will market razor blades in India this year (AA, May 21).

"We're not going into India, although I wish we were," said DYR's Mr. Roberts.

"It's back burner in terms of business development, but front burner in terms of interest. If the government changed its restrictions today, tomorrow there would be 58 meetings in Manhattan," Mr. Roberts added.

"Most international marketing companies are wishful about India. They wish they [India] could do better because it is such a large market. But the reality is that you can spend a lot of money and get nothing out of it," Mr. Roberts said. "If you can't make an immediate profit, or if there is no client that wants you there, then why do it?"

Agencies without equity in India don't mind the status quo. Michael Thomas, international vp of McCann-Erickson, which is affiliated with India's Clarion Advertising, said, "The issue of whether to buy equity in India comes up every two or three years, but the arrangement is satisfactory now."

Saatchi & Saatchi Compton Worldwide was the only foreign agency to move into India in 1984 when it signed an affiliation agreement with Everest Advertising. "We didn't say 'Ah ha, India is about to step forth in advertising,' " said James Adler, international director of Saatchi & Saatchi.

"It's just that we were interested in setting up an office. It's not uncommon to work on an associate basis prior to taking an equity position—it depends in part on business development.

"There is no great deal of activity there. The economy is not exactly booming. There aren't many multinational clients in India. Our largest client, Procter & Gamble, isn't even there," he said.#

The saga of India's cola war

By KIM GORDON-BATES

New Delhi—For a foreigner to understand America, he must understand baseball, author Jacques Barzun once said. To know India, an American must understand soft drinks.

On the surface India is one of the world's most promising soft-drink markets. Its 730 million population is largely under 20.

Also, the country's per-capita soft-drink consumption is one of the world's lowest: Six bottles per year—compared with the U.S.' 420.

But both PepsiCo and Coca-Cola, the dominant global cola marketers, can merely look on and thirst over this huge market, which they avoid because of laws protecting indigenous industries.

Sources say these and other consumer marketers are asking themselves whether the time is ripe to try India again now that the government is loosening restrictions on foreign business involvement.

"We're always looking at markets we are not in," said a Pepsi spokesman.

If western consumer marketers decide to enter the Indian market, it will be one of the most remarkable turnarounds in the underdeveloped world, rivaling the opening up of China.

Observers are watching markets like soft drinks to see if India is serious about its "open door" policy.

Mainly confined to India's affluent urban zones, soft drinks over the past decade have been at the mercy of politics.

More than 10 years ago, the government sought to establish a protectionist cocoon to promote India's budding industry. This meant all foreign capital employed in India had to be diluted down to a 40% maximum. The upshot of this "Indianization" of foreign capital was the departure of at least two major U.S. concerns, Coca-Cola and IBM.

Before that, Coca-Cola arrived in India in 1950 and built a profitable business by weaning Indians away from their traditional fruit drinks, curds and sherbets.

Like the fizz of its modern drink—which is how Coke was promoted—first-year sales of fewer than 1 million bottles rose to 12 million by the early '70s.

In 1951, PepsiCo embarked on an attempt to compete in the Indian market, but sold its machinery and plant to Coca-Cola in 1957. "We couldn't make a go of it and chose to get out," said the spokesman.

The key to Coca-Cola's Indian operation, according to sources here, was a New Delhi-based bottling company, Pure Drinks Ltd., run by the Mohan Singh family, who were close friends of Indira Gandhi, the late Indian leader.

The company was run by Mohan Singh, his son, Charanjit, a former member of parliament for a South Delhi constituency, and their family of enterprising members of the Sikh religious group. They possessed an established bottling factory and a lot of grit.

But enterprise and grit were not enough to keep Pure Drinks' connection with Coca-Cola fizzing.

The break came when Coca-Cola refused to yield either equity or its secret formula to the Indian government. Just when the country was rocked by a political earthquake—in 1977, Mrs. Gandhi was surprisingly but convincingly defeated in an election—Coca-Cola pulled out, leaving the Singh family high and dry, deprived of both political and business support (see related story).

The Campa-Cola logo is reminiscent of Coca-Cola, which pulled out of India in the 1970s.

Within weeks, the new government—made up of Mrs. Gandhi's archenemies—was out "to ruin" him, said Charanjit Singh.

Before the end of the year, the government promoted the launching of a "political cola" under the name 77—a name that had been suggested in parliament to commemorate the "1977 victory." But 77, manufactured by Modern Foods and marketed by India's largest advertising agency, Hindustan Thompson, affiliated with J. Walter Thompson Co. in the U.S., quickly turned into a certified failure, according to sources.

One advertising executive who had been working with Hindustan Thompson at the time said, "77 was a rushed job, and the manufacturers made a mess of it. The mixture had either too much carbonated water or too little, and the taste formula was pretty rough."

Meanwhile, a Bombay-based entrepreneur, Ramesh Chauhan, was thinking ahead. He owned a bottling company, Parle's, which since 1949 had been India's pioneer in soft drinks with two "hit" beverages to its name—a lime-and-lemon drink, Limca, and an orange drink, Gold Spot. Suddenly, he introduced Thums Up, India's first noncola-nut cola.

Today, MIT-educated Mr. Chauhan claims he was "instrumental" in getting Coca-Cola out of India, although it is unclear how. But he helped usher in a market war between himself and Mr. Singh.

As the Indian summer season approached in 1978, Mr. Singh launched India's "only cola containing cola," Campa-Cola.

The battle continued through Mrs. Gandhi's return to power in 1980, along with a new member of parliament: Charanjit Singh. The tide had changed, and now it was Parle's turn to feel the brunt of political adversity.

Meanwhile, down in the streets, the cola battle had taken a new turn. According to Charanjit Singh, Pure Drinks' attempt to penetrate the Bombay market with Campa-Cola after being well established all over northern India "was completely sabotaged by Parle's, which had engineered a 10-month strike at our Bombay bottling plant."

Mr. Chauhan, on the other hand, claimed that "Pure Drink people go around Delhi smashing our empty bottles"—a vital tactic in India's soft-drink warfare, since the country is a returnable-bottle market.

But even amid the turmoil, an equilibrium was settling in. Pure Drinks had most of the north India market, Parle's had the Bombay area and the rest of the country was carved up between the two major competitors and a few independent bottlers.

This harmony was disrupted several years ago when a total newcomer—McDowells—jolted the market by introducing a noncola-nut drink called Thril.

Previously, Campa-Cola and Thums Up had adopted similar advertising campaigns, despite Campa-Cola's attempt to be the "only cola" cola.

The thrust of all the campaigns was on fast-living, disco-dancing and fun-loving kids.

But the arrival of Thril changed all that. Trying to differentiate itself from competitors, McDowells billed Thril as the drink for cricket players ("cricketers")—which is virtually India's national sport.

The campaign's theme line, via Lintas, is "Us, you and Thril."

Thums Up has stuck to its "Happy days are here" theme (borrowed from Coke's ads), via Everest Advertising (now a Saatchi & Saatchi affiliate).

Campa-Cola is striving to exploit the "togetherness" slant with young people "doing things" rather than performing in exotic sports.

The market turmoil is not over yet. Last year, the three soft-drink agencies launched a total of seven new brands between them, including diet colas and grape drinks.

Mr. Chauhan says, "All were lovely flops," including his own.

The good news is that soft drinks have spread to all classes in India, says one agency exec.

In some cases, "it has become a mark of status to offer a visitor a [soft] drink rather than the traditional cup of tea," he said.

Things go better with Campa-Cola

New Delhi—When Coca-Cola left India in the mid-1970s, rather than give up equity or its secret Coke formula as the government demanded, Charanjit Singh had big problems.

Coca-Cola's departure left Mr. Singh's company, Pure Drinks—Coke's bottler—in danger of going under. To save it, he launched a Coke-like soft drink, Campa-Cola, and now Pure Drinks is thriving.

The ubiquitous Campa-Cola signs—the logo is identical to the scripted Coca-Cola logo—have helped make the drink one of India's hottest.

C. Singh

Mr. Singh, 44, is a member of India's entrepreneurial Sikh religion. His plush office, above the factory floor in New Delhi, is decorated with photos of French President Francois Mitterrand and Britain's Prime Minister Margaret Thatcher.

But despite his fame, Mr. Singh is press-shy, and few ad agency execs will talk about him.

"He has political clout," one exec explained.

Mr. Singh said Coca-Cola's departure was "a tremendous challenge."

To make up for the loss, Mr. Singh and his chief chemical engineer, P.S.R.K. Prasad—"the father of Campa-Cola"—went to London in 1977. There, Mr. Prasad "cracked Coke's secret formula in less than three weeks," Mr. Singh claimed.

Mr. Singh admits that "there were some objections from Coca-Cola" about the similarity in logos, but within a few months Coke let this possible breach of copyright "go by," he says. Coca-Cola officials refused to comment.

Other complications arose, however, when Campa-Cola began reaching outside India, notably the U.K., Holland and Nigeria. "Our Nigerian plant is only four blocks away from Coca-Cola's, and we had to change our lettering," said Mr. Singh.

In the U.K., Mr. Singh expects to "win over 10% to 15% of domestic cola sales" using "ethnic pull" on Britain's huge Indian population.

Negotiations for Campa-Cola plants also are under way in Portugal, Belgium, Spain, Taiwan and Singapore. A natural extension of Campa-Cola's success, said Mr. Singh, "would be to take on Pepsi-Cola in the Soviet Union."

QUARTERLY EARNINGS

P&G strategy slices profits

CINCINNATI—Procter & Gamble posted strong consumer sales in its second quarter, but earnings continued to fall as the Cincinnati-based company pursued its previously announced high level of investment in new products. P&G also said its earnings were affected by "major product developments" in established brands, including the new generation of Pampers disposable diapers.

Bottom line: Worldwide net sales for P&G's second quarter, ended Dec. 31, rose 8% to $3.37 billion from $3.13 million a year ago. Net earnings, however, fell 36% to $137 million from $214 million.

For the first six months, sales increased 7% to $6.86 billion from $6.41 billion, while net earnings declined 26% to $360 million from $487 million.

Johnson Products Co. says "sluggish haircare product sales" contributed to lower earnings for its first quarter of 1985, ended Nov. 30. Sales totaled $10.08 million, down 0.9% from $10.18 million a year earlier.

Earnings were $85,000, down 49% from $169,000.

Although increasingly strong competition in the haircare category continues to affect retail sales, "Gentle-Treatment and Classy Curl did better this quarter than a year ago," said George E. Johnson, president.

In addition, sales of professional products, where the company has concentrated its efforts, also were higher.

Bristol-Myers Co., New York, reported strong performance across the board in 1984, producing record fourth-quarter and yearly sales and earnings. Domestic sales rose 9%, while international sales were up 2%.

Bottom Line: Worldwide, sales rose 6% for the quarter to $1.01 billion, and net earnings increased 13% to $117.7 million. For the year, sales rose 7% to $4.19 billion, and earnings were up 16% to $472.4 million.

A sluggish retail environment for health & beauty aids in the U.S. contributed to a decline in sales at **Richardson-Vicks**, Wilton, Conn. Sales of Vidal Sassoon Inc. and most of the company's other divisions were behind their strong performances in the second quarter of fiscal 1984, the company said. However, the personal care division made record gains.

The picture was brighter for earnings, which benefitted from onetime gains from the sale of the Pea-Beu insecticide business in Australia and Lavoris mouthwash in the U.S. Furthermore, marketing expenditures were down because of heavy spending for new-product introductions last year.

Bottom line: Sales in the second quarter, ended Dec. 31, were $321.5 million, down 4.2%. Earnings rose 9.6% to $14.6 million. For the six months, sales declined 5.2% to $662.6 million, while net income rose 10.5% to $48.2 million.

RCA Corp., New York, reported record 1984 sales and earnings, fueled chiefly by healthy gains in network tv and consumer electronics. National Broadcasting Co. alone saw its record profits jump 40% on a 13% sales increase, largely because NBC-TV climbed out of the network tv ratings cellar for the first time in almost a decade. RCA's electronics operations also posted record earnings, after excluding the special $175 million SelectaVision videodisc provision.

Bottom line: Revenues rose 13% to $10.1 billion for 1984 as net income soared 50% to $341 million. Net income in the fourth quarter rose 37% to $102.8 million on a sales increase of 13% to a record $2.8 billion.

Quaker Oats Co., Chicago, said its net income drop in second-quarter 1985 results reflect advertising and merchandising spending of $354.6 million for the first six months of the year, up 21%, or $62.7 million, from last year. The company plans to reduce its level of promotional spending in the next six months, resulting in "a good year for Quaker," the company said.

Bottom line: Second-quarter sales increased 5% to $899.2 million from $852.7 million in the same period a year ago. Second-quarter net income fell 10% to $31.3 million from $34.8 million.

Sales for the first six months rose 9% to $1.77 billion, from $1.61 billion last year. Net income for that period fell 9% to $57 million from $62.8 million last year.

Dart & Kraft, Glenview, Ill., said acquisitions of Celestial Seasonings Herb Teas, Lender's Bagels, Precor exercise equipment and a zinc-air battery business as well as a poor showing by its Tupperware division resulted in the company's mediocre 1984 results.

Bottom line: Fourth-quarter 1984 sales fell 3.1% to $2.5 billion from $2.6 billion in 1983. Fourth-quarter net income rose 6% to $125.5 million from $118.4 million in 1983.

Yearend sales increased 0.5% to $9.8 billion from $9.7 billion in 1983. Net income for 1984 increased 5% to $455.8 million from $435.1 million in 1983.

For the year, Tupperware operating profits fell 27% to $138.8 million and its sales declined 6% to $776.9 million. The decline is due to start-up costs for Tupperware's new Ultra 21 product line, the company said.

G.D. Searle & Co., Skokie, Ill., already a hot acquisition target, turned in double-digit sales and earnings increases for its fourth quarter. But the quarterly figures lagged behind the company's full-year results.

The full-year figures illustrate what a hot new product—in this case Searle's low-calorie sweetener aspartame—can mean to a company's balance sheet. Sales of NutraSweet and Equal, Searle's brands of aspartame, climbed 74% last year to $585 million, from $336 million in 1983. NutraSweet/consumer products division sales rose 60% to $680.5 million, from $424.8 million in 1983. The division's net income figures aren't available.

By comparison, pharmaceutical sales increased just 9% to $584.6 million, from $535.2 million in 1983.

Often-mentioned suitors for the NutraSweet/consumer products unit include Procter & Gamble and American Home Products, New York, and, for the pharmaceutical division, Pfizer, New York.

Bottom line: For the fourth-quarter, sales increased 18% to $334.3 million from $284.4 million in 1983. Net earnings rose 22% to $53.3 million from $43.7 million in 1983.

Sales last year increased 32% to $1.25 billion, from $946 million in 1983. Net earnings rose 36% to $161.6 million, from $151.2 million.

Kimberly-Clark Corp., Neenah, Wis., said higher unit sales of its Huggies disposable diapers spurred record fourth-quarter sales and income. Increased diaper and facial tissue sales, improved newsprint prices and mill operations and higher U.S. consumer product prices more than offset lower unit sales of feminine care products here and abroad, K-C said.

Bottom line: Fourth-quarter sales increased 10% to $918 million from $836 million. Net income was up 15% to $53 million from $45.8 million in the same period a year ago.

Full-year 1984 sales rose 10% to $3.6 billion, from $3.2 billion in 1983. Net income increased 19% to $225 million, from $189 million.

Ralston Purina Co. said its first-quarter 1985 results reflect increased earnings from its pet food division and Jack-in-the-Box restaurants, despite a poor showing by its agricultural products group. The St. Louis company's first-quarter figures also include its October acquisition of Continental Baking Co.

Bottom line: First-quarter (ending Dec. 31) sales increased 19% to $1.6 billion, from $1.3 billion for the same period a year ago. Net earnings rose 2.5% to $82.8 million, from $80.8 million last year.

Circulation: Sunday magazines in the 1980's

	[illegible]	[illegible]	The New York Times Magazine
1983	23,168,789	12,675,921	1,498,873

1981	21,644,119	12,458,750	1,430,358
1980	21,644,000	12,366,269	1,430,358

Due to a production error, the logotypes of the *New York Times Magazine* and *Family Weekly* were reversed in a chart (AA, Jan. 24, P. 28). The correct circulation figures appear above.

For the Record

LICENSED MERCHANDISE SALES soared 50% to $40.1 billion in 1984, says the annual survey by "The Licensing Letter," Scottsdale, Ariz. It is the seventh straight year of "vigorous" sales growth, said the newsletter's publisher, Arnold Bolka.

DEPARTMENT OF HEALTH & HUMAN SERVICES Secretary Margaret Heckler is being prodded by an advisory panel to urge Congress to ban all cigaret advertising. The National Council on Drug Abuse, a dozen HHS-appointed doctors who offer guidance on major policy issues, has forwarded its anticigaret message to Ms. Heckler. But her office says she may be slow in responding. Separately, the U.S. Surgeon General's office believes it can show smokeless tobacco is harmful, a spokeswoman says. That opinion came last week after the Federal Trade Commission asked Surgeon General C. Everett Koop to conduct a review of existing scientific evidence on snuff, dip and other smokeless tobacco products.

THE DEPARTMENT OF JUSTICE, after more than two years of review, has concluded that many marketing agreements between companies and their wholesalers and distributors can be restrictive without being anticompetitive or illegal. In a set of guidelines released last week, the department said these vertical-restraint agreements would be considered legal unless they limited output or increased price while not displaying any redeeming pro-competitive attributes.

ADOLPH COORS CO., Golden, Colo., next month breaks radio and print advertising in Chicago for its Coors and Coors Light beers, which become available on draft in that market today. A tv effort will begin in April, when the brands become available in package-goods stores. Foote, Cone & Belding, Chicago, handles.

G. HEILEMAN BREWING CO., La Crosse, Wis., hopes to prop up its ailing Lone Star label with a new comparative tv campaign. In the spots, young Texans choose Lone Star over Coors, Anheuser-Busch's Budweiser and Lite beer from Miller. Lone Star sales dropped 13% in the last year, but Heileman believes the six 30-second commercials can restore the beer's popularity. The campaign, via W.B. Doner & Co., Baltimore, breaks Feb. 4 in 14 Texas markets. Separately, Heileman will close its Phoenix bottling plant in March. The company said the facility is too small to be economical, given the currently flat beer market.

FOUNDATION FOR SAVINGS INSTITUTIONS, New York, broke a $4 million print campaign Jan. 27 touting federally insured Individual Retirement Accounts and other savings & loan services. The ads, in newspaper-distributed Sunday magazines, include local listings of IRAs in each market. Backer & Spielvogel handles the effort, which will run through April 15, the peak IRA selling season.

CURTIS TROEGER has been elected president at Doremus & Co., New York. The former exec vp succeeds chief executive officer Steve Kahler, who becomes chairman. Franklin Schaffer retired as chairman at the end of 1984 but remains a consultant to the BBDO International subsidiary.

COCA-COLA CO., Atlanta, has been given permission to sell Coke in the Soviet Union, more than 10 years after rival PepsiCo entered the country. It will be available first to foreigners, then to Soviet citizens.

TAMBRANDS, Lake Success, N.Y., has signed a preliminary agreement to sell tampons and sanitary napkins in the People's Republic of China. Tampons will be sold under the Tampax name.

NATIONAL ASSN. OF BROADCASTERS' board is ordering a task force to study the idea of creating NAB's own nonprofit audience-measuring service. The task force's findings are expected to favor setting up such an in-house service. The move is a response to NAB's displeasure with radio audience surveys that it believes are inaccurate, overpriced and misleading to potential advertisers.

MINOLTA CORP., Ramsey, N.J., is introducing a new compact autofocus 35mm single-lens reflex camera, the Minolta Maxxum 7000. Print and tv advertising will feature the Minolta theme "Only from the mind of Minolta." William Esty Co., New York, handles Minolta products.

GLAMOUR reports record ad pages and revenues for the first quarter of fiscal 1985. Ad pages totaled 446 for the quarter, up 4% from the record level a year earlier. Revenues jumped 14% to $15.1 million.

ACCOUNT ACTIVITY: **Club Med**, New York, to **N W Ayer** for its estimated $9 million account, from Ammirati & Puris.

WORTH NOTING: **Midway Airlines**, Chicago, last week belatedly joined the budget-fare bandwagon (AA, Jan. 21, *et seq.*) with Express-Fares to Florida from Chicago, Detroit and Cincinnati. The unrestricted fares range from $79 to $89 one-way. . .**U.S. music stars** will record their own single, "We Are the World," this week in Los Angeles to raise funds for Ethiopian famine relief, a la British performers' Band-Aid with its "Do They Know It's Christmas?" (AA, Dec. 17). . .**Grey Advertising**, New York, has established an affiliate relationship with Istanbul-based Cenajans Reklamcilik. The Turkish agency, fourth-largest in the country, had 1984 billings of about $4.2 million. . .Grey Advertising's **LBS Communications** unit, New York, and Telepictures have dissolved TelLex Media International, their year-old international tv barter-syndication joint venture. . .**Robert Humphreys** has been named to the new post of chairman-ceo at Grey Advertising's western division, Los Angeles. Apple puts the bite on Eve

By BRIAN MORAN

Another upstart marketer of Apple-compatible personal computers may crumble under Apple Computer's relentless pursuit of imitators on trade infringement grounds.

Eve Computer Corp., East Rutherford, N.J., markets hardware compatible with the Apple II line, but it has been brought to a standstill by a court-ordered injunction barring the company from manufacturing or selling its Eve line.

Apple has charged Eve and its parent, Computer Technology, with copyright and patent infringement in the production of Eve's operating system and memory instructions. Apple's suit in a federal district court in Newark, N.J., seeks all profits related to the Eve, plus $50,000 in damages.

Cupertino, Cal.-based Apple has built a reputation for fierce determination in chasing companies it suspects have used illegal components and licenses to make "clone" machines. Such notoriety resembles that of Apple's mammoth rival, IBM Corp., Armonk, N.Y.

Last year, Apple won a $2.5 million settlement against Franklin Computer, Pennsauken, N.J. That helped force Franklin into bankruptcy (AA, Aug. 23, *et seq.*).

"Fighting Apple in court is going to be very tough for us," said CTI ceo Charles Rothstein, who denied the charges. CTI had sales of $7.4 million in the fiscal year ended last Nov. 15, compared with Apple's 1984 sales of $1.4 billion. "Apple can win most of these cases based on sheer power," he said. "We don't have $1 million to spend defending ourselves."

Apple does have enough money to keep on retainer Barrick Securities Group, a San Mateo, Cal., private security company. BSG undercover investigators, posing as distributors interested in handling Eve computers, first met with Eve officials at the Comdex computer trade show last November in Las Vegas.

The larger marketer also secured a court order forcing Eve to surrender more than 250 computers and its sales records to Apple. Last week, however, the federal judge ordered Apple to return 24 of the impounded machines so that embattled Eve engineers could work on a redesign.

Jeffrey Blatt, a Beverly Hills, Cal., attorney representing Apple, said because the allegedly illegal Eve computers were imported from Taiwan, U.S. Customs officials have indicated they may seize the impounded machines still held by Apple.

In an effort to have the injunction lifted, Mr. Rothstein said his company plans to make two "minor" technical alterations in the Eve and submit them for Apple's approval. But regardless of whether the injunction is lifted, Mr. Rothstein said he expects a protracted trial.

Through its eight-year history, Apple has fought aggressively against marketers of compatible systems in the U.S. and foreign markets. In addition to the Franklin settlement, Apple last year won a lengthy copyright case against Formula International, Hawthorne, Cal., and Formula's Pineapple computer.

Several other copyright lawsuits brought by Apple, against marketers in California, Louisiana and Massachusetts, have been settled out of court, Mr. Blatt said.

Eve's shutdown also casts a shadow on parent CTI's hopes of raising $3 million through a preferred stock offering. Mr. Rothstein said CTI will go ahead with the offering, the proceeds of which are being counted on to finance further development of the Eve line and expansion of Micro Merchants, the parent's computer retailing arm. Micro Merchants is also a defendant in the suit.

The Eve pc, which is made in Taiwan, hit the U.S. market last September. The line consists of two Apple compatibles—a desktop machine and a portable. They feature built-in printer and disc interfaces and a numeric keypad, enhancements that are "extras" on Apple's line.

Eve has marketed the machines through CTI's four Micro Merchants stores and through some 20 independent dealers nationwide, Mr. Rothstein said. Sales were limited to "several hundred" units last year, he said, but the company had high hopes for the portable model, which received favorable industry reviews.#

January 23, 1985.
The day we upset the Apple cart.
Introducing Apricot.
apricot

Taste of competition

Apricot Inc., Santa Clara, Cal., a division of the U.K.'s No. 1 personal computer marketer, is breaking a $7.5 million U.S. introductory ad campaign that takes comparative shots at Apple. Business press ads say Apricot will "upset the Apple cart."

Super Bowl ratings

The Super Bowl audiences went with the flow of the game, and advertisers who paid $1 million a minute to be near the close of the game ended up paying a much higher cost-per-thousand than second-quarter advertisers. While fourth quarter tuneout is common in blowouts, the Super Bowl tuneout was certainly more expensive than most. Some 110 million Americans watched the game, but only about 100 million had their sets on when the Apple Computer "Lemmings" spot ran. Source: *A.C. Nielsen Co.*

6:00-6:30: 44.6/64 (First quarter)

IBM PC Jr., Nostrilla 12-Hour, McDonald's, U.S. Army, Michelin, Sharp Electronics, Anheuser-Busch, Nissan, McDonald's, Johnson Controls, ABC ("MacGruder & Loud")

6:30-7:00: 48.7/67 (First quarter-second quarter)

Cullinet software, ITT, ABC Sports (bowling), Bud Light, Master Lock, ABC Sports ("Wide World of Sports"), Hyatt Hotels, American Home Products' Advil, Nissan trucks, Tandy Radio Shack, Minolta, National Dairy Board, ABC Sports ("Wide World of Sports")

7:00-7:30: 48.2/65 (Second quarter)

Tandy Software, Ford Tempo, Canned Food, Northwestern Mutual Life, ABC News (Peter Jennings), ComputerLand, LA Beer, Sharp microwave ovens, Soloflex, Ford Thunderbird, IBM computers, United Way, ABC ("MacGruder & Loud")

7:30-8:00: 47.4/63 (Second quarter-halftime)

Apple still backs 'Lemmings'

By CLEVELAND HORTON

CUPERTINO, CAL.—Apple Computer is defending its decision to air the "Lemmings" commercial during Super Bowl XIX, claiming its vision of the future needs to be communicated almost at any cost.

At a press conference following Apple's annual meeting here last week, Apple president-ceo John Sculley said he would prefer to "run the risk of offending somebody rather than having them not hear of the vision, the alternative," when fielding a question regarding the potentially offensive nature of "Lemmings."

The vision referred to by Mr. Sculley is the Macintosh Office, a family of products built around the Macintosh computer. Crucial to this concept are two peripheral components—a network and a high-quality printer—both of which were introduced, as expected, at the meeting.

Apple first announced the Macintosh Office concept in the tag line of the controversial "Lemmings" spot. The commercial aired during the Super Bowl despite reservations held by top management, and it drew criticism from the advertising community.

"Lemmings" creator Chiat/Day, Los Angeles, last week turned over to Apple the results of a day-after survey designed to gauge the effectiveness of the spot.

Apple president Steven Jobs told shareholders the company was entering a two-year transition period, during which office computers will change from individual, isolated workstations to network-linked communications devices. By avoiding discussion of short-term goals, the company may ease some of the immediate pressure for Apple to gain a significant share of the business market for personal computers.

Mr. Jobs did say he believes Apple will sell 10,000 AppleTalk networks during the transition.

To avoid a head-to-head collision with IBM Corp., Apple proposed "detente" with the Armonk, N.Y., computer giant. Apple even announced its intention to market a device designed for its archrival's computer to allow it to communicate over the AppleTalk network. The move is seen as Apple's acknowledgment that it can't survive in the business market by ignoring Big Blue's standard.

Meanwhile, the company also made public that it is giving up on its Lisa line. The troubled Lisa has performed well below Apple's expectations since its introduction at Apple's 1983 annual meeting. Mr. Sculley blamed computer retailers for the Lisa line's failure, noting that dealers were not suggesting the Lisa when the limited capacities of the Mac were cited by customers. The Lisa 2/10, the most advanced model in the line, will be renamed the Macintosh XL (for extra large). The Lisa 2 and 2/5 will be phased out.

Compared with its meeting last year, this Apple session was subdued, particularly for a company that just completed its best fiscal quarter. For the first quarter of fiscal 1985, ended Dec. 28, Apple reported net income of $46.1 million on sales of $698.3 million. For the comparable period a year earlier, Apple saw net income of $5.8 million on sales of $316.2 million.

Despite the record sales and earnings for the company's first quarter, Mr. Sculley cautioned shareholders that "1985 is not going to be an easy year for the industry as a whole. . .the retail market is somewhat fragile." He expects Apple to introduce a number of new products in 1986, in preparation for the next boom period, which he predicts will occur in the following year.#

Lemmings

(Continued from Page 1)

product advertised: Nearly seven out of every 10 people—112, or 69%—who said they had seen an Apple commercial said they didn't know what product was being advertised.

Only nine, or 5.6%, identified the product advertised as the Macintosh Office line. Another 18, or 11%, said simply Macintosh (or Apple Macintosh). Thus, counting both categories of responses as correct, fewer than 17% of the respondents who said they had seen the spot knew what product was being advertised. Other answers—which were considered incorrect—included "Apple IIe" (seven mentions) or just "Apple" (six mentions).

In awareness among all Super Bowl advertisers—in which respondents named the first commercial to come to mind of all that were on during the game—Apple's spot, which the company touted in newspaper page ads on Super Bowl Sunday, finished third behind Budweiser (including Bud Light) and Ford.

Apple was followed in over-all awareness by IBM, McDonald's, the U.S. Marines and Nissan *(See chart)*.

As might be expected, the Apple commercial fared best among its middle-manager target group, as suggested by income level. Respondents earning $20,000 to $39,999 a year had the highest percentage of accurate descriptions of the commercial, while those earning $40,000 or more had the second-highest percentage of accurate descriptions.

Those two income groups also ranked highest in the percentage of correct identifications of the product being advertised.

The number of those who correctly described the spot was too small for any statistically valid conclusions to be drawn about their opinion of it. Of those 31 people, 16 said they liked it or liked it a lot, 14 said they disliked it or disliked it a lot and one was neutral.#

Colgate's drilling hits another nerve at P&G

By NANCY GIGES

New York—Colgate-Palmolive has its best shot in years to snatch the lead in the $1 billion dentifrice category from archrival Procter & Gamble.

Colgate toothpaste is within three share points of P&G's Crest, according to warehouse withdrawal figures for December.

Last summer, the gap between the two brands exceeded 10 points.

A Colgate comeback would mean the brand would return to the leadership position for the first time in almost 30 years. It had been in first place until Crest won the American Dental Assn. seal in 1955.

That enabled the P&G brand to skyrocket to the top spot, where it has remained.

For P&G, the toothpaste battle is another instance of the consumer-goods giant having to fight fires rather than prevent them. Just after putting forth its master plan to stop the leaks in its diaper business (AA, Jan. 21), the Cincinnati-based company now must turn its attention to the squeeze on its toothpaste operation.

While other brands have more or less held their market shares, P&G has failed so far to stop the steady erosion of Crest.

P&G was late to add a gel line extension, and more recently the company's rush to introduce a pump dispenser has been sidelined by production problems.

According to the December figures, Crest has fallen to a low of 31% market share, down five points from six months earlier.

Most of Crest's lost share has gone to Colgate. For the December period, Colgate toothpaste held 28% of the market.

Figures not yet available from A.C. Nielsen Co., measuring product movement off retail shelves for the November-De-

Miller, A-B take to the country with latest ads

By SCOTT HUME

"Miller Time" will be replaced with a country beat and a patriotic theme, but Anheuser-Busch already has a preemptive strike ready.

Miller Brewing this week will unveil for its distributors a new campaign for its struggling flagship brand, High Life, created by J. Walter Thompson USA, New York. According to sources, the new commercials are set to the song "American Made," a hit last year for country music quartet, the Oak Ridge Boys. JWT has modified the lyrics to give the campaign an "American brewed" theme with heavy emphasis on product quality. The Oak Ridge Boys themselves do not sing or appear in the spots, these sources say.

Miller executives declined comment on the report and it is not known when the new High Life spots will break, although some sources suggested it might be as early as Feb. 9.

Meanwhile, Anheuser-Busch, which lately has shown an uncanny ability to anticipate Miller's advertising strategies, has prepared its own batch of new patriotic commercials that could break before the new High Life creative hits the air. As a result, JWT's new tack for Miller may come across merely as "me-too" advertising.

A-B exec vp Michael Roarty last week said the nation's No. 1 brewer will expand its "corporate quality" campaign that he said "emphasizes the long-standing high quality of Anheuser-Busch's American-made beers."

The quality campaign consisted of a 90-second spot showcasing A-B's brand lineup (AA, Dec. 10) that was seen most recently during the Super Bowl pregame show Jan. 20. New tv executions of the quality message now will be added, Mr.

Creative refocus at Burnett

By SCOTT HUME

The organizational changes announced last week at Leo Burnett Co., Chicago, resulted from what president-ceo John Kinsella called "a desire to 'young-up' the company" and give creatives a higher profile.

One change involved the 56-year-old Mr. Kinsella himself. He continues as president-ceo, but his former position as chairman has been assumed by Norman Muse. Mr. Muse, 50, has been vice-chairman and chief creative officer.

"Our corporate goal always has been to produce superior advertising, and we thought that one of the two top officers should be from the creative department," Mr. Kinsella said of the chairmanship shift.

"We also thought it important to get some of the younger execs more involved and prepare the company and them for the fu-

Gannett Co. registers big coup in Des Moines

By GARY LEVIN

DES MOINES—The sale of the *Des Moines Register*, which began with antagonism in November, ended last week in agreement.

Advertiser and agency reaction to Gannett Co.'s acquisition of the *Register* and three other newspapers was decidely low key, but hopeful. Those contacted expressed little concern that a change of ownership will affect their business with the 240,000-circulation *Register*.

"People here were hopeful that if the paper was sold to an outside organization, it would be a group with enough stature to bring something better to the party," said William Fultz, exec vp of Creswell, Munsell, Fultz & Zirbel, a major Des Moines agency. "Gannett may offer the paper dimensions it didn't have before."

In acquiring the *Register*, Gannett is adding what its executives termed "a prestigious newspaper," whose daily circulation will make it the largest of the 87 local and metropolitan dailies the company owns. The transaction is expected to be completed in June.

At a press conference here Jan. 31, David Kruidenier, chairman of the Des Moines Register & Tribune Co., announced the sale of the *Register*, Jackson (Tenn.) *Sun* and weekly papers in Indepencence and Indianola, Ia., to Arlington, Va.-based Gannett for $200 million. The purchase price nearly doubled the initial offer made for the entire company Nov. 5 by Dow Jones & Co. and a group of Iowa investors, including Register & Tribune officers Michael Gartner and Gary Gerlach. Neither their positions nor the future post of Mr. Kruidenier have been determined.

The Register & Tribune board had rebuffed the original bid, touching off widespread speculation over the internal politics of the company and who would eventually get the winning offer.

Gannett was not mentioned in a list made public as companies to whom the Register & Tribune board would like to sell the paper. But as reported earlier, Gannett was among the major players in a bidding war that began after the Dow Jones bid (AA, Nov. 15).

Sources said the other bidders were Cox Enterprises, Atlanta; Hearst Corp., New York; Lee Enterprises, Davenport, Ia.; Morris Communications, Augusta, Ga.; Tribune Co., Chicago, and the Washington Post Co.

Besides unloading the *Register*, the company will sell WQAD-TV, an ABC affiliate in Moline, Ill., to the New York Times Co., for an undisclosed price. Published reports have set the figure at $24 million.

The sale of the company's remaining properties—KHON-TV, Honolulu; KAII-TV, Wailuku, Hawaii; and four radio stations in Portland, Ore., and Madison,

Clearing the fog

A few months ago, reports were circulating that Bruce Jenner was about to replace Stefanie Powers as spokesman for London Fog. Now the word is that Mr. Jenner will join, not replace, Ms. Powers in that role. If anyone had doubts that Ms. Powers wasn't out, all they had to do was walk up Park Avenue to the Lever Bros. building last week where she was shooting the spring, 1985, London Fog tv spots. She was off to Mohunk, N.Y., the next day for a second round of shooting with agency AC&R. *Photo by Arnie Adler.*

B&W 'Coins' niche; Players tries new filter

By WILLIAM F. GLOEDE

The "niche-ing" of the cigaret business is expected to intensify again this week. The industry's major players will begin breaking and testing new products designed to lodge themselves in small, but profitable, market mini-segments.

Brown & Williamson Tobacco Co., Louisville, Ky., is rolling national with the nation's first generic-price smoke made especially for sale in vending machines. The new smoke, called Coins, comes in 85mm regular and light styles.

It is being manufactured and distributed for B&W by a company called NVBG, Oakland Park, Fla.

Vending-machine makers see Coins as a potential answer to steadily declining sales.

The brand is "an economic breakthrough that will enable us to increase our profits," said Art Fein, president of the National Coin Machine Institute, Fort Lauderdale, Fla.

B&W believes Coins "provides an ideal solution to declining vending sales," added Ive Otte, director-

Quaker gets bids for agency

AdCom for sale?

By VALERIE MACKIE

CHICAGO—The bidding to acquire AdCom, Quaker Oats Co.'s $43 million in-house agency, is heating up.

"We're not soliciting offers, but they are coming in," a Quaker spokesman said. Several agencies apparently are interested in buying the agency.

Agency sources here said they had heard AdCom had been in contact with Saatchi & Saatchi Compton Worldwide and that Quaker appeared to be interested in selling the operation.

Saatchi & Saatchi has been talking to several shops in the Chicago area, including Don Tennant Co. (AA, July 19), in a effort to open an office here.

The rumors that AdCom might be on the block first surfaced two months ago. At that time, Quaker executives indicated they were not interest in selling because the operation has been profitable. In 1983,

CORPORATE CLOSEUP

Luck is the residue of A.H. Belo's design

By TOM BAYER

DALLAS—In retrospect, A.H. Belo Corp. executives may be feeling lucky.

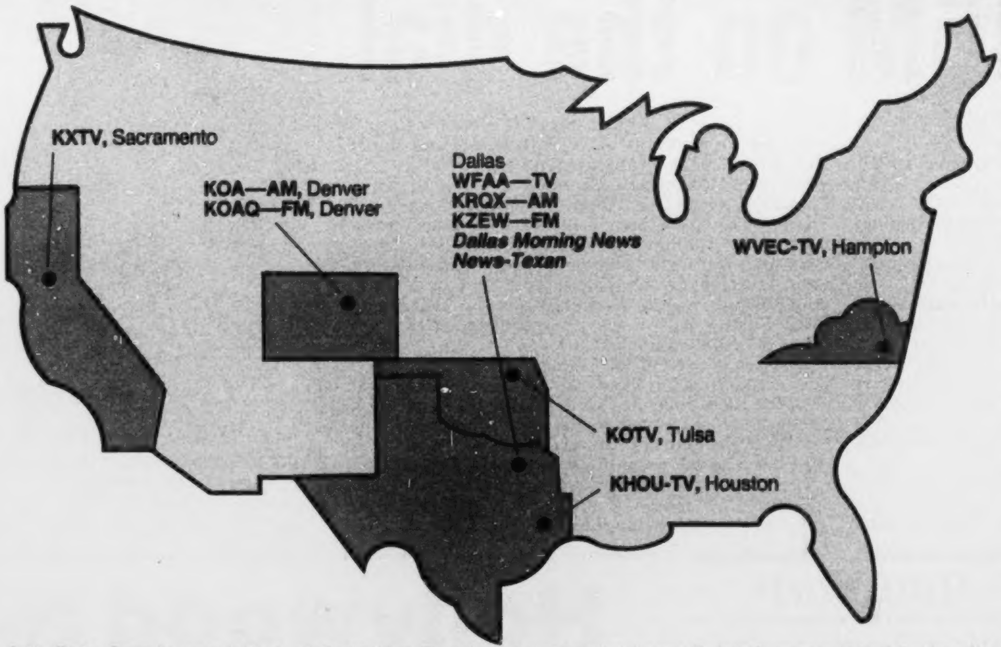
A year after their surprise acquisition of the Corinthian Broadcast Group, the company's managers are more convinced than ever that there's no way the same deal could be cut today. Changes in the media market since then would have prevented it.

Belo, it so happened, was in the right place at the right time with the right deal. And industry observers, caught off guard when Belo made its move, now are saying with a tone of assurance, "Watch out—Belo has only begun."

Founded in 1842, Belo came from relative national obscurity in 1983 to stun the media world with the $606 million purchase of the six tv stations in Dun & Bradstreet Corp.'s Corinthian group.

The acquisition, observers believe, signifies a growing aggressiveness by a company previously best known for publishing the *Dallas Morning News* and running WFAA-TV here. With a solid list of print and broadcast properties now in hand, Belo figures to have deeper regional and national impact in the sometimes lucrative media world. Its ranking as the nation's 41st-largest media company in 1983 (AA, June 28) is sure to rise with the tv stations in tow.

Company officials said the Corinthian acquisition probably is not the last major strike in its attempt to grow. The Federal Communications Commission's recent move to increase the limit on tv station ownership makes buyouts easier. Instead of seven each of tv and of am and fm radio stations, the FCC now conditionally allows individual companies to own 12 of each.



A.H. Belo Corp.'s acquisition of Corinthian Broadcast Group helped widen the company's geographical reach but keeps Belo's interests located primarily in the Sunbelt.

Belo continues to evaluate its opportunities against a set of criteria it developed in 1981 after going public: Target growth in the Southwest, West and mid-South; concentrate first in broadcast because of cash-flow generation, and focus on 20 markets growing at rates above the national average.

The Corinthian purchase demonstrates how serious Belo is in this wave of growth. Dun & Bradstreet had vowed to sell the properties separately, but it took Belo just nine days to negotiate for and win the whole group, including a prized Houston station.

Besides the 100-year-old *Morning News* and ABC-affiliate WFAA, Dallas' No. 1 tv station, Belo came into the deal with some suburban newspapers and a small group of broadcast properties.

The broadcast portfolio, after the acquisition and the necessary divestitures to comply with the old FCC ownership rule, comprises WFAA; KHOU-TV (CBS), Houston; KXTV (CBS), Sacramento-Stockton, Cal.; WVEC-TV (ABC), Hampton-Norfolk, Va., and KOTV (CBS), Tulsa.

Belo also owns radio stations KRQX (am) and KZEW (fm) in Dallas and KOA (am) and KOAQ (fm) in Denver.

The acquired stations were—and remain—a strong second or third in their markets, except for KXTV, which sometimes runs fourth in Sacramento.

Reflecting on the acquisition, president Robert Decherd said Belo had flirted with buyouts since the company, owned for many years by Dallas' Dealey family, went public in 1981.

He knows now, though, that deals Belo almost made would have been less than ideal because they would have precluded the Corinthian acquisition.

Barry Kaplan, a media analyst with Bear Stearns & Co., New York, called Belo his "favorite media company" and pegged it as "the Cap Cities of tomorrow." (Capital Cities Communications, New York, the 16th-largest media company, owns Kansas City's daily newspapers, Fairchild Publica-

The same people who would like to put your upcoming success in headlines. The same techniques that developed the new strategy for The Wheat Industry Council, put Baking Soda in more than thirty million refrigerators, developed new Alka Mints for Alka Seltzer and new S.O.S Oven Pads . . . can work for you.

They could be just what you've been looking for to restage that fading star, or create a successful new product's plan. Gerald Schoenfeld, Inc., consultants to America's major marketers, now offers the "Product Success Program."

- Whether it's developing new products from scratch or treating old products like new;
- Whether your resource is your name, your R&D, your distribution, your marketing insights, your established brand, your interest in a new category, or some combination of these;
- Whether you want us to work with your agency or without, here or abroad;

. . . the "Product Success Program" offers unique and proven techniques.

To find out more about the "Product Success Program", call or write Sonia Kallen, (914) 631-8800

ADWATCH

Consumers' advertising recall was all wet over the holidays

By SCOTT HUME

It's little wonder the holiday season was a disappointment for retailers: Consumers who were expected to be hungry for the latest in expensive appliances and apparel appear instead to have been merely thirsty.

That's right. Despite all the money poured into advertising for videocassette recorders, computers, automobiles, under-cabinet coffeemakers and the like, the advertising categories showing the most significant changes in December in ADVERTISING AGE's adWatch consumer awareness survey were soft drinks, beer and wine.

The most interesting developments were in the soft-drink category, where Coke and Pepsi have locked bottlecaps in a battle for supremacy all year. Pepsi's advertising awareness was riding high through the first half of the year on the strength of Michael Jackson and its "New generation" campaign. In May, for example, 39% of the respondents said Pepsi's ads came to mind first, while only 20% named Coke.

Coke has battled back, regaining the No. 1 spot once again in the November survey.

In December, Coke's tv advertising barrage nearly blitzed Pepsi out of the game.

That five-week network blitz, which kicked off Nov. 2, included a pool of 21 different spots for Coca-Cola's soft-drink line (AA, Nov. 1). Company officials said that, on average, a Coke product spot would run once every three hours.

That cost the bottler a bundle, but no matter—consumers noticed.

In December, 34.1% of the 1,253 adults surveyed named Coke when asked which soft-drink advertising first came to mind. That represented a 3.5 percentage-point increase compared with results from November, a month in which Coke's score had risen 4.4 points. Spokesman Bill Cosby's insistence that Coke is less sweet than Pepsi appears to have caught viewers' attention.

Pepsi, meanwhile, took it on the chin in December. It retained the No. 2 spot, of course, but its share of first mentions dropped 5.4 points to 24.7%, its lowest since January, 1984.

Holding on to the No. 3 slot was 7UP, with 6.1% of first mentions. That's the same share it held in November, despite December's return of longtime spokesman Geoffrey Holder in some holiday-themed tv spots.

The effects of Coca-Cola's tv blitz weren't confined solely to its flagship Coke brand. Taking the No. 4 spot (held in November by Dr Pepper) was Diet Coke, with a 3.4% share.

The No. 5 brand, making its best showing ever, was Coke's Tab, with 2.3% of first mentions. As part of its network blitz, Coca-Cola gave Tab a new campaign, themed "Tab's got sass," replacing "Let's taste new Tab."

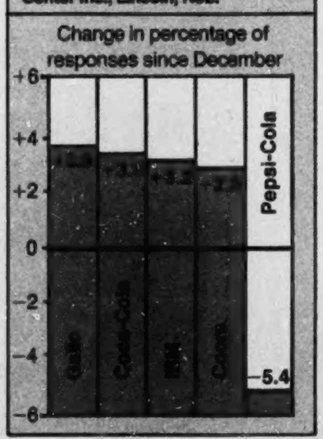
And the No. 6 brand in ad awareness? Coca-Cola's Sprite. Its 2.2% of first mentions may not sound like much, but it was a better score than Diet Pepsi could muster. Who says you can't buy awareness?

The big news in beer advertising awareness was the ascendance of Coors to second place behind tradi-

(Continued on Page 28)

December winners & losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Note:* A change of plus or minus 2.8 percentage points is statistically significant. Source: SRI Research Center Inc., Lincoln, Neb.



MEDIAMOVES

'Free Press' plans expansion

Detroit—The *Free Press* will not fold despite stiff competition from the *News* and is considering expanding production facilities, according to Alvah H. Chapman Jr., chairman of Knight-Ridder Newspapers.

Both the *News* and *Free Press* are losing money despite circulation gains that make them, respectively, ninth and 10th largest in the U.S., analysts say.

'Maison & Jardin'

Conde Nast International, New York, will change its *Maison & Jardin International* to *Vogue Decoration—MJ International* with its first 1985 issue, due March 15. The worldwide quarterly continues under the supervision of *Maison & Jardin's* Paris staff.

Associated Press

Associated Press' AP Network News operation, Washington, plans a 10-part series of 60-second featurettes on Grammy Award nominees for its subscribing radio stations, starting Feb. 15. The winners will be announced live on CBS-TV Feb. 26.

Billboard

Billboard Publications' Billboard Information Network, New York, has introduced Territorial Rights Reports, a music industry database on the global copyrights for songs as they break on the weekly *Billboard* hit record charts. Billboard Information Network's subscribers in 30 territories (*e.g.*, Europe, Latin America, Asia) immediately will learn each song's copyright holder, contact person, address, phone number and telex number, territory by territory.

'WOOD'

Better Homes & Gardens WOOD has doubled its rate base to 300,000 just eight months after beginning regular six-times-a-year publication. A b&w page will cost $7,560 effective with the April issue; a color page will be $10,800.

'Better Homes & Gardens'

Better Homes & Gardens plans an advertorial section on computers for its June issue. The section is to be written by the editors of *PC Retailing*. The section will be distributed to 4.3 million high-income subscribers of *BH&G* in 33 metro areas. A b&w page costs $23,330; a color page is $29,650. Ad closing is March 1.

'Compute!'

Compute!, Greensboro, N.C., will bring out its first special issue April 9, called *Compute!'s Apple Applications*, for Apple personal computer users. Rate base is 150,000, with a b&w page $2,495 and a color page $3,695. Plans call for a second issue later in '85 and four in '86. Separately, *Compute!* is the latest major computer magazine to cut its rate base, reducing it 16.7%, to 350,000 from 420,000, effective Jan. 1.

Yankee Publishing

Yankee Publishing, Dublin, N.H., which publishes *Yankee* magazine, *New England Business* and the *Old Farmers' Almanac* has halted publication of the 2-year-old *Collectibles Illustrated* with the Jan.-Feb. issue and is expected to sell the 45,000-circulation, glossy bimonthly within the next 60 days. A company spokesman declined to say if *CI* had been losing money, although sources said a format change, necessary to lure more advertisers, was vital. Prospective buyers are said to include a group comprising the former editor, Charlie Jordan; his wife, Donna, who was assistant to the editor; Gene Ehlert, ex-ad director, and Kim Nilsen, who was associate editor. The proposed price tag for *CI* was not disclosed.

'Metropolian Home'

Meredith Corp.'s *Metropolitan Home* plans a "Summer style" theme issue in June, with storewide promotional tie-ins at Neiman-Marcus department stores in Chicago, Dallas, Los Angeles and San Francisco. Ad rates are $12,620 for a b&w page and $17,850 for a color page. Ad closing is March 20.#

Magazines boast big gains

New York—The final figures for 1984 magazine advertising performance (AA, Jan. 28) show that the rich got richer.

The major titles usually inhabiting the ranks of the top dozen in ad revenues and pages made it again. Many scored double-digit gains. Quite a few also set individual records in a year when the industry over-all broke records for revenues—$4.67 billion, up 16.5%—and ad pages—153,803, up 8.5%.

In fact, of the 137 magazines measured by Publishers Information Bureau, all but 15—a whopping 89%—reported higher ad revenues in 1984 than in '83.

Among the few suffering declines: *Discover*, *Penthouse*, *Playboy*, *Prevention*, *Us* and *Vanity Fair*.

Magazines that ran up the highest percentage gains in revenues (for a full year-to-year comparison): *American Health*, up 152.2%; *Connoisseur*, up 88%; *Harper's*, up 82.9%; *Country Living*, up 71.5%, and *Southern Accents*, up 69.9%.

In 1984, as in '83, the hottest categories for ad revenues, achieving the largest precentage gains, were business, up 23.7%, and fashion-service, up 22.2%. Some examples: *Glamour*, up 20.4%; *Harper's Bazaar*, up 30.1%; *Inc.*, up 39.1%, and *Venture*, up 54%.

In revenues, perennial first-place finisher *Time* again was No. 1, at $335.6 million, up 12.1%. The rest of the top dozen follows, with their revenues, percentage gains and their '83 finishes:

2. *TV Guide*, $304.3 million, up 12.9% (2); 3. *Newsweek*, $247.1 million, up 13% (3); 4. *People*, $232.9 million, up 32.8% (5); 5. *Sports Illustrated*, $230.8 million, up 26.1% (4); 6. *Business Week*, $184.8 million, up 18.3% (6); 7. *Good Housekeeping*, $133.3 million, up 4.9% (7); 8. *Family Circle*, $130.7 million, up 10% (8); 9. *Better Homes & Gardens*, $126.1 million, up 15.7% (9); 10. *Reader's Digest*, $111.9 million, up 10.1% (11); 11. *Fortune*, $111.7 million, up 15.1% (12); 12. *Woman's Day*, $110.4 million, up 4.5% (10).

In ad pages, *Business Week*, usually first, was at the top again, with 4,972 pages, up 7.1%. The rest of the top 12 closely followed earlier estimates (AA, Dec. 31). Following are the titles, their pages, percentage gains and '83 finishes:

2. *People*, 4,063, up 17.9% (4); 3. *Forbes*, 3,834, up 12.7% (5); 4. *TV Guide*, 3,800, up 4.6% (2); 5. *The New Yorker*, 3,539, down 2.8% (3); 6. *Fortune*, 3,486, up 7.4% (6); 7. *Vogue*, 3,466, up 11.4% (7); 8. *Sports Illustrated*, 3,035, up 10% (10); 9. *Newsweek*, 3,003, up 2% (8); 10. *New York*, 2,943, up 0.8% (9); 11. *Time*, 2,817, up 4.2% (11); 12. *Los Angeles*, 2,528, up 3.2% (12).

In the Sunday newspaper category, which PIB ranks separately, *New York Times Magazine* had ad revenues of $111 million, up 21.8%, and 4,736 ad pages, up 11.7%. The two mass-distributed titles had a down year: *Parade*, $157.3 million (down 6.7%) and 640 pages (down 14%), and *Family Weekly*, $87.1 million (down 15.1%) and 693 pages (down 11.2%).#

Introductory advertising for the Ford of Europe-built Merkur XR4Ti sets out to establish the import's "serious" German road-car credentials. Young & Rubicam, Detroit, handles.

adWatch

(Continued from Page 4)

tional leader Budweiser. Coors' ads came to mind first for 10.5% of the respondents, a 2.8 percentage-point increase from November.

Anheuser-Busch's Budweiser stayed right where it had been in November, with an even 14% of first mentions. But because Bud is a truly national brand, its lead remains deceptive. In the South Central, North Central and West regions where both brands are available, Coors' and Budweiser's advertising are fractions of a percentage point apart (with Coors ahead in two of those three regions).

When Coors expands distribution to New England this spring, there should be a real horse race for awareness leadership.

Miller's Lite beer held third place in December with a 7.8% share, but its High Life brand dropped to the No. 5 spot with 6.3%. Stroh was No. 4 with 6.7%.

Gallo advertising's quality message got through in time for holiday parties. Awareness of the brand's advertising increased 3.9 points in December, giving Gallo a 12.8% share of first mentions.

That moved it once again into the No. 1 spot, ahead of Riunite. That brand's ad awareness also increased last month, but not as dramatically. It moved up from 10.2% to 11.3%. Paul Masson moved up to third place with 3.2%.

AdWatch is a joint project of Ad Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising in a variety of product categories that first comes to mind from all seen, heard or read in the previous 30 days.

In December, 1,253 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variations.

Among other noteworthy results from the December survey:

- Has Burger King exhausted the equity of its "broiling vs. frying" attack? Each time it has returned to that theme in the past, its ad-awareness share has increased, although a little less significantly each time.

Its latest creative executions for that point of difference (including one spot in which a group of young girls moan in mock revulsion upon learning that McDonald's "fries" its burgers) brought hardly a ripple of response. BK's share of first mentions in December in the **fast-food** category was 14.4%, a statistically insignificant increase of 1.2 percentage points and not enough to get it out of the No. 3 spot.

Wendy's advertising, in a lull before the January baked-potato campaign, also showed a small decline in awareness. With 16% of first mentions (compared to 18.7% in November), it remained No. 2. McDonald's, slowly rebuilding its once-formidable lead in awareness, garnered 40.9% of mentions.

- Burger King even failed to make the **top 10** in over-all unaided awareness for the first time in more than a year. When the survey sample was asked which advertising came to mind first, regardless of product category, from all they'd seen, heard or read, the top 10 were, in descending order, Coke, Wendy's, McDonald's, Miller/Lite, Ford, Budweiser/Bud Light, Pepsi, IBM, Chevrolet and Sears.
- In addition to making an infrequent appearance in the top 10, IBM's advertising registered a respectable gain in the **computer** category. Its awareness share rose 3.2 points to 16.9% in December. That still was less than half the share Apple's advertising received (35.8%).
- From the "Graying of America" file comes an observation from December results in the **cosmetics and fragrances** category. Advertising for Forever Krystle, featuring over-40 "Dynasty" star Linda Evans, proved more memorable than advertising for Cover Girl with beautiful-despite-her-youth Christie Brinkley. Neither brand made the top five spots in the category, however.#

New owner a match for 'World Tennis'

By STUART J. ELLIOTT

New York—CBS Magazines' *World Tennis* has a new lease on life, thanks to its sale to Family Media, its vp-publisher believes.

The long-rumored sale (AA, Jan. 10), which occurred Jan. 28, means the money-losing monthly now is in the hands of "a guy with a proven track record of helping magazines that need help," said Francis (Bud) Dealy Jr., who, along with the rest of *WT's* business and editorial staff, will stay.

The "guy" is Robert Riordan, president of Family Media, whom Mr. Dealy said is "noted as a great circulation person, and if there's a single problem this magazine has, it's circulation." Mr. Dealy said he was "thrilled" and "delighted" by the sale. While terms were not disclosed, sources said they were favorable for Family Media, so that any improvements the company can make would make the deal pay off.

World Tennis, which CBS had owned since 1972, is a distant second in circulation, as well as advertising revenues and pages, to rival *Tennis*. Among the many promotional, editorial and business plans of Peter Diamandis, president, CBS Magazines, to turn it around was a rate-base cut effective in June to 275,000 from 385,000, that would include virtual elimination of newsstand sales.

But sources say Family Media is likely to keep *WT* on newsstands, given its redesigned, more graphic covers, one of several changes recently made by new editor-in-chief Neil Amdur. As a result, they said, the rate base might not be reduced.

Why would Family Media, which owns five other titles, including *Ladies' Home Journal*, *Health* and *1,001 Home Ideas*, want such a problem-plagued magazine? "I really think we can do something with it," Mr. Riordan said through a spokesman. "We can have a real impact in the market."

Mr. Riordan noted *WT* is in "a completely new area of publishing" for Family Media. Thus, it offers the company access to new, lucrative markets such as imported autos, liquor, sportswear, sports equipment. And some Family Media executives have some sports experience; formerly at Newsweek Inc., their duties included work on *Inside Sports*.

The sale of *World Tennis* includes *Tennis USA*, the monthly newsletter of the U.S. Tennis Assn. Under an agreement, *WT* pays for the newsletter and, in exchange, *WT* is designated the USTA's membership magazine, sent to its 250,000 members.

WT's sale marked the second time in three months CBS Magazines threw in the towel on a troubled title, following the folding of *Cuisine*. Mr. Diamandis did not return calls to discuss the sale.#

Liquor sales still down

By JOHN C. MAXWELL JR.

Once again last year, the liquor industry was down about 1%. About the only items that were up were liqueurs and cordials, up 5.9%, tequila, up 7.4% and brandies, up 3.6%.

Canadian whiskies only rose slightly, 0.4%, but in light of a 4.6% drop in bourbons and a 4.7% drop in scotches, this was a good performance.

With the exception of Irish whiskies, which rose 13.8% year-to-year, brown goods are continuing to decline as specialty products and white liquors pick up the slack. Within the vodka and gin categories, imports were up, which carried the categories, accounting for the year-to-year increases in total gin and vodka. Consumption of domestic products actually fell.

As for rum, imports had a year-to-year increase although not strong enough to carry the entire area. One theory is that the increasing consumption of imported items may be status-related.

Of the best-performing brands, the order of the top five remained unchanged with the exception of Canadian Mist, which moved from fifth place to fourth in 1984, edging past Jim Beam. Bacardi maintained its No. 1 position with a slight sales increase, up 1.7% over 1983. Smirnoff and Seagram's 7 Crown retained their respective No. 2 and No. 3 positions, despite case-sales declines for both. Smirnoff fell 0.9%, while 7 Crown was down 3.6%

Windsor Supreme moved up two spots to take the No. 6 position from Jack Daniel's.

The largest growth of the top case sellers came from Christian Brothers brandy, up 13%. Other year-to-year double-digit increases were achieved by Popov vodka and Seagram's Crown Royal, up 12.9% and 10.2%, respectively.

In 1983 and 1984, sales figures were revised for Lord Calvert, which is now included in the 1 million-plus ranking. In addition, Baileys Irish Cream liqueur was added to the list as it hit the 1 million case mark in 1984.

The big worry in the industry this year is the $2 per gallon increase in the excise tax effective Oct. 1, to $12.50. The industry expects that this will cause a 3%-to-7% decline in sales. However, they anticipate stockpiling by consumers before the increase, and the liquor industry as a whole may not be down more than 3% to 4% in 1985.

Top-selling liquor brands

Brands selling more than one million cases. Source: John C. Maxwell Jr., Laidlaw Ansbacher, New York.

Rank				Nine-liter cases (000)		
'84	'83	Brand	Company	1984	1983	Change

Key to parent corporations: (AB) - American Brands, (D) - Distillers Co., (G) - Glenmore, (GM) - Grand Metropolitan, (HWR) - Hiram Walker Resources, (RA) - Rapid-American, (RJR) - R.J.Reynolds, (S) - Seagram and (WB) - Whitbred.

The industry also is worried that there will be another excise tax implemented in 1986, possibly another $2 per gallon. This would exacerbate the industry problems, unless there were accompanying excise tax increases on wine and beer.

To balance that off, however, the industry is hoping to be allowed to lower proof gallonage. As of now, 80 proof is the lowest that can be sold. There is some thought that the minimum might be reduced to 50 proof.

Because a tax is based on proof gallonage, this would allow the products to be sold at a lower price.

There also are those in the industry who want to dispose of the proof designation altogether and replace it with percentage of alcohol. They believe this would allow better comparisons to be made with, for instance, wine, which measures absolute alcohol content versus proof.

Further compounding industry problems are pressures from some sectors to eliminate alcoholic beverage advertising altogether.#

Chrysler eyes parts market

By JESSE SNYDER

WARREN, MICH.—Chrysler Corp. wants to peddle its high-technology components on the open market.

The No. 3 auto maker reorganized its component manufacturing operation and charged Lee Runk, new vp-component business operations, with boosting sales outside the corporation.

"I think we'll be able to increase outside sales by 15% annually as far ahead as we can see," said Mr. Runk.

"Our efforts to get lean and competitive on cars means we make some darn good, darn inexpensive products that are very salable in the open market."

Mr. Runk's components group will map out an outside marketing strategy during the next three months and determine advertising needs.

Mr. Runk said he will continue to use Ross Roy Inc., Detroit, Chrysler's merchandising agency, on specialized trade publication advertising for now.

He also ruled out a divisional image campaign as "an unnecessary ego trip."

Chrysler sells $400 million in components other than engines and transmissions to outside buyers.

Outside sales are 15% to 18% of Mr. Runk's gross, and he wants to increase that to about 25%, even as the value of internal parts supplying grows.

"We have a bias toward keeping high-technology and the high-growth, high-potential business inhouse," he said.

Growth in outside sales will be balanced against increased "outsourcing," or buying from foreign or noncompany suppliers of less advanced or labor-intensive components.

That matches similar moves at General Motors' supplier divisions such as Delco Electronics (AA, Oct. 20, '83).

"We are putting our energies in the strongest growth elements," Mr. Runk said.

Those include electronic radios; electronic transmission, engine and air-conditioning controls for autos, boats and aircraft; powered metal parts, and other diversified products.

For example, a Chrysler-developed leather-look vinyl called Ultrahide is being marketed to boat manufacturers, and Chrysler also is offering seat design services for smaller companies.

The existing 65-person sales and marketing staff will remain intact but is planned to be consolidated into three divisions—machining, electronics and diversified, Mr. Runk said.#

Brady's Bunch

Fascinating juxtaposition on "60 Minutes" the other night with the feature on **Leona Helmsley's** grandiose life style following a harrowing report on African famine. I suspect Don Hewitt was making a point.

The Great One is in town. Cocktails Wednesday (Feb. 6) at "21" hosted by **Jackie Gleason**, Viacom and Showtime Entertainment. Jack will be previewing some soon-to-be-released episodes of "The Honeymooners" that haven't been aired for nearly 30 years. Welcome back, Ralpheee!

Someone sent me a "Friend of **Dennis Stein**" t-shirt.

Another reason why I believe in America: President Reagan's admission to *People* that he always wanted to be **Errol Flynn**.

Gary Hart dined at Elaine's with Peter Straus of WMCA radio in New York. Peter the waiter (not Peter the Straus) told Hart, "See you in '88." Responded Gary, "You'll see me before that."

Big improvement in those new **Merlin Olsen** spots for flowers. The first batch last year made Merlin a wimp, not the Merlin the NFL remembers. The new ads have wit and the "real" Olsen.

When **James Beard** moved on to that gourmet table in the sky the other day, I remembered that last year in an interview I asked him about his own notion of a perfect "last meal." I forget everything it included but I remember one dish: "Bacon and eggs." Gracious, talented, touchable man.

Ross

Hart

Flutie

I like the **Doug Flutie** deal. He gets the $7 million, can spend the next five years learning to throw in the pros, then can walk legally to the real league and, presumably, another big contract.

That'll show 'em. OPEC pulled the press credentials of *Wall Street Journal* ace oil reporter Youssef M. Ibrahim three days after his front-pager about a Geneva OPEC summit and the thousand-dollar-a-night "escorts" shuttling in and out of their suites. If they ever run out of blondes, OPEC's in real trouble.

I have been to maybe 10,000 rubber chicken dinners in the grand ballroom of the Waldorf-Astoria but never before have I heard someone not in the employ of the Hearst Corp. praise William Randolph Hearst out loud. **Walter Annenberg** did it the other night at the Magazine Publishers Assn. dinner. An unexpected grace note, nicely done, in the form of an anecdote about the time the 12-year-old Annenberg was taken up to the old monster's home and fell under what they tell me was his considerable charm.

Newsweek got a good one when they grabbed **Morton Kondracke** to head their Washington bureau. Kondracke's *New Republic* work and his *Wall Street Journal* and United Features syndicated stuff are all first rate.

Bill Beutel of WABC-TV in New York and **Mariel Hemingway** (of Ketchum, Idaho, and Hollywood) co-host next Monday night's (Feb. 11) Humane Society fund-raiser at the Hard Rock Cafe in Manhattan. Mariel's married to the manager. In Ketchum, Idaho, all the cafes are hard rock.

John Naitove of Yarbrough & Co. in New York tells me the beauty in the new Brut commercial is his wife of five months, **Andrea Ross**, who's represented by the Wilhelmina Model Agency.

Mary Hart of "Entertainment Tonight" will play herself in "Hollywood Wives" over ABC this month. But while most of the sex bombs starring in the flick will be working in designer clothes, Mary got her black velvet dress "off the rack" at the Lillie Rubin shop in Sherman Oaks and doesn't have the foggiest who designed it. That's what the Lillie Rubin folks tell me. I'm sure you're waiting with bated breath for other news of "Hollywood Wives" but for the moment, that's all I have.

The Four Seasons restaurant in Manhattan understands the priorities. The other day at lunch **Calvin Klein** had one of the posh banquettes while *Time's* "man of the year," baseball commissioner Peter Ueberroth, made do with a small table by the stairway.

Marc L. Barz of Ace-Parker in Chicago is another who knows that "polish" changes its pronunciation when capitalized.

Joe Hanley jumped from the Los Angeles Times Syndicate after nine years for a big international job for the Murdoch organization's own syndicate.

Dick Pyatt, who used to run the news operation for New York's municipal station WNYC, has a new book out: "The People's Medical Answer Book."

Would it be unsporting to call the Senate judiciary committee a "Meese trap"?

By James Brady

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodology to report comparable figures (1984 month vs. 1983 data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*).

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column formats.

8 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 8 column formats.

9 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 9 column formats.

6 column broadsheet standards or tabloids which have a slight depth change in 1984 but did not change column format are converted back to original depth.

'Wives' set to sweep

By JAMES P. FORKAN

NEW YORK—The first half of the February sweeps shapes up as a battle of the Hollywood stars, but "Hollywood Wives" undoubtedly will emerge as the victor of the February ratings war.

Arbitron began monitoring the sweeps Jan. 30, with A.C. Nielsen Co. starting its reporting a day later. Arbitron closes the book on the ratings period Feb. 26, a night before Nielsen's report concludes.

Among the stars the networks are depending on for above-average ratings: Alan Alda ("The Four Seasons," CBS, Jan. 30); Paul Newman ("The Verdict," NBC, Feb. 3); Clint Eastwood ("Firefox," ABC, Feb. 3); Lee Marvin ("The Next Mission," a sequel to "The Dirty Dozen," NBC, Feb. 4); Ellen Burstyn ("Surviving," ABC, Feb. 10); James Earl Jones ("Atlanta Child Murders," CBS, Feb. 10 and 12); Robin Williams ("The World According to Garp," CBS, Feb. 13); Penny Marshall ("Challenge of a Lifetime," ABC, Feb. 14), and Telly Savalas ("Kojak: The Belarus Secret," CBS, Feb. 16).

But "Hollywood Wives" Feb. 17 to 19 is the programing the advertising business is talking about. The ABC three-part miniseries, based on the Jackie Collins best seller, has an all-star cast headed by Stefanie Powers, Angie Dickinson and Suzanne Somers.

"Hollywood Wives" is "gonna be big, it's gonna do very, very well," said Paul Schulman, president of Gardner Advertising's Paul Schulman Co. network tv buying subsidiary. He is projecting Nielsen shares in the upper 30's. At SSC&B, Jack Otter, senior vp-network programing, agreed, adding he is "even more bullish" than most: "It could easily get a 40 share." Said Phil Burrell, Dancer Fitzgerald Sample's vp-network programing: "I guess I'd have to join the chorus" expecting big numbers from that "exploitative" miniseries.

Most if not all industry observers will be stunned if "Wives" does not prove to be the sweeps' biggest draw. Earlier this season, CBS advanced "Atlanta Child Murders" by about a week while NBC delayed its Procter & Gamble-sponsored "A.D." miniseries into March-April, both to avoid the glitzy ABC miniseries.

Despite all the stunting and counterprograming, Mr. Schulman said, "Over-all, I see no change in status" for the Big 3, with CBS still leading NBC and ABC in the seasonlong ratings fray. Moreover, as Mr. Otter added, the sweeps are far more important to the networks' affiliates (for setting new local ad rates) than to agencies and their clients. Because marketers have year-round needs and goals, "Most advertisers think of the long haul," said Mr. Otter.

CBS' biggie should be "Atlanta"; shares of the two installments are expected to average in the mid-30's. Other nonseries hits, with shares in the 30's, are projected to include ABC's "Consenting Adult" tonight and "Surviving," though the latter will be hurt by "Atlanta," plus CBS' Grammy Awards Feb. 26.

Theatricals, used sparingly as sweeps ammunition in this pay tv era, will not score "special numbers," one adman said, while made-for-tv movies and miniseries again will dominate. "Firefox," a "Rocky" repeat and "Garp" will be among the features with so-so ratings, several sources agreed.

Of the tv movies, NBC's "Poison Ivy" comedy will be "in big trouble" on Feb. 10 versus ABC's "Surviving" and CBS' "Atlanta." CBS' "Kojak: The Belarus Secret," meanwhile, should improve that network's Saturday showing.

Most of the sweeps weeks will wind up with a competitive Sunday. Feb. 10, which will climax the 1984-85 season's 20th week (and the "second season's" fifth week), will see "Surviving" competing with the opener of "Atlanta Child Murders." A week later, "Hollywood Wives" starts opposite NBC's "Hitler's SS." And on Feb. 24, NBC will pit Bob Hope and part one of its "Evergreen" miniseries against ABC's "Star Trek II."

Among regular series, ABC's "Dynasty" and CBS' "Dallas" will continue their battle for the season-to-date series crown. The Feb. 6 "Dynasty" could go through the roof. Why? President Reagan's State of the Union speech will bump several series, and the soap's competition will be the Democrats' response on CBS and NBC.#

Pizza Hut leaves hometown

By JENNIFER PENDLETON

Pizza Hut is dropping its "Hometown" for Hollywood in its first campaign from Chiat/Day, Los Angeles.

The PepsiCo division will anoint seven celebrity presenters as "Pizza Hut People" in new tv commercials intended to project a confident, quality image for the U.S.' largest pizza chain (AA, Jan. 28).

The campaign is a departure from the country theme of its long-running "Hometown" ads created by Chiat/Day's predecessor, Foote, Cone & Belding, Chicago. In the $30 million campaign, celebrities Martin Mull, Susan Anton, Rita Moreno, Herbie Hancock, Hoyt Axton and SCTV's MacKenzie Brothers will speak on different aspects of pizza consumption.

According to Chiat/Day exec vp-creative director Lee Clow, the campaign is a new approach to testimonials. Pizza Hut opted for "approachable, honest, friendly and believable presenters. . .so that people could identify what they're saying and have fun along with them." The agency gave them general guidelines on what to discuss in the ads, but most of the comments were extemporaneous.

"Let me tell you a little something about pizza etiquette," comedian Martin Mull will say, as he points to the areas on a pizza slice that are acceptable first bites. Then he asks, "but is it okay to take it from the other end—crust-first?" "No," he says. "I'm sorry, you have to start with the point." As it ends, the presenter's name flashes on the screen, followed by the name of his favorite Pizza Hut pizza.

The MacKenzie Brothers of SCTV fame spar over pizza. "You know what you got to get yourself?" says one brother to another. "A new attitude to eating." After informing him that he eats like a bird, followed by a few barbs, the larger brother steals the pizza away from his smaller rival.

One spot features actress Rita Moreno. "If I'm feeling mellow, I just want cheese and tomatoes. If I'm feeling attractive. I say put on some pepperoni, and if I'm feeling wild and crazy, I just say throw it on," she says suggestively. "My, my, my, my, my."

Pizza Hut senior vp-marketing Walter (Bud) Gates and vp-advertising/sales promotion David Ropes describe these spots as the first in what likely will become a long-running campaign. The company executives spoke of adding other Pizza Hut People as the year progresses. They also spoke of running similarly themed ads with local celebrities on a local level.

Pizza Hut's selection of Chiat/Day as its agency has been surrounded by controversy. After the agency defected from the review of its competitor, Godfather's Pizza, to pitch the larger Pizza Hut account, Godfather's sued Chiat/Day. Its purpose was to stop the agency from revealing proprietary information—in effect, stopping them from working on the business (AA, July 16, *et seq.*).

Arguing that Chiat/Day possessed trade secrets that could be used against them, Godfather's secured an injunction against the agency, restricting certain staffers from working on the account. That injunction was in place until November. The case is pending.

Pizza Hut is the U.S.' largest competitor in the $9 billion pizza-restaurant category with a 20% market share.#

Colgate

(Continued from Page 1)

cember period, also are expected to show a dramatic drop.

Colgate's roll goes back to the gains it made with the addition of a gel to the dentifrice line. Colgate rushed to beat P&G to the market, a move that paid off. A second coup came when Colgate introduced both its regular and gel versions in pump dispensers.

P&G, which had hoped to have good regional, if not national, distribution of its Crest pump by now, still is having manufacturing problems with it. Although the exact problems with the pump, designed by the West German-based Henkel, could not be pinpointed, it appears P&G is having trouble developing filling equipment. The design was sold by Henkel to Continental Can Co., which was refused trade secrets for filling the pumps.

A buyer in Portland, Me., said he hasn't had any word from P&G. The product was put into test there in the fall. But once initial shipments sold out, stores found they couldn't get any more stock. P&G stopped advertising when it couldn't supply product.

Some say it may take 18 months to produce the proper equipment for filling this kind of pump.

P&G prefers to term the difficulties as "not being able to meet consumer demand" without specifying that the problems relate to manufacturing and distribution. A spokeswoman said, "We are working on it as quickly as possible."

Despite all the activity, other brands appear to be maintaining status quo. The third-biggest seller, Beecham's Aqua-fresh, holds 12%, followed by Lever's Aim, at about 9% and Lever's Close-Up at about 8%. None of the other brands exceed a 4% share. Minnetonka's Check-up, which pioneered the pump in this country, has a 1%-to-2% market share.#

1960s relived at 'One Club'

By STEWART ALTER

What was it about the 1960s that has made it so beloved to ad agency creative people?

It can't be that the work was so much better, because not everyone agrees that it really was.

But inarguably, the '60s had a mystique. It was a time of camaraderie, of heroes, of a much smaller industry enthralled with the excitement of doing something new—namely, tv advertising.

That, anyway, was about all one could ascertain from a fairly inconclusive panel discussion involving six top creative executives. They were collected in New York last week by The One Club for Art & Copy, a craft guild of copywriters and art directors, to discuss "Creativity: How great were the '60s? How bad are the '80s?"

There didn't seem to be any definitive answer to the question of why things were better then or if clients and their advertising were really better. Jay Chiat didn't seem to agree with the premise at all. The chairman of Chiat/Day, New York, refused to join in the lament that things are so bad today. His defense of the '80s won the applause of many of the young people in the audience.

But what seemed undebatable was that the atmosphere in the '60s was somehow different and more charged. "There was a camaradie that was incredible," said Jim Durfee, creative director of Durfee & Solow, New York, who felt the newness of tv made for a freer creative environment. "We weren't trying to top anything. We were doing something new."

And with the camaraderie came the pursuit of excellence and competition. "Who's the best young copywriter around?" was a question most often asked back then, according to Jerry Della Femina, chairman of Della Femina, Travisano & Partners, New York. He wondered if it was still asked today. "We spent a lot of time talking about advertising and it was fun. If people stay late now, they're not talking about advertising. I think it's just a job."

That was supported by Len Sirowitz, co-chairman of Rosenfeld, Sirowitz & Lawson, New York. "We were hungry and killed ourselves to do good work," said Mr. Sirowitz, part of the Doyle Dane Bernbach pantheon in the 1960s. "I don't think people today are as hungry as we were then."

But Mr. Chiat, one of the '80s panelists, didn't agree. "We don't have any patience for anybody who's not passionate. I just think you're either tired or not, and if you look at the advertising you can tell." Mr. Chiat, at another point, also felt that "the amount of advertising that's really brilliant today is about the same as in the '60s."

The other two '80s panelists, Tom Messner, senior vp-creative group head at Ally & Gargano, New York, and Tony Angotti, co-founder of Angotti, Thomas, Hedge, New York, joined in attesting to the '60s mystique, especially at DDB.

"There was a reverence," said Mr. Angotti, who worked at DDB. He spoke of the joy of winning Mr. Sirowitz' approval or the awe of entering Helmut Krone's office. Mr. Messner similarly observed that people at DDB in the '60s regarded their advertising as works of art. "It was an aesthetic. Marvin Honig and Evan Stark thought of their work like plays."

The questions of whether the work was any different and, if so, why, were harder to answer, even after two long reels of spots were shown, one from the '60s and one from the '80s.

Apart from the fact that 60-second spots were the norm then, the major difference seemed to be in production values. "In the '60s you saw the work of a copywriter and an art director," said Mr. Della Femina. "Nobody knew the names of any of the directors in the '60s. Today we see the work of the copywriter, art director, producer, assistant producer, director, camerman—a cast of thousands," he said.

But regardless of the differences in products advertised, techniques and commercial length, were those '60s spots effective? asked one questioner from the back.

"We're all still working," was how the panel answered that one.#

Bringing new Clow-t to ads

CHIAT'S UNLIKELY CREATIVE

BY JENNIFER PENDLETON

Exceptional creative ability can show up in unlikely places. And Lee Clow is one such place.

The exec vp-creative director at Chiat/Day is the force behind some of the most remarkable U.S. ad campaigns of recent years, but his special talent is hard to pin down. Although the 41-year-old Southern California native looks the part—he maintains a style of dressing that some describe as "1960s surfer" and wears his hair and beard in a manner reminiscent of that turbulent time—he doesn't seem to possess many of the personal qualities usually associated with great creative prowess.

"If you met Lee Clow on the street you would never guess he's the creative force behind those campaigns," says Nike Inc. creative director Peter Moore, who has worked with Chiat/Day for more than two years. "But he's got *tremendous* abilities."

Mr. Clow's colleagues, when

Special Report

Shakeout has devastated the ranks of personal computer hardware and software marketers. Now, experts say, it's the retailers' turn. Despite the gloomy predictions, however, optimism reigns among franchised computer chains and independent retailers alike. See Personal Computer Marketing Special Report starting on Page 13.

Presstime

AdCom suitors line up

Chicago—The most likely suitors for AdCom, Quaker Oats Co.'s in-house agency (AA, Feb. 4), are BBDO International, Bozell & Jacobs and an investor group led by AdCom president-creative director Gary Bayer, inside sources say. AdCom could command a purchase price of $5 million to $10 million, sources predict.

Bomb threat a dud at JWT

San Francisco—J. Walter Thompson USA's Embarcadero Center offices here emptied Feb. 5 after a bomb threat was phoned in. A search by security turned up nothing, and employes returned after a couple of hours.

'Savvy' staff move

New York—*Savvy's* business and editorial staffs have been invited to stay on by new owner Family Media. And at *World Tennis*, Family Media's other new acquisition (AA, Jan. 10, *et seq.*), Shepherd Brandfon becomes president of a new subsidiary, World Tennis Inc., while continuing as publisher, *1,001 Home Ideas.*

Another lap for Olympics

Stamford, Conn.—ESPN is planning to repackage ABC-TV's 180 hours of 1984 Summer Olympics coverage to run for two weeks in July.

Kenner hugs new dolls

New York—Kenner Products, Cincinnati, will preview its new Hugga Bunch doll line at a pre-Toy Fair press conference here today. Like Kenner's 1984 Rose Petal Place line and Mattel's Rainbow Brite, Hugga Bunch was licensed by Hallmark Properties, Kansas City, Mo.

Howort bolts Ohlmeyer

New York—Philip Howort has resigned as president at Ohlmeyer Advertising, New York, and exec vp at parent Ohlmeyer Communications Cos., a joint venture with Nabisco Brands.

Schick in All-Star insert

Morris Plains, N.J.—Warner-Lambert Co.'s Schick division will run a six-page insert in *USA Today* Feb.8 in conjunction with the National Basketball Assn.'s All-Star weekend. The insert is designed as a fan's guide to the All-Star activities and as a program for the 35th annual game. J. Walter Thompson USA is Schick's agency.

Nielsen eyes syndie shows

Northbrook, Ill.—A.C. Nielsen Co. has formed a new unit to measure syndicated tv shows. The unit, called Nielsen Syndication Service, will combine several services offered by Nielsen.

Cummings exits Saatchi

New York—Josephine Cummings has resigned as senior vp-group creative director at Saatchi & Saatchi Compton Worldwide to join Ted Bates Advertising as senior vp-exec creative director. Ms. Cummings arrived at Saatchi only six months ago as one of the agency's key hirings in efforts to give greater emphasis to creativity. Separately,

Trainer cries 'fowl' on IBM software ad

By BRIAN MORAN

They say it's not nice to fool with Mother Nature, but don't try telling that to IBM.

When it comes to Big Blue's insatiable demand for perfection, God's creatures great and small sometimes just don't measure up. But not to worry—the almighty muscle of machines is always at the ready.

Take Moe DiSesso's unlucky ducks.

Mr. DiSesso, a Hollywood animal trainer with a long list of tv commercial and film credits, was hired recently to drill a team of ducks for a spot promoting IBM's personal computer software line. Mr. DiSesso called a slaughterhouse in Los Angeles' Chinatown and placed an order for 40 ducks.

"They were just getting ready for lunch down there," Mr. DiSesso recalled.

"I said, 'Wait—don't kill 'em, I'll be right over!' It was a happy day for those ducks."

IBM's storyboard for the commercial, via Lord, Geller, Federico, Einstein, New York, called for a group of unruly ducks to fall into a neat row after running through a series of five doors marked with the titles of software programs.

"The producer said it was going to be a real tough one, but I knew I could do it. I do all the tough ones," said Mr. DiSesso, who trained Sandy the dog in the film version of "Annie" and shared a Chicago Film Festival award for Star-Kist Foods' spots for Meaty Bone, which feature "talking" pooches.

Mr. DiSesso put his feathered minions through a four-week boot camp on the three-acre farm he owns in Newhall, Cal. Using a long candy-striped pole, he split up groups of ducks and moved them back and forth and from side to side. When shooting day at Hollywood's Raleigh Studios finally arrived, the ducks were ready.

Mr. DiSesso and 15 assistants, equipped with poles and headsets, positioned themselves just out of camera range about 20 feet away from the swarming ducks. A director from Los Angeles' HISK Productions called for action, and the great IBM duck walk was on.

There was anxiety on the set. None of the IBM and agency reps knew for certain that the ducks could perform on cue. Only Mr. DiSesso knew that getting ducks to walk in a choreographed row was a day at the beach compared with the time he taught a Tidy Cat kitten to play the banjo like Elvis Presley.

"All the setups of the ducks moving in and out of the doors were done in one take," Mr. DiSesso said. "They [the producer and Lord, Geller's representatives] were tickled to death—it went like clockwork."

But after viewing the rushes, Big Blue's team decided that the final scene in the 30-second commercial of IBM's cane-toting Little Tramp shepherding an impeccable row of six ducks out the final "software door" didn't convey enough clout. Mr. DiSesso was asked if he could get *16* ducks to walk the line.

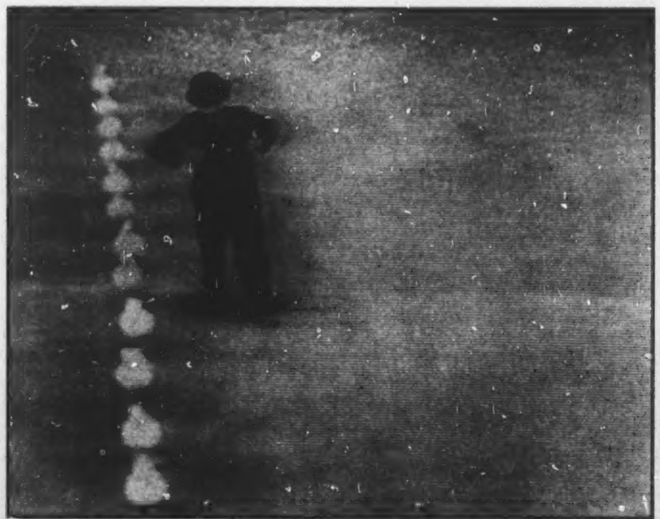
"I couldn't believe it," Mr. DiSesso recalled. "What they asked for was absolutely impossible. It was a lot of work to get six or eight [ducks] to be patient. Maybe I could have done 10, but 16—no way."

What man (or ducks) can't do, a machine usually can. IBM recut the final scene of the spot with 16 docile, obedient mechanical ducks.

"How could they do this to me? They ruined a good commercial," Mr. DiSesso lamented. "That last long line of ducks is too perfect. My friends in Florida and New York called to say how great it looked—until the phony part. I was very disappointed."

A spokesman for IBM's Entry Systems Division, Boca Raton, Fla., would not comment on the spot. A Lord, Geller account exec also ducked the issue, on orders from the client.

Mr. DiSesso said he and his assistants couldn't bring themselves to partake in the peking duck dinner served to the studio crew after work on the shoot finished. He collected his 40 ducks and went back to his farm, where they are now "eating up everything I made on that commercial."#



Moe DiSesso, animal trainer for IBM's software spot, got six ducks to run in a row. But Big Blue wanted a more impressive line and subbed 16 mechanical quackers in the final cut (above).

Special Report

Retailers key in on niches

By Betsy Gilbert

Change is in the air surrounding the personal computer industry.

No one's sitting on Easy Street anymore—not the hardware manufacturers, not the software publishers and certainly not the retailers. Competition has grown fierce within this $12.2 billion retail industry—in terms of combined hardware and software sales for 1984—and those without a clear-cut plan for growth and innovation might as well start thinking about an early retirement.

The computer business rapidly is evolving into a consumer industry. Five years ago, it was hard to find a personal computer in the home or office. Today, according to Future Computing, a Dallas-based information services company focusing on the personal computer industry, 11.9 million homes boast a personal computer; 7.1 million have been installed in offices around the U.S. Consumers have discovered that owning a computer can be smart—for personal as well as professional productivity—and the more they discover, the more they want from their systems.

Increased consumer demand and fast growth have glutted the market with hardware and software, and it has redefined the distribution channels for this equipment.

In the beginning, large chains, such as the 562-unit Hayward, Cal.-based ComputerLand, got the walk-in business, while manufacturers' representatives took care of the bigger accounts. Then independent retailers moved into the market to grab a piece of the ever-increasing action. Today, mass merchandisers such as K mart Corp., Sears, Roebuck & Co. and many other major department store chains have jumped into the fray as well, realizing that putting computers on the shelf next to stereos and videocassette recorders can be lucrative.

(Continued on Page 14)

Betsy Gilbert, a Silicon Valley-based frequent contributor to Special Report, covered computer-user groups in last March's Personal Computer Marketing Special Report.

Independents to specialize in survival

"The rumors of my death are greatly exaggerated." The words are Mark Twain's, but they might have been spoken by any one of the hundreds of independent computer retailers throughout the U.S.

Research from Future Computing, a Dallas-based information services company, identifies 4,337 computer specialty stores in the U.S.; 43.8% of those, or slightly less than 2,000, are independently owned.

For about the past year, the personal computer industry has been abuzz with talk that independents are not long for this world, but insiders say the rumors aren't true. While a good number of independents have closed their doors, experts attribute their failures to bad business operations, not to a trend within the retail channel.

"Everybody is always talking about specialty retailers drying up and blowing away, about how the chains are going to do them in or the vendors are going to take their business away," *PC Retailing* editor Michael Alexander says. "It's just talk.

"I heard the same rumors about appliances, then about consumer electronics and look at those two industries—the dealers are still growing strong. Specialty retailing hasn't changed since the day the first guy opened up a shop and put a shingle outside. The products have changed, but the fundamentals of retailing haven't."

Echoing this optimism, Future Computing predicts independents will maintain a decreased but still formidable 30% to 40% of the market as specialty retailers grow in number to 7,200 by 1989.

However, Mr. Alexander says that although the future holds potential for independents, they no longer can sit back and expect to enjoy healthy sales simply by stocking product. To compete with the large chains and the vendors, which increasingly are going after customers previously the exclusive territory of dealers, they're going to have to place greater emphasis on service and support.

> **"There's plenty of room for everybody, but the independent has got to be sharper than he's been in the past."**
>
> *—Carroll Greathouse*
> *National Assn. of Computer Stores*

"The advantage the independents have over everyone else is the personal touch they're able to offer," Mr. Alexander says. "People will always like going into a store and getting that personal attention, knowing that when they want to add to their system or something goes wrong, their dealer will be there."

Carroll Greathouse, exec vp of the National Assn. of Computer Stores, headquartered in Stamford, Conn., agrees. While he has witnessed the downfall of a number of independents in the past year, he says he doesn't believe these failures represent the shape of things to come.

"Look at the growth curve of any major industry," he says. "You eventually reach a point where the strong start to get stronger and the weak ones pass by the wayside. That's just basic economics, and that's where we are today, but it doesn't mean that independent retailers are dying out.

"There's plenty of room for everybody, but the independent has got to be sharper than he's been in the past."

That means enhanced service and support, something the chains, by their very size, aren't able to offer. If the independents are willing to offer service above and beyond what the big companies do, business will remain healthy.

Success in the computer retailing business isn't much different from any other field. The smart independent is going to find a special niche, become better than anyone else in it, offer customers the kind of support they can't get from the big companies and keep on top of market trends.

You don't need a computer to come up with a successful formula. You just need a good business head. *—B.G.*

Niches

(Continued from Page 13)

The retail business has become crowded, and those hoping to survive are looking for niches.

"You hear all kinds of gloom and doom stories about how specialty computer retailers are going to die out now that the mass merchandisers have gotten into the act," says John Dinsmore, director of the Assn. of Better Computer Dealers, "but that's just not the case. The market has gotten crowded, but different outlets address different markets.

"That's the way it's really always been; it's just that now, the definitions are a lot more pronounced."

The Lexington, Ky.-based ABCD, which was formed in 1982 and has about 60 dealer members, addresses those definitions as well as other issues faced by both independents and chains. The members meet three times a year, along with representatives of the major hardware and software companies, to discuss methods of improving the existing retail channels.

Leaders of the pack

Top computer chains at close of 1984

7. IBM Product Center, Armonk, N.Y.	81
8. Computer Depot, Minneapolis	79
9. Team Electronics, Minneapolis	78
10. Heathkit, St. Joseph, Mo.	74

Source: Future Computing

"Our members are focused very squarely on the business and professional user and to some extent, the institutional/educational market," says Mr. Dinsmore. "That, I think, is fairly universal. The mass merchandisers go after the home and hobbyist market, which is substantial, but which ABCD members have no interest in pursuing. The lines are clearly drawn, and there's very little, if any, overlap."

That is in part because, Mr. Dinsmore says, mass merchandisers are not able to offer customers service and support, which the serious computer user needs. People who buy computers at a K mart or Sears, he says, expect to take the computer home, plug it in and have it run games or low-end, simple software—nothing more. The business user and the serious home user need more in the way of software, add-on peripherals and ongoing service.

"Department stores and the other mass merchandisers are selling boxes, period, and the serious customer is always going to need and want service and support," Mr. Dinsmore says. "That's what the specialty retailers have to offer, and that's why they will continue to do well.

"By the end of this decade, computer products will be so easy to use and people will be so computer literate that you will see a decline in the number of specialty outlets and an increase in sales among the consumer stores, but it's going to be an evolutionary thing."

Statistics compiled by Future Computing would seem to back up Mr. Dinsmore's predictions. The company's research indicates that while sales by mass merchandisers will increase from about $1.5 billion in 1984 to more than $4 billion in 1989, those from specialty stores also will rise, by about the same rate, to nearly $1 billion in 1989.

Those hardware figures are comparable to software sales. Future Computing estimates mass merchandisers' software sales will increase 300%, to more than $2 billion in 1989, while specialty stores will see figures double to about $750 million in 1989.

"Those figures are a little misleading," says Michael Alexander, editor of *PC Retailing*, a magazine aimed at those who sell computers, "because they're taking in all types of computers, from the Atari machines to Apples and IBM PCs.

"Of course, the department stores are going to sell a lot more machines in the years to come, but what they're moving are low-end products. Because the specialty stores lean toward medium to high-end products, they aren't going to be affected by what the mass merchandisers are doing."

The change, Mr. Alexander says, will not take the form of independent and chain retailers falling victim to sales dominance by the mass merchandisers. The real change will be increased specialization by retailers. Not only will they offer increased service and support, but they also will pick specific market niches and direct all their efforts into dominating those areas.

"It all boils down to profit margin," he says. "The mass merchandisers just offer a box and they operate on high volume, low markup. The specialty

But . . . there's still room to grow

Big companies' confidence unshaken

Although some admit to plans for keeping ahead of the pack, the nation's largest specialty chains seem undaunted by talk of an imminent shakeout among computer retailers.

"The competition is definitely heating up, with more and more retailers entering the business," says Diane Douglas, spokeswoman for Hayward, Cal.-based ComputerLand, "but we're not overly concerned about it. It's the independents who should be concerned, because as competition increases, survival is difficult without the identity or support of a large organization network."

Ms. Douglas agrees with the consensus that the entry of mass merchandisers into the computer market won't have any long-term effects on either the chains or the independents, because the targeted customers are so different.

"There's an audience for boxes sold off the shelf, but that's not our audience," she says. "Our positioning is value-added sales, which involves service, training and knowledgeable salespeople and staff at the retail level.

"We're going after the business professional, who wants and needs that whole package," she says.

ComputerLand, which at year's end operated 562 stores in the U.S., offers advantages the small independent doesn't enjoy. Central purchasing—offering franchisees lower prices—marketing programs and extensive training are available. Given the reduced margins most retailers are experiencing today because of aggressive competition, those aren't advantages to be taken lightly.

"I'm not saying that all independents are doomed," Ms. Douglas says. "But the ones that are going to make it are going to have to be real smart about how they approach the market."

Suzie Crocker, spokeswoman for the 55-unit, San Jose, Cal.-based Businessland, says that means narrowing the scope to vertical, or specialty, markets.

> **" . . . we're able to attract and keep the best people. That's a big advantage when the competition for customers is so keen."**
>
> ***Suzie Crocker***
> ***Businessland***

"There's been the assumption that independents can come in and take over the chains' high-end business market, but that is simply not correct," Ms. Crocker says.

"Independents can't afford to keep the kind of staff that's needed to support these customers, and they are unable to service the big businesses that have locations throughout the country. So what they have to do is find a healthy market niche and put all their efforts into it."

Businessland, unlike ComputerLand, is a company-owned chain, rather than a franchise organization. The company believes this arrangement offers advantages over both independent and franchised setups.

"An organization like ours has consistent policies, products and staff throughout the country," she says. "The others can't say that. This company is like any major corporation. People have career paths here, so we're able to attract and keep the best people. That's a big advantage when the competition for customers is so keen."

Businessland isn't sitting back and taking it easy, however. Ms. Crocker says the company is practicing what it preaches: Start moving toward the specialty market niches.

"Some of the independents have been extremely good at hitting those markets, and we can be even better," she says. "Actually, we've always been in the specialty niches, like networking, and it's our policy to continue moving up to higher end products.

"Businessland isn't worried about anyone coming in and taking business away. We've got the people, we've got the ability to service and support and we're able to offer customers what they need.

"Not many other retailers are able to say that." —*B.G.*

retailers have a big overhead and they have to have a bigger profit margin.

"So what you'll see among the different stores is maybe one emphasizing vertical software, another specializing in more technical machines, like multi-user, multi-tasking computers. Depending on what the customer needs, he'll go to a specific store or chain to get it. There won't be nearly the generalization among retailers that you see today."

Because customers will be coming to the specialty retailers for functional products, Mr. Alexander says those stores wishing to remain successful will have to become more sophisticated, more technical and more consultative in their sales techniques. If that happens, he says a status quo will be maintained throughout the retail channels, and everyone will enjoy profitable business.

A representative from one of the leading personal computer companies elaborated even further on the specialization theory. Srini Nageshwar, retail marketing manager of Palo Alto, Cal.-based Hewlett-Packard Co.'s Personal Computer Group, says he believes that in the next 12 to 18 months, the retail channel will shake out into two distinct directions.

"When you look at the retail channel as it stands, you don't see a lot of differentiation," he says, "but you are going to see it in the near future."

He says he believes that as the channel evolves, two categories will emerge. ("I put the mass merchandisers in another category entirely, because I don't feel that they are ever going to present any real threat to specialty retailers," Mr. Nageshwar says.)

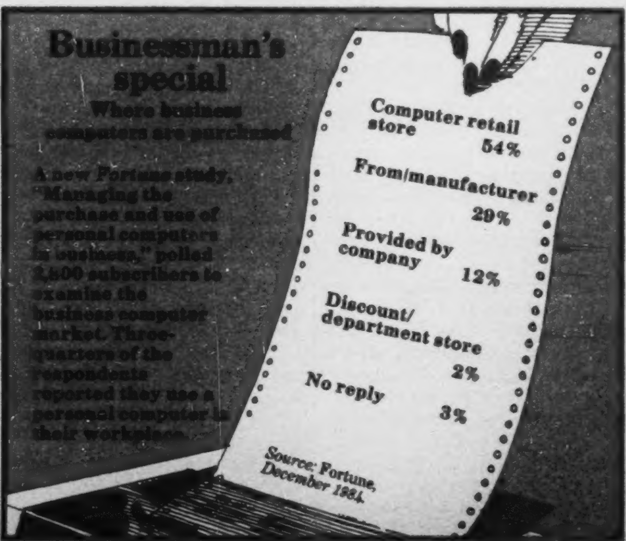
The first category will be the dealers that concentrate on having impressive showrooms and depend on store traffic walking in and asking for product. These stores will attract the price-conscious buyer, because they will compete heavily on the basis of a good value for the dollar. Service won't be a big issue because these dealers will be picking up spillover from *Fortune* 1000 accounts, which typically have internal support systems.

The second category Mr. Nageshwar refers to as "high support dealers," emphasizing support rather than price in their sales efforts. They won't rely on walk-in sales, but they will look to outside sales forces to attract the small to medium-size business computer user (a rapidly growing market), who needs a good computer, but doesn't have the resources to support the system. The dealer that can offer that support is going to get the business, Mr. Nageshwar says.

"We have no doubt that this is going to be the scenario in the next year or so, and have developed a new dealer program based on our belief," he says.

"All the easy computer sales have already been made and there's so much product floating around now, that dealers are going to have to become specialized in order to stay in business.

"The industry is evolving and the retail channel is going to have to evolve right along with it." ■



Businessman's special

Where business computers are purchased

A new *Fortune* study, "Managing the purchase and use of personal computers in business," polled 2,500 subscribers to examine the business computer market. Three-quarters of the respondents reported they use a personal computer in their workplace.

K mart says, 'Come on down'

Ads will reassure bargain-hunters

By JESSE SNYDER

Troy, Mich.—The marketing pendulum at K mart stores is swinging from upscale back to value.

The swing won't reach as far back as the "blue-light special" imagery, but K mart Corp. will reemphasize low prices to reassure traditional customers.

The architect of the switch is Norman Milley, new president of K mart stores group, who is credited with instigating the retailer's move upscale.

Marketing effects include:

- More print and less tv advertising until 1987.
- Flat ad spending in '85, coming in at $590 million.
- Revival of "The savings place" theme line and downplaying of the Olympic-year "We've got it good."
- The temporary loss in billings by Ross Roy Inc., Detroit, which handles tv, radio and some magazine advertising. Those billings, however, are expected to grow in the long term.

This is "the year of the customer," said Mr. Milley. Informal research showed 70% of K mart customers favored the upgraded stores, but 30% didn't.

So K mart will reemphasize low prices and value in advertising, Mr. Milley said. He liked the image gains from the $20 million Olympics tv campaign done by Ross Roy, but acknowledged that only about one-third of K mart's 2,100 stores had been renovated by the summer games. Mr. Milley said there is more tv in K mart's future, but not until after the refurbishing program is completed by the end of 1986.

The shift to an upgraded product mix, including more brand names, will continue apace, but the stores will work to make the lower-price items more visible to shoppers, Mr. Milley said.

For now, K mart is launching a second weekly rotogravure section in major markets, affecting 1,100 stores. Print, mostly in newspaper run-of-press and inserts, will get 91% of K mart media spending this year. But Mr. Milley said changing consumer reading habits eventually will force K mart to reevaluate that weight.

Tv will get a boost when the budget permits, especially when K mart is fine-tuning its image or trying to attract new customers, Mr. Milley said. K mart also is interested in more magazine advertising, but Mr. Milley ranked that a lower priority than tv. K mart uses specialty magazines to supplement sporting goods, apparel and houseware lines.

K mart exceeded its announced goal of $20 billion in sales with a strong fourth quarter. Mr. Milley projects $25 billion in sales by 1988, not including specialty retailing, which by the end of the decade is expected to account for 20% of total K mart sales.

The company, however, said its earnings for the fourth quarter, ended Jan. 31, were below expectations. Chairman Bernard M. Fauber said "massive clearance sales" in the whole retailing industry, brought about by overstock situations, were to blame. "Our

Alcohol hearings

WRG grinds Hills Bros., juices P&G

By JENNIFER PENDLETON

Wells, Rich, Greene has resigned an $8 million account, Nestle's Hills Bros. coffee, reportedly to handle a new juice product that would fall under Procter & Gamble's beverage division.

Sources said the new P&G product, to be handled by WRG/New York, will be introduced later this year.

WRG/Worldwide chairman Kenneth Olshan remained noncommital on the P&G assignment, saying only that Hills Bros. had been resigned due to a "potential, but not immediate, conflict" involving another client. A P&G spokesman said WRG "currently has no P&G beverage assignment."

The decision to abandon the Hills Bros. business, a major account at WRG/West, Los Angeles, for the last five years, was apparently made to meet P&G's tough account-conflict rules and the quiet realignment of P&G's beverage operations.

The P&G spokesman said that

Vcr zapping bug bites Aussies

By GEOFFREY L. MARTIN

Sydney—The "zapping" problem is reaching epidemic proportions in Australia, according to a $100,000 study by Unilever and Lintas.

Zapping occurs when videocassette recorder owners fast-forward through ads, or eliminate them altogether, to get to prerecorded programing. Australia is emerging as a key country for study because vcr ownership is so highly saturated here—32% of households own vcrs, compared with almost 20% in the U.S. The figure is expected to increase to 40% in Australia by the end of the year, sources predict.

The Unilever/Lintas research found that viewing of "live" tv in Australia has fallen to 71% (from 100%) with increased vcr ownership. It also found vcr use is increasing monthly, particularly among older people, children, women, city residents and among vcr owners of more than six months.

The study said vcr use is high during nonrating periods, when, like the U.S. summer, first-run tv programing is scarce.

But the big concern in the advertising industry is zapping, and the report found that at least 25% of all vcr owners either fast-forward through commercials or edit them out of recorded programs.

Geoffrey Cousins, chairman of George Patterson Pty., the biggest agency in Australia and 80% owned by Ted Bates Worldwide, said the study shows that "advertisers will just have to learn to use the medium [tv] differently."

However, two studies last year contradict the Unilever/Lintas results. A McNair Anderson study last year found vcrs had little impact on live tv viewing, and a Roy Morgan Research Center study found that vcr use in Australia actually is dropping.

Also, some have objected to the study's finding that live tv viewing dropped 29%. They point out that this drop is true only on the days when vcr owners are recording programing. All vcr owners on all days show a live tv viewing drop of 11%, they say.#

Dingell dangles clout over alcohol hearings

By STEVEN W. COLFORD

WASHINGTON—Looming over last week's Senate hearings on alcohol advertising was the unseen presence of Rep. John Dingell, chairman of the House energy and commerce committee and generally regarded as the man on the Hill whose views can make or break an issue.

When Sen. Paula Hawkins (R., Fla.) convened the hearings before her alcoholism and drug abuse subcommittee, she attested to her impartiality on the issue, then characterized the consumer crusade against beer and wine ads on tv and radio as a "runaway freight train." Nearly five hours later, she closed the one-day session by denouncing the "subliminal" effects of alcohol ads on the public, especially youngsters who, she maintains, start down the road to perdition with a beer in hand, then graduate to hard liquor and, finally, drugs.

The issue of alcohol advertising has provoked controversy worldwide. Story on Page 70.

Industry forces were generally satisfied with the opportunity to present their views—that no one has come close to proving a cause/effect relationship between beer and wine ads and alcohol abuse; that advertising dollars are devoted to expanding market share, not consumption; that the First Amendment protects advertising. But they nevertheless muttered aloud that the Mormon senator from Florida failed to grasp their arguments.

Even after James Miller III, chairman of the Federal Trade Commission, disavowed any intention of immersing his agency in the dispute and suggested that an ad ban could prove counterproductive, the advertising interests grew restive.

But there was still the powerful Rep. Dingell to contend with. As commerce committee chairman, the Michigan Democrat sits in the driver's seat as far as determining whether House legislation will get an appropriate committee airing or be consigned to withering on the statutory vine.

And in the Senate, Sen. John Danforth (R., Mo.), whose hometown of St. Louis is also home to Anheuser-Busch, chairs the commerce committee.

Before the Senate hearings, Rep. Dingell told ADVER-

Some like it hot

High-speed footage of a laboratory test shows a metal saucepan placed inside a Visions glass saucepan melting down when the temperature approaches 850 degrees. In this tv spot for the Corning Glass Works cookware, an announcer notes Visions "withstands heat that turns ordinary saucepans into sauce." The commercial, originally created by Gough Willoughby for airing in Australia, is scheduled to break in the U.S. in the middle of March. Benton & Bowles, New York, adapted the commercial for this country.

Valentine's day comes early

Advo loses heart

By PAUL L. EDWARDS

NEW YORK—Jack Valentine last week unexpectedly resigned as ceo of the Advo System/John Blair Marketing division of John Blair & Co.

Mr. Valentine's departure, for personal reasons, comes less than a year after he and a partner sold Advo System, Hartford, Conn., to John Blair for $40 million and an unspecified percentage of future profits. When Mr. Valentine and his partner purchased Advo in 1976, the company was losing $1 million a year. Last year it had revenues exceeding $400 million.

In October, half a year after Blair bought the company, Mr. Valentine was promoted to ceo from Advo president when the $414 million diversified marketing company underwent a reorganization that resulted in some 40 persons being let go.

Replacing Mr. Valentine at Advo

McNamara skips to McCann

Agency McMove

By STEWART ALTER

NEW YORK—John (Jay) McNamara, president of Young & Rubicam USA, will move in March to McCann-Erickson Worldwide as its top U.S. agency officer.

The 22-year veteran of Y&R rose to president in November, 1982. He now will become vice-chairman at parent McCann-Erickson Worldwide and chairman of McCann-Erickson USA. The latter is a new post. All nine U.S. agency offices will report to him.

Mr. McNamara, 50, will join McCann at the same time Robert James becomes ceo (AA, Dec. 20) at the parent. Mr. James, currently president, has had many of the U.S. and international agencies reporting directly to him.

In explaining his selection, Mr. James cited Mr. McNamara's "super track record" in agency

Targets Nielsen service

SAMI unveils a drug report

By JACK HONOMICHL

NEW YORK—Selling Areas-Marketing Inc., the third-largest U.S. market-research company, is launching a new-product-movement measurement service against its archrival, A.C. Nielsen Co. The target: Nielsen's syndicated Drug Index service, estimated to account for about $25 million of Nielsen's U.S. revenues.

SAMI's new drugstore tracking service will report movement on 420 product categories, including over-the-counter drugs and health & beauty aids, through chain and independent drugstores. The service will be on-line by April in Chicago, Los Angeles, New York and San Francisco. Ten areas will be on-line by yearend and 18 by June, 1986, according to SAMI.

SAMI uses warehouse withdrawal figures to gather its data; Nielsen uses the conventional invoice audit system.

"This is just one of the first steps in a program to expand SAMI information services," said Carlyle Daniel, president of SAMI. He added that further new ventures will be announced later this year. The main service of SAMI, a subsidiary of Time Inc. since it was founded in 1966, is a local-market and national projected data series on grocery-products movement from food-operator warehouses to retail grocery stores in 54 markets that account for more than 86% of national food-store sales.

This service competes head-on with the Nielsen Food Index service in the U.S., and, according to Mr. Daniel, this portion of its business in 1984 continued 18 consecutive years of growth.

Nielsen's Drug Index, which was founded in 1933, was that company's first nationally syndicated service, predating the Food Index by about seven months. It has had no major U.S. competitor.

According to Mr. Daniel, the new SAMI service will provide clients with report formats and servicing akin to what has been offered on food products; local-market geographical definitions will be the same as those now used for SAMI grocery-product reports.#

Crain names Morrow

W. Morrow

DETROIT—William A. Morrow has been appointed senior vp-operations of Crain Communications Inc., effective April 1.

Mr. Morrow, managing tax partner of the Detroit region offices of Touche Ross & Co., will be responsible for all financial, legal and administrative operations of Crain and its subsidiaries.

Crain publishes ADVERTISING AGE and other business and consumer publications.

"We are delighted to have someone with Bill's experience and knowledge joining our company to assist us in the continued growth of our publishing base," said Rance Crain, president, and Keith Crain, vice-chairman, in a joint statement.

Mr. Morrow, a member of the bar and a certified public accountant, will be based in Detroit.#

Uncover your highlights. Discover your glow. Halsa.

Halsa: How Swede it is

Five European-looking beauties are helping S.C. Johnson & Son, Racine, Wis., introduce its new line of Halsa Swedish Botanical shampoos and conditioner (AA, Nov. 12). The $13 million national print and tv campaign kicks off at the end of this week via J. Walter Thompson USA, Chicago.

World News Roundup

TORONTO—Labatt Brewing Co. has pulled its estimated $30 million account out of J. Walter Thompson Canada because of a conflict with Miller Brewing Co., which JWT USA won last year (AA, Nov. 15). Young & Rubicam and Scali, McCabe, Sloves are pitching for Labatt's major brand, Blue, which bills $20 million. Scali assumes all media buying, and McCann-Erickson picks up three Blue line extensions.

LONDON—Mars Confectionary has shifted two brands from D'Arcy MacManus Masius to its other U.K. agencies. Ted Bates Holdings picks up Marathon ($3 million), and Allen, Brady & Marsh gets Topic ($2 million). DMM still has Mars bars and other Mars accounts.

SCHWALBACH, WEST GERMANY—Procter & Gamble, through its Bittmeyer subsidiary, is kicking off its first campaign for Valensina orange juice, via Saatchi & Saatchi Compton Worldwide. The theme is "Choosy mothers choose Valensina."

LONDON—Anheuser-Busch, which already markets Budweiser in the U.K., will launch Michelob here this year through local brewer Watney, Mann & Truman. Marsteller Little & Strodl will handle. Budget has not been released.

BUENOS AIRES—Hiram Walker SA has moved its liqueur account to Ruben Maril, a new shop founded by Mr. Maril, from

Argo aims video idea at AT&T

By BRIAN MORAN

NEW ROCHELLE, N.Y.—Argo Communications, one of the newest telephone companies to challenge AT&T in the long-distance market, this week will expand its assault to another potential AT&T stronghold—teleconferencing.

Argo, a partnership of five U.S. and French telecommunications companies, will introduce a service that permits color video conferences to be held over ordinary telephone lines at prices about double those charged for regular tele-

Ad pressure mounts for European tv

Private, cable players put heat on

By LAUREL WENTZ

LONDON—Folks like Clara Peller, Mr. Whipple, Josephine the plumber and Madge the manicurist are strangers to most European tv viewers, but all that may be changing.

The reason: European state-owned tv networks, which have prohibited commercials for years, are now being pressured to open up new airtime to advertisers. In some cases, this means accepting ads for the first time.

The pressure is coming mostly from growing competition– either new, private tv channels or satellite-beamed cable channels that soon will blanket Europe.

The outcome is good news for advertisers, particularly U.S.-based global ones, that have complained the loudest and longest about the lack of commercial tv time.

Within the last year, broadcasters in some European countries have started taking advertising for the first time; in other countries, they have decided to increase the amount of commercial time available to advertisers.

Even the U.K.'s British Broadcasting Corp., traditionally disdainful of advertising, has been shaken by Prime Minister Margaret Thatcher's recent hints that she would be glad to see the BBC support itself with advertising.

On the Continent, the French government may increase advertisers' options by allowing some tv stations to operate privately, a big step for an industry traditionally run by the government. Belgium is moving toward allowing brand-name marketers to advertise on tv for the first time, and Norway, with no previous tv advertising, will plug specially produced spots into a weekly program for two months this year.

"I forecast within five years every country in Europe will take advertising," said David Wood, a London-based Ogilvy & Mather media executive.

Options now are limited for both viewers and advertisers. Of 16 western European nations, 10 have only one or two land-based tv channels—and they often are dull. Advertisers in some countries have to book tv time as much as a year in advance—if they can get it at all. Nine countries allow fewer than 60 minutes of advertising per day (compared with an average of 540 minutes in the U.S.).

In the U.K., the BBC is pleading for a 40% increase, to $84.50, in the revenue-producing annual color tv license fee charged to set owners. At the same time the ad industry and some politicians are calling for ads to be introduced on some of the BBC's two national tv channels and four radio networks.

D'Arcy MacManus Masius recently concluded in a study that

ACCOUNT CHANGES

Warwick adds Sterling shop

NEW YORK—Warwick Advertising, which has handled $7 million to $8 million in Sterling Drug billings, has added another $12 million to $14 million as a result of acquiring Thompson-Koch Co., Sterling's in-house ad agency.

Besides adding about a dozen employes, Warwick will add Midol, d-Con and Campho-Phenique to its roster of products. Terms of the acquisition were not disclosed.

Other accounts moving:

Fremarques Ltd., Westport, Conn., to **David C. Burleigh Associates**, New York, for new-product introductions including Duquesne rum and Saxon Apple Schnappes. No previous agency.

Piedmont Industries, New York-based apparel marketer, to **Rockmore, Mosallem, Bloch & deLeo**, a new agency formed by four former senior vps from AC&R Advertising: Patricia Rockmore, Mitch Mosallem, Bruce Bloch and Micheal deLeo. No previous agency.

Esselte Pendaflex Corp., U.S. division of Esselte AB, New York, international marketer of Pendaflex hanging file folders, Oxford filing supplies and Dymo Labeling Systems, to **Penchina, Selkowitz** for all consumer and trade advertising, from J. Walter Thompson USA. Annual budget exceeds $1 million.

Mica Corp., Culver City, Cal., producer of copper-clad glass laminates for use in printed computer and electronic circuit boards, to **Darryl Lloyd Inc.**, North Hollywood, from Robert A. White Advertising, Pasadena. Budget estimated at $250,000.

Trenomed, Irvine, Cal., marketer of cable assembly systems, to **R.L. Couch & Co.** from Marketing Directions.

Impell's Computer Systems Corp., San Francisco, marketer of computer-aided design and engineering systems for the electric utility industry, to **Livingston/Sirutis/Advertising**, Belmont, the first agency.

General Parametrics, Berkeley, Cal., manufacturer of VideoShow business presentation graphics system, to **Van Bronkhorst Group**, Mountain View, from Gardner Communications. Also to Van Bronkhorst: **S-MOS Systems**, San Jose, manufacturer of CMOS semi-conductors, from Imahara & Keep.

Wonder Corp., Norwalk, Conn., marketer of flashlights, lanterns, camping and energy equipment, to **Meiger Nordlinger Inc.**, New York, from in-house.

New York state department of agriculture and markets to **Henderson Friedlich Graf & Doyle** and **Arthur D. Little Inc.** to jointly handle a new $225,000 marketing study for its foods and wines.

QuinnEssentials, New York marketer of computer software, to **Franznick & Cusatis**, New York, for its $1 million advertising and public relations account. No previous agency.

Philips Business Systems, Woodbury, N.Y., marketer of dictation and transcription systems, to **Greenstone & Rabasca Advertising**, Melville, for advertising and public relations from Geer, DuBois, New York.

Applied Computer Products Corp., Huntingdon Valley, Pa., marketer of IBM-compatible software and peripherals, to **Thomas J. Paul Inc.**, Jenkintown, for advertising and to **Rosen-Coren Agency**, Jenkintown, for public relations. No previous agencies.

Whitesmiths Ltd., Concord, Mass., marketer of computer systems software, to **G/R Public Relations**, Watertown, from Industrial Marketing Associates. Budget about $50,000.

Dayton Newspapers, Dayton, O. to **Willis Case Harwood Advertising** from Needham Harper Worldwide.

Spring Valley Bank & Trust Co., Jasper, Ind., to **Englehart, Johnson & Associates**, Indianapolis, its first agency.

Federal Express, Memphis, to **Telephone Marketing Programs**, New York, first agency for Yellow Pages advertising for two units, ZapMail and the international division.

Willow Chase Fashion Center, Houston, Western Development Corp.'s first Texas project, to **Vollmer Public Relations**, first agency.

Corn Popper, Dallas, franchisor of gourmet popcorn stores, to **Howard, Merrell & Partners**, its first agency.#

Europe

(Continued from Page 3)

selling just 15 seconds of advertising per hour on the BBC would bring in $75 million a year and enable the annual tv license fee to be frozen at the current $60.

The "Beeb" is against the idea, fearing that the pursuit of advertisers would lead to a sordid ratings war with ITV, a commercial network, and an invasion of tacky American and American-like soap operas, mindless sitcoms and inane game shows—even though the BBC already runs "Dallas" and "Dynasty," for example.

Most media watchers think the broadcasting corporation will stay ad-free until the new three-year tv license period, beginning in April, ends.

Belgium's two French-language tv channels began accepting service and generic ads in 1984, and a law allowing brand advertising is expected to pass later this year.

"Now you can say something like 'Drink more coffee' as opposed to 'Drink more Maxwell House coffee,'" said a London-based agency media director. "That's not really what we want."

Tightly controlled France and Germany, after years of doling out a few commercial minutes per state-owned channel, could be heading for an explosion of advertising minutes with the advent of private tv.

French President Francois Mitterrand has indicated that privately owned tv may be allowed regionally in France for the first time, providing an alternative to three unexciting state-owned tv networks.

The sporadic appearance of pirate tv signals may be adding impetus for private tv. Popular pirate station Canal 5 was quickly shut down but hopes for permission to become a legal, private channel.

"We think Mr. Mitterrand will probably agree to private local tv stations by the end of 1985," said Didier Colas, Ogilvy & Mather's Paris-based media director.

Mr. Colas said private tv probably will follow the pattern of commercial radio, in which private, regional ad-supported radio stations were allowed to set up two years ago.

Germany's plans for ad-supported private tv are confusing. In January a group of German publishers launched SAT 1, a cable tv channel that was allowed to fill an unprecedented 20% of airtime with ads and even run them after the traditional 8 p.m. cutoff time. The catch is that only 1% of German households—about 250,000 homes—can pick up the cable station.

Another private tv station, RTL-Plus, reaches only 4% of West German homes. All others need a $500 home satellite dish to pick up the RTL-Plus signal.

At this point, no one is sure which will grow faster: The cabling of Germany or sale of satellite dishes.

In Italy, private tv has already run amok and trampled the three government channels RAI 1, 2 and 3. When the state broadcasting monopoly ended in 1976, some 500 private tv stations mushroomed and RAI's ratings collapsed.

Now, private networks stuff as much as 20% of their most popular programs with commercials. Entrepreneur Silvio Berlusconi, who owns the main private networks, rakes in the lion's share of Italy's $700 million annual tv revenues.

A dazed post-monopoly RAI finally is fighting back. For the first time, RAI, which used to sell only 2.5% to 3% of its airtime to advertisers, is hitting its ceiling of 5% commercial time per hour of programing, said Mario Bianchi, Lombardia regional director for SIPRA, RAI's space concessionaires.

Last year, RAI relaxed rules, for the first time allowing spots to run for automobiles (previously banned as unwanted competition for domestic auto maker Fiat) and luxury goods from pet foods to furs.

"Before, RAI waited for the advertisers to call on it," Mr. Bianchi said. "Now, SIPRA goes to the clients. It's the first time ever."

It is hard to imagine having less to watch on tv than in Scandinavia, where Norway and Denmark have a single channel each (Sweden has two). Europe's last holdouts against commercial tv, the Scandinavian countries have grimly resisted pro-advertising lobbies. But their governments are beginning to realize that with the spread of satellite-carried cable programing, Scandinavians will see ads whether their governments like it or not.

In that spirit, Norwegian state tv channel NRK has invited international ad agencies to produce commercials to run in a Saturday night entertainment program airing for eight weeks in the first quarter of 1985. However, the spots must be for noncommercial or generic products.

Despite the trend toward more opportunities for advertisers on European tv, demand continues to outstrip supply.

Swiss agency A.G. Fuer Werbefernsehen, which handles all advertising for Switzerland's state-owned French, German and Italian-language networks, estimates its $55.6 million annual revenues could be increased by at least one-third if more spots were available for sale.

Even outside Europe, the movement to open up more commercial tv is taking place.

The Israeli government is discussing ground rules for commercializing its state-run, one-station network, which was modeled after the BBC.

The government already has said it will eliminate the 3% subsidy of the broadcasting authority, and last year it opened the door to program sponsorship. Industry sources predict full-fledged commercial programing is inevitable as pressure mounts from advertisers and the economic situation in Israel continues to worsen.#

Libby's salmon ads have national scale

By JULIE FRANZ

CHICAGO—Libby, McNeill & Libby will break its first national campaign for canned salmon products in March and April issues of women's magazines.

This is a decided departure for Libby. Since its three canned salmon products first appeared on store shelves 75 years ago, the marketer has relied mostly on regional newspaper and store ads.

Libby is the leader in the canned-salmon segment, with a 15% share nationwide, analysts say. Bumble Bee Seafoods, San Diego, runs a close second. Regional and local marketers account for almost half the business.

The new ad effort should build national awareness of Libby's canned salmon, a company spokeswoman said.

Libby's canned salmon is packed with skin and bones, unlike the new Chicken of the Sea brand salmon that Ralston Purina Co. is testing now (AA, Jan. 28).

Libby's ad campaign isn't a reaction to Ralston's new deboned, skinned salmon in a can, the Libby spokeswoman said.

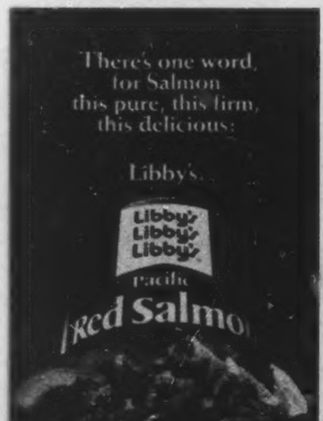
Rather, campaign plans were set before Ralston began testing its new product. The Bloom Agency, Dallas, handles Libby's canned salmon. Ads will coincide with Lent, when salmon sales tend to be highest.

Themed "There is one word for salmon this pure, this firm, this delicious: Libby's," many of the ads will include 20¢-off coupons. They will run in *Family Circle*, *Good Housekeeping*, *Health*, *Ladies' Home Journal*, *McCall's*, *Sunset* and *Working Mother*.

Libby's salmon comes in red, pink and keta varieties. Red is the highest grade and keta the lowest.

It is packaged in 15½-oz. cans and retails for $2 to $3 a can, depending upon the grade. The product also is sold in 7¾-oz. cans retailing for $1.30 to $2.

Libby's campaign also includes point-of-purchase materials.#



There's one word for Salmon this pure, this firm, this delicious:
Libby's.
Libby's Libby's Libby's
pacific
Red Salmon
20¢ Off on any can of Libby's Salmon

Libby's ads for its canned salmon products are timed to coincide with the Lenten season.

Beer ads: Hooray for the red, white & brew

By SCOTT HUME

Miller Brewing believes the new "Made the American way" product-quality campaign for its High Life brand is the best approach to reversing that beer's sales slump.

It is such a good approach, in fact, that both archrival Anheuser-Busch and up-and-comer Adolph Coors will be battling back with similar approaches to help their sales. Coors this year also will be taking its message to network tv.

The High Life campaign J. Walter Thompson USA, New York, has crafted for Miller broke on network tv Feb. 10. Set to the beat of the Oak Ridge Boys' hit "American Made" (AA, Feb. 4), it continues the trend in beer advertising toward celebrating American virtues along with beer quality.

Milwaukee-based Miller also has altered its label to include an American eagle, as the original Miller label did in 1855.

Radio, outdoor and magazine advertising support.

Miller's campaign will compete with the expanded "corporate quality" advertising D'Arcy MacManus Masius, St. Louis, has prepared for St. Louis-based Anheuser-Busch (AA, Feb. 4) and what executives at Golden, Colo.-based Adolph Coors call the new "distinctiveness advertising" from Foote, Cone & Belding, Chicago, for its Coors brand (AA, Jan. 31).

"The idea that beer is an emotional reward for a hard day's work was the basic theme of beer advertising for years. And it worked, as the longevity of 'For all you do, this Bud's for you' and 'Welcome to Miller time' attest," said Jerry Steinman, publisher of *Beer Marketer's Insights*. "Now the theme is becoming 'quality,' perhaps because the old message was wearing out or because the business is changing."

The change that is most significantly dictating the shift in beer advertising, analysts and beer executives said, is not the rising tide of anti-alcohol sentiment, although brewers take the threat of a tv advertising ban seriously. The more immediate threat is the lack of gusto in beer sales.

Major breweries' 1984 results

Anheuser-Busch, the only major brewer to report increased beer shipments for 1984, has increased its share of the market to an estimated 36%. Miller Brewing posted no growth despite introducing new brands. Figures are barrels shipped in millions. ***Source: Brewers' figures.***

Brewer	1982	1983	1984
Anheuser-Busch	59.1	60.5	64.0
Miller Brewing	39.3	37.5	37.5
Stroh Brewery	22.9	24.3	23.9
G. Heileman Brewing	14.5	17.5	16.8
Adolph Coors	11.9	13.7	11.6

While estimates of total 1984 beer barrelage vary, industry analysts agree that total 1984 shipments fell below 1983 levels (itself a no-growth year). Among the major brewers, only Anheuser-Busch reported an increase (5.8%) in barrelage. Miller reported a flat year, with improvements for its Lite, Meister Brau and Milwaukee's Best brands offsetting the continued decline of High Life.

All other major brewers (including Coors, whose production dipped 4%) registered decreases.

A-B, which now commands perhaps 36% of the market, is secure enough to use its quality campaign as an adjunct to continuing product campaigns for individual brands.

New 60-second versions of the 90-second spot A-B has run occasionally since November have been added to its commercial pool. Their appeal to patriotism is sounded in the refrain "Made in America, that means a lot to me. I believe in America and American quality." Print versions soon will appear in news, sports and lifestyle magazines.

"The brewing industry is in a period of change," said A-B vp Tom Sharbaugh. "There's going to be some shaking out of players, and there are the problems of excess capacity and [low-cost-] price beer.

"As our competitors get more and more into price beer, we felt we needed to have another weapon rather than be forced to 'duke it out' in the price arena. That weapon is the message that our beers are a cut above the rest."

Adolph Coors Co. disagrees. The "Coors is the one" campaign for its premium brand that broke last week makes a similar superiority claim while taking the product-quality message to new lengths.

In each of six spots, actor Mark Harmon calmly examines a different reason Coors claims to be different from other beers. These include Coors' refusal to pasteurize its beer, its "cold aging" process and its reliance on a single brewery to produce all its beer. "Coors thinks like a brewer, not a corporation," he says in one spot.

"This campaign represents more a fine-tuning than a change of strategy," said Coors vp-marketing Rob Klugman. "The 'Best of the Rockies' theme we had been using was good, middle-of-the-road beer advertising, but we didn't think consumers were taking the points about quality we've been making seriously enough."

Coors told its distributors at meetings that ended last week that its move into New England (making it available in 44 states) will make it a national brand, finally ready for national advertising.

The "Coors is the one" campaign (and the continuing "Turn it loose with the Silver Bullet" campaign for Coors Light) will begin airing on prime time network tv during the second quarter.

But Mr. Klugman admitted the networks' exclusivity arrangements continue to stymie Coors' efforts to buy time during network sports programing.

"We've had low-key discussions with the networks about the exclusivity deals for years and told them those arrangements are improper and probably illegal," he said. "Their reaction has been 'Gee, we hear you, but we can't help you there. But how about eight minutes during the "Triathlon of the Network Stars"?' In sum, they haven't been terribly helpful."

Coors also told its distributors that it will begin test-marketing a new brand, called Coors Extra Gold, during the second half of the year. It is expected to be a heavier-tasting premium beer, replacing the Coors Golden Lager brand, which failed in test last year (AA, Oct. 25). It is unlikely that Extra Gold will be a low alcohol brand.

"We've done our homework on that category and we still believe there is low consumer demand for it. Frankly, we're surprised how other brewers have approached it both in the marketplace and in the courtroom," Mr. Klugman said.

A-B, whose LA brand pretty much owns the low-alcohol category now, isn't ruling out further additions to its product line. Observers speculate the No. 1 brewer may test a nonalcoholic beer and add an import to its stable.

"There's going to be new-product availability for us," Mr. Sharbaugh agreed, without offering specifics. "And that is another reason for the 'quality' campaign. It serves as an umbrella under which all our beers can be tucked."

The aggressive new campaigns from Miller, A-B and Coors threaten to turn the beer market into a three-company race. The two other major brewers, La Crosse, Wis.-based G. Heileman Brewing and Detroit-based Stroh Brewery, are tangled in the struggle for Milwaukee-Pabst.

Last week, Pabst's board said it would not oppose a renewed $10-a-share bid from California financier Paul Kalmanovitz' S&P Co. That bid came after Stroh and Philadelphia-based C. Schmidt & Sons successfully sued to halt Heileman's attempt to take over Pabst.

Adding another lawsuit to a situation that hardly needs another, S&P last week filed suit against Stroh in a San Francisco federal court, charging it with predatory pricing of its low-end beers and with interfering with S&P's attempts to purchase Pabst.#

Dingell

(Continued from Page 2)

TISING AGE he has seen no evidence to support cries for either legislative or regulatory intervention into alcohol advertising.

He shoved the burden of proof that government intervention is needed onto the Center for Science in the Public Interest and other advocates of an alcohol-ad ban.

"They have to prove that alcohol advertising is bad, not the other way around," said Rep. Dingell, whose constituency, until a 1980 redistricting, included Detroit, home of Stroh Brewery Co.

The House commerce committee's telecommunications subcommittee, chaired by Rep. Timothy Wirth (D., Colo.), is expected to hold its own alcohol advertising hearings, perhaps jointly with the commerce, transportation and tourism subcommittee chaired by Rep. James Florio (D., N.J.).

FTC chairman Miller acknowledged that some beer ads and promotions "come close to the edge," especially college-campus events. But he said most alcohol advertising on tv and radio "seems well within bounds unless the argument is whether alcohol should even be allowed."

Sens. Strom Thurmond (R., S.C.) and Thomas Eagleton (D., Mo.) launched into varying lines of questioning. Sen. Thurmond, with a history of seeking to legislate health warnings on alcohol labels, announced, "I'll certainly favor anything to reduce the consumption of alcohol by young and old."

Sen. Eagleton, without prompting by aides, pursued several avenues, bringing out the argument that market share is a be-all for alcohol advertising, and wondering where he might find "evidence" of a causal relationship between alcohol ads and abuse.

But he also jumped on the industry for its college promotions. "Breweries are spending $15 million-to-$20 million a year on these," he said. He asked if the FTC's jurisdiction extended to them.

Mr. Miller said the commission's inability to apply its unfairness authority for advertising rule-making cast doubt on whether it might be invoked for nonadvertising marketing efforts.

Besides calling on the industry to "clean up its act" for ads that might appeal to youths, Mr. Miller provoked advertising industry interest in his call for an interagency government committee "to aid in combating alcohol abuse through more effective use of resources."

Sen. Hawkins repeatedly quizzed witnesses about the use of ex-athletes, rock stars and celebrities in beer and wine ads, and referred to the Wine Institute's voluntary code prohibiting the use of athletes in ads.

Howard Bell, president of the American Advertising Federation, said he expects tightening of voluntary industry codes and regulatory changes on the use of celebrities in alcohol advertising.

The Bureau of Alcohol, Tobacco & Firearms is nearing completion of a proposal to broaden its regulatory restriction against using athletes in alcohol ads to include celebrities.

During the testimony of Eddie Fritts, president of the National Assn. of Broadcasters, Sen. Hawkins blasted daytime tv. "I've never seen more garbage than what's on tv from 9 a.m. to 7 p.m. There's an abortion every hour, a divorce every half-hour and a glass in everyone's hand."

Mr. Fritts, after a brief defense of daytime programing, noted that the removal of beer and wine sponsors from tv could consign many sporting events to cable or pay-per-view tv—an argument supported by others.

Although the subcommittee balanced the pro and con panels with equal numbers of witnesses, the advertising industry panel spent more than three hours testifying and responding to legislative queries. The anti-advertising panel breezed through its presentations in little more than an hour, with the CSPI, National PTA and National Council on Alcholism repeating their attacks on the targeting of youth by alcohol ads.

Sen. Hawkins leveled only a handful of questions in their direction, but spent several minutes conversing with Charles Atkins, author of a Michigan State University study on the effects of alcohol advertising.

Mr. Atkins, whose study is always cited by alcohol advertising foes, said the effects of media advertising were "minor" but made the audience, young and old, "more receptive" to drinking.#

Doctrine foes unfazed

By JANET MEYERS

WASHINGTON—Federal Communications Commission chairman Mark Fowler doesn't seem to care that he may be wasting time trying to repeal the Fairness Doctrine.

Asked last week how he will break through solid congressional opposition, spearheaded by Rep. John Dingell (D., Mich.), chairman of the energy and commerce committee, Mr. Fowler shrugged his shoulders and said he can't predict the future.

During the first day of testimony on whether the 1959 doctrine should be repealed, Mr. Fowler acknowledged that Rep. Dingell represents a formidable obstacle.

Earlier in the week, Rep. Dingell flatly warned he will block any FCC attempts to do away with the doctrine, which requires tv and radio stations to air both sides of controversial issues.

Rep. Dingell and others argue the commission lacks authority to repeal the doctrine and that only Congress can change it.

Still, Mr. Fowler, with the apparent support of three other commissioners, is moving ahead. He expects the agency to make its decision this summer, if, as is expected, commission attorneys decide the law is separable from the FCC code.

Witnesses at the FCC's two-day hearings—mostly network attorneys, journalists and special-interest groups—testified as to whether the doctrine is more of a hindrance to broadcasters than a protection for viewers.

"We carry some loads that the printed press doesn't have to bear," said Eric Sevareid, the veteran CBS newsman, who supports the doctrine's repeal. Echoing Mr. Sevareid's comments, Bob Johnson, president of *Newsday* and vice-chairman of the American Newspaper Publishers Assn.'s telecommunications committee, said news-industry competition is enough to guarantee fair treatment of issues.#

K mart

(Continued from Page 1)

own aggressive inventory reduction and promotional programs resulted in much heavier markdowns than expected," he added.

The inventory reduction included deep discounting for some low-price merchandise that was being discontinued as part of the upgrading process.

K mart's reorganization was partly to groom key executives for the next generation of top management, starting about 1987. Mr. Milley, in the newly created post of president of K mart stores group, is considered most likely to be K mart's next chairman.

He discounted reports K mart was taking broadcast advertising in-house and said Ross Roy is growing in importance.

He noted that the award of K mart's Jaclyn Smith apparel line would add several million dollars in billings to Ross Roy and take up some of the slack caused by the end of the Olympics special advertising. He said Ross Roy's K mart billings for '85 would be about the same as 1984, minus the $20 million in Olympics advertising.#

Presstime

Needham D.C. chief quits

Washington—Jim Williams, exec vp-general manager at Needham Harper Worldwide's $26 million office here, abruptly announced his resignation this week. Mr. Williams' departure after seven years as Needham chief here continues a top level shakeup at that office. Daniel Pollick, senior vp-director of client services and No. 2 man in the office, was forced out days earlier, agency sources said. Since September, the office has reported to Jim Kuras, who joined Needham as New York office president last summer (AA, Aug. 27). Mr. Kuras has assigned Joe Landy, exec vp-director of client services in the New York office, to serve as acting Washington office chief.

PM matches record share

New York—Philip Morris USA in 1984 captured 35.3% of the U.S. cigaret market, the first time any company has achieved a 35% market share since American Tobacco Co. did so in 1946, says industry analyst John C. Maxwell Jr. PM had 34.4% of the market in 1983. Its sales increased 6.3% in '84. Sales at Liggett & Myers, Durham, N.C., were up 18.9%; sales at R.J. Reynolds Tobacco Co., Winston-Salem, N.C., rose 1.2%.

Anheuser defends ads

St. Louis—Anheuser-Busch exec vp Michael Roarty, speaking Feb. 12 to the adclub here, defended advertising as providing information that created acceptance for low-alcohol products, such as its LA brand. "We structured that brand to appeal to current beer drinkers, not, as [Center for Science in the Public Interest head] Michael Jacobson would have it, to entice nondrinkers to our consumer base," Mr. Roarty said.

BBDO profits spurt 25%

New York—BBDO International reports 1984 revenues of $305.3 million, up 16% from '83, and net income of $22.6 million, up 25%. In the fourth quarter, revenues rose 5% to $82.2 million, and net income increased 9% to $7.5 million.

Questron for Geer, DuBois

New York—Random House has named Geer, DuBois to handle Questron, a series of "electronic books" for children unveiled this week at the Toy Fair here. A $4 million network tv and print campaign will break in August. Sussman & Sugar continues to handle Random's book account.

AT&T ads in 'Space'

Parsippany, N.J.—AT&T Consumer Products, which assigned its consolidated $55 million ad account to N W Ayer, New York, will break its first new commercials during CBS-TV's "Space" miniseries in mid-April.

CBS Magazines staff shifts

New York—CBS Magazines, in a round of realignments following its acquisition of 12 Ziff-Davis Publishing Co. consumer magazines (AA, Feb. 11), has named Paul Chook to exec vp-operations, from exec vp, Z-D consumer magazine division; Al Traina to exec vp-magazines from president, Z-D consumer magazine division; Paul Spillane to senior vp from vp-circulation, CBS

Brittle breaks new ground in liquor ads

By GAY JERVEY

It's April, and perhaps you're flipping through *Newsweek*. You stop, do a double take and stare in disbelief.

For the more you look, the more you see: Druidesque beings with six fingers; snakes with wings; two moons, and a cat with an owl's face. Is the sky threatening or merely dark? And what *are* those mysterious faces saying beneath their capes and hoods?

No, it's not the second coming of Hieronymus Bosch, and, no, you're not seeing things. Instead this is an ad for spirits. . .the liquid kind. The new whisky liqueur is called Brittle, an 80-proof import from Ireland that's being marketed by the William V. Elliott Co., New Britain, Conn.

"Believe me, I've seen a lot of new products go by, and this is going to be the next generation of whisky taste," said an excited Bill Elliott, who founded his wine and spirits marketing company in 1979 with little more than a few hot ideas, pallid funding and a long history in the spirits business, including several years as a top marketing executive at Heublein. (His contributions there included Boggs cranberry liqueur, Yukon Jack whisky liqueur and Malcolm Hereford's Cows, a product that caught on in a big but brief way in the mid-1970s).

The way Mr. Elliott tells it, his newest baby—which he himself dubbed Brittle, for its clean, cool sound—is reminiscent of an Irish concoction he fell for years ago while visiting there. Next month, Brittle will begin shipments to New Jersey, Connecticut, Rhode Island, California and Massachusetts, with consumer advertising slated to start April 1, running in *Connecticut, National Lampoon, New Jersey Monthly, Newsweek, Omni, Penthouse* and *People*.

If the ad visuals are intricate, copy is short—but equally cryptic, saying only "When the moons slept and the sun took a nap. Brittle was born." William James Advertising, an in-house shop of the Elliott company that also does work for outside clients, is the agency for Brittle.

"I really don't think you get initial trial from liquor ads, but hopefully this one will be eye-catching enough to do it," Mr. Elliott said. "We wanted to do something totally unique, something that would appeal to all age groups, because we think Brittle's potential is unlimited in terms of target audience. We wanted to star the product in the most unusual surroundings and background. And the ad had to have a discovery visual, one that every consumer can read something different into."

No doubt about that. And to achieve such an elusive goal, Mr. Elliott commissioned Braldt Bralds, an illustrator whose recent work included the *Time* cover of Admiral Hyman Rickover.

The Dutch-born Mr. Bralds, 34, has been on the New York scene for four years. His work has appeared on the covers of *Science Digest*, and he has handled ad work for a range of companies, including Atlantic records, Random House, People Express and Levi Strauss.

The Bralds style, according to the New York-based Society of Illustrators, is known for its enormous

Baby food becomes more than a matter of taste

By Cara S. Trager

In interviews and focus groups, tots may clap their hands and lick their lips with glee, but if the strained peas or bite-size apples don't appeal to their mothers, those products will sit on the shelf.

In the baby world of Gerber, Beech-Nut and Heinz, the consumer to woo and win is mom. "If the food doesn't look good or taste good to mom, she probably won't buy it for baby," says a spokeswoman for Pittsburgh-based H.J. Heinz Co.

And today's mother is more demanding than ever about what food she buys and serves. "Food is an important factor because what her baby eats is one of the few things a working mother can control while she is away," says Salina Guber, president, Children's Market, New York, a research company. With more education and more money, but less time to spend with her child, today's mother emphasizes quality, nutritional value and convenience.

Consequently, baby food companies constantly are reevaluating the appearance, ingredients and position of their products. In direct response to mothers' complaints and resistance, baby food companies virtually have overhauled their product lines to remove or reduce salt and sugar content. As a result, the do-it-yourself baby food craze seems to have subsided.

"We don't hear about it as much," says Jerry Ward, director-market planning, Gerber Products Co., Fremont, Mich. Do-it-yourselfers had their heyday during the mid-'70s, he says, and even then they accounted for only 5% to 10% of the market.

Today's working mothers respond to convenience and nutritional factors most, Mr. Ward says. "If she makes it herself, she isn't sure of the freshness of the ingredients and she can't determine the amount of nutrients lost in overcooking."

Recognizing that the market is at a high point and consumer life styles are favorable to usage, baby food companies are hoping to position their products for toddlers as well as infants.

Lines such as Gerber's toddler-oriented meat sticks entree are designed to expand both the consumption of and rationale for baby food, Mr. Ward says, not to mention sales. Packaging, portion sizes, textures and advertising all have been adjusted in an attempt to lengthen the time when a child consumes the baby food products.

Such a strategy involves reaching mothers at the child's earliest stages of eating solid food and positioning their products as a supplementary food source until the child is at least 2 years old. Baby food companies divide their market into sequential eating patterns: The 4 to 6-month-old, ready-to-eat strained foods; the teething baby, requiring larger portions, and the toddler, preferring chunky textures and some seasonings.

To help mothers identify the proper category as well as to facilitate product selection at point-of-purchase, companies color-code their offerings. In Gerber's case, a blue label means Strained foods for infants; a red label identifies Textured for juniors, and brown label indicates Chunky for toddlers.

To support this concept, Gerber—which controls 68.7% of the baby food market compared with Beech-Nut's 17.3% and Heinz' 14.0%, according to industry estimates—runs an ad featuring three young children in various stages of development and showing the appropriate label for each. "To make sure baby gets the right food at the right age, look for the label," the ad advises.

Gerber's Chunky category, a relatively new line, replaced its Toddler Meals. Chunky offerings represent more of a bridge from baby food to table food than did its predecessor. The reformulated line features smaller pieces and less texture and is regarded as more appropriate for children from 10 months to 3 years old, Mr. Ward says.

Because all mothers are concerned with the nutritional factor, he says, the appeal of Gerber's products is not limited to the upscale, working parent. Motherhood is a great neutralizer, Mr. Ward says, and most parents—regardless of education or income level—want the best for their children.

While officials at Beech-Nut Nutrition Corp., Fort Washington, Pa., may agree with that assessment, they say Beech-Nut's recently revamped line appeals to the upscale, working parent.

The new line, called Beech-Nut Stages, is a four-part program created to match a baby's developing taste, texture and nutritional needs. Introduced last March, the line is divided into four developmental stages —1, 2, 3 and Table Time. It features foods appropriate for the youngest eaters—"which is up to a mother and doctor to decide"—through 2 years old, says Steve Most, vp-marketing.

Stage 1 is a variety of single-ingredient foods, designed to enable the mother to monitor her child's reaction to new tastes and foods. In targeting the quality-conscious mother, Beech-Nut features well-known brands and types of fruits and vegetables, such as Chiquita bananas, Bartlett pears, golden delicious apples, tendersweet peas and yellow cling peaches.

Stage 2 offers flavor combinations from the Stage 1 single-ingredient foods. Stage 3, which includes minibites of fruits, vegetables and meats, expands a baby's taste horizons to include a mixture of foods.

Using well-known produce adds to the cost of Beech-Nut's baby food, which traditionally has retailed for about the same price as Gerber's. But Mr. Most says he is unconcerned because "if we can make baby food good, what does price mean? Mothers think they pay between $1,500 and $2,000 [a year], but that includes not only baby food but Pampers and Desitin. For baby food alone, a mother spends a total of $150." The quality ingredients add only $5 each year to the food bill, he says.

Mr. Most says he doesn't expect retailers will increase the price of Beech-Nut fare. "It's their way of getting mothers into the store, where they buy diapers, Desitin—and that's where stores make their money."

While the retailer is building store traffic, Beech-Nut is extending its stay on the highchair with Table Time, its fourth stage intended for the tot who eats table food. The line is positioned as a convenient alternative when the family fare includes such nontot dinners as chili and pizza or as an easy dish to leave for the baby sitter to serve.

"I am not going to change the behavior of the world," Mr. Most says. "But what I can do is to help people in the way they already live. With Table Time, they don't have to feel guilty about serving faster-paced food." Rather than turn to canned, ready-to-eat foods, which often include preservatives, salt and monosodium glutamate, mothers can serve one of Table Time's soup, stew or pasta dishes. "It's fun food that's not junk food," he says.

Table Time addresses the demands of parents who want to serve their child nutritional foods designed for developing digestions and palates, and yet still enjoy esoteric and ethnic meals—"wine and caviar, Chi-

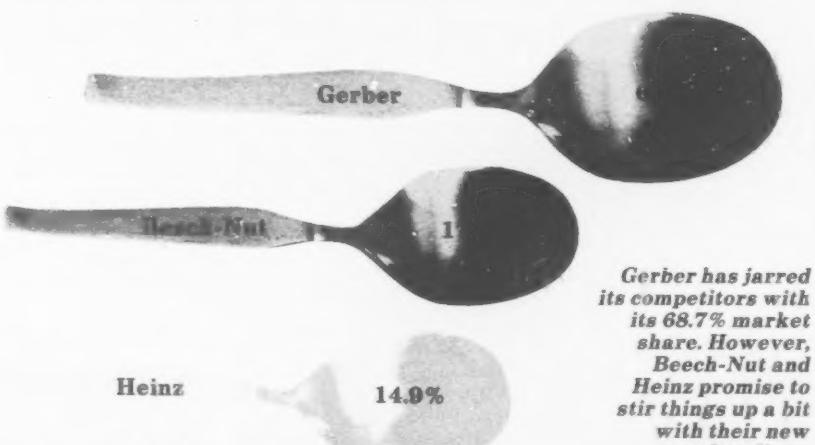
Baby food market helpings



Gerber has jarred its competitors with its 68.7% market share. However, Beech-Nut and Heinz promise to stir things up a bit with their new product lines.

Source: Selling Areas Marketing Inc.

Gerber dishes out more products

Gerber may be synonymous with baby food, but there's more to it than jars of Strained, Junior and Chunky varieties. Fremont, Mich.-based Gerber Products Co., the undisputed heavyweight in marketing food products for lightweights, is making a determined effort to put its proverbial finger in every baby product jar—not just those containing baby food.

Under the Gerber label alone, the company markets a range of baby items, including feeding and breast-feeding products, toys, apparel and accessories.

During the past few years, the company also has acquired a number of nonfood baby product-oriented companies. Its holdings, all of which operate as separate profit centers, include:

- Reliance Products, marketers of Nuk brand orthodontic bottle nipples and pacifiers;
- Century Products, car seats, walkers, high chairs;
- Bilt-Rite Juvenile Products, playpens, carriages, furniture;
- Okla Homer Smith Furniture Mfg. Co.;
- Walter Moyer, baby wear;
- Wooltex International, soft sculptures;
- Palo Alto Educational System, daycare centers;
- Bates Nitewear Co.;
- Hankscraft, vaporizers, humidifiers;
- Nursery Originals, lamps, mobiles, toys.

Beyond providing babies with the essentials and luxuries of childhood, Gerber is intent on addressing the interests of the newest crop of parents—those young urban professionals. To appeal to the upscale parent, in 1983 the company acquired two higher end apparel companies, Buster Brown, Chattanooga, Tenn., and Weather Tamer, Columbia, Tenn.

Weather Tamer, marketer of outerwear for children from the crawling to the driver's education set, and Buster Brown, marketer of fashion playwear, represent "well-thought-out departures" for Gerber, according to Steven Poole, a company spokesman. Both distribute their products through fashion, department and specialty stores, while the majority of Gerber's goods are marketed mainly through supermarkets and general merchandise stores.

"Our marketing and research people tell us that over 40% of current births are first-time births within the family and that parents and grandparents spend 10 times more on first-born infants than on subsequent children," Mr. Poole says. "Young professionals can and do spend more on their children than their parents did."

Another way Gerber attempts to reach these well-heeled, high-spending parents is through Gerber Children's Centers. According to Mr. Poole, this "definitely high-end" subsidiary numbers 89 daycare centers—including 29 units of the recently acquired Palo Alto Educational System—in 10 states.

As a result of Gerber's holdings, food products accounted for 53.5% of $805 million in total sales for fiscal '84, which ended March 31, 1984. But, according to Mary Vandeventer, security analyst with Widman, Blee & Co., Narbeth, Pa., Gerber would be wise to further emphasize nonfood, less-age-restricted products.

"Food is a slow growth area for Gerber, because it already has so much of the market," Ms. Vandeventer says. "When the [growth in] births ends and Gerber can no longer rely upon increasing food volume, it will have other areas to rely upon."

Mr. Poole states Gerber's rationale for acquiring companies that cater to the children's market very simply: "It's what we know best." —C.S.T.

Cashing in on children's smiles

Special Report: Critique

By Carol Moog

About the second month of a baby's life, when seemingly endless feedings, diaperings and pacings have cranked the new parents' frazzle level to an electric high and pushed them to consider trading her in at the local pet shop, the baby smiles. It isn't just one of those random smiles that occasionally tag along with a sneeze or a burp—she smiled *back* at her parents.

ULTRA SENSE
The look and feeling of luxury.

The little girl is selling more than luxurious Ultra Sense pantyhose.

Ingenious design. There's a powerful psychological function in that wonderful, irresistible smile. It's nature's lock on survival. And it works because it's part of our psycho-biological makeup to be suckers for kids.

So it's no accident that children in advertising are notoriously superb attention-grabbers. That's one of their biggest job assignments in life, and it's our job to respond.

But there is a tricky part. Just because children have the power to evoke such profound emotions, advertising has to be very clear on exactly *how* it uses children to target particular markets.

Simply put, children are used in advertising as:

- Borrowed interest;
- A shill;
- An emotional bridge,
- An identifying mirror.

The rather complex psychological processes involved in each of these approaches are best illustrated by analyzing some examples.

Traditionally, agencies incorporate images of children in ads in the hope of profiting from their borrowed interest. When used with warmth, sensitivity and *focus*, this strategy is honestly effective.

Sticking a picture of an adorable child into an ad practically ensures that a wide range of humans at least will look at it. However, unless the interest is not only borrowed, but also integrated with the verbal and visual components of the product message, the attention gained will be squandered.

Della Femina, Travisano & Partners' print ad for First Boston Corp. and Wells, Rich, Greene's campaign for Pan American World Airways, New York, unabashedly capitalize on the magnetism of babies. Beaming forth from the competitive clutter of rational news and product benefits, the psychological dynamism of these cheery images stops readers in their intellectual tracks.

Both ads attempt to anchor the interest they borrow by conceptualizing their products as babies.

American Express avoids projecting a "super woman" image.

First Boston is symbolized as "The $40 billion baby that the world hasn't adopted yet," and Pan Am sees its new Clipper Class as a "$1 million" baby. Everybody—client, agency, consumer—feels very good about such creative, heartwarming images of interest rate swaps and business flights. The advertisers both come off looking very humanistic. So far so good.

From a psychological viewpoint, however, a couple of caveats should be considered before using the attention-grabbing approach. First, when moving from a high voltage emotional image to rational copy points, don't overload the intellectual circuits. People's cognitive fuses get blown when they're immersed in powerful imagery, and many can't regain their logical, number-crunching capabilities quickly enough to process a heavy surge of dense, digital information.

In attempting to make an abrupt shift from imagery to reasoning, it is likely that First Boston's detailing of its accomplishments in engineering interest rate swaps misses the consumer's consciousness.

Second, when using children for borrowed interest value in adult product and service ads, it's important to objectively assess the appropriateness of a child's presence or portrayal. For example, in the Pan Am piece, the agency wanted the photogenic baby's diminutive size to highlight the 747's spaciousness—a strategy that works beautifully when she's waving happily from an airplane seat.

But the use of this same cherub could trigger disturbing associations when she appears *inside* the overhead bin. Parents of small children, whether or not they are the intended targets, do make up a significant part of the consumer market. This market is sensitive to the dangers of suffocation posed by enclosures such as freezers, which bear an uncomfortable similarity to the overhead bin. Not to mention the fear of falling.

The point is, an airplane luggage bin is not a safe place for a baby to play. Spaciousness could have been demonstrated—without the risk of raising unpleasant specters—if the bin had been filled with toys, for example, and the baby was shown peeking at its contents from the outside.

A child used as a shill for a product, particularly one designed for adults, taps very different psychological processes than those derived from borrowed interest. One of the ironic liabilities of the shill role, when a child actively is engaged in selling a product, is that the advertising gambles with losing one of the child's most salient "selling" points—her childishness.

AT 1 A.M., YOU'D BETTER HAVE A NASAL DECONGESTANT THAT'S VERY FAST AND VERY EFFECTIVE.

Neo-Synephrine plays on a range of emotions by using a sick child.

Too often, child-as-huckster comes off as a contrived phony,

Taste

(Continued from Page 17)

nese cooking," Mr. Most says. To attract this culinary subculture, Beech-Nut advertises Stages as "The New Generation of Baby Food."

The company is spending more than $10 million this year in print and daytime and prime-time tv because "the traditional role of mother has been broadened," he says. "A lot of women are working or doing volunteer work—they're not standing in front of the tv ironing."

As a result of its tv buying strategy, Mr. Most says Beech-Nut is advertising more to non-users than users. Only 3% of the audience it reaches has babies, he says, but because 75% will have a child some day, "we're not wasting our money. It's a cumulative effect." This strategy also pulls in what Beech-Nut calls "The Influencers"—new parents' mothers and mothers-in-law.

Heinz also wants to tell both moms and moms' moms that baby food is different. The company, which markets a regional brand of jarred baby food, is going national—reportedly in March after tests in the South, Southeast and West—with a line of Heinz instant baby food.

The line consists of 23 varieties of dried foods, packaged in foil-lined, resealable canisters. While it also touts nutrition and convenience, Beech-Nut officials say the waste factor will set it apart in the market.

"Mothers use as much as they need--making the food as thick or thin as they want by just adding water," says Beth Adams, a Heinz spokeswoman. "There's no heating or refrigerating needed. Once opened, the contents can stay [fresh] for up to two weeks." Jarred food must be discarded two to three days after it is opened, she says.

Although the instant food, at 59 cents a canister, costs more than twice as much as Heinz' jarred variety, the instant version supplies two to four servings. The company's jarred baby food provides one to three servings. "But very often a baby doesn't eat the full amount at a time," says Idamarie Laquatra, a Heinz nutritionist. She says company tests show that when the instant food is mixed to the consistency of the jarred food "the instant wouldn't fit into the jar."

Heinz is spending an estimated $25 million in 1985, advertising the instant line in baby magazines, medical and professional journals, on prime-time and daytime tv and SIN Television Network. Heinz' jarred baby food is virtually unadvertised these days "because we are either second or third, and Gerber has the preponderant share of the market," Ms. Adams says. "That's Gerber's business, and it's not No. 1 in ours," reiterating the company's desire to carve a niche as the provider of instant baby food.

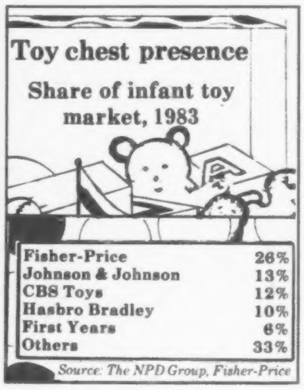
Whether babies will go for instant remains unanswered in many markets. But that may not matter. "We believe strongly that Heinz instant baby food is for today's new breed of parents," Ms. Adams says.

Indeed, baby may be the ultimate consumer, but he's far from the ultimate judge. At a time when mothers are climbing the corporate ladder, the buzzwords in the baby food game are quality, convenience and nutrition. There's more to winning mom than offering tasty textured, strained and bite-size apples, and baby food companies know it.

Parents don't just want to have fun toys

By Cara S. Trager

Toys are no longer simple playthings to brighten Bridget's day or fill Freddie's free moments. Rather, they have emerged as an important child development tool and as a means of easing working parents' guilt.



Toy chest presence

Share of infant toy market, 1983

Fisher-Price	26%
Johnson & Johnson	13%
CBS Toys	12%
Hasbro Bradley	10%
First Years	6%
Others	33%

Source: The NPD Group, Fisher-Price

Faced with less time to spend with their preschoolers but more money to spend on them, working parents are demanding toys that, in their absence, develop, educate and teach rather than merely entertain.

"There's a great push to build the better baby," says Helen Boehm, a New York-based psychologist and toy industry consultant. "Because many parents today aren't home, they're looking for toys that are more stimulating and will help stimulate the baby sitter who would ordinarily just put on the tv."

Parents often believe the right toy can give Henry a head start. This concern comes at a time when many school systems are on the fence for failing to teach Johnny to read. "A large percentage of parents aren't happy with the school system and feel they have to do more with their children, and they start at quite an early age," says Doug Thompson, president, Toy Manufacturers Assn., New York.

As a result, the buzzwords of child development—word recognition, hand-eye coordination, verbal skills, creative play—have been appearing as copy on toy packages and in accompanying booklets. "Such terminology is not foreign to a parent today," says Allan Blum, director-marketing, preschool products, Child Guidance, Secaucus, N.J. "Mothers like to be assured that their child will get something out of the toy."

To that end, Skillman, N.J.-based Johnson & Johnson Baby Products Co., which has 13% of the infant toy market, according to industry estimates, includes with its infant and preschool toys a booklet containing the product's educational and developmental value. For example, one toy, a large open-ended plastic ball with three smaller balls that fit inside, is supplemented by a 20-page booklet.

"Ten years ago, a toy company would never have paid a psychologist to write a 'dear parent' letter," says Ms. Boehm, who wrote parental instruction guides for Selchow & Righter Co., Bay Shore, N.Y. "But educational credibility has to be part of a product."

As parents' education has increased, so has the likelihood they will be fussy about toy purchases, Mr. Thompson says. Therefore, ads also emphasize toys' educational value. "From an advertising standpoint, we try to center on the toy—its features and play value as well as child development," says Mr. Blum of Child Guidance, which along with Wonder, another division of CBS Toys, accounts for 12% of the market.

Fisher-Price invents the Play Quilt.

Fisher-Price, a toy seller for 53 years, has added other products.

Educational features *always* have been incorporated into the company's toys, he says, but only recently has Child Guidance begun to tout them. "We felt they were obvious, but since others were beating their breast about them, we had to also. We are very cognizant of the baby boomers, their affluence and demographic position, and that a growing number of mothers want . . . superbabies," Mr. Blum says. "We're just changing our advertising to remind parents that it's there with Child Guidance."

But while parents are shopping for toys that will help them cultivate a superbaby, some marketers say mothers and fathers shouldn't lose sight of the fun factor. "We are not trying to make superbabies," says Al Carosi, vp-marketing services, Hasbro Bradley, Pawtucket, R.I., whose recently acquired, preschool-oriented Playskool products total 10% of the market. The value of these products, he says, is as much for entertainment as education. "Some toys are toys, and they can't do much more than let the child enjoy him or herself."

Nevertheless, Hasbro Bradley offers a wide range of products that could answer parents' educational requirements as well as children's criteria for fun. These toys also provide working parents with a vehicle to maximize "quality time," those after-work hours that corporate moms and dads spend with their children. Hasbro Bradley's Listen and Look books, for example, are designed for parents to read to

"Russell Davis, age 2½, likes knocking them down as much as stacking them up."
PLAYSKOOL

"Good Morning America's" Joan Lunden promotes Hasbro Bradley products.

Plaything parties a great discovery

Tupperware parties can't compare with a weekly event in my neighborhood—toy parties. These klatches don't come together for any old toys, but for upscale, sophisticated, European playthings, designed with the upscale, sophisticated, transcontinental parent in mind.

When I was invited to a friend's home for my first Discovery Toy party, I jumped at the chance. I was desperate to avoid the messy aisles, long lines and the usual wait-for-a-price-on-the-unmarked-box delay.

Discovery proved more than convenient. It was intellectual, taking parenting and play to new heights. My friend, in a matter of seconds, assumed the position of "educational consultant," explaining the whys and hows of each colorful toy and handsome book.

Visions of the local toy store faded into the distance, as I sat with 10 other mothers, sipping decaffeinated coffee, munching delicate pastries and learning the buzzwords of child development—verbal skills, hand-eye coordination, word recognition. Rattles were not just fun; their sounds and textures were keyed to developing the child during the crucial "sensory and motor" period.

We were encouraged to ask questions, to touch the toys, to play with them. Many of them were from Europe, designed to grow with the child. They ranged from unusual rattles to puzzles within puzzles to colorful building sets. The best selling toy, the Stack & Pop, costs $12.98, and the average cost of a Discovery toy is $8.50.

At the end of the two-hour party, all 10 of us wrote checks. The sell was soft but the message strong: Toys are critical to a child's development.

The marketing strategy of Discovery Toys, headquartered in Pleasant Hill, Cal., is well-positioned to reach today's new parents, who have more money to spend on their children but less time to spend with them. The company, which shuns the retail shelves, uses direct selling, with home demonstrations accounting for a large percentage of its estimated $33 million 1984 sales.

"The home demonstration route helps the parent to cut down on the time spent seeking out the toy specialty stores," says Marcia Levine, senior manager-Northeast. Ms. Levine, a mother and former teacher, is a fairly typical Discovery consultant, looking to remain active in the business world after having children.

The company was founded seven years ago by Lane Nemeth, a mother and former preschool administrator who wanted to give parents a chance to buy toys that previously had been available only to schools. She fine-tuned the Discovery concept in her garage.

Today, Discovery has educational consultants in all 50 states, Puerto Rico, Guam, the Virgin Islands and the U.K. Consultants operate independently, buying and selling sample inventory and receiving additional commissions for each new salesperson they discover.

Many of the Discovery toys require parental participation, Ms. Levine says. This parental involvement plays into the working parent notion of "quality time," which holds that what counts is not the number of hours spent with a child, but the quality of those hours.

"If we can get people to turn off their tv sets and get together for 30 minutes to play a game that's fun and educational—it's not a textbook—it's a way of getting the family back together," Ms. Levine says. "The biggest toy is the parent—it's the time spent and the interest."

And so, when I came home with my 20-month-old son's bag of goodies and together we placed the colorful plastic pegs into the pegboard, I couldn't help think that 25 years from now, I could boast about my son, the nuclear physicist. —*C.S.T.*

Target: The College Market

MARKETING TO COLLEGE STUDENTS IS NO TOGA PARTY

Each campus is unique. No single medium can reach college students effectively.

IS PRINT THE ANSWER?
HOW ABOUT RADIO?
POSTERING?
. . . and WHO PUTS IT ALL TOGETHER?

An ideal media mix should meet your goals and budget whether your target is a handful of schools or a national college campaign.

For more information contact:

PRO-MEDIA

their children, although tots also can follow along solo with a taped recording.

Additionally, in a joint venture with Walt Disney Productions, this year the toy company will introduce Wuzzles, a collection of plush animals, each with its own personality and accompanied by a book parents can read to children. "Wuzzles is a conscious effort to make more than six stuffed animals," Mr. Carosi says. They stimulate a fun, yet instructional, experience in which both parent and child can participate, he says.

Hasbro Bradley also is offering preschoolers toys that feature licensed characters. While such licensing has played a crucial role in the over-all toy industry, it's not as significant a factor in the preschool arena. But it doesn't hurt to start young, marketers say. "Licensed products have a lot of recognition, and to that degree, they are important, because maybe the child will play with the [toy] longer," Mr. Carosi says.

Others regard preschool product licensing as an extension of the designer-name phenomenon, which has its greatest followers among the young, urban topsider society. "A parent may think a familiar name means a quality product and will buy it to keep the kid happy, because they feel guilty about not spending time with him or her," says Steve Smith, editor-in-chief, *Toy & Hobby World.*

Because today's toys promise not only to produce ingenious offspring, but also to ease parental guilt, the amount of money spent on toys is substantial. "Parents who aren't home feel less guilty if they buy a super toy," Ms. Boehm says. In 1983, parents spent an average of $165 a year on toys for a first-born child 3 years old and younger, according to the NPD Group, a research consulting company, Port Washington, N.Y.

With the advent of electronic and video toys, which appeal to the yuppie parent's quest for the best state-of-the-art products, prices have changed radically, according to Mr. Smith. "Consumers are used to paying $100 for a video-game system and another $30 for a hot game cartridge, so when a toy costs $25 or $30, they might blink an eye, but they'll pay it."

Under the Spinnaker label, for example, Fisher-Price markets preschool educational software—retailing for about $25—for 3 to 6-year-olds. "As preschoolers get older, parents are concerned about getting the right tools. They want to give their children no less than what their . . . friends have to practice preschool skills," says Sandy Danon, vp-marketing, East Aurora, N.Y.-based Fisher-Price, the No. 1 infant toy marketer with a 26% share.

In nonelectronic products, price is more of a factor, marketers say, especially for infant toys, which lose their appeal once skills are acquired and challenges are met. As a consequence, Ms. Danon says, toys that cost less than $10 sell best. If a toy has a longer life and the potential to grow with the child's skills, she says, parents will go beyond single-digit prices.

For example, Fisher-Price's Discovery Cottage, which retails for about $15, is designed for a child 9 months *and* older. The cottage grows with the child, Ms. Danon says. "The young child will find elements in it to finger and shake," she says. "As the child becomes more aware of controlling his environment, he will begin to open its doors, lift the roof up and put the figures into the cottage."

The toy also provides an interesting twist on the quality time theme, encouraging not only time together with tots but also time apart. "Whether mom is home or works, she still wants time to herself. Hence, the more money that's put into a product, the more extended play value there is, because you get what you pay for—a toy that entertains, lets a child play by himself and provides more interactive play," Ms. Danon says.

As part of their sophistication, parents are looking at things from points of view other than their own—namely, their children's. Realizing this, Fisher-Price, for example, markets a crib mobile that is "designed from a baby's point of view," Ms. Danon says, with animals positioned face-down, staring at baby. "It's not overly attractive," she says, "but it makes a lot of sense. The other mobiles may look gorgeous, but this new mobile develops tracking."

Meanwhile, Fisher-Price, which has increased its ad budget about 40%, is looking "for ways to communicate what its products do." Today's mothers are too savvy to be influenced by advertising, Ms. Danon says.

Fisher-Price believes its 53-year-old heritage is its best selling tool. The company recently banked on that history when it entered other juvenile product segments. Along with toys, it markets such products as changing tables and highchairs and children's clothing, although it has had difficulty in the latter segment. Its highchair is No. 1 in the industry, Ms. Danon says, revealing "how strong the Fisher-Price name is."

Hasbro Bradley also is pushing company credibility, sponsoring "Mother's Minutes," 60-second infomercials featuring "Good Morning America" cohost Joan Lunden. Mr. Carosi says such spots, produced by Michael Krauss Productions, are designed with the baby boom parent in mind. "These baby boomers are more cosmopolitan [and] travel more. Their own parents aren't readily accessible anymore for them to ask questions. Our commercials are a way to get information to them."

So, at a time when upscale parents are traversing the globe, pursuing their career goals, toy manufacturers are going beyond their role as marketers of playthings, assuming a position as child development expert. So the next time Tommy is giving you trouble or struggling with his ABCs, send him to the new family counselor, Dr. Fisher-Price or Dr. Hasbro Bradley.

Diaper services unwrapping market potential

By Laurie Freeman

It's the middle of the night and Baby Jane is wailing. Dad stumbles to the nursery, turns on the light and discovers, to his horror, that there are no diapers.

"If a family has a diaper service, chances are they would never run out of diapers. And if they need more, they just call and request them," says Mary Hilton, owner of Grand Rapids, Mich.-based Cottontails, which also has facilities in Kalamazoo, Mich., and the Chicago area.

Laurie Freeman, a reporter in the Chicago bureau of AD AGE who covers the paper goods industry, often discusses the underpinnings of the diaper business.

Yes, diaper service companies, such as Baby's Perfect Dy Dee Wash, Tidee Didee and Cottontails, once thought to have disappeared after the introduction of disposable diapers in the 1960s, are back in force after undergoing nearly two decades of decline and consolidation. The diaper services of the 1980s aggressively are seeking customers and sweetening the pail by providing more than a weekly delivery of fresh diapers.

Although diaper service owners concede they'll never win back the top spot from disposable diapers, which garner more than two-thirds of the nation's diaper sales, they believe they can expand their market share.

"Most households maintain an inventory of cloth diapers, whether they have purchased them or they use a diaper service. Many families now use cloth and disposables interchangeably," says Arthur V. Boyce Jr., director-marketing, Kendall Co., Boston, marketers of the Curity line of baby products. About 98% of all households using diapers use disposables, while 80% use cloth and disposables and only 2% use only cloth, he says.

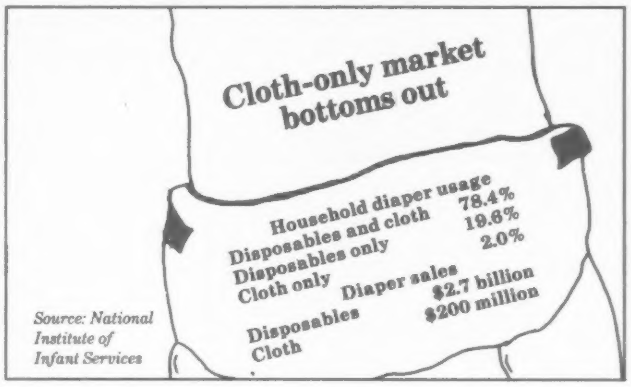
According to Philadelphia-based National Institute of Infant Services, diaper services' market penetration is 12% to 20%, about equal to their market share before disposables were introduced. The NIIS estimates cloth diaper sales reach $200 million annually.

While one-time sales of cloth diapers have jumped, diaper services have kept pace. The number of diaper service customers has increased at an annual rate of 11%, despite a decrease in the national birth rate in the 1970s.

The recent upswing in cloth diaper sales and services is attributed in part to the baby boomlet. However, Mr. Boyce says, today's family simply prefers to have more diapers on hand. "Instead of purchasing an average of three dozen diapers per household, it's more like 3.2 dozen," he says.

Jack Mogavero, president of Sketchley Diaper Service Co., Piscataway, N.J., which operates Baby's Perfect Dy Dee Wash and 20 other diaper services, views parents who use cloth diapers and diaper services as part of a return to "naturals."

Cloth diapers are resurging "because they're made of natural cotton," he says. "With the increase in natural childbirth, breast-feeding . . . parents want the best for their child and that includes cotton diapers. There's no substitute for cotton against a baby's skin."



Source: National Institute of Infant Services

Even federal regulatory agencies, such as the Consumer Product Safety Commission, agree that cloth diapers may be better for covering babies' bottoms. A November, 1982, commission "Special Report on Infant Products" says serious incidents have resulted from the "ingestion of the plastic covering on synthetic diapers, and increased incidents of baby skin rashes occurring on babies wearing artificial diapers is also significant."

"At least 20% of our new customers come to us when their babies are 13 weeks or older," Mr. Mogovero says. "Quite simply, they've started with disposable diapers and had diaper rash problems. It's a big issue."

However, definitive research on which type is better has not been performed, says Marge Guthneck, head nurse of the pediatrics ward at the University of Wisconsin Hospitals, Madison.

"It depends on how parents use disposable diapers and how frequently they change the baby," she says. "The only bad thing about disposables is most parents can't feel the wetness through the plastic covering, so the baby may not be changed as frequently. But I've seen cases of diaper rash with cloth diapers too, because some babies are more sensitive to soaps, fabric softeners and bleach." In most hospital nurseries around the U.S., newborn babes are swaddled in disposables, Ms. Guthneck says.

Mr. Mogavero says he doesn't buy the argument that disposables don't cause diaper rash. "There are more instances of diaper rash due to the plastic covering of disposables, because the plastic heats the skin 5 to 10 degrees warmer. It cultures an environment for bacteria to form."

Because the word "service" appears in most of their names, the companies in the reusable diaper business take extra steps to satisfy new parents. To combat diaper rash, Sketchley impregnates cloth diapers with bacteria to inhibit the growth of undesirable elements. The diapers are put through a 90-minute washing cycle, with water temperatures as high as 180 degrees. "We put the diapers through seven rinses, then

Disposables try to stop leakage

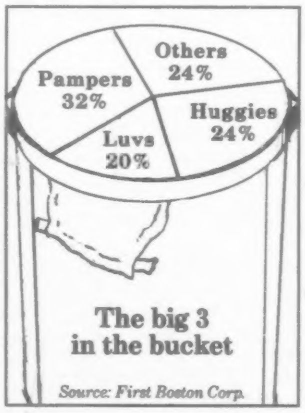
Babies are to diapers what fish are to water. They both live, eat and sleep in their respective environments.

There's no denying that babies go through lots of diapers. Because disposable diapers equal annual U.S. sales of $2.7 billion, the two big players in the disposable diaper market—Procter & Gamble and Kimberly-Clark—constantly are jockeying for position.

Unlike advertising for cloth diapers or diaper services, the disposable diaper advertising onslaught is unrelenting. It would be difficult for a new parent to ignore the estimated $40 million Cincinnati-based P&G spends advertising its Luvs and Pampers or the $19 million K-C puts into Huggies.

Not only do the two marketing giants try to top one another in advertising, but they also never stop racing to come up with a more comfortable, more absorbent disposable. Now, P&G is testing a "superabsorbent" Pampers in Wichita, Kan., as a means of countering K-C's Huggies marketing clout (AA, Dec. 24).

The trend is clearly toward premium disposable diapers, such as Huggies and Luvs, and away from lower-priced brands, such as Pampers. In fact, in addition to the Wichita diaper, P&G has redesigned and upgraded Pampers into another premium-price product currently being tested in Florida and South Georgia. To minimize Pampers' potential plundering of Luvs' market share, P&G will promote Pampers' dryness and Luvs' comfort (AA, Jan. 21).



The big 3 in the bucket

Source: First Boston Corp.

The shift to premium brands has caused problems for both P&G and K-C, as they struggle to retool factories and produce enough premium diapers to meet the demand. Both companies now say they're back up to full production capacity.

P&G still leads the over-all disposable diaper category with a 52% share—Pampers has 32% and Luvs 20%, according to First Boston Corp. And while 52% sounds pretty respectable, P&G once dominated the market with a 75% share.

Neenah, Wis.-based K-C's Huggies now command a solid 25% share of the market, up two share points from 1983, according to Hercules Segalas, a household goods analyst and P&G tracker with Drexel Burnham Lambert, New York. Private-label and generic disposable diaper brands hold the rest of the market, with a 23% share.

Perhaps the best known private-label diaper brand is the Cabbage Patch Kids disposable, which puts the ubiquitous bumpkins on the buns of tiny tots everywhere.

Gregory Sullivan, vp-merchandising, Riegel Textile Corp., Aiken, S.C., doesn't have a huge ad budget backing the designer diapers—$1 million for the company's first consumer ad cam-they're dipped into antiseptics and softeners," Mr. Mogavero says.

Cottontails' Ms. Hilton says her service adjusts the pH balance of the laundry ingredients in the washing cycle to accommodate babies with sensitive skin. "We make adjustments: For instance, if the baby is allergic to fabric softener, we leave it out of the diapers," she says.

Many parents cite the convenience of having a diaper service as the biggest advantage over disposables. "Diaper services play up the convenience factor, that [cloth diapers] are as easy to use as disposables and there are always enough on hand," Curity's Mr. Boyce says.

"Cloth diapers are a basic baby layette item, and at least 40% of cloth diapers are bought as gifts for the new mother."

Diaper services typically start a new customer with 90 diapers a week, at a cost ranging from $9 to $10.25 a week. Cottontails charges 40¢ for every 10 diapers over the 90 diaper minimum, making it an attractive option for a family with a new baby and a toddler in diapers.

"The cost is comparable with disposable diapers, and in fact it costs 50% less than disposables in the long run, because with a newborn, you don't need as many diapers," Mr. Mogavero says. Although disposables for the bassinet set may cost less, as children progress from sitting to crawling to toddling, both the size and price of disposables increase, while the services provide larger sizes at no extra cost.

However, diaper service operators are the first to admit disposables have a place in today's household, especially when the family travels or if the children go to daycare centers. Now, deliveries of both cloth and disposable diapers are the most popular diaper service plan.

At least one diaper service offers parents more than diapers. Mr. Mogavero is taking the "convenience" factor one step further, expanding Sketchley's service to include children's clothing. "We're offering clothing from shirts to training pants, the items which statistics say are the 10 most popular items for new moms." Unlike diapers, clothing is a one-time purchase.

Besides offering families "new and improved" cloth diapers, Cottontails features new "breathable plastic diaper covers with Velcro closings, giving the diaper a snugger fit around the baby," Ms. Hilton says. Cottontails is the only company offering pinless diaper covers.

The next logical step for most cloth diaper manufacturers seems to be producing the "ultimate pinless diaper," namely a cloth diaper with Velcro closures. Although putting Velcro on diapers is an expensive proposition, according to trade sources, a number of companies are experimenting with such diapers.

Along with product refinements, the diaper services have had to change their marketing strategies to reach women who are not only working outside their homes, but also are delaying their maternity leaves until the last possible minute. "We're using more tv and radio advertising now and have stepped up our evening and Saturday telephone call solicitations," Mr. Mogavero says.

Currently, Sketchley runs three types of ads: One plays up the diaper rash issue; another talks about the convenience of diaper service for both baby and mother, and the third features two babies, one wearing disposable diapers and the other in cloth. "The one in plastic says 'I have diaper rash,' and the other baby asks, 'What's a rash?'" Mr. Mogavero says. MacNamara, Clapp & Kline, New York, has the Sketchley account.

Cottontails handles its advertising in-house, using mainly direct mailings to expectant couples and scattered newspaper and radio ads. However, Ms. Hilton says, at least 80% of her customers are word-of-mouth referrals.

Curity concentrates on the one-time sales of cloth diapers and places ads heavily on tv and in consumer magazines. The current campaign, prepared by HBM/Creamer, Boston, positions the diaper as the "one babies would ask for if they could talk."

Although the cloth diaper and diaper service marketers readily admit they cannot match Procter & Gamble's estimated $40 million ad budget for Luvs and Pampers or Kimberly-Clark's $19 million for Huggies, they say the market's big enough for both types of diapers. Says Mr. Boyce: "The years of rapid contraction are over. We're all in the business for the long term."

---

paign via Richard & Edward's, New York. But he is convinced Cabbage Patch diapers will catch on in the Sunbelt, where babies are more likely to run around with nothing on except their diapers.

He does not say that babies will wear Cabbage Patch diapers or nothing at all, however. "Cabbage Patch diapers can be used as an alternative to plain, premium diapers," Mr. Sullivan says. "I don't expect every diaper change will be with a printed diaper."

Premium diapers are *the* hot item. "As a category, premiums continue to show the strongest growth. However, [share] gains aren't going to be as spectacular as in the 1970s," says Dick Auchter, Kimberly-Clark product manager-infant care products. The reason behind this is the softening of the baby boomlet.

"The number of babies born hasn't changed all that much from a few years ago, but the percentage of diaper changes per baby has increased," he says.

So until they can figure out a fool-proof way to make babies soil them faster, diaper marketers are going to continue upgrading babies' underwear and charging parents more per change at the same time. —*L.F.*

For-profit centers open doors to daycare

By Margaret LeRoux

Less than a decade ago, most working parents experienced guilt when leaving their children in a daycare center. Daycare was seen as being custodial at best, with images of lethargic children clustered around a tv set or compounds of crying kids in cribs haunting many mothers' working hours. For many, yesterday's fears are still very real.

But educational programing for pint-size students and savvy marketing, positioning daycare as a positive social and learning experience, is winning customers despite frightening headlines concerning child abuse. "Daycare had a negative image for such a long time," says Kathy Quinn, vp-advertising and marketing for Fox Daycare, Chicago. "Now the business is really taking off."

Vivian Cadden, editor of *Working Mother*, says, "Look in the Yellow Pages under 'daycare' in any major city in the U.S. and you'll find page upon page of ads. Ten years ago you'd have found maybe a single page." Even Fremont, Mich.-based Gerber Products Co. is getting into childcare, having acquired Palo Alto Educational System, the seventh largest U.S. daycare chain.

Although the growing number of working parents has caused the industry to boom, the for-profit daycare center chains barely have scratched the market's potential. The U.S. Census Bureau indicates that 40.2% of working parents send their children to a friend's or family member's home, 30.6% arrange to have a care-giver come to their home, 14.8% use a daycare center, 9.1% bring their children to a job-based center and 5.3% make other arrangements.

"Our market represents only about 15% of the total number of kids whose parents are working," says Rob Hartley, vp-marketing for Montgomery, Ala.-based Kinder-Care Learning Centers, the largest for-profit daycare chain. Despite the limited market penetration, sophisticated, center-based baby sitting is good business. Kinder-Care increased its revenues 180% during the past five years, from $57 million in 1980 to $160 million at the end of fiscal 1984.

La Petite Academy, headquartered in Kansas City, Mo., and a far second to Kinder-Care, experienced 25% annual revenue increases for the past three years. Revenues for the third quarter of 1984, $16.7 million, are up 35% over the similar period in 1983.

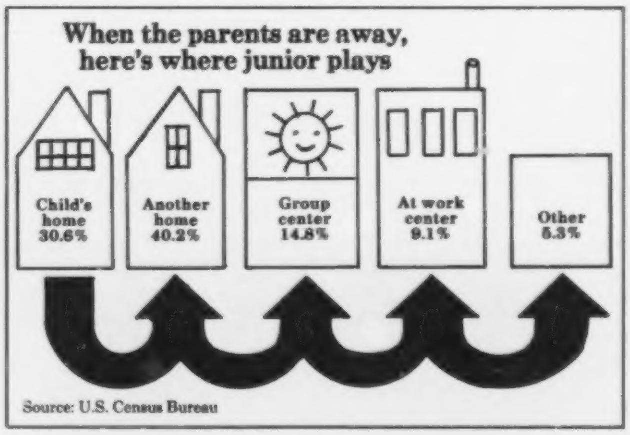
A *Working Mother* survey found the average weekly cost for daycare in the U.S. to be $53. Twelve per cent of the 2,000 survey respondents say they pay between $61 and $80 weekly.

The women's responses about daycare costs are very interesting, Ms. Cadden says. "They clearly see it as their expense, not a family expense. Some of the women wrote, 'Daycare eats up a big chunk of my salary.' Few of them look on it as their husband's expense too."

Daycare chains are targeting two-income, upwardly mobile parents who harbor similar ambitions for their children. These parents can afford to demand more than baby sitting, and most daycare centers meet those demands.

"I could open a daycare center called 'Yuppie Daycare,' charge top dollar and fill it within days," says Stephanie Fanjul, a daycare consultant in Research Triangle Park, N.C. Working with corporate clients to find daycare for their employes' children, Ms. Fanjul says she continually is surprised at the demand for daycare. Ms. Cadden agrees, saying, "It's frightening how fast new centers fill up."

When the parents are away, here's where junior plays



Source: U.S. Census Bureau

To attract the offspring of yuppie parents, daycare chains are using ads and direct mail to market "learning experiences" in a safe environment. With brightly colored graphics, brochures portray smiling children playing games that teach prereading and premath skills, which their parents hope will give their offspring a competitive edge in school.

Kinder-Care advertises its "learning ladder," designed to "meet your child's needs from 6 weeks to 12 years." Mr. Hartley says, "Children in our centers scored much higher than the national average in reading readiness tests."

To answer convenience and safety concerns, Kinder-Care targets parents who live within a three-mile radius of its new centers with direct mail. The campaign, designed by Ogilvy & Mather-Atlanta, promotes the chain's activities that "make learning fun" and invites parents to visit Kinder-Care and enter a sweepstakes offering a $40,000 college scholarship grand prize. In some markets, children can attend Kinder-Care for a week free. The campaign increased the chain's revenues $300,000 a week, according to Mr. Hartley.

"We did a lot of research into what kind of message about daycare appealed to working parents," he says, "and concluded it was important to show that daycare was the closest thing to a mother's love. We looked at terms like 'safe,' 'secure' and different ways of saying 'mother's love.'"

Kinder-Care ads are placed in newspapers in communities where new centers are opening and nationally in publications such as *Working Mother*. The ads say children are "encouraged to learn at their own speed, without pressure." However, each center follows an identical educational program. On any given day, the same activities are occurring at each of the more than 900 Kinder-Care centers.

La Petite Academy markets a "learning for living" program based on the Montessori method, according to Robert Rodriguez, vp-operations. Besides Montessori-style toys, La Petite's centers feature large, open classrooms with separate areas that cover life and learning situations. Some of these include the practical life—a child-sized play kitchen—language arts, mathematical and sensorial awareness. Computers also are standard equipment at La Petite centers.

Some early childhood education experts object to Kinder-Care's and La Petite's mass market approach. "Each individual kid deserves a program suited for him or her," says Ms. Fanjul, a former daycare center director and private elementary school founder.

"Mass-marketed programs can't consider the range of development you'll find in a room full of 3 and 4-year-olds," she says. "The kids will be bored if they're beyond the program and angry and frustrated if the program is beyond them."

While not contesting their success, Ms. Fanjul says, chains such as Kinder-Care are "marketing human services like they are hamburgers."

Kinder-Care's Mr. Hartley considers the comparison with fast-food chains to be "a compliment. We're consistent and clean. Parents who move or are transferred to another city know they'll be getting the same program for their kids at Kinder-Care centers."

(Continued on Page 32)

Margaret LeRoux, a frequent contributor to Special Report and author of a number of articles on daycare, is the mother of Mark, 4, and Emily, 5 months.

Selecting a school

The following observations are the result of Margaret LeRoux's visits to three nursery schools and two daycare centers in Chapel Hill, N.C. Some were locally owned and operated nonprofit centers; others were part of national daycare chains.

Buying daycare is like buying a house. There are important considerations such as location and price, but when it comes to making a choice, a lot of subjective factors come into play.

Like buying a house, selecting daycare is one of the most stressful experiences a parent can have. Once your search begins, you quickly learn that enough good daycare simply is not available.

I remember getting up at dawn to stand in line for places on a waiting list at one of the better nursery schools in our town. Classes for this school were filled nine months before the sessions started. Another school in town used to put prospective students on a waiting list before they were born, but discontinued the practice when the list of petitioning fetuses became too long.

Visiting daycare centers and nursery schools is also like inspecting houses. Some you love or hate on sight; in others you discover things that gratify or horrify you.

In one nursery school I saw a 4-year-old girl sitting on a chair in the hall outside her classroom. She was being punished for 25 minutes for biting another child, the director told me.

None of the other schools or centers I visited interpreted this "time out" method of discipline so strictly. Instead, I frequently saw teachers quietly but firmly redirect children to different activities when arguments occurred. I saw hugs given freely by teachers, and I saw children who seemed genuinely happy in their surroundings.

In another daycare center, the children seemed to be doing their best to dispel the center's advertising of its thoughtful, orderly activities. Some of them were using the Montessori-style blocks as make-believe guns, "shooting" their playmates.

At still another center, I was dismayed to see the baby room arrayed in rows of cribs, with only two staff members caring for 12 infants. I wondered about the cuddling and stimulation touted in the center's ads. From what I saw, when a baby cried, the primary attention it received from a care-giver was to have a pacifier put in its mouth.

That's when I decided that how well a daycare center is regulated by the state is more important than its advertising. In North Carolina, a center needs only one adult care-giver for every 12 children between the

Hospitals deliver options in birthing care

By Lori Kesler

Every year thousands of female teachers plan their babies' births to coincide with their summer vacations. Every year more women executives install nurseries in their offices—or computers in their homes—so they can work and nurture at the same time.

Women are coping—some rather unconventionally—with their transition from spouse and worker to the new role of spouse, worker and *mother*. For example, a pregnant city editor timed her labor contractions from her newsroom desk and dashed to the hospital right after the five-star deadline.

These are the new mothers of the 1980s. At least some of them.

Not every expectant mother these days claims to be a puppie—pregnant urban professional. Many, in fact, are not high-powered career trackers. But make no mistake about it, today's new mother is a different breed from her female forebears.

In addition to generally being older and more affluent and tending to work outside of the home, today's pregnant woman is accustomed to taking charge of her affairs. Because many have waited to have children and meticulously planned their pregnancies, they know exactly what they want in obstetrical and hospital labor and delivery services.

"She's really almost militant about wanting to control the birthing experience," says Daniel Beckham, president of Health Market, an Arlington Heights, Ill.-based medical marketing consultancy. "There's a much greater reluctance to let the physician direct the show."

More than a decade ago, pregnant women—newly conscious of their rights as healthcare consumers—began demanding that hospitals and doctors treat them and their babies as participating members of the labor-and-delivery team. The wing-tipped and green-smocked members of that team initially regarded this idea with more than a little skepticism, but many have become believers.

Along the way, hospital administrators discovered that birth-and-baby services comprise one segment of their business that is bought by an enthusiastic market. Pregnant mothers may be the only patients who look forward to their trips to the hospital.

Then, too, a hospital's obstetrics unit can serve as a "window to the community," Mr. Beckham says. "A link forged with a family at the time of a baby's birth can last a lifetime."

Now, with many hospitals struggling to keep their beds full and revenues rolling, the business of attracting new patients has taken on a special urgency. Most cities have far too many hospital beds; one report predicts 1,000 of the nation's 7,000 hospitals will close their doors before 1990.

The delivery market—unlike most medical specialties—tends to be consumer-driven, playing by the traditional rules of supply and demand. Hospital officials admit they are not accustomed to dealing with fast-changing trends and fickle consumer tastes. Nevertheless, most are scrambling to learn the new rules because they know those who fail to play the game eventually will lose.

"The birth business has gotten very competitive," Mr. Beckham says. "Women often choose a hospital and then arrange to go to one of the doctors on staff," rather than research the doctor first and the hospital later.

"Some shop around for a hospital even before they become pregnant," says Carol Seibold, an account supervisor at Wexler & Shalek, Los Angeles, which handles advertising for National Medical Enterprises, a Los Angeles-based hospital corporation.

According to research studies,

Save on delivery charges.
St. Helena

Price has been an important part of obstetrics advertising.

Lori Kesler, an Ad Age correspondent and frequent contributor to Special Report, has tested her hospital's labor and delivery services first-hand on two occasions.

Competition pushes privacy, personal service

St. Joseph's Hospital, a 132-year-old Catholic hospital, has been in the birth business in St. Paul, Minn., almost long enough to deliver the state's first citizen. But when its market share dropped dramatically in the past decade, hospital administrators found age does not mean much in today's baby-bearing market.

Partly because of competition from health maintenance organizations and partly because the hospital simply hadn't kept up with the times, administrators decided this old hospital had to learn some new tricks. "It became clear we'd have to make some basic product line changes," says Jim Thalhuber, assistant vp-marketing.

Responding to research that indicated new mothers preferred privacy, hospital administrators decided to put every maternity patient in a private room at no extra charge. Those rooms were spruced up with some homey touches—a rocking chair here, a hanging plant there.

"We couldn't afford a major renovation," Mr. Thalhuber says. "But we could do minor things to make the rooms aesthetically more pleasing."

The hospital also instituted a "personal nurse" system designed to initiate early contact between its personnel and pregnant women. It announced that any woman planning to deliver her baby at St. Joseph's could call the hospital and be assigned a personal nurse who would counsel the woman from early pregnancy through delivery.

Finally, the hospital created a birth options list that detailed some of the amenities available. The list included such standard options as a birthing room and a short-stay program, costing just $700 instead of the typical three-day stay cost of $1,129. The list also included other personalized services:

- Nurses will take photos or movies of the baby's birth;
- Lights can be dimmed or music played during labor;
- Husband or support person can stay overnight;
- Children or other family members can be present at birth.

The program was advertised on radio and in newspapers and magazines. A free baby book was offered to anyone who called the hospital's maternity center.

Mr. Thalhuber says the three-month, $24,000 ad campaign—designed by Arlington Heights, Ill.-based Health Market—generated 500 calls within its first six weeks, and the hospital's obstetrical patient count increased for the first time in five years.

The campaign yielded other, less statistical benefits as well. "The physicians are happy," he says. "We got lots of good media exposure. And the obstetrics staff has gotten involved in some good customer relations." —*L.K.*

Daycare

(Continued from Page 30)

If Kinder-Care is a McDonald's, then the third largest chain, Evergreen, Colo.-based Children's World, probably would consider itself a delicatessen. "Our philosophy is to provide teachers with an array of support material and give them a lot of room to design their own program," says Robert Benson, president. "We decided 15 years ago to provide high quality, developmental programs before parents were asking for them."

Because these programs push up Children's World's costs, the chain targets a more affluent parent. "Our prices have always been 4% to 5% higher than our competitors, but we've also had a utilization rate that's 5% to 20% higher," he says.

Because Children's World allows its teachers and directors more freedom in designing programs and, Mr. Benson says, offers higher pay and better benefits, "we suspect we have a lower turnover rate than our competitors." Early childhood experts say consistency is the key to bringing up well-adjusted children. If they are going to live up to their billing as *for-profit* companies, many chains can't afford to invest heavily in staff salaries, which typically start at the minimum wage.

In addition, many centers must pack their houses to be cost effective. The pressures of caring for lots of tots all day for low pay often result in high care-giver turnover.

"Turnover is a real problem," Ms. Quinn at Fox Daycare says. One of the causes "is that early childhood education programs taught in colleges don't accurately reflect the childcare business," she says. "Students get into these programs because they think how cute little kids are, but cuteness is not what this business is about. It's very demanding work."

For parents, the most crucial problem with daycare is the threat of child abuse. Publicity over horrifying incidents of abuse have led parents to question their children's safety at even the most expensive and exclusive centers.

Daycare chains have tried to reassure their customers; Mr. Benson says within 10 days after a case of abuse in a California daycare center was publicized, he had mailed a letter to the parents of all the children in his centers. "The letter told them how I felt and what they should be aware of in considering the issue of abuse.

"We're all appalled, of course," he says. "Yet we have a sense of being unfairly singled out. Some of the legislative remedies that have been proposed focus on the daycare industry alone."

To stem a witchhunting mentality in light of child abuse cases, most daycare chains are intensifying hiring requirements. "We have a two-step interview process that includes interviews by both the center's director and one of our regional directors," La Petite's Mr. Rodriguez says. Most chains also thoroughly check all references.

"It would be fine if we had six

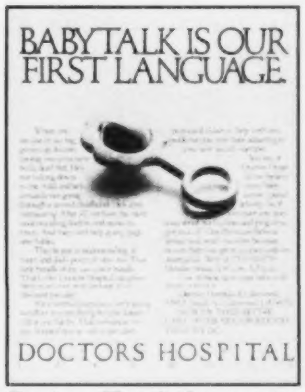
patients pick the hospital about 30% of the time and the doctor makes the primary decision the rest of the time. But that's changing. "Evidence suggests that by 1990, 60% of the patients will be making their own hospital choices," says Dennis Bolin, director-marketing for Hinsdale, Ill.-based Adventist Health System/North.

Hospitals are facing the fact that providing sound medical care is no longer enough, because today's parents view their baby's birth as something more than a medical procedure. "The modern couple is buying an experience," Mr. Beckham says. "Birth is seen as a natural event, and the more a hospital does to accommodate that approach, the better it's going to do."



BABYTALK IS OUR FIRST LANGUAGE.
DOCTORS HOSPITAL

Doctors Hospital promotes its flat fee for a normal delivery.

Education has become an almost universal preparental perk. Most hospitals now offer classes on pregnancy, childbirth and child development for mothers and fathers, brothers and sisters, even grandparents. North Fulton Medical Center in Roswell, Ga., takes its preemptive measures to the limit, providing a course for people who aren't pregnant but are thinking about having a baby.

Hospitals also are taking steps to provide a full range of birthing options. Perhaps the most important innovation is the advent of the bedroom-like birthing room. Also called an alternative birthing center, this development allows an expectant mother to remain in one room throughout her stay rather than be shuffled through labor, delivery and recovery rooms.

Deborah McFarlane, assistant vp-marketing communications, National Medical Enterprises, says she frequently tours her company's 51 hospitals and finds "the alternative birthing centers are always in use. Our newer hospitals frequently put in two or three of them."

Babies born in birthing rooms usually are sent home with their mothers within 24 hours, reducing the bill. This is significant because both hospitals and consumers are talking a lot about cutting costs. The National Assn. of Birthing Centers reports that in 1982, a "normal" delivery in a free-standing birthing center cost $801. In 1983, the national average for the cost of a "normal" hospital birth, typically including a three-day stay, cost $1,713, Mr. Beckham says. A Caesarean section easily can double that figure because of increased surgical costs and a longer hospital stay.

Figures like these are causing employers and insurance companies to shift more of the financial burden back to consumers, who in turn are shopping for cost-efficient care. "Price is becoming an important aspect of obstetrics advertising," Wexler & Shalek's Ms. Seibold says. "People used to want the best at any cost. Now they want reasonable care at a reasonable cost."

She says several National Medical Enterprises' hospitals now advertise discount packages, which generally offer a flat fee for standard delivery and two or three-day stays. "They don't put dollar figures in the ads, but they mention that they have package rates," she says. For example, National Medical Enterprises' Doctors Hospital in Lakewood, Cal., says for a normal pregnancy, "We throw in everything but the diapers. All at one flat fee."

National Medical Enterprises' Ms. McFarlane says every hospital's ad strategy has to be tailored to community conditions. In an area where people pay hospital expenses out of their own pockets, discounting works, she says. But in upper-middle-class markets, "pricing seems to have no affect. It's the reputation and the frills people are interested in."

Ms. McFarlane says good hospital advertising targets physicians as well as patients because "ultimately the doctors are the key players." She says most doctors like to see hospitals market their services aggressively. "It's a confidence-builder," she says, and physicians also benefit from referrals generated by hospital ads.

Most healthcare marketing experts expect hospitals to continue to move toward more retail-style marketing, but some in the industry are bucking that

(Continued on Page 34)

Pioneering pregnancy package

How do you get an expectant mother's attention? Offer her free maid service.

On Jan. 4, Glendale Heights, Ill., Community Hospital did just that when it began test marketing and advertising a maternity package that officials say eventually could be adopted by other members of the Adventist Health System, which operates 75 hospitals around the country.

The Glendale Heights program puts several maternity services into a flat-fee package. Program options and features include a birthing room delivery or traditional delivery; a 24-hour or 48-hour recovery stay; childbirth classes; a home visit from a registered nurse, and two eight-hour visits from a care assistant who does light housekeeping, simple meal preparation, baby care and household chores.

Dennis Bolin, director-marketing for Adventist Health System/North in Hinsdale, Ill., says the company's marketing research disclosed most expectant parents wanted more education, more outpatient options and lower-cost programs. "As people become better educated, they view pregnancy less as an illness and more as a natural aspect of life," he says. "As a result, they want to spend less time in the hospital."

Consumers have become more cost conscious as changes in insurance coverage have left them holding a bigger chunk of the bill, Mr. Bolin says. The Glendale Heights package costs about the same as a three or four-day stay in the hospital, he says, "but it has more of the options people have asked for." Last year, the hospital discussed money in fairly straightforward terms with an ad that pictured a new baby and a headline announcing, "Outstanding reproductions at discount prices."

We also help with labor after baby's born.
Adventist Health System
GLENDALE HEIGHTS COMMUNITY HOSPITAL

Glendale Heights Community Hospital is offering free maid service.

Mr. Bolin says several Adventist Health System hospitals have tried the direct price-oriented approach with mixed results.

"It does address the needs of consumers. They are concerned with costs," he says.

But hinging a campaign on discounting can be dangerous because many first-time parents are overwhelmed by labor and delivery costs—even at a discount. He says Glendale Heights' new home care delivery plan is a "much stronger package" because it offers a broader range of benefits. —*L.K.*

---

magic questions that would reveal child abusers, but it's not that simple," Mr. Benson says.

To calm parents' concerns, most daycare chains are emphasizing an open-door policy, allowing parents to visit anytime their child is in the center. Some chains also are educating children and parents about abuse. La Petite Academy has a videotape, "Strong Kids, Safe Kids," starring Henry Winkler, while Kinder-Care is producing a film on child abuse and molesting.

The best way to reassure parents is to get them to interact with the staff, Mr. Benson says. "We encourage parents to get involved with things that are going on at the center."

Parents should be very demanding consumers of daycare, he says. "It should be a very considered decision, not influenced by flashy advertising." After all, Mr. Benson says, "Parents are entrusting their most precious possessions to the staff at a daycare center."

Reach 24 Million Demographically Targeted Households in 1985, 40 Million in 1986

Double your response or redemption in these proven co-op mailing programs

Now you can *focus* your direct-mail and couponing programs on mail-responsive, high-redemption households in these targeted, growing markets. No waste distribution. No duplication. Truly cost-efficient on a cost-per-response or cost-per-redemption basis.

We deliver you only the households who will buy—and buy again. Our carefully selected mailing lists weed out the unproductive, low-redeeming households before we mail…guaranteeing you the profitable, long-term customers you're looking for.

Our U.S. Family Value Shopper co-op mailings are the largest, fastest growing demographically targeted programs in the country—bringing participants twice the redemption levels of any other mail co-op (and five to six times more than FSIs)! Direct marketers report tens of thousands of orders, at a fraction of the cost of solo mail.

Our "take-one" programs are targeted, too—in high-traffic locations with predictable demographics, resulting in high-volume, high-quality response.

We'll Guarantee Your Payout on a cost-per-redemption/response basis. Or ask us about our "No-Risk Tests". We'll even reserve a category exclusively for you for 30 days.

Get the full story today: attach your business card to a copy of this ad and mail it to us—or simply call Larry Tucker, Jim Taylor, or Hank Wener at (201) 569-8888. We'll get you a full media kit, with rates, schedules, testimonials, and sample mailings.

Selling parents on financing an education

Special Report: Commentary

By Marilyn Adler

When the baby is a newborn, a constant source of wonder and pride, anything seems possible—a future president, a Nobel Prize-winning astrophysicist, a superstar professional athlete. Yes, even parents of baby boys have similar dreams.

Putting money aside for their child's education is a thought that occurs to most new parents at least once. But it's all too easily lost in the more immediate demands of child-rearing and the shuffle of competing consumer priorities. This thought typically won't resurface until college catalogs are filling the family mailbox. But financial service companies are working hard—and probably must work harder—to provide parents with the reasons and products to meet future needs.

What will college education cost in the year 2003—the numbers that will be emblazoned on the letter sweaters of this year's bumper crop of babies? The experts generally are reluctant to hypothesize, perhaps because current costs already are so high.

A year at a four-year state college in 1984-1985 averages $4,881, including tuition and fees, books and supplies, modest personal expenses, transportation, and dormitory room and board, according to Kathleen Brouder, author of the "College Cost Book 1984-85." To send junior to a four-year private college or university will cost $9,022 on the average. Ms. Brouder declines to speculate on college costs in the year 2003, saying there are "too many imponderables to do a linear projection with any confidence."

However, some banks and life insurance companies estimate college costs will increase 7% annually through the foreseeable future. Applying that rate to the College Board's current average costs yields a stunning set of estimated expenses for the year 2003—about $15,400 and $28,500 a year at public and private four-year colleges, respectively. If their children make it through school in four years, parents can expect to pay a total of about $61,600 to $114,000.

New parents can take some comfort in the fact that their incomes probably will increase as well. But unless salaries rise at a considerably higher rate than that of college cost increases, they may still have some trouble meeting that first-semester tuition bill.

"Most parents can't afford to finance today's costs out of current income alone," Ms. Brouder says. "They necessarily draw on savings, pay on installment or borrow money, and expect their children to borrow and to work summers and parttime."

Even that scrimping and saving often is not enough. The College Board estimates that about half of the students currently enrolled in postsecondary education or training are receiving some form of public or private financial assistance. But counting on this as a source of revenue is dangerous because federal student assistance money has leveled off in recent years, and the over-all amount of available aid has declined relative to rising college costs.

Ms. Brouder tells parents of young children to assume that they will have to shoulder the lion's share of the responsibility. "If I were the parent of a newborn," she says, "I'd count on college costing more than I ever dreamed possible, I'd *hope* that some kind of outside help would be available to me when the time comes, but I'd *act* as though it were all going to depend on me."

Because new parents are acknowledging the truth of Ms. Brouder's statement, the demand for financial planning programs to meet educational needs has grown. While helping new parents plan for their offspring's college education may be an emerging industry, birthing it has not proved simple.

Despite increased demand, innovative marketing will be required to convince families they may need help and can afford help.

The field is relatively new, and the players in it have not arrived at a consensus on which financial plans and instruments are most appropriate for which types of families. Despite increased demand, innovative marketing will be required to convince many families they may need help and they can afford the help.

Some of the more popular financial instruments in use today combine college planning with tax planning, enabling parents to accumulate cash for education while reducing their tax burden:

- Most banks, brokerages and mutual funds offer custodial accounts in accordance with the Uniform Gifts to Minors Act. The simplicity of the approach—setting money aside until the child reaches maturity—may make some parents uneasy, fearing that the child may use the funds for something other than educational endeavors.
- Clifford Trusts are a mechanism for transferring funds from parent to child for a minimum of 10 years and one day. The interest income the trust generates can be used for college expenses while the principal eventually reverts back to the parent.
- Zero coupon or deep discount bonds are another approach, but they carry an element of risk. Because the rate of return is fixed for a long period, skyrocketing interest rates could make parents wish they hadn't tied their money into a maturing bond.

However, financial marketers have yet to develop a widely available commercial alternative for the mass market. A few financial institutions have experimented with comprehensive college planning that combines specialized financial programs with counseling on various aspects of college preparation, planning, admissions and financial aid. Others have them in the works, and new instruments and services are being explored.

The marketing of such new programs will be as critical as their scope and content. New parents are knee-deep in diaper changes and midnight feedings, aghast at the cost of doll-sized sleepers and t-shirts, concerned about the adequacy of current insurance coverage and worried about the prospect of buying a first or bigger house. Expecting them to concentrate on an expense that is 18 years down the road is expecting a lot—particularly when many are still paying off their own student loans.

Parents of newborns are more concerned about the adequacy of the local elementary and secondary schools.

If they live in an area where public schools are deteriorating, their more immediate priority can be paying private elementary school tuition. Toss in expenses for orthodonture, gymnastic lessons, Cabbage Patch Kids, the ubiquitous personal computer, and the college expenses recede further. Marketing efforts must overcome parents' tendency to "worry about it later" and persuade them they should act now.

Reaching out to parents in settings where they already are disposed to thinking about their children's education may provide one part of the answer. Meetings of school groups, parent-teacher associations or any organization that draws its membership from parents with children in the target age range provide natural settings.

Companies that offer public service information and materials, speaker panels and audiovisual presentations—providing information first, gently advertising products and services second—are likely to find receptive audiences.

Marketing efforts must educate parents on not just the importance and value of planning for their children's education, but also on financial terms and concepts that may be as new to them as their role as parents. Hitting parents, who are concerned more immediately about getting Heather to eat vegetables, with a blather of fiscal babble about bonds and IRS restrictions only will scare them.

Marketing college financial planning services should not only educate but also stimulate parents to assume the responsibility for meeting their children's eventual educational costs. Parents want to "do right" by their children—ask any parent—but they need to be coached. ■

Marilyn Adler is president of New York-based Creative Targets, which specializes in marketing strategies aimed at youths from cradle to mortar board, and mother of 11-year-old Eric.

Hospitals

(Continued from Page 33)

trend. "We're not into retailing admissions," says Ian Latham, senior vp-creative director of Ogilvy & Mather, Atlanta, which handles advertising for the East and Southeast regions of American Medical International, a Beverly Hills, Cal.-based hospital chain.

"There's pressure on hospitals and their agencies to 'turn a trick' with advertising, to produce immediate results," he says. But, Mr. Latham says, hospital advertising should be viewed as an investment in a facility's image.

To that end, Ogilvy & Mather creates service-oriented hospital ads. "The ads are part of a wellness program designed to build a relationship with the community," Mr. Latham says. "We don't measure their success by how many enrollments they generate. They're designed to influence how people perceive the hospital."

For example, one ad for North Fulton Medical Center, headlined, "Working while you're pregnant," talks about coping with morning sickness, eating right, exercising and avoiding stress. It mentions the hospital only briefly. Another ad offers tips for baby sitters and a third illustrates some of the equipment needed for a baby's room. "We present information of a topical nature because we feel the hospital should be seen as an authority," Mr. Latham says.

However, as women become more well-versed in labor and delivery services and more opinionated on what they want those services to be, hospital administrators may find themselves asking prospective patients as many questions as their doctors are answering. ■

Coke Cherry bombs Pepsi

Preemptive strike at celebrity spots

By NANCY GIGES

Coca-Cola USA, intent on upstaging archrival Pepsi-Cola USA's annual bottler meeting Feb. 23 and 24, is expected to pull a new product out of its arsenal—Cherry Coke.

Coca-Cola reportedly will introduce Cherry Coke at a Feb. 19 press conference. The company's decision to go with Cherry Coke was made quite recently and is seen as a move to take some interest away from some major announcements Pepsi will make at its bottlers meeting. Cherry Coke is rolling out despite never being tested in take-home packages. Coca-Cola last year used its fountain network to test that flavor, as well as Chocolate and Lemon Coke.

Coca-Cola, Atlanta, is positioning Cherry Coke as a new product, not a line extension to its flagship brand. As such, Coca-Cola felt no compulsion to assign the brand to the Coke agency, McCann-Erickson. The assignment went instead to SSC&B, agency for Diet Coke and Tab and the apparent hot shop on Coca-Cola's roster.

Although cherry is a dominant flavor in Dr Pepper and Coke's answer to that brand, Mr. PiBB, those two soft drinks are not cola-based, as is the new Cherry Coke.

At the Coca-Cola press conference, the company also is expected to show new spots for Coke, Tab and Diet Coke, using current ad themes.

New music for flagship Coke will be sung by name artists, who are not expected to be identified, such as jazz singer Phoebe Snow.

Meanwhile, Purchase, N.Y.-based Pepsi is relying heavily on big names to revive Diet Pepsi, which has lost business to Diet Coke.

The campaign kicks off with a spot featuring Super Bowl quarterbacks Joe Montana and Dan Marino. Pepsi also is signing up a string of so-called "leaders in their fields" to appear in a new Diet Pepsi campaign, which will be shown to bottlers along with new campaigns for other Pepsi brands in Los Angeles next weekend. So far, the company reportedly has signed Democratic vice-presidential candidate Geraldine Ferraro, Chrysler Corp. chairman

Block's bulk net buy turns day into night

By VERNE GAY

New York—Block Drug is midway through an experimental one-year deal with CBS-TV that could substantially alter the way Block and other medium-size network tv advertisers use that medium in the future.

The architects of the Block buy simply refer to it as the "CBS multi-daypart" deal, but the nature of it is more dramatic. In exchange for lower cost-per-thousand rates, Block lets CBS move $5 million to $10 million of its $40 million national broadcast weight from one daypart to another without advance notice. CBS thus can tighten soft shows or time periods.

The arrangement gives Block more prime time and newscast exposure for its brands. Block, like other advertisers with small budgets by network standards, has found the cost of prime time network tv increasingly prohibitive. Some have turned to syndication to capture the prime time viewer; others are using split 30-second commercials for two products as cost-cutting measures. This deal, however, helps circumvent both alternatives.

"The CBS deal has allowed us to do more prime time than in previous years," said Avrum Geller, director of marketing services for the Jersey City, N.J.-based company. He added that both parties are so happy with the way it has worked that they hope to repeat it in the 1985-86 season.

The company reportedly achieved cpm levels equal to or below those set six months ago when the upfront buy was made.

All the company's brands are involved in the experiment. Block markets Polident, Poligrip denture adhesive, Promise toothpaste and Tegrin medicated shampoo, among other brands.

Mr. Geller and Grey Advertising, Block's agency, claim this is the first time a standing multi-daypart

Xerox does not compute

By BRIAN MORAN

Xerox Corp., which brought the first personal computer to the business world in the early 1980s, has quietly dropped out of the mammoth market it helped create.

Xerox's exit, brought on by the company's failure to cash in on crucial lead time, effectively leaves only two major long-term players in the $4 billion pc battle—IBM Corp. and Apple Computer.

Stamford, Conn.-based Xerox had been counted on to take a decisive role in shaping the pc business, but a conservative marketing approach ultimately stalled the

Burnett drops $35 million in Nestle business

Chicago—Leo Burnett USA has resigned its estimated $35 million worth of business from Nestle Enterprises, White Plains, N.Y. Burnett chairman Hall Adams cited "irreconcilable philosophical business differences" for dropping the Taster's Choice and Nestle Morsels assignments. No successor has been named yet, but Nestle's agency stable also includes Jordan, Case & McGrath; McCann-Erickson, and J. Walter Thompson USA.

Ritz Hotel sues RJR in trademark dispute

New York—Ritz Hotel Ltd., a U.K. corporation and owner of the Ritz Hotel, Paris, has filed suit in federal district court here accusing R.J. Reynolds Tobacco Co., Winston-Salem, N.C., of trademark infringement. The suit centers on RJR's planned test-marketing of Ritz cigarets bearing the initials of French designer Yves St. Laurent (AA, Jan. 21). An action also has been filed against Mr. Laurent personally in Paris. Ritz Hotel Ltd. said it began marketing a new cigaret called Ritz Paris in specialty shops here on Feb. 1.

Travelers account may be on move

Hartford, Conn.—Travelers Corp. is entertaining bids for its $14 million account. The review includes incumbent Ally & Gargano and four other New York agencies. A decision is expected by late April.

BDA/BBDO collars Kuppenheimer account

Atlanta—Kuppenheimer Mfg. Co., with 127 men's clothing outlets in 33 states, last week moved its $11 million account to BDA/BBDO after only eight months with J. Walter Thompson USA. Kuppenheimer, a division

Eustace moving to a Newhouse?

By STUART J. ELLIOTT

The familiar face of *The New Yorker's* Eustace Tilley could end up in the stable of magazines owned by S.I. Newhouse (l.), a move that many in the industry would applaud.

NEW YORK—*The New Yorker* the target of a takeover bid? Yes, *The New Yorker*.

The famed literary magazine with the affirmative ad slogan is getting ready to celebrate its 60th anniversary next week with another guest at the party: S.I. Newhouse Jr. Through his Advance Publications holding company, Mr. Newhouse has made an unsolicited bid to acquire, for $180 a share, the 82.9% of the stock of The New Yorker Magazine Inc. he does not already own (AA, Feb. 14). Purchase price: About $124.5 million, atop the $25.6 million spent for the initial 17.1% of the company's stock he bought earlier (AA, Nov. 19). At that time, Mr. Newhouse said he had no plans to seek control of the company. Why he changed his mind remains a mystery; as is his wont, he was not available for comment.

The attention of the media and advertising communities is riveted on what happens next, for the cachet and reputation of *The New Yorker* give the company's flagship an impact far greater than it would otherwise merit for its size. The company's board, which received Mr. Newhouse's bid in a "Dear sirs" letter dated Feb. 11, said the next day it would "consider all aspects" of it, with the assistance of its investment banker, First Boston Corp., and its legal counsel.

Mr. Newhouse's letter, which began, "We are pleased to submit for your consideration. . .," seeks a reply by March 31. And The New Yorker has scheduled its annual company meeting for March 26.

"It would seem to me," said Joyce Richter, pr manager, The New Yorker, "that it would be a logical thing for the meeting to respond to [Mr. Newhouse's offer]," though there has been no date set for a response. The New Yorker's chairman, Peter Fleischmann, and president, J. Kennard Bosee, have no comment beyond the board's Feb. 12 statement, she added.

While Mr. Newhouse might be an uninvited guest, many magazine industry figures do not consider him an unwelcome one. For the most part, they believe his cash merger offer has a better than 50-50 chance of being accepted. Not only is it likely, they say, but it is appropriate: "This is a marriage that should happen," as Peter Diamandis, president, CBS Magazines, put it.

Were that the case, Mr. Newhouse would add the idiosyncratic upscale weekly as well as the company's other holdings (*e.g.*, interests in *The Cook's Magazine* and *Horticulture*) to a collection of magazines—Conde Nast Publications, nine monthlies ranging from *Bride's* to *Vogue*—that is, to a large degree, the envy of his peers.

To own the magazine that each year still runs a portrait of its mascot, a dandy named Eustace Tilley, on the cover of its anniversary issue (he is slated to appear on the 60th anniversary issue dated Feb. 25)—a magazine that is known as much for its cartoons by James Thurber and Peter Arno as for its stories by E.B. White and J.D. Salinger, a magazine that eschews gatefold covers, scent strips and "advertorial" sections—that could well be the jewel in the crown.

"Si has put together, over a period of years,

Quotation from Chairman Lee: 'Rebate rerun'

By RALPH GRAY

HIGHLAND PARK, MICH.—Auto rebates are coming back, Chrysler chairman Lee Iacocca predicted last week.

A combination of slack demand and overcapacity in small cars will trigger a marketing donnybrook between Ford Motor Co., General Motors and Chrysler, he said.

The rebates will come whether or not voluntary import restraints come off March 31, Mr. Iacocca told a press conference.

"There is enough softening in some parts of the market, especially the low end, as long as gas is cheap," he said. "We don't want to shut down those small-car plants, so we build them and put on incentives.

"We didn't build these cars for $1-a-gallon gas. We built them for $2-a-gallon gas," Mr. Iacocca noted.

Chrysler shied away from direct consumer rebates with a $500 offer to owners of 1979-84 models if they buy a U.S.-made Chrysler product by June 6. Mr. Iacocca said a regular rebate goes not just to the 4.5 million Chrysler buyers but "the world at large." The limited rebate gets direct-mail coverage only.

Chrysler did package other incentives into a "Thank you, America" campaign breaking this

Burnett, Needham gangs duel locals

McShootout at the U.K. corral

By VALERIE MACKIE

Leo Burnett Co. and Needham Harper Worldwide again are bumping heads for a chunk of the lucrative McDonald's Corp. account.

This time it involves the $6.6 million U.K. business, which became available last week when McDonald's terminated D'Arcy MacManus Masius.

Both Burnett and Needham, avid competitors for McDonald's business since Burnett took the $200 million-plus U.S. account from Needham in 1981, are pitching for the U.K. account along with one or two local agencies. D'Arcy will continue handling the business until June 1.

A spokesman for McDonald's in the U.K. said the company had been considering an agency change for several months.

"Our rapid and successful growth in the U.K. has necessitated some rethinking on our marketing needs of the future," the spokesman said. "We believe a change in agencies at this time will

The Metro Sunday Comics Network is hoping that a revamped package of funnies pages (right), the result of an industrywide project called 21st Century Comics, will hold special interest for teens and children. "We felt we were losing the kids," said Thomas Craddock, Metro sales director. "If you lose kids, you lose tomorrow's readers."

Making a fuss over funnies

By WILLIAM F. GLOEDE

NEW YORK—Garfield's going modular, Marmaduke's on the remake and Mary Worth's in for a face-lift.

It's all part of a push by comics syndicates, Sunday-comics sales organizations and newspaper companies to breathe new life into a moribund ad medium—the Sunday funnies.

A three-year industrywide project called 21st Century Comics, designed to make Sunday comics more meaningful to tomorrow's yuppies, was unveiled last week at the offices of the Metro Sunday Comics Network here. The project aims to increase readership of the Sunday funnies among adults, teens and children, with a special emphasis on the latter.

"We felt we were losing the kids," said Thomas Craddock, sales director for Metro. "If you lose kids, you lose tomorrow's readers."

In a pair of research studies conducted during the project, the ad hoc group of syndicate, newspaper, advertising agency, printing and sales representative executives found that most people are introduced to reading through comics and cereal boxes. The plan is to persuade daily newspaper publishers to put some art direction into their Sunday comics packages, adding special features, humor, "supergraphics" and a better measure of organization.

That's no small task, but according to Mr. Craddock, participation in the project by executives from Knight-Ridder Newspapers, Gannett Co., Times Mirror Newspapers and the Tribune Co., and finan-

ABC-TV 'Laces' up for ratings crusade

By BOB MARICH

In the network tv ratings race, nothing is sacred any more—not even Holy Week.

ABC-TV, pulling out the stops in its drive to catch NBC and avoid finishing last in the network ratings race, will air "Lace II," a steamy four-hour miniseries, starting Palm Sunday, March 31. NBC-TV had staked out the same date to premiere "A.D.," a 12-hour biblical miniseries sponsored by Procter & Gamble (AA, Dec. 10).

The ABC move, which had been rumored (AA, Feb. 4), immediately raised eyebrows because that date is the start of Holy Week, which runs until April 7, Easter Sunday.

ABC apparently is willing to risk criticism for scheduling exploitive programing during an important religious period in order to close the ratings gap with NBC. At the start of the season, ABC unexpectedly slipped into third place in prime time and has been playing catch up to NBC, which passed it, ever since.

The miniseries showdown is rife with implications, especially for Madison Avenue. It will mark only the third time in network tv history that miniseries will square off opposite miniseries. In the two previous instances (both in the May, 1984, sweeps), ratings of the miniseries involved were low because they tended to cancel each other out.

"There is a real danger that if the networks continue to snipe at each other they're going to dissuade advertisers from committing to large sponsorships in the miniseries area," cautioned Duane Kell, senior vp-director broadcast media, Campbell-Ewald, Detroit.

Miniseries command anywhere from $180,000 to $240,000 per 30-second commercial, compared with $180,000 for a 30 in a top-rated regular series.

"We might as well put our money in something else" that's a safer bet, said Leon Luxenberg, senior vp-director media relations, J. Walter Thompson USA, Chicago. "This is a disservice to advertisers and viewers."

On March 31, "A.D." will air from 8 p.m. to 11 p.m. (ET); "Lace" is scheduled 9 p.m. to 11 p.m. The next night, the same miniseries go head-to-head again from 9 p.m. to 11 p.m. "A.D." continues with two more two-hour episodes and then ends a five-consecutive-night run April 4 with a three-hour finale. The dates have not been officially announced but have been confirmed by NBC executives.

NBC originally wanted to schedule "A.D." during the February sweeps, but withdrew for fear that

Money-losing accounts dog ad agencies

By STEWART ALTER

Unprofitable accounts seem to be a way of life for small and medium-size ad agencies.

Almost half the accounts, representing more than 25% of the billings, of a sample of 102 small and medium-size agencies were unprofitable last year, says a Los Angeles company that provides computerized cost-accounting services to ad agencies.

And that's been the way the agency business has been for at least the last decade, adds BCS/Profit Index Systems. The 18-year-old company also authors the American Assn. of Advertising Agencies' "Cost Accounting Manual."

Looking at its own client list of 102 agencies, representing $1.4 billion in total billings, BCS/PIS found that 44% of the accounts last year fell into the money-losing category. Those 1,921 accounts represented 26.3% of those shops' billings.

The size of the accounts ranged from $7 million to $240 million.

"Those loss accounts generated 25% of total gross income but accounted for 40% of total operating costs, and 46% of total direct hours," said BCS/PIS vp H.E. McDonald.

The loss accounts brought in an average gross income of $25 an hour for those agencies. That rate is "about what an apprentice plumber or a very mediocre cocktail lounge piano player gets these days—it's a hell of a business bargain to these advertisers," Mr. McDonald said.

Profitable accounts, which made up 75% of the business, generated an average gross income of $61 an hour. Both the profitable and unprofitable accounts required about the same amount of service, valued at about $40 per hour.

That indicates agencies were not putting less expensive talent on loss accounts, Mr. McDonald said.

This pattern has not changed much in recent years *(see accompanying chart)*.

Industry reaction was mixed concerning whether that 44% figure for loss accounts was surpris-

Ayer gets confidence boost from AT&T

Shootout victory is worth $55M

By STEWART ALTER

New York—When N W Ayer won the AT&T Consumer Products account Feb. 11, the agency won more than a $55 million account.

Ayer won an important vote of confidence, one that Louis Hagopian, chairman-ceo of Ayer, called a "sweet victory."

For with the divestiture of AT&T, agencies such as Ogilvy & Mather Worldwide, McCann-Erickson Worldwide and Young & Rubicam have taken away portions of the AT&T business at Ayer, which has been the main AT&T agency since 1908.

To many, the perception had been that the new, competitive environment was eroding the AT&T-Ayer relationship, even though Ayer still handled such large and growing portions of the business as corporate and domestic long distance.

"We had four creative teams working on this. This was very serious for us. We know this business and we wanted to demonstrate that we know this business," Mr. Hagopian said.

Each of the agencies presented for 2½ hours—Foote, Cone & Belding on the morning of Feb. 7, D'Arcy MacManus Masius that afternoon, and Ayer on the morning of the next day—to a group of 13 AT&T executives at AT&T Information Systems headquarters in Parsippany, N.J.

Each agency handled a portion of the residential consumer-products account and was shooting for the whole consolidated package (AA, Dec. 31).

"All three groups presented full campaigns," said Lee Blitch, AT&T advertising manager for consumer products. He said that only rough storyboards were presented. However, the campaign will be ready to go in mid-April when it will debut on the CBS-TV miniseries "Space." AT&T also will break a new corporate ad campaign at that time (AA, Feb. 4).

Mr. Blitch would not specify what the theme would be other than to say it would focus on the "high quality" of AT&T products. He did indicate, however, that there would be a "common look" to the three products lines for the first time.

"We have been searching for a common look since divestiture," he said.

In fact, AT&T has been working on a new common theme line for all of its companies.

"It's safe to say we're 90% of the way there," said David Shaver, AT&T corporate advertising manager. "We're not ready to discuss what the line is, or how widespread its use will be."

Mr. Shaver said DMM will retain the agency of record media-buying assignment it picked up a few months ago as part of a realignment of media-buying assignments (AA, Dec. 10).

But for DMM, which had handled the biggest portion of the consumer-products account (residential phone leasing), that seems like cold comfort. The loss of the AT&T business is a setback to that agency's plan to build its office here. Billings had been at the $115 million-to-$120 million range, and now will drop below the $100 million mark.#

Direct Marketing moves

Beginning with the issue of Monday, Feb. 25, the Direct Marketing news section will shift to the Monday issues from Advertising Age *Thursday*.#

CORRECTIONS & CLARIFICATIONS

- The correct newspaper linage for the *Boulder* (Colo.) *Daily Camera* is 2,406,212.0, 1984; 2,107,809.3, 1983 (AA, Feb. 4, P. 52).
- Northstar Advertising is not the agency of record for Warteck nonalcoholic beer (AA, Jan. 31, P. 28). The account is unassigned. Also, the product has been brewed only since 1975.
- Waylon Co., St. Louis, is handling the "Head for the mountains" telemarketing promotion for Anheuser-Busch (AA, Feb. 4, P. 8).
- The Washington Post Co. netted $6 million from selling part of its stake in four SportsChannel ventures to CBS Inc. and Rainbow Program Enterprises, not $25 million as reported (AA, Feb. 4, P. 46). The sale price was $25 million.
- Yardley of London is a unit of Beecham Cosmetics, Chicago, not Beecham Products Co., Pittsburgh (AA, Feb. 4, P. 55).

  Both are divisions of Beecham PLC, London.
- Among the magazines in which a Jag Beverly Hills ad appeared was *Harper's Bazaar*, not *Harper's* (Global Gallery, AA, Feb. 7, P. 11).
- An On the Move item (AA, Feb. 11, P. 50) erroneously lists Bill Lau, DYR, Hong Kong, as general manager. His title will be deputy managing director. The replacement for John Price is to be named at the end of this month.
- Adolph Coors Co., Golden, Colo., shipped 13.2 million bbls. in 1984, a 4% decrease from the 13.7 million bbls. shipped in 1983. Previously, the 1984 total was incorrectly reported (AA, Feb. 11, P. 84).

sweep' stakes, plus

SWEEPSTAKES AND GAMES: THE TIP OF THE ICEBERG.

Because there's more to sales promotion than sweepstakes and games, at Don Jagoda Associates we do more than just create and execute sweepstakes and games.

re' bates

We work with advertisers and their agencies on planning and administering refund/rebate offers. We screen and verify all responses, very painstakingly, and return cash or coupons according to the terms of the offer. We're very careful when it comes to handling other people's money.

in·cen'tives

Because we know sometimes it takes more than money to motivate sales people, brokers, distributors and dealers, we help create and implement incentive programs. We know where and how to buy the prizes that will help increase sales, within budget.

pre'mi·ums

Looking for premiums or self-liquidators? We can help you there too. Our premium buyers shop the world looking for the right items to produce the right responses.

ful·fill'ment

And, with our ever expanding facilities, we have streamlined and expanded our capabilities for fulfillment. Getting the right merchandise to the right person on time, intact, is as important as getting people to respond to your offer.

sweep'stakes

Finally, if you decide to get involved in sweepstakes and games, the most visible tip of the promotional iceberg (in five years, sweeps have almost tripled in number), our more than 21 years of experience can be invaluable. We'll help you conceptualize, administer and—through our National Judging Institute—judge your promotion. We go out of our way to help our clients avoid the myriad pitfalls that can befall the unwary promoter.

When it comes to promotion, whether it's the very visible type or the not so visible but very effective nitty gritty variety, you have our number.

Old name, new partner add up to new Nova

By JESSE SNYDER

CHICAGO—The best Japanese car for midwesterners is one built in the U.S., according to Chevrolet marketers.

So the GM-Toyota joint-venture car will make its debut June 13 in 25 midwestern states as the Chevrolet Nova. It was displayed at the Chicago Auto Show last week to test the waters in a key market.

The revival of the old Chevy compact nameplate and the central U.S. introduction are part of a long-range Chevrolet drive to capture 20% of the total U.S. new car market. And being U.S.-built carries more weight in the Midwest, where the domestic auto industry is concentrated, according to Chevrolet executives.

"Unless we can sell a million small cars [Cavalier and smaller], we aren't going to make that 20%," said Robert Burger, Chevy general manager.

With Chevy's Japanese-built Spectrum and Sprint confined to coastal markets because of small import quotas, Chevrolet will launch Nova in the middle of this year with a planned 40,000 units. National distribution will come in 1986, when production hits 125,000, in a slow buildup to full 240,000 annual capacity.

Nova will be priced between $6,300 and $7,000, pitting it against well equipped Japanese imports. Sprint is the price leader at around $5,000, while Spectrum, at slightly more than $6,000, is aimed at the Chevette segment. The venerable Chevette will hang around a year or more because Chevrolet needs the small-car volume.

Nova ads for an early June break in major central markets still are being formulated by Campbell-Ewald, Warren, Mich.

They will probably key on the Japanese design of the car and the U.S. worker-Japanese management setup at New United Motors Mfg., said Thomas Staudt, Chevy general marketing manager.

Public perception of the joint venture has mellowed from an initial feeling that GM was admitting it couldn't compete with the Japanese, he said.

Nova will be differentiated from the Toyota Corolla design on which it is based by content, he said. But Nova will not get a heavy promotional budget, Mr. Staudt added.

As the market volume leader, Chevy must concentrate advertising on its "core products," like Cavalier and Celebrity, for volume and on hotly contested markets like small trucks, he said.

That leaves Nova with no more than "a fair share" even for introduction.

Mr. Burger not only has to worry about foreign small-car competition, but the new General Motors Saturn Corp. small car. Saturn is "almost as much of a competitor as if Ford had launched a new car," he said.

Ford division was showing off a new "concept" minicar called the Urby, for urban commuter car. It's three inches higher and two inches shorter than the subcompact Escort. There are no immediate plans for production.

Ford is planning an on-demand four-wheel-drive option for its Tempo-Topaz compacts. It will come in model year 1986 or 1987.

Pontiac also is looking at 4wd for its Sunbird J-cars. In addition, Pontiac will decide soon whether to go ahead with a minivan based on a car platform.#

Agencies

(Continued from Page 3)

ingly high.

"That's not a surprising figure for a small or medium-size agency. That probably would have been us four years ago," said Arthur Root III, president at Root & Associates, a $10 million shop in Baton Rouge, La.

Mr. Root's agency has begun doing profit analysis on an account basis and negotiating fees with clients.

"I was surprised when I first saw that figure because that is not our experience," said Daniel Gaby, president at Keyes Martin, a $39 million agency in Springfield, N.J.

Robert Schneider also was surprised. "If that's true, how do they stay in business?" asked the president of Schneider Parker Jakuc, a Boston-based shop with $30 million in billings.

Mr. Schneider's agency has developed its own proprietary software for cost accounting. Nonetheless, he noted, "I never feel as if I've mastered profitability. At any time, an account can turn unprofitable either because it's overstaffed or the wrong people are on it or it has for one reason or another cut back in billings and the agency has not responded."

Mr. Gaby, like all the agency principals interviewed, found clients generally receptive to negotiating a fee when their accounts start turning unprofitable.

"If we make a businesslike case for the need, more often than not they are sympathetic," he said.

Mr. Gaby also observed that the situation was far from "cut and dried." An existing account, for example, may turn unprofitable in the middle of the year, at which point the budget is fixed and there is little the client can do to rectify the situation until the next year.

The problem is not limited to small shops, said John Connors, president at Hill, Holliday, Connors, Cosmopulos, Boston.

"It has nothing to do with the size of the account or the agency," said Mr. Connors, whose shop has just topped the $200 million mark in billings. "Essentially, this is a business managed by account service people and creative people and not financial types. Secondly, people don't spend enough money (cost-accounting) in this business."

The unusual compensation system at Mr. Connors' agency reportedly has made it one of the more profitable shops in the industry. HHCC, realizing it could not make much money on 15% commission as a small agency, 14 years ago began charging clients on an hourly basis linked to employe salaries. About 60% of its clients now compensate it on that basis.

"We can never make a killing from sudden client billings growth, but we can always have reasonable profit," said Mr. Connors, whose agency's good profit margins have allowed it to invest for growth both with overseas offices and top talent.#

The Newspaper of Record in Japan–Asahi Shimbun

When Somebody Wants to Say Something, His Reference Is the Asahi Shimbun. The Figures Below Speak for Themselves.

The majority of opinion leaders are Asahi Shimbun readers. To determine which of the daily newspapers was the main source of daily information for Japan's opinion leaders, a research organization conducted a survey in 1983 of members of the Diet, government officials, and the academic community. The results revealed how far ahead of its rivals the opinion leaders placed the Asahi Shimbun.

Percentage

	ASAHI	Mainichi	Yomiuri	Nihon Keizai
Diet Members (Sample: 492)	**84.1**	60.2	69.5	59.1
Government officials (Sample: 173)	**82.1**	27.2	26.0	42.8
Professors of colleges and universities in the Tokyo metropolitan area (Sample: 1,490)	**80.3**	28.9	24.4	20.3

Note: Multiple answers are indicated above. (Source: The Marketing Research Associates, June, 1983)

New items, conflicts send Pioneer on shop search

LONG BEACH, CAL.—Pioneer Electronics here is looking for a new agency as it introduces new-product lines and bolsters its car-stereo line.

The car and home audio equipment marketer is splitting with Chiat/Day, Los Angeles, its agency of 10 years (AA, Feb. 11). Sharyl Juhlin, Pioneer vp-marketing communications, who is supervising the agency search, said the change was prompted by account conflicts.

Chiat/Day handles home audio/video for Mitsubishi Electric, an estimated $3 million account (although Mitsubishi car stereo is assigned to Stiller Advertising, Costa Mesa, Cal.).

Ms. Juhlin said Pioneer expects to name a single agency to take over its $9 million account in March. She said Pioneer is talking to several agencies but would not identify them. However, other sources say Dailey & Associates; Foote, Cone & Belding, Keye/Donna/Pearlstein and Needham Harper Worldwide are among them. All are in Los Angeles.

Pioneer introduced a car security system in January, the first of several new-product lines that are in the works. Ms. Juhlin would not disclose the other new products.

The car-stereo market, in which Pioneer claims to be the top-selling brand, is facing tough times.

Car makers have stepped up sales of stereos as factory-original equipment. This has cut into sales of car stereos as accessories in the aftermarket, where Pioneer competes. The company also markets home audio equipment.#

Loden opens consultancy

NEW YORK—John Loden, a former senior vp at Ally & Gargano and marketing director at Bristol-Myers Products, has opened Loden Associates, a marketing consultancy at 1230 Park Ave., 10128.

Time, Gannett buys win praise

Time heads south for winner

By STUART J. ELLIOTT

NEW YORK—Time Inc.'s move across the Mason-Dixon line to acquire Southern Progress Corp. is being described as a logical, natural step as the communications giant rediscovers its roots in magazine and book publishing.

"It sounds like they bought a fine property," said John Reidy, vp-media analyst at Drexel Burnham Lambert here, "very complementary with the properties they have. It's a fine deal for both sides."

Time Inc. surprised the media and marketing communities Feb. 21 when it disclosed the cash transaction—$395 million plus $85 million in other considerations—to acquire the Birmingham, Ala.-based Southern Progress.

Time Inc. has had "a lot of cash sitting around for a while," said Mr. Reidy. "This looks like a good place to put it."

The company, 99 years old this month, bills itself as the nation's largest regional magazine and book publisher. Among the properties of the company, which was ranked as 81st-largest in ADVERTISING AGE's annual 100 top media companies listing last June: *Creative Ideas for Living*, a national monthly with a circulation of 732,127 for the six months ending last Dec. 31; *Progressive Farmer*, a regional monthly, circulation 573,402; *Southern Living*, the company's preeminent holding, another regional monthly with a circulation of 2,253,569, and the Oxmoor House book division.

The Time-Southern Progress deal is the

CBS sells off 'Family Weekly'

By WILLIAM F. GLOEDE

NEW YORK—Gannett Co.'s agreement to purchase *Family Weekly* from CBS Magazines has set off speculation as to what the new owner plans for the ailing Sunday magazine.

Industry insiders believe that, under the agreement reached Feb. 21, Roslyn, Va.-based Gannett will pay between $35 million and $50 million for *Family Weekly*, which last year earned an estimated $6 million before taxes. These insiders say CBS had asked $60 million for the weekly.

What Gannett will get—just a month after it agreed to pay $200 million for the *Des Moines Register* and other newspaper properties of Des Moines Register & Tribune Co.—is an admittedly ailing publication that CBS has been unable to turn around since its purchase in 1980, but it is a property that holds promise for a company like Gannett.

"It's kind of interesting," said John Morton, publishing analyst for Lynch, Jones & Ryan, Washington. "One wonders what's up Gannett's sleeve."

In 1984, according to Publishers Information Bureau, *Family Weekly's* ad pages fell 11.2%, to 693 from 780, as ad revenues fell 10.4%, to $87.1 million from $97.2 million. So far this year, through the Feb. 17 issue, ad pages are estimated to be down 0.2%.

Gannett has already established new networks of national advertising combinations, including its flagship *USA Today*, its 85 daily newspapers, 16 radio and six tv stations, outdoor advertising boards and the newly an-

Ferraro takes women's theme in Diet Pepsi spot

PURCHASE, N.Y.—Pepsi-Cola USA's new Diet Pepsi tv spot featuring Geraldine Ferraro (AA, Feb. 18) will show the 1984 Democratic vice-presidential candidate with her daughters, Donna and Laura Zaccaro. The spot's theme deals with women's opportunities and that "You can be anything you want to be today. . .be it a mother, a vice-presidential candidate," said a spokesman for Ms. Ferraro. The spokesman said PepsiCo told Ms. Ferraro she could "say anything she wanted to, within reason," and that she decided to use her daughters in the spot. BBDO handles Diet Pepsi. *(See Page 3 for other stories on Pepsi creative.)*

Coca-Cola may snap at Gatorade market

ATLANTA—Coca-Cola Co. is considering an entry in the high-energy isotonic soft-drink category now dominated by Stokley-Van Camp's Gatorade, industry sources believe. To date, Indianapolis-based Stokley-Van Camp has not built a strong market for Gatorade outside the Southeast and Southwest, but to build sales in the $1 billion single-strength juice-drink category Stokley parent Quaker Oats Co. plans to boost marketing support as much as 50% this year. Coca-Cola, PepsiCo and other soft-drink marketers have been eager to capitalize on increasing consumer preference for more nutritious fruit drinks and isotonics. Coca-Cola earlier tested an isotonic drink, Puma, that never was rolled out.

Bozell cashes in on Dillard account

LITTLE ROCK, ARK.—Dillard Department Stores has named Bozell & Jacobs/Southwest, Dallas, to handle its $10 million-to-$12 million broadcast account. Faulkner & Associates previously handled.

Do celebrities, alcohol mix?

By STEVEN W. COLFORD

WASHINGTON—Lite beer without Marv or Rodney? Budweiser but no Leon Redbone? Paul Masson sans Citizen Kane?

Those could be only a few of the personnel losses that beer and wine advertising would suffer if a soon-to-be-released Treasury Department trial balloon on celebrities in tv and radio ads rises to its ultimate height.

See editorial on Page 18.

In posing the question of whether to extend its existing ban on active athletes to include ex-jocks as well as stars from stage, screen and music, the department's Bureau of Alcohol, Tobacco & Firearms will formulate its answer from the comments, studies, surveys and supporting data of the advertising and alcohol industries, as well as their critics.

The bureau already is girding for an onslaught of responses to its proposal, now expected by mid-March, according to agency sources who blame the latest delay on more pressing matters at the Treasury Department—the federal deficit and tax-law revision, to name a couple—as well as the need to brief newly arrived Secretary James Baker III.

The proposal also underwent some "minor" rewriting at the hands of John Walker, assistant secretary for enforcement and operations, and deputy general coun-

Fractious Mars turns from fractured DMM

By GAY JERVEY and SCOTT HUME

The shuffling of domestic agency assignments last week by M&M/Mars forebodes a new wave of agency infighting and scrambling for Mars business overseas.

Mars is already moving quickly into new foreign markets and has started quietly reassigning some brands in Europe.

The major shifts in the agency lineup at Hackettstown, N.J.-based M&M/Mars (AA, Feb. 21) are most critical to D'Arcy MacManus Masius Worldwide. Last week, DMM lost some $15 million in Mars U.S. billings to Leo Burnett USA, Chicago, and Ted Bates Advertising/New York.

In addition, DMM's London office recently lost the $5 million Mars' Marathon and Topic brand candy bars in the U.K. to Ted Bates Holdings and Allen, Brady & Marsh, respectively.

Some sources said the London reassignments were as critical to DMM as the domestic losses because London is considered critical to both Mars and the DMM worldwide operation (AA, Feb. 11). D'Arcy still handles most Mars advertising in the U.K. Its U.K. account and the international Mars business D'Arcy coordinates from London reportedly are worth as much as $60 million.

The problem is worsened by reports that other non-Mars accounts at DMM/London are also under review.

In addition to losing the Mars business last week, DMM in New York has lost about $30 million in AT&T consumer products business to N W Ayer (AA, Feb.

ABC moves 'Lace II' to May

Countermoves batter 'Wives'

By JAMES P. FORKAN

New York—First, ABC's miniseries "Hollywood Wives" turned in disappointing Nielsens. Then ABC, which had scheduled "Lace II" for Palm Sunday, switched that miniseries to the May sweeps.

Agency media experts say "Hollywood Wives" was hurt by counterprograming moves by NBC and Showtime. As for postponing "Lace II," most sources said it was a sign ABC has thrown in the ratings towel. Scheduling the steamy sequel in March wouldn't help ABC close the gap with second-place NBC, they said, and so the network decided it would do more good for affiliates in May.

"I was surprised 'Hollywood Wives' didn't do better," said Jack Otter, SSC&B's senior vp-network programing. "It was as promised—trashy, but wonderful trash," he said, laughing. His agency had projected a 32 share, although he himself had anticipated much higher. The three-part "Wives," beating all its competition, actually delivered a 22.7 A.C. Nielsen Co. rating and 35 share (ABC officials maintained that "Wives" performed about as well as anticipated).

The Aaron Spelling-produced sex-and-murder potboiler, which went from a 33-share premiere to a 32 share for part two before climaxing with a hefty 39 share, was "hardly a disaster," said Phil Burrell, vp-network programing, Dancer Fitzgerald Sample. "The advertisers came out all right, though the network had hoped to put a greater dent into NBC's lead." ABC execs lately had been banking on advancing on the strength of such first-quarter events as "Wives."

Pointing to the Nielsens for Feb. 17, Mr. Burrell said, "You could see 'Hitler's SS' [on NBC] got a one-hour headstart that hurt 'Wives.' The second night the [NBC] Disney special did very well and established a beachhead that took a lot of available viewers away."

"Certainly the bridging NBC did had to hurt 'Wives' somewhat," Mr. Otter said, "with 'Hitler's SS' and 'Disneyland's 30th Anniver-

Apple II returns to its core in ads

By CLEVELAND HORTON

Apple Computer, which is betting its future on the success of its Macintosh, is giving increased ad support to its older, but surprisingly healthy, Apple II line.

The No. 2 personal computer marketer this week starts airing two new tv spots for the Apple IIe, stressing the pc's educational value. The commercials effect a warm tone to promote Apple as a friendly computer company, the Cupertino, Cal.-based marketer says.

Industry observers have accused Apple of ignoring its older machines, despite their hefty contributions to the company's record-breaking sales gains. Even Apple co-founder Stephen Wozniak, who recently resigned from the company (AA, Feb. 11), reportedly based his decision to depart on the

CORPORATE CLOSEUP

Alberto's one-man show wins rave reviews

By LAURIE FREEMAN

MELROSE PARK, ILL.—When Alberto-Culver Co. pops up in Wall Street conversations these days, comparisons to Helene Curtis Industries, another Chicago-area toiletries company, are inevitable.

But while some analysts believe Helene Curtis' shining future in health & beauty aids marketing has dimmed somewhat, they say Alberto has a rosy outlook.

The rejuvenation of the company, based in this western Chicago suburb, comes as it jumps into new-product categories—most notably the estimated $100 million women's mousse category (AA, Dec. 12, '83). Since its introduction, Alberto's mousse has grown to rank No. 2 behind leader L'Oreal, and retailers report "vigorous" repeat sales of VO5 mousse.

More recently, Alberto has tried another bold foray, this time into the $150 million men's haircare category, with its introduction of VO5 Mousse For Men (AA, Oct. 22).

Yet, while Alberto remains best known for its VO5 toiletries, tenaciously holding onto small product shares in the estimated $14.8 billion health & beauty aids retail market, the company continues to diversify, notably into household products and leather goods. The results of moving into these territories have been mixed: Sales of Mrs. Dash salt-free seasonings are growing, for instance, while sales of leather boots and designer handbags are sluggish.

Regardless of results, however, Alberto's commitment to diversification is steadfast. Haircare products, which accounted for 53% of sales in 1975, dropped to 38% in 1984. At the same time, household products continue to rise, currently accounting for slightly less than 10% of Alberto's gross sales.

The company's seeming reemergence stems in large part from the unrelenting drive of Leonard Lavin, 65, chairman and president, and the man, most would agree, who runs the company as an extension of his personality. If anyone fits the spirit of the word "entrepreneur," Mr. Lavin does.

Mr. Lavin bought the company in 1955 at a time when VO5 (Five Vital Oils) conditioning hairdressing was its main product. He admits he was looking to test his business wings after graduating from the University of Washington as a journalism major. Alberto-Culver, a small $300,000 California beauty supply company at the time, fit the bill.

From that one product, VO5, he built the company into a $348 million corporation, which he says wouldn't have happened without his strong belief in "good ideas."

"It takes an idea that's worthwhile and an idea that the public will respond to," he says. "You need a product that will fulfill that idea. Then you need a knowledge of advertising, marketing and promotion that will help that idea succeed."

Although the company's product list—not to mention its internal workings—has grown substantially from its humble beginnings, Mr. Lavin runs what still is considered a one-man show.

"I don't think of myself in any particular category," he says, leaning across his desk to better emphasize his point. "I like doing this type of business, I enjoy working with bright young people and I get a kick out of building and growing."

Yet the force of Mr. Lavin's leadership and personality concerns some industry insiders, who privately question what will happen when he retires. Would Alberto-Culver suffer should his guidance no longer be there?

Partly to allay those concerns, Mr. Lavin in recent years has brought more managers into his inner circle by forming an advisory committee of five top vps.

WOULD A BEAR USE MOUSSE?
GROOMING GEAR FOR REAL GUYS. CONSORT.

Chicago Bear Gary Fencik struts his "style" off the field in new print ads for Alberto-Culver's Consort Styling Mousse for men. Bozell & Jacobs, Chicago, handles.

Still, control of Alberto rests firmly with Mr. Lavin, who owns more than 40% of the company's stock. Other top posts also remain in the family. His wife, Bernice, is a vp, secretary and treasurer of the company. His daughter, Carol Bernick, is vp-new business development, and her husband, Howard, is a group vp, most recently in charge of turning around Alberto's ailing John A. Frye Shoe Co. and Phillippe handbag divisions.

It is these last two divisions that continue to be a thorn in Alberto's side when quarterly earnings are totaled. Frye's problems stem from an overabundant supply of women's cowboy boots during the early 1980s, which left the company out in the cold when the prairie look faded. Alberto is determined to turn the division around by introducing new colors, shapes and styles in its future collections.

Changing consumer tastes forced the Phillippe division to return to its forte—traditional, multicompartment leather handbags—thereby writing off its attempt with metallic leather purses, a supposed fad several years ago that never really picked up steam.

Industry observers are quick to say the two divisions are "losers" and the company should dump them and concentrate more on its core business—toiletries.

Yet, despite the well publicized problems with Frye and Phillippe, Alberto's bottom line is healthy. In fiscal 1984, ending Sept. 30, the company reported an 11% sales increase from the previous year to $348.6 million. Earnings rose 16% to $4.5 million.

The increased spending on new-product development hasn't had much effect on Alberto's earnings. A number of industry observers say the company is on sound financial ground.

Indeed, company executives share that optimism and recently declared a three-for-two stock split at Alberto's annual meeting (AA, Jan. 28) to generate more revenue for future growth and acquisitions.

Whatever the case, Alberto's toiletries and household/grocery divisions indeed have been busy. In 1984, it introduced 13 new products, helping to increase fiscal 1985 first-quarter sales by 11% from the same period last year, to $90.5 million. Earnings for the period, which ended Dec. 31, jumped 21% to $1.1 million.

The rapid-fire product pace actually began

ADWATCH

Cola, wine makers race to bottleneck

By SCOTT HUME

The new year has begun with a dead heat in cold drinks.

Coca-Cola and Pepsi-Cola are massing their advertising arsenals for a major go at each other's market share (AA, Feb. 18), and the results from this round of the Cola Wars should be especially interesting.

That's because both Coca-Cola Co. and Pepsi-Cola Co. began the year with nearly identical shares of consumer awareness for their cola advertising.

For ADVERTISING AGE's adWatch poll last month, 1,250 adults were asked to name the soft-drink advertising that first came to mind from all they had seen, heard or read in the previous 30 days. The results: 339 named Coke and 338 Pepsi.

It doesn't get much closer than that.

Except in the wine category.

Gallo and Riunite have been waging a battle for top-of-mind ad recall every bit as fierce as that between the cola giants.

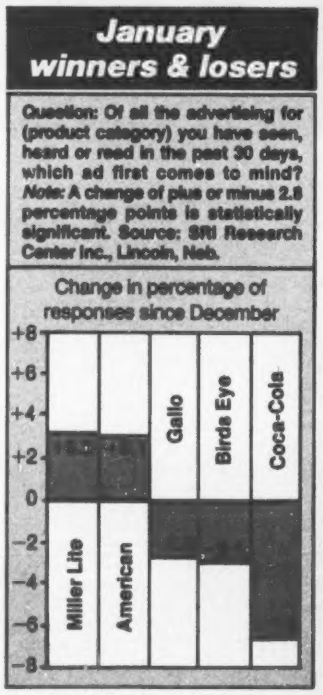
E. & J. Gallo Winery and Villa Banfi USA also have started 1985 dead even. Asked to name the first wine advertising that came to mind, 125 of the respondents named Gallo and 125 Riunite.

Coca-Cola's 27.1% share of first mentions in the January survey represents a decline of seven percentage points from December's poll.

That decline indicates how closely advertising awareness mirrors advertising weight: Coke's December share increase of 3.5 points followed its five-week tv advertising blitz that began in November (AA, Nov. 1).

Although Coca-Cola obviously continued to be a major advertiser after that period, the weight de-

(Continued on Page 68)



Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Note:* A change of plus or minus 2.8 percentage points is statistically significant. Source: SRI Research Center Inc., Lincoln, Neb.

Food giants dish up new marketing moves

Pasta, snacks trigger more spending

By NANCY GIGES

St. Petersburg, Fla.—Top executives from major U.S. food and beverage marketers are expressing renewed commitment to their primary businesses as they plan hefty increases in 1985 ad spending.

Key officials from 13 of the top 100 advertisers made presentations here last week on the state of their businesses to the Consumer Analysts Group of New York.

Increases in marketing expenditures this year may exceed 20% for many of the companies. With few exceptions, the companies expressed continuing interest in growth through acquisition, a trend that led to a number of marriages last year.

New-product plans include:

- Dart & Kraft, Northbrook, Ill.: Geographical expansion of Lender's bagels and Celestial Seasonings teas, the testing of a superpremium ice cream and the introduction of Tupperware Ultra 21 plastic ovenware products.
- CPC's Best Foods division, Englewood Cliffs, N.J.: Completion of national rollout of Thomas' English muffins and possible testing of products emerging from the merger of Mueller pasta and Knorr sauce technologies.
- R.J. Reynolds Industries, Winston-Salem, N.C.: Possible rollout from test of Del Monte frozen dinners, Island Blends beverages and Lite Hawaiian Punch.
- General Foods Corp., White Plains, N.Y.: Geographical expansion of Ronzoni pasta and Entenmann's baked goods, national rollout of Jell-O Fruit & Cream frozen dessert and testing of a new line of frozen desserts.
- Hershey Foods Corp., Hershey, Pa.: The testing of two new confectionery items this year and the move out of the Northeast and Midwest into its first Sunbelt market—Orlando—with its Friendly Ice Cream restaurant.
- Ralston Purina Co., St. Louis: The introduction of three new pet foods—Field Master, Lucky Dog and Puppy Chow Chewy Morsels.
- General Mills, Minneapolis: The rollout of Bran Muffin Crisp cereal, Nature Valley Dandy chocolate-covered granola bars and S'Mores Crunch cereal and the testing of Fiber One cereal.
- Quaker Oats Co., Chicago: Rollout of improved Celeste pizza crust and the introduction of Aunt Jemima Light butter-flavored syrup.

Most of the food and beverage companies have plans to increase marketing and ad spending at least 15% this year, with companies such as Quaker, Reynolds and Pillsbury Co., Minneapolis, mentioning hikes of more than 20%.

Reynolds chairman J. Tylee Wilson said its Kentucky Fried Chicken unit is countering successfully the challenges of chicken products by nonchicken fast-food chains and others.

Kentucky Nuggets, an answer to McDonald's Chicken McNuggets, is favored two-to-one in blind taste tests, Mr. Wilson contended, adding that in the first full month for which data are available, Nuggets produced a 7% incremental sales gain. They also are generating more lunch business.

RJR has spent the last five years since Del Monte was acquired getting that company in shape and ready to make moves that capture attention, Mr. Wilson said. Now set up with a marketing orientation and strengthened by fill-in acquisitions, such as Canada Dry, Heublein Foods, Morton frozen foods and Sunkist, the programs are beginning to bear fruit, he said.

RJR's commitment to Del Monte is reflected in a higher marketing budget, which was $396 million in 1984, a 41% increase compared with '82. It is expected to reach $530 million by 1987.

Despite lower earnings than expected for its 1985 fiscal year, which ends in six weeks, General Foods' businesses are sound, said chairman James Ferguson.

Although powdered beverages began the year strongly, poor weather and so many new entries containing NutraSweet slowed GF's growth. He said Crystal Light still is considered a success with sales of $150 million, and Country Time lemonade has turned around with volume up 60%.

Kool-Aid Koolers, aseptically packaged drinks now in test, are being considered for expansion.

Another strong area has been frozen novelties, with sales of about $140 million. Those sales are expected to double in the next few years. GF plans to roll out Fruit & Cream later this year and test a new line of frozen desserts.

Geographical expansion is planned for both Ronzoni pasta and Entenmann's baked goods as well as Less low-calorie bread.

Mr. Ferguson said fiscal 1986

(Continued on Page 83)

MADISON SQUARE GARDEN NETWORK Four Pennsylvania Plaza, New York, N.Y. 10001 (212) 563-8000

adWatch

(Continued from Page 4)

creased. So, too, did its awareness level.

Now Coca-Cola is launching Cherry Coke and new advertising featuring Bill Cosby, Aretha Franklin, Martin Mull and others. Pepsi will fire back with a horde of famous names that includes Geraldine Ferraro, Lee Iacocca, Joe Montana and Lionel Ritchie.

This is either soft-drink advertising or a Who's Who of universally liked celebrities. Whichever, its effects on consumer advertising awareness in the soft-drink business bear watching.

While the cola boys slug it out, Seven-Up Co.'s 7UP, itself expected to break major new advertising in March, maintained its traditional role as a bridesmaid but never a bride. Its 6.2% share was good enough to keep it No. 3, but Diet Coke is breathing down the neck of 7UP's bottle with 4.2% (its best showing yet).

Diet Pepsi isn't far behind. Its advertising captured 3.7% of first mentions in January.

Runners-up in wine recall last month were Paul Masson (3.8%) and Taylor California Cellars (2.7%), which have had to content themselves with a back-and-forth competition for the No. 3 spot.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising in a variety of product categories that first comes to mind from among all seen, heard or read in the previous 30 days.

In January, 1,250 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points between monthly polls is considered to be statistically significant and attributable to more than variations in the sample.

Among other noteworthy results from January's survey:

- On the eve of breaking its long-awaited new campaign for its High Life brand, Miller Brewing Co. took the No. 1 spot among the **top 10** over-all in awareness. Judging from results in the beer category, Lite beer from Miller accounted for most of that awareness. The January, 1984, adWatch survey was the last time Miller claimed the most memorable advertising.

Other members of last month's top 10 were, in descending order, Wendy's, McDonald's, Coca-Cola, Anheuser-Busch's Budweiser/Bud Light, Pepsi, Burger King, Ford, Chrysler and Toyota.

- Miller Lite also was the newsmaker in the **beer** category, though when respondents were asked to name the first beer advertising that came to mind, Lite finished second (11% of mentions) to Budweiser (13.8%).

Lite advertising's recall represents a 3.2-percentage point increase from December and its best adWatch showing ever.

The January survey was conducted before the Super Bowl, during which Miller aired a Lite spot that departed from its 10-year-old "Lite All-Stars" creative format. A Miller spokesman explained the new "Cavalry and Indians" spot as a purposeful change designed "to make sure everyone's still watching." Judging from last month's recall score, Bob Uecker, John Madden and the rest of the gang still are going strong.

Adolph Coors Co.'s Coors, which had vaulted into the No. 2 spot in December, lost much of that ground in January. Its 8.3% share was only good enough for fourth place, behind No. 3 Miller High Life (9.8%).

- Riding high with its "Something special in the air" theme, introduced last month, American Airlines' advertising awareness rose 3.1 points to 14.5% in January. That propelled it to the No. 1 spot in the **airlines** category, displacing United, whose advertising came to mind first for 13.8% of last month's sample.

The January survey was conducted before American, United and others locked ad horns over new restricted discount fares.

Eastern held the No. 3 spot with 10.9%; Trans World Airlines ranked fourth with 7.8%.

- There was some uncharacteristic movement last month in the usually calm **frozen foods** category as the share for General Foods Corp.'s Birds Eye decreased 3.1 points to 10.2%. But its major competitors, Campbell Soup Co.'s Swanson and Pillsbury Co.'s Green Giant, didn't benefit; both also saw slight declines in shares of first mentions. Swanson remained No. 2 with 5.4%; Green Giant's 4.2% kept it No. 3.
- Worth noting is the rapid rise in Sears, Roebuck & Co.'s ad awareness in the **home electronics** category. The nation's largest retailer has given heavy emphasis recently to promoting its array of tvs, stereo systems and tape players, clearly with some effect.

Sears' electronics ads came to mind first for 3.5% of the January sample, placing it second behind General Electric Co.'s commanding 10.1%. Sony trailed with 3.3%; RCA and Whirlpool each garnered 2.3% of mentions.#

'Tinkerer'

(Continued from Page 10)

into place. When they don't, you try to fix them. When they do, it can be enormously rewarding."

Mr. Riordan quickly amended that thought: "That sounds goody-two shoes. There can be disappointments, and you live with your disappointments." Among his, he numbers an idea for regional franchises for *1,001 Home Ideas* (which, with *Health*, comprises Family Media's original nucleus of publications) and the company losing out to Mortimer Zuckerman in the bidding last year for U.S. News & World Report Inc.

"I love the newsweekly field," said Mr. Riordan, "and it's difficult to think we were that close to having one of the great names in American publishing and lost it. . .Memory—'What's too painful to remember, we simply choose to forget.' Barbra Streisand and I go offstage with a buck and wing on that." The latter remark was punctuated with an infectious laugh.

Does Mr. Riordan frown at the idea Family Media is not one of the better-known names in the publishing field? "Even though the company is 15 years old, the latter-day Family Media, dating to the acquisition of *Ladies' Home Journal*, is not quite three years old. Give us time, give us time. We're in no rush to publicize ourselves. I think our purpose is to publish, as opposed to publicize."

Not that Mr. Riordan has anything against parties and publishers' letters, "it's just that we're not trying to grab headlines all the time. It's just that we'd rather grab profits." Again, the infectious laugh.

Speaking of profits and where they go, Mr. Riordan, it could be said, is Mr. Family Media, owning, as he put it, "a little short of" 85% of the privately held company, with the remainder owned by the estate of Mr. Geffen and some of his former associates. Even so, he lavishly praises the company's staff as "simply wonderful people," and downplays his own role: "Woody Allen said, 'Ninety-five per cent of success is showing up every day.' I think he said that—if he didn't, I did."

What next for Family Media? While the two recent acquisitions mean the company will be "a little quiescent for a shortish while" in that arena, Mr. Riordan said, there are plans for new advertising combination buys (*e.g.*, possibly *Health*, *Savvy* and *World Tennis*, or *LHJ*, *Health* and *Savvy*); a test of a mail-order book operation, under the name Family Media Communications; the start of the company's own subscription fulfillment center, in Palm Coast, Fla., and financing, with George Banta Co., Menasha, Wis., and the start-up of Digital Prepress Center, Yonkers, N.Y., which operates an electronic prepress center for printing magazines and catalogs.

"I'm really less concerned with what I'm known as than with what I'm doing," said Mr. Riordan.#

Buyout spurs unit's growth

By JACK HONOMICHL

CHICAGO—Information Resources Inc., the fastest-growing U.S. marketing and advertising research company, is on the verge of another major surge of growth—the acquisition of Management Decision Systems, Waltham, Mass. (AA, Feb. 21). Combined, the two companies had revenues of $60.8 million in 1984.

The proposed deal, sealed with a letter of intent signed on Feb. 15, calls for an exchange of stock that would result in a purchase price of about $30 million. MDS '84 revenues were $25 million.

IRI, which had an extraordinarily successful placement of public stock in '83, was founded in '77 and has enjoyed impressive growth ever since. Its revenues last year were $35.8 million.

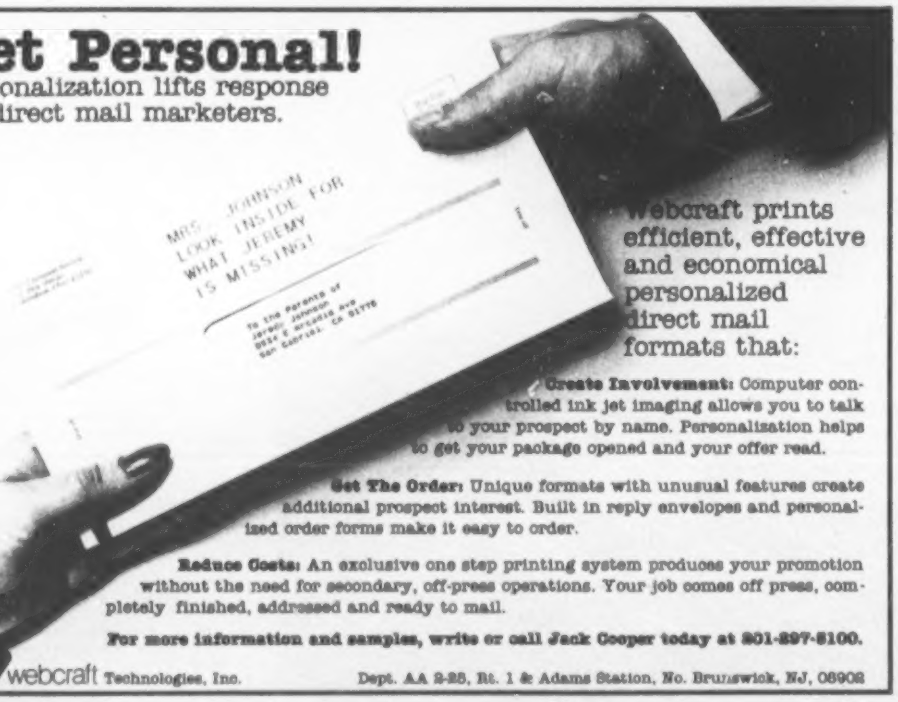
The main IRI service is BehaviorScan, a network of controlled test markets used for new-product test-marketing and advertising-effectiveness tests.

MDS was founded in 1967 by John Little and Glen Urban, two professors at the Massachusetts Institute of Technology, and Len Lodish, a professor at the University of Pennsylvania's Wharton School. They, plus a group of key employes, own stock in what is now a closely held, private corporation.

Their company is involved in two main activities. One is the marketing of information services (about 70% of total business), including forecasting, modeling and related analytical software services. MDS' other main area of activity is through its consumer research division (about 30% of its business), the main services of which are Assessor, a simulated new-product test-marketing service, and Defender, a model and market-measurement system for determining best response to a competitor's new product.

MDS will continue under current management in Waltham as a wholly owned subsidiary of IRI. John (Jay) Wurts, 37, continues as president.#

Get Personal!
Personalization lifts response for direct mail marketers.



Webcraft prints efficient, effective and economical personalized direct mail formats that:

Create Involvement: Computer controlled ink jet imaging allows you to talk to your prospect by name. Personalization helps to get your package opened and your offer read.

Get The Order: Unique formats with unusual features create additional prospect interest. Built in reply envelopes and personalized order forms make it easy to order.

Reduce Costs: An exclusive one step printing system produces your promotion without the need for secondary, off-press operations. Your job comes off press, completely finished, addressed and ready to mail.

For more information and samples, write or call Jack Cooper today at 201-297-8100.

Evinrude revs up new pitch

By LAURIE FREEMAN

Evinrude Outboard Motors is gearing up for the 1985 sport fishing season with its first national tv campaign in five years.

The Milwaukee-based division of Outboard Marine Corp. and its agency, Freckmann, Pedderson & Prom, have produced four 30-second tv spots.

Each of the commercials is targeted to one specific group of boaters. All four tie in with Evinrude's supplemental consumer magazine ads.

The estimated $2 million campaign, themed "Evinrude performance," breaks March 10 during the Nashville Network's "Country Sportsman." The spots will air only on that cable channel "because the network has a heavy audience concentration in the north central and southern markets Evinrude wants to reach," said Ron Pedderson, exec vp at the agency.

Evinrude's campaign goal is to lure boaters in three different sport fishing segments: Bass boaters; family-oriented, weekend anglers, and "big water," or offshore, fishing enthusiasts.

The bass boaters are considered the "single most important market" because these sportsmen are looking for performance-oriented motors, Mr. Pedderson said. Bass fishers buy the lion's share of the high-powered, V-6 outboard motors sold each season.

The "Bass boat" spot focuses on a specific Evinrude product, the XP-150 motor. The commercial uses rear views of the motor to demonstrate its high-speed performance.

"Inland fishing" is a family-oriented spot. It shows three generations of a family out for a day of relaxed fishing. Generally, boaters in this category buy 35-horsepower engines to drive the family rowboat.

"They're looking for an engine that is economical and will keep running without trouble," Mr. Pedderson said.

For the "Off-shore" spot, Evinrude engine reliability is stressed, because anglers in the coastal, salt-water markets "look for engines that will hold up in corrosive ocean waters," Mr. Pedderson said.

The fourth commercial is a general retail spot for in-store dealer promotions. "It's a shouter, designed solely to get people into Evinrude stores," he explained.

Competition in the outboard motor category is stiff between Evinrude and Mercury Marine, Fond du Lac, Wis., a unit of Brunswick Corp.

A suit is still pending in federal court on Outboard Marine's refusal to allow boats equipped with Mercury engines to compete in the Formula 1-Outboard Racing Circuit (AA, Aug. 27).

Brunswick remains the biggest spender in the segment, putting about $4 million into advertising its Mercury and Mariner motors last year. Mercury Marine has three agencies: Carmichael Lynch Advertising, Minneapolis; Gardner Advertising, St. Louis, and Martin Williams Advertising, Minneapolis.#

Ad-dollar levels build yearend gains

New York—Advertisers' 1984 spending in daily newspapers ended with increases over comparable '83 levels in most major categories, says the Flash Report.

The report on newspaper advertising investments in major market dailies is prepared for Advertising Age by Media Records.

For the holiday shopping season, department stores, the largest users of newspaper ad space, hiked investments 18.7% to $111.8 million in November and 17.3% to $117.4 million in December.

Food stores increased spending 8.9% to $27.1 million in November and 10.6% to $27.9 million in December. The radio-tv-phonographs-record category increased spending 36.1% to $23.4 million in November and 14.1% to $25.7 million in December.

Advertising for new passenger cars increased 49.8% to $15.3 million in November and 42.2% to $11.2 million in December.

Cigaret companies continued to increase spending in newspapers above '83 levels, with November up 70.7% to $7.9 million and December rising 46.1% to $7.1 million.

Airlines hiked spending 9.9% to $12.9 million in November and 25% to $7.9 million in December.

Other categories registering gains included: Publishing and media advertising, up 31.5% to $17.9 million in November and 29.4% to $9.95 million in December; soft drinks-diet and nondiet, up 7.9% to $524,360 in November and 86.5% to $965,081 in December; sporting and leisure time equipment, up 17.3% to $683,441 in November and 196.2% to $746,080 in December, and cosmetics, makeup and manicure products, up 262.6% to $291,136 in November and 127.7% to $153,131 in December.

The coffee and tea category showed a 48.5% decline in November to $120,874 and a 43% increase to $78,824 in December.

Categories registering declines in both months included: Soaps, cleansers and polishes, down 72.1% to $49,026 in November and 86.6% to $24,709 in December, and cold, cough and sinus remedies, down 34.5% to $47,975 in November and down 100% in December.

Headache remedies and sedatives category showed no activity.#

Pumping Air Jordan ads

Nike's new Air Jordan basketball shoes and apparel have raised a few hackles in the National Basketball Assn. But Nike plans to use the clamor to its advantage in advertising. *See Page 4.*

A vote for McKinleyana

Prevention publisher Marshall Ackerman is always on the lookout for McKinleyana. That's McKinleyana, as in William McKinley, who was president at the turn of the century. Mr. Ackerman has what could be the country's largest collection of McKinley artifacts. *See Page 7.*

Rocking fashion world

The cutting edge of fashion slices across the floor at Manhattan's Danceteria, as Steven Lewis (l.) creates fashion extravaganzas on bare-bones budgets. *See Page 41.*

NEW YORK'S
ROCK FASHION
PRINCE

Stereotype

"Yes, suh—everybody's on the go again," says the grinning porter as he carries a white man's bags in an ad for the NHM Hotels. This ad is one of many ethnic stereotypes to be examined at a May 5 conference. *See Page 42.*

A comet's marketing tale

Halley's Comet, that ethereal phenomenon that returns every 76 years, this year will be put to a more earthly task—selling products. *See Page 43.*

Special Report

Costly and time-consuming, conventional test-marketing is more challenging than ever. Companies chance exposing new products to competitors as they fight for shelf space. Test-marketing consultants are broadening their range of research tools and preparing to meet needs of service industries. *Test-Marketing Special Report, starting on Page 15.*

Presstime

Y&R parcels out power

New York—Young & Rubicam USA, which had been expected to name a new president to succeed John McNamara (AA, Feb. 11), has instead expanded the responsibilities of the heads of the $1.6 billion Y&R division's three components. John McGarry Jr. becomes president, a new post at Y&R/New York, a $700 million agency, from exec vp-general manager. Roby Harrington, exec vp in charge of Y&R/Chicago, Detroit and San Francisco, adds the new title of chairman of the National Group of Agencies. Arthur Klein, president of Y&R's Direct Marketing Group, now will have Sudler & Hennessey also report to him.

Writers vote on pact...

Hollywood—The 8,700-member Writers Guild of America is scheduled to vote March 1 on whether to strike or accept a new three-year contract covering theatrical films and entertainment tv shows. The current contract expires today. Home video residuals are a sticking point in negotiations so far. WGA struck for three weeks after its contract expired in 1981.

...While actors OK strike

New York—Members of Screen Actors Guild and American Federation of Tv & Radio Artists have authorized their negotiating team to call a strike if necessary "to achieve a fair contract" for people who appear in radio and tv commercials. Talks with sponsors' representatives continue on a day-to-day basis. Talent seeks raises for spot and network runs, while the ad industry has asked for a rollback and concessions on 15-second spots. The old pact expired Feb. 6.

De Lorean fund razing

Los Angeles—John De Lorean's effort to raise money through newspaper ads to pay for his successful defense of drug trafficking charges (AA, Nov. 12) apparently is being discontinued because of poor response. A page ad in the *Los Angeles Herald Examiner* brought only a few thousand dollars in contributions. Cozad/Benskin & Associates, Encino, Cal., placed the ad.

McEnroe gets reflective

Beaverton, Ore.—Nike will demonstrate the rarely seen human qualities of tennis star John McEnroe in a new tv spot breaking in May for its McEnroe-designed tennis apparel line (AA, Jan. 21). The testy tennis pro is shown dressing as he ruminates over an impending match. Chiat/Day, Los Angeles, handles.

Honda thins Accura field

Gardena, Cal.—American Honda Motor Co. has named three finalists for its Accura line of upscale cars to be introduced in 1986. The finalists for the $10 million account are Backer & Spielvogel; Bloom Agency, and Ketchum Advertising. All have promised to open a Los Angeles office if selected. Needham Harper Worldwide continues to handle Honda's existing line.

Mennen campaign for Real

Morristown, N.J.—Mennen Co. will introduce Real antiperspirant nationally in March with an

Celebrity lines tough to draw

By STEVEN W. COLFORD

Washington—In Bud Light's pool of introductory commercials, a hockey goalie, badly beaten by a sneering opponent early on, recovers sufficiently later in the game to make the big save that defeats the enemy and turns his glum coach's snarl into an approving nod.

Nice commercial by Budweiser, nice save by the goalie, but small-time compared to the save that the beer industry—and wineries, to a lesser extent—will have to make if they want to keep the right to use names or faces in their spots.

See, the goalie in the Bud Light ad is Ron Graham, not exactly a household name but, in real life, a former National Hockey league goaltender of some renown, surviving several seasons with the Los Angeles Kings and Boston Bruins, among others.

And Mr. Graham is the kind of actor/athlete who could confound the Treasury Department's attempt to redefine the kind of celebrity who might be barred from appearing in alcohol ads (AA, Feb. 25).

Simply asked, is Mr. Graham an actor entitled to earn a living emoting on the screen, or is he merely an ex-jock draining the last few dollars from his history and reflexes before they both desert him for good?

If the former, then all is well, but if federal regulations now under review interpreted Mr. Graham as being a former athlete, his career acting in beer spots might be over (as is the "Bring out your best" campaign, having been replaced by commercials themed "Give me a light—Bud Light").

Another current example of the Gordian Knot that the Bureau of Alcohol, Tobacco & Firearms may be trying to unravel is the newly broken Coors campaign that mixes imagery of snow-topped, wind-dusted mountains with a handsome spokesman, Mark Harmon, better known as Dr. Robert Caldwell of NBC-TV's "St. Elsewhere."

But, in a previous life, Mr. Harmon, the son of former University of Michigan All-American halfback Tommy (Ol' 98) Harmon, was an athlete of some notoriety, having quarterbacked UCLA teams of the early 1970s to modest accomplishments.

Certainly, Mr. Harmon is an actor, but if deemed by federal regulators to be an ex-athlete, he could join Mr. Graham on the sidelines of beer commercials.

It all depends on how widely the BATF attempts to broaden its current prohibition on ex-athletes performing in alcohol ads.

If the agency decides not to ban all celebrities, only certain categories such as active and former athletes, rock music stars and others with a particular appeal to youngsters, then the federal agency will have to determine where to draw a line of demarcation.

If, in the case of athletes, it tries to draw that line between amateurs and professionals, then a Mark Harmon, a Bruce Jenner or a—perish the thought—Mary Lou Retton would be free to hawk suds or chablis while a relatively anonymous, former pro—Mr. Graham, for example—would be disqualified.

The chain of permutations and combinations seemingly never ends: What about Frank Gifford, who retired way back when as a New York football Giant but whose face has gained household familiarity thanks to ABC's "Monday Night Football" and—you guessed it—Dry Sack sherry ("Try it on the rocks, too")?#

Dry-sacked?

Would athlete-turned-sportscaster Frank Gifford face banishment to the ad sidelines if the government decided to ban ex-athletes and celebrities from appearing in ads for alcoholic beverages?

Miller adds suit to Landau woes

By ROBERT RAISSMAN

Miller Brewing Co. has filed a $19 million federal suit alleging that Robert Landau, president of the bankrupt Robert Landau Associates, fraudulently diverted the brewer's payments for promotional work to cocaine, racehorses, apartments and cars.

The suit filed last week in Milwaukee also named as co-defendants Charles Lockwood, exec vp, RLA; the New York-based accountancy Eisner & Lubin, and Gerald Marsden, a member of that company's executive committee.

Miller alleges that New York-based RLA engaged in a pattern of fraud that led Miller to advance RLA the $2 million (AA, Oct. 11).

Miller charges that all the defendants in the suit led Miller executives to believe that RLA was on solid financial ground when the sports marketing/sales promotion agency was on the verge of bankruptcy.

The suit alleges that Mr. Landau bought cocaine, homes and horses with the money, and hired his uncle and paid him $100,000 a year to act as a psychiatric consultant to RLA employes. Landau and E&L officials could not be reached for comment on the Miller suit.

RLA filed for reorganization last September (AA, Sept. 20).#

Battle for shelf space

By Laurie Freeman

On the obstacle course of test marketing, marketers face a hurdle potentially larger and more expensive than protecting test products from the competition's prying eyes: Persuading retail buyers to place those products onto supermarket shelves.

For retailers, the cost of handling new products has increased sharply as more new products are introduced into limited supermarket space. Each day, as many as seven new products are introduced across the U.S., according to Dancer Fitzgerald Sample's "New Product News"; that compares with only three a day in 1980.

Caught between this deluge of new products and rising handling costs, retailers and wholesalers are reevaluating buying policies and reviewing purchase orders of new and familiar products.

One result of the scrutiny: In return for placing new products on shelves, buyers are demanding slotting allowances from marketers.

Slotting allowances cover cash discounts and free case goods as well as placement allowances. Placement allowances usually cover the cost of entering new product information into a store's computer and placing the product in the warehouse and on store shelves.

Although such placement practices have existed for years, buyers recently have become more vocal.

The push for better incentives was inspired, in part, by Cincinnati-based Kroger Co., the nation's second largest publicly held grocery chain with 1983 food sales of nearly $14 million in its 1,500 stores. Last year, Kroger became the first chain to state officially that it would ask marketers for a slotting allowance on new products—but only in one market.

The experimental policy is in effect only in the chain's 103 Houston stores. There Kroger is charging marketers an upfront "admission price" of $15.75 per new product per store.

Kroger plays down its position. "Most manufacturers recognize that [our] costs have gone up, and they're including that additional cost in their promotional allowances," says Audrey McCafferty, public information manager for Kroger.

While Kroger apparently has not asked major marketers, such as General Mills, Pillsbury and Procter & Gamble, to increase their promotional allowances, one buyer says brokers and smaller marketers are paying higher placement allowances. Kroger officials have no comment on whether they plan to expand the formal slotting allowance policy beyond the Houston market.

Other grocery chains have not yet stated slotting allowance policies as publicly or as bluntly as has Kroger. One buyer says many grocers, especially large wholesalers, have demanded new product incentives for years, but never put the policies on paper.

But with widespread agreement that the retail grocery industry must band together to protect its turf—and its traditionally small profit margins—the big chains are considering formalizing their unspoken policies.

"We won't allow the manufacturers to take advantage of us. We make sure they have provided extra [money] to cover the cost of handling new products," says Michael Rourke, vp-marketing for the Great Atlantic & Pacific Tea Co.'s A&P food stores, Montvale, N.J. A&P, with 1983 sales of $4.3 million in its nearly 1,000 U.S. stores, is the nation's sixth largest public grocery chain.

"New products are costly—we have to find room on the store shelves and in the warehouses," he says. "Other products have to be discontinued to make room for new items, and it costs us a lot of money to handle them."

According to a northeastern broker, marketers already have become more sensitive to retailers' rising costs. "If there aren't enough allowance dollars to go along with the test market of new products, it's difficult to do a new product introduction correctly. Manufacturers are recognizing that," he says.

"By and large, manufacturers are—and should be—providing supermarkets with sufficient incentives to stock good products," says Gerson Barnett, senior vp-grocery operations, Giant Food, Landover, Md.

Although Giant has no formal policy on slotting allowances, Mr. Barnett says such fees are an integral part of the business.

"When a manufacturer wants to introduce a new product, it comes in with allowances," he says.

A Topeka, Kan.-based paper-products buyer says, "If a company wants to just put a product on the grocery shelf, we want no part of that. But if the company comes in with the proper backing, like coupon promotions and tv [commercials], then we're interested."

While retailers say they negotiate for higher placement fees, most admit they wouldn't refuse to take a new item, even if the company doesn't provide an allowance. No store wants to be without the latest new item and no one wants to drive customers away by not carrying the desired product.

At the same time, retailers aren't afraid that requests for stricter slotting allowances will deter future in-market test marketing. They say marketers always will need test market information.

"The final test of a product comes when that product is placed on supermarket shelves. There's no way to get around that," A&P's Mr. Rourke says.

If a product has not been test marketed, some grocery chains will go so far as to claim they don't have room for it.

"The cost of yanking a product after a national rollout is too high for both us and the manufacturer. A company really needs a real world handle on it before distributing a new item nationally," says Dick Fredericksen, vp-head grocery buyer, Lucky Stores, Dublin, Cal. His 600-store chain, with 1983 sales of $5.5 million, is identifying new-item placement costs, but does not now ask for placement allowances.

Recently, however, some buyers have questioned the accuracy of both out-of-market and in-market testing. They say the simulated test market is not the best vehicle to test a new product properly.

One midwestern wholesaler criticizes in-market tests. "Manufacturers don't get an accurate reading on their test products because they baby sit the items to make sure they sell."

"When I'm reviewing test market data, it bothers me that I don't know how the test was conducted," says a Topeka, Kan.-based buyer. "[The product] could have received heavy couponing, or buy-one-get-one free sales, which is very misleading."

Despite all their concerns, most supermarket chains still welcome new products with open arms. "From our standpoint, when a company tests a new product, they make it sell," says a Kansas City, Mo.-based buyer for a major national chain. "They come in with good allowances, both advertising and promotion and they force the product down consumers' throats."

And although, according to industry sources, the debate over test marketing and slotting allowances shows no signs of abating, on one point both retailers and marketers agree: New products are the lifeblood of the industry.

Exploring new services

(Continued from Page 15)

since 1981, and Merit paper towels, in test since 1982.

White Plains, N.Y.-based General Foods' manager of corporate communications Ken Defren says it would be simplistic to characterize sell-in as going out of style.

"At General Foods, we simply have too great a variety of products to make such a generalization," Mr. Defren says.

"On one hand, there are a lot of products going directly national and forgoing test marketing entirely. But there are other cases in which test markets are lengthened for one reason or another. Each product requires individual treatment."

Nonetheless, there's no question that alternative test market techniques, particularly scanner-based systems, have created a fundamental shift in the package goods industry's approach to test marketing.

IRI has grown steadily during the past five years and counts virtually all the major package goods marketers among its clients. A.C. Nielsen Co. is preparing to launch its new Testsight service in April. And Burke Marketing Services, in conjunction with Arbitron Ratings Co., New York, recently announced a new system called ScanAmerica.

A key reason for the popularity of these electronic systems is their ability to measure a product's performance under alternative marketing plans instead of, in the words of IRI's Mr. Fulgoni, "having to come up with the optimum program up front."

"By the same token," Mr. Fulgoni says, "you should not use these systems blindly."

The now classic dilemma is the question of how accurately companies can gauge retailers' acceptance of new products and, thus, their distribution potential, without the sell-in.

"A company must be realistic about its distribution potential," Mr. Fulgoni says. "For example, if you're General Mills and you're testing a cake mix, you have a good feel for the level of distribution your sales force is going to get.

"But if you're going into a product category you're not sure of, in those situations, we would also recommend that you get some experience with your own sales force."

Spokesmen for several large package goods companies agree.

"I think sell-in continues to be valuable in cases where one of the major marketing problems is going to be gaining sales acceptance," says Jan Tritsch, director-technical resources for Pillsbury Co., Minneapolis. She says this sales acceptance problem includes quality of distribution (for example, how many sizes or flavors a retailer is willing to stock) as well as quantity.

Dan Ailloni-Charas, president of Stratmar Systems, a New York marketing services company, says trade acceptance is critical to most new product introductions. "To test without relevance to the trade is foolish," he says.

Larry Stanek, vp and director-marketing information for Kraft, Glenview, Ill., says there's plenty of room for both sell-in and electronic minimarkets. According to Mr. Stanek, selectivity is the key to the proper choice.

"We use sell-in as well as controlled testing," Mr. Stanek says. "Sometimes we do both at the same time. We may be doing a controlled test to test advertising weight and copy or pricing variables and a sell-in to determine distribution build.

"We see one as complementing the other, which enables us to respond to opportunities as quickly as possible and preempt competitive response as much as possible."

Pillsbury's Ms. Tritsch, who says her company also uses a number of proprietary test market techniques, concurs.

"The general point to be made is, there are tradeoffs, advantages and disadvantages, to both scanners and sell-in test markets," she says. "One is not 'better' than the other. It depends on what you're trying to accomplish."

With its April launch of Test-

Ted mulls ultimate buy—CBS

New York—Is Ted Turner serious?

That question drew cheers and sneers from Wall Street to the farthest reaches of the entertainment industry after word leaked out last week that the cable entrepreneur was intent on making a run at a hostile takeover of CBS Inc.

If Mr. Turner and his Atlanta-based Turner Broadcasting System can pull it off, it would be by far the largest media company takeover ever. CBS is valued by analysts at $4 billion or more.

While the analysts agree that Mr. Turner would need far less than $4 billion to execute the takeover, there is clearly no quick consensus on just how much the takeover bid would cost.

A Turner takeover, however, would have dramatic impact on CBS management structure and the nature of programing at CBS-TV Network. It would also give Mr. Turner an unparalleled concentration of power over ad dollars going into various forms of tv.

In a terse, prepared statement last Friday, Mr. Turner stopped short of confirming or denying a run at CBS.

He acknowledged that his Washington attorney for Federal Communications Commission matters "made general inquiries at the FCC concerning broadcast license transfer procedures. These were of a general nature and not related to a particular broadcast group."

On the face of it, Mr. Turner, through his WTBS superstation and Cable News Network operations, would take in more than half of all basic cable ad spending, while through CBS-TV Network he would control more than one-third of network tv ad revenues.

That fact alone has led some experts to predict that, presuming Mr. Turner's bid is sincere, the takeover process could become long and tedious. Even after the FCC decides whether the combination of Mr. Turner's tv station and the CBS-owned stations violates federal regulations, the Justice Department is expected to investigate antitrust aspects of the concentration of media might through a combination of the two corporations.

Observers were generally split over whether Mr. Turner believed he has a realistic chance to execute a hostile takeover, or if he was simply orchestrating another of his famous publicity stunts.

What has emerged, however, is an analysis that Mr. Turner is not following an either/or process. This is not just a publicity stunt, although there will be considerable publicity, observers believe. And, while it is uncertain whether Mr. Turner has the capacity to execute the takeover, there will certainly be considerable—and most likely favorable—publicity.

For years, Mr. Turner has said his primary goal was someday to own one of the Big 3 tv networks. Two years ago, Mr. Turner approached CBS about merging the two companies, but according to CBS, they turned him down.

The decision to make his move now and to take aim at CBS is influenced in no small way by the current moves by Sen. Jesse Helms (R., N.C.) and his Fairness in Media organization to acquire enough CBS stock to force a change in the ideological slant of CBS News.

While Mr. Turner and FIM have denied any connection, they are clearly complimentary to each other. Mr. Turner's persistent criti-

Miller legal papers take high life of RLA to task

By ROBERT RAISSMAN

Miller Brewing Co.'s $19 million lawsuit against bankrupt Robert Landau Associates (AA, Feb. 28) relates a tale of high-living excesses, replete with charges that Miller's money was misspent as the sports-related sales promotion company's founder pursued cocaine, racehorses, luxury homes and autos, often from posh hotel suites.

The disclosures come in a remarkable court document that tells, from Miller's viewpoint, how Miller execs were denied access to audited Landau financial statements last May after they sought reassurances about Landau's net worth.

The court records state that instead of showing Miller the books, Robert Landau and Charles Lockwood, RLA president and exec vp, respectively, asked their accountants to write Miller and (1.) reassure them that RLA was in solid financial shape, capable of servicing Miller, its account since 1981, and (2.) convince Miller that RLA should receive a substantial advance. The advance was to cover third-party vendors who were working on Miller promotions as well as other Miller-related expenses.

The letter, from the accounting firm of Eisner & Lubin, was followed by calls to Miller execs by Messrs. Landau and Lockwood and Eisner & Lubin partners, including Gerald Marsden, a member of the firm's executive committee. In these calls, they sought to reassure Miller executives further about RLA's financial strength.

With these reassurances in mind, Miller contends, it sent a check for $1.3 million on June 1, 1984, to RLA and subsequently continued to make prepayments, eventually totaling $2 million, to RLA. The funds were to be used to administer the Miller programs.

Why Miller executives became suspicious about RLA's handling of this money is detailed in the Milwaukee-based brewer's lawsuit. The suit names Mr. Landau, Mr. Lockwood, Mr. Marsden and Eisner & Lubin as defendants. Mr. Landau and Mr. Marsden did not return calls from Advertising Age, and Mr. Lockwood could not be reached for comment.

Landau has 30 days to respond to the suit, which was filed Feb. 21.

The suit charges misappropriation of payments Miller made to RLA to administer the brewer's pro-

Pepsi finds Ferraro fuss festers

THE one-calorie CHOICE OF
A NEW GENERATION™
“CELEB[illegible]GERALDINE FERRARO”
diet pepsi

It's Sunday morning and the first woman candidate for Vice President of the United States is relaxing with her daughters. Their interchange over a shared newspaper reveals a close family, warm relationships and the easy wit that characterized Ferraro's valiant campaign. The integrity and character of this amazing woman are expressed in her choices. And making an intelligent choice is what Diet Pepsi is all about. Diet Pepsi. The one-calorie choice of a new generation.

Geraldine Ferraro appears in this Pepsi spot but doesn't make an outright product endorsement.

By NANCY GIGES

Pepsi-Cola USA attempted to blunt some of the stinging criticism of the appearance of Geraldine Ferraro in a Diet Pepsi spot (AA, Feb. 18, *et seq.*) by previewing the commercial and by explaining that the first female vice-presidential candidate was never asked to endorse the product.

The company advanced a press conference, planned for this week, when it learned the three tv networks were planning stories on Ms. Ferraro's decision to appear in the spot with her daughters, Laura and Donna Zaccaro.

“We never asked her to hold a can of Pepsi,” said Roger Enrico, president, Pepsi-Cola USA, responding to whether she refused to make an endorsement. “I would presume she would have been more uncomfortable with a blatant product endorsement.”

At the press conference in New York Feb. 28, Pepsi also showed new spots for Mountain Dew and Pepsi Free breaking within the next week, as well as spots for flagship brand Pepsi that began airing last week. BBDO, New York, is the agency for Pepsi, Diet Pepsi, Mountain Dew and Pepsi Free.

The Diet Pepsi series, breaking today, features the two Super Bowl quarterbacks, Joe Montana and Dan Marino, in a friendly verbal exchange that takes place in front of a Diet Pepsi vending machine. Another spot shows singer/actress Diahann Carroll, now in ABC's “Dynasty,” discussing how she makes the important decisions affecting her career.

Mr. Enrico said he would like to have a pool of at least a dozen spots featuring “the most interesting people we can get,” but he would be satisfied with half a dozen. He still is hoping to work out deals with Lee Iacocca, the Chrysler Corp. chairman whose autobiog-

Hot sounds set tone for summer

By FRED DANZIG

New York—Hard on the heels of Super Bowl XIX there is Pepsi II. In Pepsi I, a year ago, remember, it was Michael Jackson's supercommercials for Pepsi-Cola that broke the mold, as Pepsi reached out to a whole new generation (kids) with breakthrough, extravagantly produced commercials.

True, as some critics pointed out, Michael didn't linger long on the screen. And true, with all the money they paid him, he still didn't even lift a bottle or can to his lips. But did it really matter? Look at what Pepsi accomplished in the marketplace last year with its Michaelink and you know the message went out loud and clear.

Enter Pepsi II: Lionel Richie for Pepsi. The new campaign's world debut on the glittering CBS Grammy awards special last Tuesday had to be turned into a media event because, well, because the Jacksons set a precedent last year. And now we're all hooked, all watching, all excited, all spouting opinions. Pepsi must love every second of it.

There are three elements in the Lionel Richie music video, “Style,” “Heart” and “Beat.” We see the mellow-voiced balladeer cozy up to a little girl, visit Grandma and strut through a swarming army of his fans. Yes, the Little Girl spot immediately recalls Coca-Cola's Mean Joe Greene & the Little Kid spot of a few years ago. And yes, the Grandma spot could work just as well for Hallmark or AT&T Long Distance. And, of course, in that performance spot, there are just too many people milling around on that small screen to

Seagram plan tests taboos

By GAY JERVEY

New York—Joseph E. Seagram & Sons, knocking on tv network doors last week with a bold comparative tv ad plan, is stirring up intense reaction from the nation's capital to the headquarters of its beer and wine competition.

Seagram is asking the networks to bend, if not abandon, their taboo on distilled spirits advertising just when the anti-alcohol advertising movement has Washington under siege.

Seagram's plan for “equivalency” messages on tv, backed by a reported $10 million ad budget through Warwick Advertising here, would tell the public that 1.25 ozs. of whisky contain no more alcohol than a can of beer or a 5 oz. glass of wine.

Network sources agree that the tone of the campaign will be critical in determining its acceptance. “If it's very, very clear that they [Seagram] are not saying it's okay to drink whisky, but more a message of awareness of how much you can drink, whether or not you're drinking beer, wine or

Fresh burst of new products

Cosmetics blush

By PAT SLOAN

Boca Raton, Fla.—The pace of new-product introductions is expected to quicken in the cosmetics and toiletries industry this year.

New-product debuts were off an estimated 15% last year, but such major marketers as L'Oreal, Avon and Prince Matchabelli are more bullish in 1985.

L'Oreal has new hair-coloring concoctions on the way; Avon is calling up a $25 million ad campaign, and Prince Matchabelli is expanding beyond fragrances into the skin and suncare categories.

Despite such upbeat revelations at the annual Cosmetic, Toiletry & Fragrance Assn. meeting here, there were expressions of increasing concern about flat sales, intensified competition and the negative effect of the dollar's strength on the import/export flow.

In hair coloring, a 2% decrease in category sales during 1984 reportedly has steered Clairol away from new-product introductions, at least for the first half of 1985. But Cosmair's L'Oreal division, with a 1% gain in hair-coloring share, will introduce this month Performing Preference, a conditioning hair coloring, and Advantage, a semi-permanent hair coloring targeted against Clairol's Nice 'N Easy, Cosmair president Jean Levy confirmed.

Performing Preference will be backed with tv and print ads created by McCann-Erickson, New York, which also is handling a new

There's Pralines 'N Cream on B-R's suit

By RUTH STROUD

GLENDALE, CAL.—Baskin-Robbins Ice Cream has taken on Pillsbury Co.'s Haagen-Dazs in what promises to be the first sally in their escalating ice cream war.

The 3,000-store ice cream retailer is suing Minneapolis-based Pillsbury in a federal court in Dallas, claiming that the food giant's subsidiary infringed on B-R's popular trademark product, Pralines 'N Cream, by naming a flavor Pralines & Cream.

The two had been haggling over the issue for four months before the suit was filed late last month. The legal action came "as a total surprise," said Johnny Thompson, director of public relations at Pillsbury.

"We feel [the name is] generic," he said. "How better do you describe something that has pralines in it if it's ice cream?"

Besides, he continued, there are other ice cream companies, such as Schrafft's Ice Cream Co., Pelham, N.Y., that have a Pralines 'n Cream flavor.

It's a mystery why B-R is picking on Pillsbury, Mr. Thompson said, "except that when you're the tall man in the silk hat, the boys with the snowballs can't resist trying to knock [the hat] off."

Baskin-Robbins president-ceo Ronald Marley called the suit "anything but frivolous." On a nationwide tour to promote the company's move toward a more sophisticated image and audience (AA, Feb. 11), he said his company has had discussions with other ice cream concerns "at least 200 times" in the past regarding unauthorized use of the pralines name "and never had to go to court.

"We thought they would change their name, too. Everyone else has," Mr. Marley said, adding that B-R's lawyers are currently negotiating with Schrafft's about changing the name of the latter's praline flavor.

The Baskin-Robbins ceo called Pillsbury's contention that it believes the flavor was generic "silly. . .[when] it's a matter of record that the federal government issued us a patent on it."

The suit is far more than a quest for publicity, Mr. Marley maintained. It's really a matter of economics. Pralines 'N Cream, invented by company co-founder Irv Robbins 15 years ago, is Baskin-Robbins' best-selling flavor, even surpassing vanilla. The company sells about 5 million gallons annually, representing more than 10% of its $470 million in revenues.

Haagen-Dazs' Pralines & Cream flavor "is substantially different" from B-R's Pralines 'N Cream, Mr. Marley claimed, saying, "We think it's a rather bad product. We don't want our name on it."#

AA adds Skenazy

NEW YORK—Lenore Skenazy has joined the ADVERTISING AGE staff here as a reporter. She will cover popular culture and trends for AD AGE *Thursday* and its "Currents" section.

L. Skenazy

A 1981 graduate of Yale, where she was an American Studies major, Ms. Skenazy served for a year as a reporter at WNYC, New York's National Public Radio station. After receiving her Master's of Journalism degree (Columbia, '83), she traveled as a free-lance writer to Turkey, in search of her "roots," and to Israel, where she worked in the press office at the Hebrew University of Jerusalem.

Ms. Skenazy returned to the U.S. last fall to resume the free-lance writing that led to her being invited to join the AA staff as a full-time reporter. She is a native of Wilmette, Ill.#

Magazines react to single-copy sales slump

By STUART J. ELLIOTT

NEW YORK—The slowing of growth in single-copy sales that has affected many major magazines recently is evident in the latest figures from the Audit Bureau of Circulations.

The per-issue averages for the six months ending Dec. 31 show declines almost across the board (AA, Feb. 25). For instance, of the top 10 consumer magazines by circulation, just two enjoyed single-copy gains: *Ladies' Home Journal* and *National Geographic*, the latter only recently shifting from a subscription-only sales stance. Seven others registered declines, ranging from 0.1% (*Better Homes & Gardens*) to 12.8% (*Reader's Digest*); one, *Modern Maturity*, is available only by subscription.

The softness in single-copy sales has been attributed to publishers' continuing rounds of cover-price increases, the unevenness of the national economic recovery after the recession and a growing attitude among many magazine buyers that a single issue must be really special in order to prompt them to buy. Case in point: *Penthouse*, which has suffered single-copy sales losses for some time, had a 7.9% increase in the six months—during which time there were two issues featuring nude photographs of Vanessa Williams.

To counteract the single-copy sales slowdown, some magazines are moving to emphasize their subscription operations.

Cosmopolitan increased subscription sales in the six months by 22.1%, as single-copy sales fell 9.4%. *People's* subscription sales growth was almost six times its single-copy sales growth (4.5% vs. 0.8%). And *Family Circle* and *Woman's Day*, which in past years were sold almost entirely by single copy, increased their subscription sales during the period by 73% and 26.8%, respectively.

Turning to the total circulation picture, only three of the top 10 magazines reported higher figures: *TV Guide*, up 0.3%; *Modern Maturity*, up 15.4%, and *Better Homes & Gardens*, up 0.2%. By comparison, in the six months ending Dec. 31, 1983, seven of the top 10 showed gains. The seven decliners this time: *Reader's Digest*, down 0.4%; *National Geographic*, down 2.2%; *Family Circle*, down 3.8%; *Woman's Day*, down 7.2%; *McCall's*, down 0.7%; *Good Housekeeping*, down 3.9%, and *Ladies' Home Journal*, down 3.7%. (ABC data do not include as magazines the large Sunday newspaper supplements, *Family Weekly* and *Parade*.)

Of the Seven Sisters women's service books, just one in the top 10, *Better Homes & Gardens*, gained total circulation. The other five there—*Family Circle, Good Housekeeping, Ladies' Home Journal, McCall's* and *Woman's Day*—lost circulation, as did the seventh title in the category, *Redbook*, which was down 0.2%.

Computer magazines, which once routinely registered double-digit percentage gains in circulation, are now reflecting the shakeout in their ranks. Some are actually losing circulation—*e.g.*, *Byte*, down 2.8%; *InCider*, down 4.3%; *Popular Computing*, down 6%—while others are gaining circulation at slower rates—*e.g.*, *Personal Computing*, up 17%, vs. the 106% it gained in the six months ending Dec. 31, 1983; *Infoworld*, up 38.7%, vs. 56.2%, and *Compute!*, up 14%, vs. 247.1%. Some, however, are bucking both trends and are growing strongly: *Family Computing*, up 87.5%, and *Compute!'s Gazette*, up 133.1%.

Speaking of bucking trends, the two largest magazines in the men's sophisticates category, *Playboy* and *Penthouse*, gained circulation during the six months, a reversal from several consecutive periods of losses. *Playboy* was up 0.2% and *Penthouse* was up 7.7%. But most others in the category continued to fall.

Among the newsweeklies, two lost circulation—*Newsweek*, down 0.9%, and *U.S. News & World Report*, down 2.4%—while the third, *Time*, grew by 0.1%.

The business magazines category showed additional strength, as almost every title gained circulation, from *Business Week's* 0.7% to *Inc.'s* 22.4%.

Among magazines in all categories with large percentage gains: *Sylvia Porter's Personal Finance*, up 198.8%; *Inside Sports*, up 71.6%, and *American Health* and *Connoisseur*, each up 40.1%. Among those with large percentage declines: *Teen Beat*, down 38%, and *Gambling Times*, down 31.8%.#

Largest magazines by circulation

For the first time in some years, there was a change in ranking among the top 10 consumer magazines, as *Modern Maturity* moved ahead of *National Geographic* to take the No. 3 spot. Three of the 10 gained circulation, vs. year-ago, when seven of 10 increased their circulations. Figures are per-issue averages for the six months ending Dec. 31 of each year. *Source: Audit Bureau of Circulations.*

Rank '84	Rank '83	Name	12/31/84	12/31/83	Per cent change

Waldenbooks throws the book at discounters

By BRIAN MORAN

After years of leaving the responsibility for big-budget book advertising largely to publishers, Waldenbooks will shoulder more of the load in 1985 with its first-ever tv campaign.

Although Waldenbooks, a unit of K mart Corp., has by far the most outlets of any U.S. retail book chain (900 as of last week), mounting competition from discounters, including New York-based Barnes & Noble and Crown Books, Largo, Md., prompted the chain to ask new agency Grey Advertising to develop an awareness-building tv effort.

As part of the new marketing push, Waldenbooks is also negotiating tie-in promotions with Holiday Inns, Revlon and Eastman Kodak. The programs would likely include in-store sweepstakes and other giveaways.

Stamford, Conn.-based Waldenbooks plans to boost its ad budget to about $5 million this year, up from slightly more than $3 million last year. Waldenbooks moved its account to Grey York last fall from Ted Colangelo Associates (AA, Sept. 27).

A pool of 30-second tv spots will break in April in seven markets on morning, late-news and fringe programs, including "The Tonight Show." Follow-up spots also are planned for the busy back-to-school and Christmas retailing periods.

A supporting print campaign, breaking in March issues of magazines including *American Health*, *Harper's* and *Psychology Today*, also carries the chain's new slogan, "America finds it at Waldenbooks." The print schedule will later expand to regional books, including *Atlanta* and *Texas Monthly*. Waldenbooks will also run its in-store "Booknotes" tabloid as an insert in *USA Today* about 10 times during the year.

The print and broadcast efforts will focus on best-selling books, store promotions and nonbook offerings, such as audio and videocassettes and computer software. The first wave of print ads promotes several series of exercise and educational audio tapes.

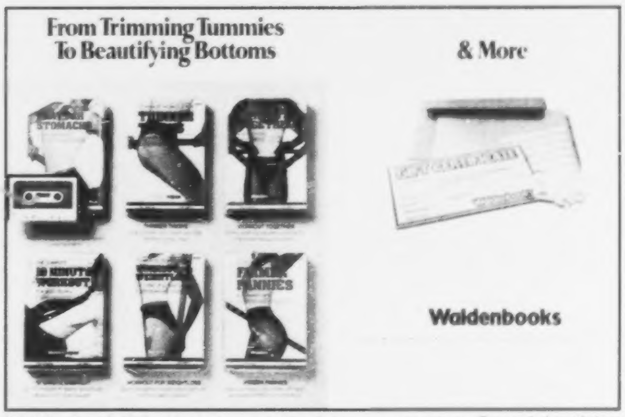
Publishers will still contribute to ad campaigns for specific product lines, but Waldenbooks execs said the chain's share of ad spending will increase this year.

Waldenbooks is depending on the cross-promotion efforts with other marketers to ease the current off-price frenzy in book retailing that is paring operating margins.

"We can't just discount and still make money," said Howard Jones, Waldenbooks' senior marketing manager. "We have to offer customers other benefits, other values besides low prices."

A tie-in with Commodore International last year brought some 2,500 children into Waldenbooks stores in 10 markets to take reading comprehension tests on a computer. In addition to bringing in customers, that promotion generated extensive local media coverage for the chain.

Value-added promotions aside, Waldenbooks is certainly not sitting out the off-price wars. The chain recently closed five of its stores in the New York metro area and reopened them as Reader's Market, offering discounts of from 10% to 35%. The company has plans to open 25 to 30 more off-price outlets this year and eventually spin off the Reader's Market operation into a national chain.



Waldenbooks' first print campaign from new agency Grey Advertising New York, supports a series of fitness and educational audiocassette tapes. New tag line is "America finds it at Waldenbooks." The $5 million campaign breaks in March issues of major consumer publications.

Waldenbooks is a latecomer to the off-price marketing. B. Dalton Bookseller, the Minneapolis-based Dayton Hudson unit that is Waldenbooks' chief competitor in mainstream book retailing with 733 stores, began testing discount stores more than three years ago. However, B. Dalton has been reluctant to commit itself to expansion; its Pickwick Discount Books operation has only 22 outlets open.

Waldenbooks would have joined the discounting fray long ago had it not been for the reluctance of its former parent, Carter Hawley Hale Stores, which preferred to nurture a full-service, upscale image.

But Waldenbooks' acquisition by Troy, Mich.-based K mart last summer for $295 million brought the chain into the fold of a champion discounter.

K mart immediately gave Waldenbooks the go-ahead for Reader's Market and installed Patrick Padden, an exec vp, at Waldenbooks to coordinate the venture.

Operating at reduced margins, Readers Market outlets must attract more shoppers and sell more books to each buyer than a full-price Waldenbooks outlet. So far, however, Waldenbooks has provided negligible ad support for the stores, and some store managers have complained. Outlets sometimes have been unable to meet monthly sales targets, which are double the sales figures set in 1984 when the locations were Waldenbooks outlets.

"We did some preopening and opening advertising for Reader's Market, but we really haven't done much yet," Mr. Jones said. "We're waiting to figure out where we are going to open up more stores."

Discounted books make up about 30% of the industry's $2 billion market for trade books and mass-market paperbacks. Crown Books is the country's largest discounter, with more than 180 stores.#

Action! That's always been the promise of direct marketing, and now that promise is coming true as direct-response marketing continues to mature. Direct and general agencies are combining their skills for marketing strategies and campaigns that take the best from both worlds. *Direct Marketing Special Report begins on Page 13.*

Presstime

JWT gets Nestle Morsels

White Plains, N.Y.—Nestle Co. has assigned its estimated $16 million Morsels candy business to J. Walter Thompson USA, New York. The account was at Leo Burnett USA, Chicago, which resigned both it and the Taster's Choice coffee account, together worth $40 million, when it won substantial M&M/Mars business.

Seven-Up revives 'Uncola'

St. Louis—Seven-Up Co. revived its "Uncola" positioning March 6 in a new radio and tv campaign themed "The Un's the one." N W Ayer, New York, handles.

'We Are World' released

Los Angeles—Columbia Records today will release the single "We Are the World" by the all-star group USA for Africa. The bulk of net proceeds will go toward African famine relief, but Columbia, which also distributed "Do They Know It's Christmas?" by U.K. group Band Aid, said 10% will go to the U.S. hungry and homeless.

Strike may jar tv season

Hollywood—A strike by tv and movie writers, which began March 5, will delay the start of the new season next fall if it isn't settled by late April, sources say here. For the tv networks, the walkout is expected to cut short some new limited series airing this spring and summer, as well as force some daytime serials into reruns. However, a spokesman for Procter & Gamble said tv's largest advertiser plans to keep its serials in production. Meanwhile, actors in tv commercials won a "moderate increase" in fees in a tentative pact reached this week with ad industry negotiators. The new pact must still be ratified by the boards of the Screen Actors Guild and the American Federation of Television & Radio Artists.

Post Co. eyes New Yorker

New York—Washington Post Co. is said to be considering the possibility of bidding for The New Yorker Magazine Inc., which is examining a takeover bid from S.I. Newhouse Jr.'s Advance Publications (AA, Feb. 14, *et seq.*).

K mart to tag Smith again

Troy, Mich.—K mart Corp. is planning to widen its use of actress Jaclyn Smith as an advertising pitchwoman. Ms. Smith now promotes only a fall line of women's sportswear. But K mart is planning Jaclyn Smith lines of spring swimwear and fall lingerie for 1986 and is considering maternity, children's and outerwear lines later. Ross Roy Inc., Detroit, handles the sportswear line.

Ad ban sinks in Hawaii

Washington—Alcohol advertising opponents have suffered another grass-roots setback with state senators in Honolulu killing a bill that would have outlawed all liquor advertising via newspapers, outdoor boards, radio and tv. The Hawaii bill withered in committee under heat from the state's publishers, broadcasters, advertisers and ad agencies. Similar legislative thrusts already have failed in Georgia and Montana, but the American Advertising Federation reports alcohol

Robots: Toys for yuppies?

By JAMES P. FORKAN

Tomy Corp., one of several toy marketers scoring last year with transformable robot figures, now is ready to tackle the robotic market's high end with a line of electronic robots.

The Carson, Cal.-based Tomy has allocated $5 million to advertise the Omni 2000, the Omnibot and the Chatbot on tv and in print. The campaign, in a lighthearted vein, starts later this year, via Keye/Donna/Pearlstein, Los Angeles (AA, Feb. 11). The efforts will be mainly tv, but each will be supplemented by a heavy print followup campaign.

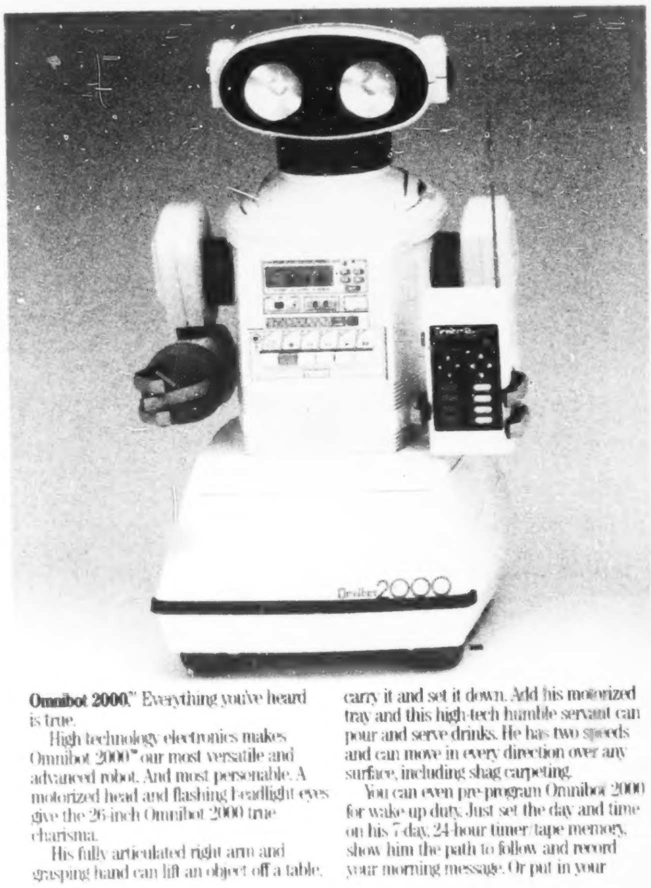
According to the agency's Paul Doupe, vp-management supervisor, and Debra Niemann, vp-account supervisor, the tv support for Omnibot will break this spring, followed in the fall by Omni 2000 and Chatbot advertising. The Omnibot and Omni 2000, as suggested by their retail price range ($200 to $250 for the former, $500 for the latter), are electronic playthings for young, upscale professionals, while the Chatbot will be directed at children. All three products will be referred to at the close of the commercials as a "State-of-the-fun robot," making that, in effect, the campaign theme.

The agency execs said they had the most fun with the Omni 2000 and Omnibot spots while the Chatbot commercial, entitled "Clubhouse," was, in their view, least creative, given what they called its "kid network legal" content.

The Omnibot spot, entitled "Urban," is subdivided into three vignettes, in which the 18-in. remote-control robots are shown wearing hats and other accessories to give them different personalities. One segment shows a group of the robots on a New York City subway station—even including a "bag lady"—while another vignette shows one Omnibot serving others drinks at poolside, as one Hollywood type tells another "Have your agent call my agent."

The idea was to turn the robots into personalities and emphasize their entertainment value, rather than simply have copy say "This is a robot, this is what it does," said Ms. Niemann. The robots are "essentially high-tech home entertainment products," more than "functional" products, Mr. Doupe added. The Omni 2000 especially is aimed at relatively upscale males in the 25-to-49 age bracket, as "one of those products for the person who has everything," said

(Continued on Page 63)



Omnibot 2000." Everything you've heard is true.

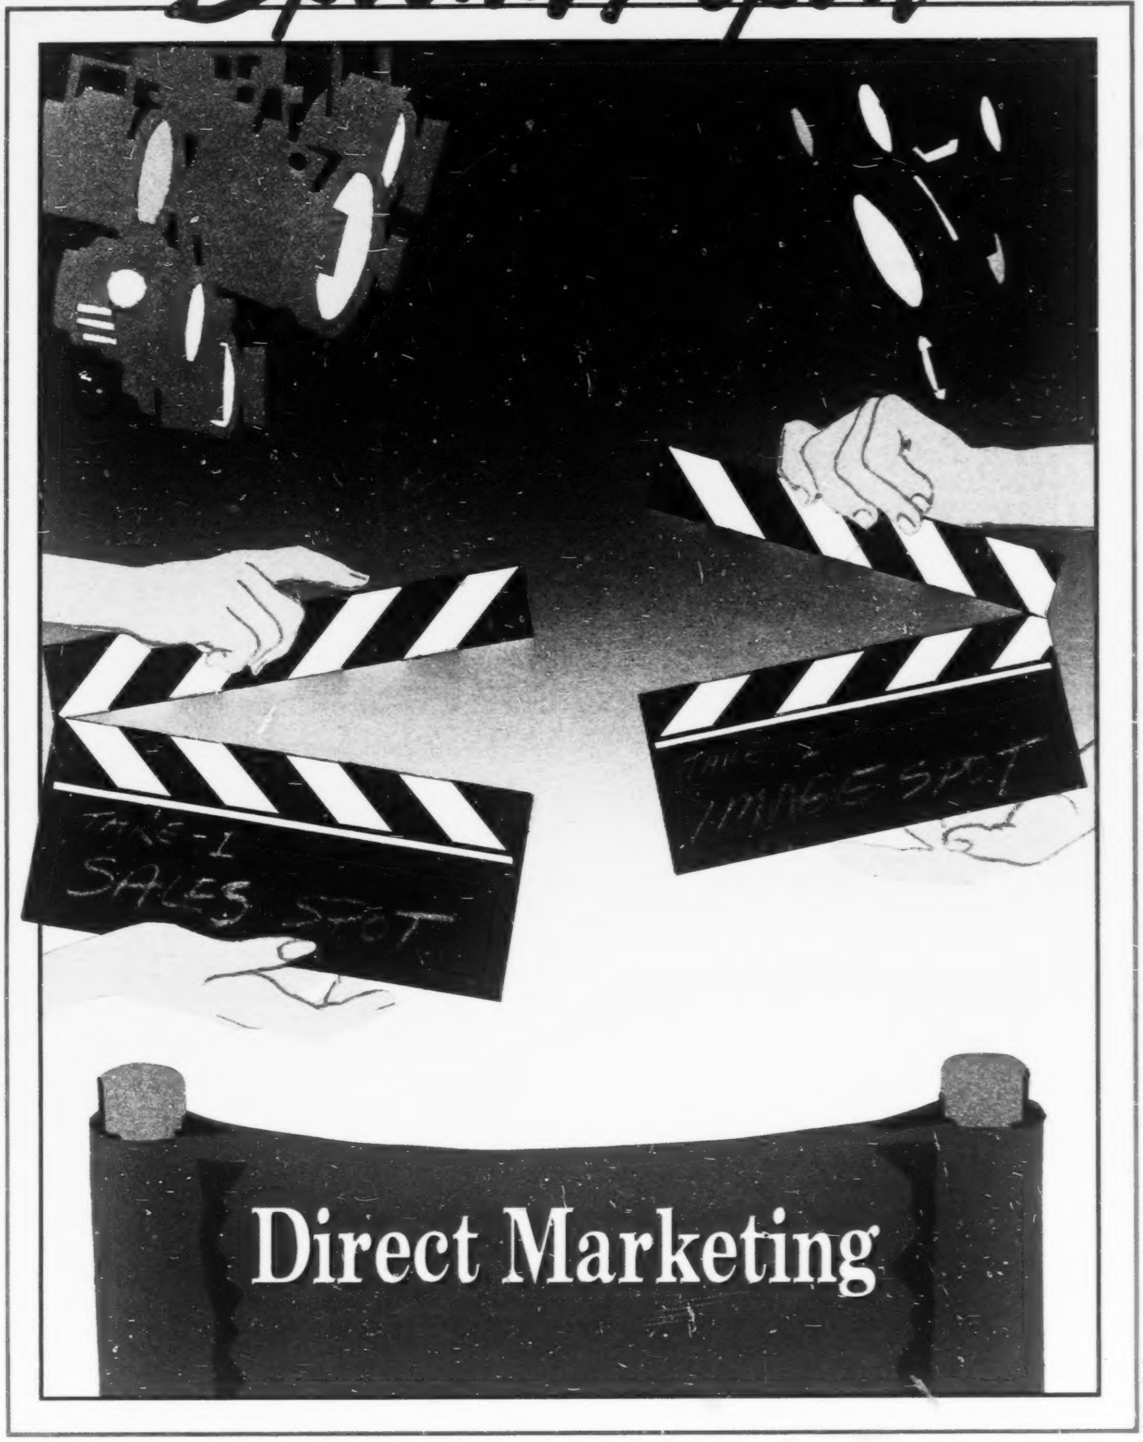
High technology electronics makes Omnibot 2000" our most versatile and advanced robot. And most personable. A motorized head and flashing headlight eyes give the 26-inch Omnibot 2000 true charisma.

His fully articulated right arm and grasping hand can lift an object off a table, carry it and set it down. Add his motorized tray and this high-tech humble servant can pour and serve drinks. He has two speeds and can move in every direction over any surface, including shag carpeting.

You can even pre-program Omnibot 2000 for wake up duty. Just set the day and time on his 7-day, 24-hour timer/tape memory, show him the path to follow and record your morning message. Or put in your

Part of the "state-of-the-fun" robot line from Tomy Corp. is the Omni 2000, a $500 product that should be a hit at yuppie parties, given its ability to play audio-cassettes as well as pour and serve drinks.

Special Report



Jeffrey Toth

Taking the best of both scenes

By Len Strazewski

Action!
That's been the promise of direct marketing since it started to develop in a big way during the media-minded 1970s.

Though direct marketing was seen by many as a competitor to traditional retail product distribution and the name and image advertising used by manufacturers and retailers, direct marketing continued to grow, taking advantage of innovations in mail testing, telemarketing and computerized databases.

In the integrative 1980s, direct marketing is making great strides toward equality with traditional ad techniques and the companies that use them. Generating more than $12 billion in annual product sales and continuing payments for services, according to a study conducted by Simmons Market Research Bureau for the Direct Marketing Assn., direct marketing is now about one-third the size of the U.S. retail distribution system.

As a result, direct marketing has earned respect, and more product marketers are adding a direct response element to tv and print advertising, seeking the satisfactions of immediate sales and market development.

More retailers are starting catalog sales operations, noting the synergy between direct sales and store traffic.

And more direct marketers are realizing that "action" involves more than moving a few record albums and steak knives; it includes long-term promotion of product names and quality images with state-of-the-art creative efforts.

The philosophy is called "integrative marketing," and the campaigns are not only spots and ads, but also all-purpose programs designed to reach consumers on all levels.

"It's absolutely true—on several levels," says Richard Colligan, chairman of the direct marketing agency Stone & Adler, Chicago. "One of the motivations is measurement. Major marketers are obviously interested in better measuring the markets they address.

"There's more pressure on both general and direct marketing agencies to use ad budget dollars more effectively, and to do that, you need better research. And direct marketing techniques are well-known for the information response they provide."

By adding a direct mail or direct response feature, marketers learn more about the demographics of their buyers and are better able to identify smaller segments, more specific appeals of products and more areas of product support, he says.

Many marketers also are interested in generating additional cash flow from their use of media, and a direct response feature, such as an 800 phone number for direct ordering, produces immediate sales.

Some agencies also tout a new rule of thumb for marketing budgets, an 80%-20% split between traditional campaigns and direct mail or direct response campaigns. But Mr. Colligan says there are as many exceptions as there are examples. As the two disciplines integrate, the direct marketing portion of the budget may shrink as the general agencies adopt more direct features in their ads, he says.

Stone & Adler, for example, shares several clients with its parent, Young & Rubicam USA, and maintains little distinction, he says. Both the direct marketers and the general agency staff attend all meetings, and one person from the family of com-

Companies find marketing answer in telephone

By Richard Edel

Once associated with fast-talking, high-pressure sales pitches and products of dubious quality, telemarketing is finding new respect as an indispensable part of the corporate marketing mix.

But the transition from back room to board room has not been an easy one for telephone marketing agencies, or for some of their blue chip clients. Telemarketing still struggles with an image problem even as it evolves into a powerful marketing force in the 1980s.

> **"They . . . know that telemarketing has become an integral part of the advertising mix."**
>
> *—Dwaine L. Canova Telephone Marketing Services*

"It has only been the last three or four years that I could admit to my children what I really do for a living," says Dwaine L. Canova, president of Telephone Marketing Services, Hayward, Cal. "Most people still tend to associate telemarketing with the [tv offers for] steak knives and vegetable slicers. We have lived under a cloud for a long time."

That cloud is lifting as large and small companies are finding creative uses for telemarketing in sales, solicitation, product promotion and customer service. But the mechanics of telemarketing still remain a bit hazy to some, Mr. Canova and other agency heads say.

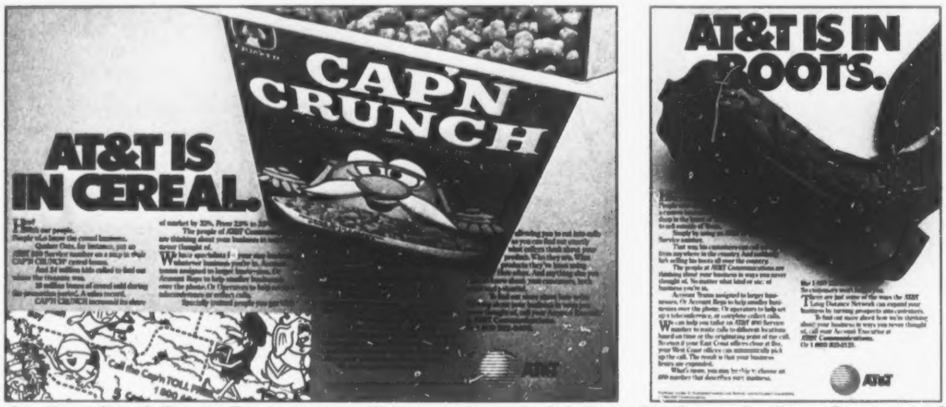
For example, most people think of telemarketing exclusively as outbound telemarketing, which means that a company hires an agency, such as Mr. Canova's, to place calls to regular and prospective customers. This technique most commonly is used to supplement personal selling, generate and qualify sales leads, provide customer service and improve market penetration. Outbound telemarketing was a vital fundraising force in last year's political campaigns.

Inbound telemarketing means a company hires an agency—perhaps the same agency—to answer calls from customers dialing American Telephone & Telegraph 800 service numbers.

This technique most commonly is orchestrated into the corporate advertising mix by selective placement of toll-free numbers in tv, print, outdoor and direct mail.

The use of inbound and outbound telemarketing creates a marketing synergy capable of increasing consumer response rates between 2% and 20%, according to estimates by AT&T and direct marketing agencies.

Whether the corporation is promoting a product or a service, more marketers are turning to the telephone to contain costs, expand market base and increase profits. This is true of both business and consumer advertising, agency spokesmen say.



Quaker Oats' Cap'n Crunch cereal promotion used inbound telemarketing, the type of technique touted by American Telephone & Telegraph in its "AT&T is in . . . " ads.

A few spectacular telemarketing success stories are helping to convince even the most hard-boiled agency and corporate executives that it is a media to be reckoned with. For example, Quaker Oats sponsored a landmark promotion in 1981 for its Cap'n Crunch cereal that involved clever use of inbound telemarketing.

The company offered 5,000 Huffy bicycles as prizes in a sweepstakes to find the correct location of the pirate character, Jean La Foote, on special treasure maps included in each cereal box. Children were encouraged to call the company using a special 800 service number to find out if they had won.

Originally projecting 10 million calls, Quaker Oats received 24 million by the end of the four-month promotion. At peak periods, about 1 million call attempts were being made each day. Sales of the cereal increased 62%. Market share increased 33% and residual share increased 15%.

"One of the reasons it was successful was that it used the telephone," says Peter Consolazio, director-promotions, Quaker Oats, Chicago. "It is my judgment that the telephone was the key element in the promotion."

The Quaker Oats promotion and others that followed helped change the thinking of many account execs concerning inbound telemarketing.

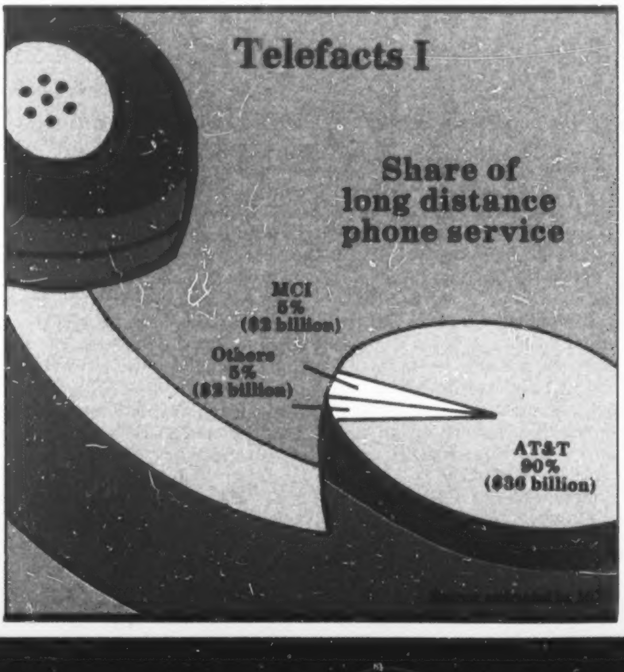
"Ten years ago, if we would have gone to an advertising agency to pitch our services, they wouldn't even have let us take our coats off," Mr. Canova says. "Now they are inviting us in to give presentations because they know that telemarketing has become an integral part of the advertising mix."

But this change of heart has as much to do with a new feel in the creative approach to advertising that uses the telephone as its direct response medium as it does with the inherent strengths of inbound telemarketing, says Ron Bliwas, president of A. Eicoff & Co., Chicago, a division of Ogilvy & Mather.

The Eicoff agency is the largest tv direct response agency in the U.S., handling accounts for *Playboy*; National Liberty Insurance; Sears, Roebuck & Co.; American Express, and Owens-Corning Fiberglas Corp., among others.

"I personally give a speech a month talking about the evolution of direct response advertising," Mr. Bliwas says. The biggest departure for corporate advertisers today from those unforgettable, hard-selling commercials of the "slicer and dicer" era is the creative component, he says.

Creative techniques, especially with tv advertising, have grown to fit the expanding array of products and services being offered, Mr. Bliwas says. No longer does the camera focus on a pair of hands performing won-



Richard Edel has written previously for Direct Marketing Special Reports.

AT&T dials its own service

When it comes to using telemarketing to sell telemarketing services, American Telephone & Telegraph sets its own best example.

"We eat our own dog food, as the saying goes," says Pete de Tagyos, district manager for applications marketing at AT&T. "Not only have we been working on telemarketing since the 1940s, but we have internalized this technique in our own marketing efforts."

AT&T uses its own 800-Services (inbound telemarketing) and telephone answering centers as the direct response medium for a tv ad schedule that is estimated by a competitor to cost $500 million.

AT&T also uses extensive print and other media in addition to AT&T WATS (outbound telemarketing) to generate leads, cross-sell services and consult with clients. Outbound telemarketing is conducted by the AT&T Communications National Sales Center in Kansas City, Mo.

"A tremendous amount of our effort is concerned with consulting with our clients," says Dick Wagner, AT&T's telemarketing staff manager. "We take them from soup to nuts on setting up inbound and outbound telemarketing."

A measure of AT&T's success is the growing number of companies using telemarketing services and the number of calls being made. For example, interstate calls on AT&T 800 Service tripled from $911 million in 1978 to $2.8 billion in 1984.

AT&T is getting a lot of mileage in its tv advertising with testimonials from companies using telemarketing services, says Jane Kleban, AT&T's district manager for business advertising.

AT&T stresses the theme "AT&T is in . . . ." Examples include "AT&T is in cereal," which talks about the success of an inbound telemarketing campaign by Quaker Oats, and "AT&T is in boots," which shows how a boot maker uses telemarketing services.

"Another tv spot titled 'AT&T is in sales' talks about the high cost of making a sales call and concludes that the salespeople have a better chance if they qualify the buyer over the telephone using AT&T WATS and 800 Service," Ms. Kleban says.

"One primary goal was to show telemarketing applications in our advertising. The idea was to tell businesses how other businesses were using our services," she says.

Another ad goal after divestiture was to let consumers know AT&T provides long-distance phone service. This became a high priority when competition was introduced in the marketplace, she says.

But you can bet AT&T is not likely to feature one of its users, long distance telephone service competitor MCI Telecommunications. MCI has used AT&T 800 Service combined with extensive tv advertising since 1980 to promote its alternative long distance service as costing less than AT&T.

"Our life is direct marketing," says Gary Tobin, director-communications at MCI. "When your major competition has 90% of the market, what else can you do?"

Mr. Tobin attibutes MCI's growth—from $140 million in 1980 to $2 billion in 1984—to the success of its direct response advertising.

"We saw something that could help us and exploited it from the very beginning," he says. "To find that other marketers are just discovering how successful direct marketing can be kind of makes us shake our heads."

MCI is a little irritated about paying AT&T for the privilege of using its telemarketing services. One day, MCI hopes to gain equal access to phone company facilities and technology. But that is a matter now before the courts. *—R.E.*

ders with kitchen utensils while a standup announcer tells when to dial the phone for "this amazing offer."

New creative approaches focus on quality and might include humor, slice of life, testimonial or original music and graphics.

Whatever the technique, the message must be strong enough to motivate somebody to make a phone call! without jarring the consumers' sensibilities or destroying the image cultivated by a corporate ad campaign, Mr. Bliwas says.

For example, the Eicoff agency recently created a tv spot promoting Sears credit cards that shows a typical family in a slice of life.

After moving to another city, the family discovers that its new home needs a lot of unexpected essentials, which would be tough to buy without locally established credit. Luckily, the family has a Sears credit card, which is usable nationwide. The commercial reminisces about how the family has used the card to buy a snow tire when it was stranded in another state, and it ends with a walk through the departments of a Sears store to show the variety of merchandise.

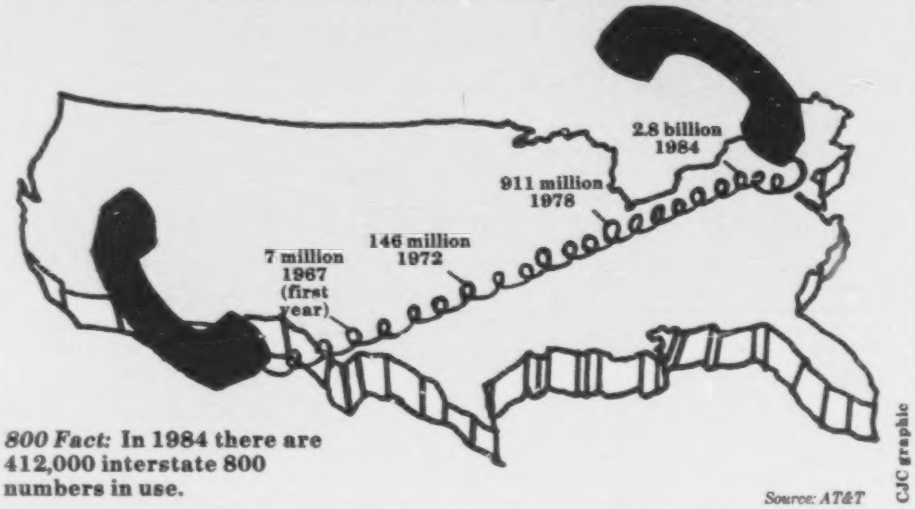
A trailer film clip tells how to order a Sears card over the phone.

"The message still comes across, but in a more creative way," Mr. Bliwas says. "We would never say, 'You have to order a Sears credit card by 3 p.m. today!' Although we might generate more leads that way, it would not fit the over-all image of Sears, which is spending millions to create image and awareness advertising.

"We're very conscious of the over-all image that the client is trying to establish with the general advertising. We try to make the tone and manner of the [direct response] commercials very similar to those of the general agency," Mr. Bliwas says.

The look and feel of a direct response commercial may be so close to that of the general agency work that corporate executives might not be able to tell the difference, he says. "When [prospective clients] see the kind of stuff we're doing, they say, 'Oh! I didn't know that was a direct response ad.' You break down that barrier they may have [to inbound telemarketing] just like that. All of a sudden, they start to see it as available medium."

Growth of interstate calls using AT&T 800 service



800 Fact: **In 1984 there are 412,000 interstate 800 numbers in use.**

Source: AT&T

CJC graphic

For some companies, inbound telemarketing has moved from viable to vital as the response medium for tv offers, says E. Daniel Capell, publisher of "Capell's Circulation Report," Ridgewood, N.J. For example, with tv offers for magazine subscription renewals, marketers of broad-based products, such as Time Inc., are finding that an 800 service number is essential.

"You simply cannot make tv [subscription offers] work without the telephone as the response device. People will not mail in their orders," Mr. Capell says. Time gets most of its new subscriptions and renewals through its direct mail subsidiaries, Publishers Clearing House and American Family Publishers, but inbound telemarketing probably has moved up to third place in importance, Mr. Capell says.

"That's pretty good, considering that 10 years ago telemarketing didn't exist," he says.

In the liquor industry, telemarketing has been used successfully to boost sales during several product introductions. For example, Detroit-based Hiram Walker listed the 1-800-Spirits, toll-free number in print and outdoor ads during its introduction last September of Haagen-Dazs Creme liqueur.

The use of telemarketing sold 30,000 gift-box bottles through the fourth quarter, says Sandy Weisenauer, group manager-cordials at the distiller. "Even though it was a new product, it outsold many major brands," she says.

Why telemarketing can be so effective in strategic advertising is a matter of little debate in the industry. Telemarketing is interactive, immediate and cost effective, says Pete de Tagyos, district manager of applications marketing at AT&T. But above all, it opens a personal line of communication with the customer.

Mr. de Tagyos says he believes the human interaction gives telemarketing a competitive edge over direct mail or mass media campaigns that make no provision for a response medium.

Perhaps this helps to explain the long-term success of companies such as General Electric, which has made huge investments over 40 years in the personnel and technology to support inbound and outbound telemarketing for sales and support of its products, he says.

The GE Answer Center, based in Louisville, Ky., employs about 200 telephone communicators and is featured prominently in GE advertising.

"This hand-holding that goes with the purchase of a product is a natural extension of GE's marketing strategy and its view of the consumer," Mr. de Tagyos says. "They're telling the consumer that we really want your business and we're going to work for it."

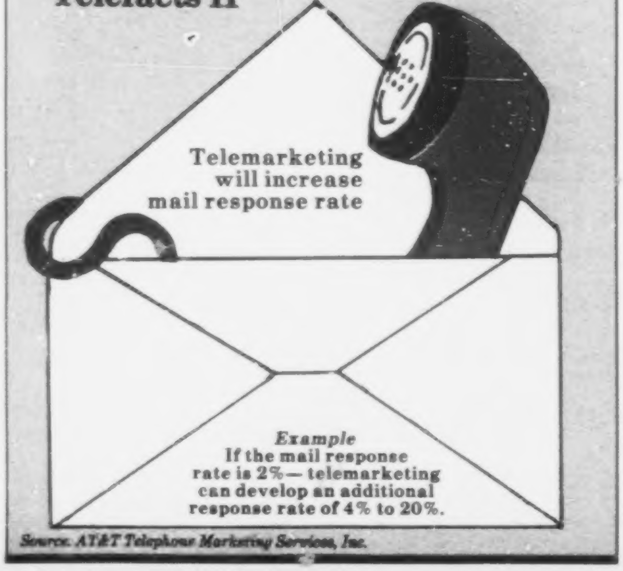
For a demonstration of the effectiveness of telemarketing in building brand and product loyalty, consider its spread into tv news and entertainment shows, Mr. de Tagyos says. ABC's "Nightline" and the syndicated "American Bandstand," for example, have both used this technique with AT&T's DIAL-IT 900 Service, as have a number of local tv stations, he says.

"If you think about the voting aspects of these shows from a marketing standpoint, consumers have a chance to participate, or to become involved in the end product, and their loyalty to that show is enhanced," Mr. de Tagyos says. "This participation is a great contrast to the dehumanizing approach of mass media, and it turns people on.

"It may seem like a dichotomy, but telemarketing is the only medium that is capable of personalizing the appeal of mass marketing," he says. "There is no replacement for talking with somebody in a personal, human way. A lot of companies feel that this is worth its weight in gold.

"We think that the rise of telemarketing is going to have a profound impact on the business of mass marketing and mass promotion."

Telefacts II



Example
If the mail response rate is 2%— telemarketing can develop an additional response rate of 4% to 20%.

Personal touch finds new fans

Telemarketing sometimes is described as a "high-tech/high-touch" advertising medium because it relies on sophisticated technology for a very human purpose: Making person-to-person contacts.

This tool is making inroads into areas such as banking and real estate, that traditionally are not known for direct response advertising, but nonetheless require a lot of personal selling.

For instance, when Royal Palm Ranch Developers, a development of 134 townhouses near Chino, Cal., began its marketing effort last fall, it got very little response from newspaper display ads, a company spokesman says. So the developers hired Response Technologies, Redondo Beach, Cal., a direct response agency, to come up with a strategy that worked.

"Advertising in the real estate sections of the local newspapers was completely unsuccessful because Royal Palm was competing with 50 or 60 other companies trying to market subdivisions," says Lance Douglas, owner of Response Technologies.

Mr. Douglas' solution was to create a 60-second tv spot showing the property and its amenities. The commercial included an 800 number viewers could call for a free map to the site and a brochure.

"When the tv commercial aired, we went from zero inquiries to about 500 per week," Mr. Douglas says. A market test for December generated 1,200 leads. "This shows the power of direct response advertising, if it's done correctly," he says.

Banking is another industry that relies on establishing a personal relationship with the customer, says Bruce McBrearty, president of CMG Telemarketing, Alexandria, Va.

That's the reason Maryland National Bank selected CMG for an outbound telemarketing campaign last year aimed at drawing customers for a new, high-interest savings account with a checking option.

The Baltimore-based bank already had conducted an extensive direct mail campaign in high-income areas identified by census tract, and it was interested in using the telephone to contact prospects who didn't respond.

"We realized that it wouldn't be easy to sell noncustomers on a new banking relationship," Mr. McBrearty says. So CMG brainstormed for all possible objections a potential customer might have to changing banks. A script then was prepared, which dealt with the main objections, and CMG's telephone communicators were briefed about the bank, the savings account and its best selling points.

The telephone campaign resulted in a 15% positive response from the people contacted. The cost per completed call was $2.77, which Mr. McBreaty says is very low for a new program.

Despite a growing number of successful direct response campaigns in industries such as banking and real estate, corporations only now are beginning to take notice, Mr. McBrearty says.

"Many people still see telemarketing as an answering service, as opposed to a marketing vehicle that can qualify sales, generate sales leads, cross-sell products, improve customer relations and be used as an effective sales tool," he says.

It is for these reasons that the big insurance companies have "jumped into telemarketing with both feet," Mr. McBrearty says. Companies such as National Liberty Insurance Co. and Colonial Penn Insurance Co., among others, are extensive users.

Telemarketing companies and ad agencies are beginning to say, "Yes, telemarketing works, but how can we do it better," he says. "We're still only at the awareness stage of what telemarketing can do." —*R.E.*

Scenes

(Continued from Page 13)

panies oversees the project.

"We need to work in concert. Direct marketing is also benefiting from the relationship. There is more sharing of creative people, more sharing of such things as graphics and greater awareness of the use of media," Mr. Colligan says.

Many of the newer integrative marketing approaches are the results of the continuing alignment of general agencies and direct marketers.

Most of the major general agencies now have some internal or subsidiary direct marketing capability—or are working to acquire some.

For example, Kenyon & Eckhardt of New York in January acquired Cinamon Associates, Brookline, Mass., a privately held direct response agency.

"It's amazing how comfortable the marriage is, both from an organizational standpoint and from a disciplinary perspective," says Tom Mahoney, senior vp-general manager of the K&E Boston office. "We are working with one strategy and one collective effort, and that seems to be the wave of the present and future.

ERDM developed a direct response campaign for Christie's.

"In the 1960s, clients were buying pieces of their marketing. Now they want one-stop shopping," he says.

A. Harvey Cinamon, president of K&E/Cinamon Associates, agrees. "Without a direct response capability, many general agencies will find their clients going elsewhere," he says.

Mr. Cinamon is visiting K&E offices around the country, lecturing on integrating general and direct agency work.

"Most often, we are seeing the basic strategy being developed by the general agency and then the direct marketing arm takes off from there. This gives continuity and economy."

One independent direct marketing agency, Ernan Roman Direct Marketing, New York, has made the development of a broad base of skills a company priority, president Ernan Roman says.

The agency specializes in integrative marketing, he says, and has developed a "guild" approach to finding key resources. ERDM maintains a working relationship with independent marketing personnel in the major creative and media specialties.

Though "guild" looks a lot like what marketers used to call "free lance," Mr. Roman says it differs greatly. "I deal only with principals, not greenhorns in the business. I'm dealing with some of the best available talent."

Regardless of what it is called, the technique is probably the wave of the future for small, independent agencies, which will have a continuing need for an expanding roster of disciplines in both the general creative and direct areas.

ERDM has applied the guild concept in developing direct response campaigns for such clients as Christie's, the London-based auctioneer, Citibank and others.

The Christie's campaign, for example, required that the client maintain an ongoing client base and promote its affluent image.

The result was the Christie's Society, a club of affluent art lovers who receive regular publications on Christie auctions.

"The creative end needed a variety of talent, including the best direct mail copywriters, experts in packaging and price testing, and the best in general agency art direction," Mr. Roman says.

"If there is one thing direct marketers have learned from the general agency business, it's that direct mail must be as artistic as more general work. Our Christie's publications had to be beautiful to make it."

Stan Rapp, chairman of Rapp & Collins, New York, Doyle Dane Bernbach's direct response company, also notes the growing synergy between direct and general agencies.

It was inevitable, he said in a speech late last year.

Introducing a new pilot study on the state of direct marketing conducted by Simmons Market Research Bureau, Mr. Rapp remarked on the expanding presence of direct marketing and its continuing use by all types of marketers.

"We are at the beginning of an era in which newly emerging industries will turn to direct marketing as naturally as mass marketers once turned to retail distribution. The question is no longer whether a company will use direct marketing, but how it will be used," he said.

Since his speech last year, the development of direct marketing in new areas has continued, he says.

"What I have seen happening is an acceleration of the trend toward developing a customer data base in whole new segments of the market. Liquor advertising, for example, has sprouted 800 numbers offering direct sales, so now the ads provide not only product awareness, but also sales and an accumulation of buyer data that can be used for other direct marketing purposes."

The perfume industry has also aggressively taken to direct sales, he adds. "A few months ago, a perfume sample and direct sales offer in a magazine ad was new. Now it's standard."

The Simmons study agrees with his observations.

Product sales alone, the most visible segment of the direct marketplace, generated about $5.2 billion in 1984 and nearly 48% of surveyed households placed direct response orders during July for a total of about 137 million orders. The average number of orders placed was 1.6 a household.

Apparel orders led the way with about 18% of the total during the survey month, followed by charitable contributions with 12% of the total, magazine subscriptions with 7% and several categories of home accessories with 4%.

Direct mail letters and catalogs generated nearly half of the orders, about 24% for each vehicle, respectively, followed by telephones and circulars with 7% each and magazine ads with 6% each.

Continuing payments for a variety of services including banking and insurance, communications, subscription renewals and newspaper delivery and clubs generated more than $6.5 billion in sales in 1984.

About 43% of surveyed households made some kind of continuing payment during the survey month for an average payment of 1.6 a household.

Direct marketing miscues

What is disliked most about direct marketing

Dislike something	**83%**
Deception	**41%**
Lack of information	**32%**
Service	**20%**
Inconvenience	**16%**
Expense (shipping)	**7%**
Miscellaneous	**8%**
Disliked nothing	**1%**
Don't know/no answer	**16%**

Open some	**30%**
Open all	**67%**

Amount household would like	
More	**5%**
Less	**42%**
Getting right amount	**53%**

Source: "Simmons Direct Marketing Study," Simmons Market Research Bureau

Financial, banking and insurance services led the category with 39% of the total, followed by publication subscriptions with 20%, and book and auto clubs with 16%. Cable tv fees accounted for about 9% and continuing contributions accounted for 4% of the total.

The survey also noted a surprising acceptance for direct mail and telephone. More than two-thirds of the households surveyed said they open all advertising mail and only 3% said they throw solicitations away without opening them. About 53% said they get "about the right amount" of advertising mail and 5% would like more. However, 42% said they wanted to see less direct mail.

More than half of the households surveyed reported that they listen to all inbound telemarketing calls; 42% said they listen to some of the calls, and only 7% said they hang up on all sales calls.

Telephone calls, however, were not popular. About 74% said they would like to receive fewer calls and only 24% said they were getting about the right amount.

Despite some positive results, respondents indicated direct marketing still has a way to go in the eye of the consumer.

About 50% of the households surveyed said they were very or extremely satisfied with the results of direct marketing and about 34% said they were somewhat satisfied.

But about two-thirds of the respondents said they were extremely or very satisfied with the results of retail shopping trips, and 29% said they were somewhat satisfied with the retail experience.

About 83% of the households disliked something about direct marketing, with 41% noting some perceived deception, including poorer quality than expected, misleading ads and substitutions.

Among the leading complaints, about 32% commented on a lack of product information, especially the inability to see products before purchase and the difficulty determining proper sizes of apparel.

About 20% complained of slow service.

Despite these negatives, Mr. Rapp, whose agency sponsored the study for the DMA, noted in his introduction that the real news of the study is the growing parity between direct marketing and other marketing and distribution techniques.

"For every dollar spent by the consumer in department stores, apparel stores, drugstores, hardware stores and every other type of store you can think of, the consumer spent 37.5 cents at home ordering goods and services by mail or phone or making payments for continuity services. That's more than anyone would have guessed."

The percentage has probably grown since last year, Mr. Rapp now says.

"Since the study was released, we have had many new industries enter direct marketing, including liquor and perfume. Our segment must be growing." ■

Why RJR shuffled agency deck

Global view pervades $130 million revamp

By WILLIAM F. GLOEDE

R.J. Reynolds Industries' decision to move an estimated $130 million in advertising agency assignments last week is seen as a double-edged attempt to shift into global overdrive while bolstering sagging brand performance in the U.S. A smattering of agency politics also entered the picture.

E.A. Horrigan, president-chief operating officer of the Winston-Salem, N.C.-based company, attributed the moves to RJR's desire to "strengthen its consumer products businesses on both a domestic and global basis. . .in order to increase our ability to meet the long-range requirements of the individual products involved and the entire corporation."

RJR's account shifts, involving R.J. Reynolds Tobacco Co.'s Winston and Sterling cigarets, Del Monte Corp.'s Hawaiian Punch and eight brands in the Heublein spirits stable, gave McCann-Erickson, New York; Young & Rubicam, New York; Dentsu-Young & Rubicam, Los Angeles; Leber Katz Partners, New York, and Tatham-Laird & Kudner, Chicago, something to crow about.

Conversely, William Esty Co., New York, and its parent Ted Bates Worldwide, New York, alongside Mickelberry's Laurence, Charles & Free, New York, and BBDO/West, San Francisco, were left licking their wounds and wondering what went wrong.

McCann, already a major RJR

AHP's $100 mil looking for network

By VERNE GAY

NEW YORK—American Home Products Corp., network tv's fifth-largest advertiser, is expected to decide by April 1 whether to make a massive two-year multidaypart buy on either NBC-TV or ABC-TV. At stake is as much as $100 million.

It is unclear whether CBS-TV will bid for the AHP business. Network executives would not comment on CBS' plans. However, previously CBS has made only one multiyear deal, that being a two-year sports buy for Miller Brewing. Multiyear deals can lock up huge amounts of inventory, and CBS, as the top-rated network, is the most likely to get higher prices in the short-term market.

While details on the AHP negotiations remain sketchy, sources said the deal will be similar to an existing arrangement between AHP and NBC. AHP has made three similar deals with NBC in the past, the most recent in 1982 when NBC was a distant third in the Nielsen battles. That deal, which expires in early 1986, was for three years and $250 million. Sources said ABC and NBC this year have proposed two-year deals for slightly less money.

Sources said AHP will demand inventory in all dayparts, with the major portion going to prime time. The target demographic will remain women 18 to 49, with a guaranteed cost-per-thousand rate.

John Conti, president of John F. Murray Advertising, AHP's house agency, declined to comment on the negotiations.

Top sales executives from ABC and NBC would not disclose details about their bids.

"ABC has been asked to submit for a two-year deal," said Jake Keever, vp in charge of sales, ABC. Mr. Keever added that network sales research still was ironing out the details of its bid.

Bob Blackmore, senior vp-sales at NBC, expressed confidence that his network would notch a fourth multiyear deal with AHP.

"What you have here is an ongoing relationship of many years. I would look to continue it in some way," he said.

If the deal comes in at $100 million for two years, it could represent almost 30% of AHP's total network tv spending. According to Broadcast Advertiser Reports, AHP last year spent $179.1 million in network tv, including $86.6 million in prime time and $63.9

Ron Travisano to hit the road

By JOHN J. O'CONNOR

NEW YORK—While his name will stay on the door "forever," Ron Travisano is leaving Della Femina, Travisano & Partners to devote all his energies to directing tv commercials.

The 46-year-old agency vice-chairman and co-director of creative services and his longtime partner Jerry Della Femina spelled out the terms of the buyout in a telephone call last week.

In selling his 32% interest in the agency, which is projecting 1985 billings of $250 million and has more than 40 clients, Mr. Travisano, in Mr. Della Femina's words, "never will have to work for the rest of his life, but I'll have to, for the next 200 years."

Although Mr. Della Femina, 48,

'New Yorker' takes 'New' turn

By STUART ELLIOTT

NEW YORK—Can Eustace Tilley find happiness in the New-house of brides, glamourous mademoiselles and fair gentlemen?

That is the $168 million question following the unanimous decision March 8 by the board of directors of The New Yorker Magazine Inc. to approve the merger proposed by S.I. Newhouse Jr.'s Advance Publications (AA, Feb. 14, *et seq.*).

Many in the advertising and media communities here expected the company to accept Mr. Newhouse's bid, which he raised to $200 a share ($142 million) from $180 a share ($124.5 million). They reason the publishing magnate would not have spent $25.6 million last November to purchase 17% of the company's stock unless he were sure of success.

The $168 million acquisition, dependent on approval of The New Yorker's shareholders, brings the company into a media empire among the nation's richest, including Random House, 29 newspapers,

Kostyra on spot for JWT

By STEWART ALTER

J. Walter Thompson USA, the ad agency world's largest buyer of spot tv time, will name Richard Kostyra as head of a reorganized spot operation designed to be more responsive to client needs.

Mr. Kostyra, who remains senior vp-media director at JWT, New York, actually takes the top spot for a second time, having headed the unit on a temporary basis in 1982 following the dismissal of Marie Luisi.

John Byron Hackett, the senior vp being succeeded by Mr. Kostyra, is a lawyer who was general manager of JWT's entertainment

FDA hints approval of food health claims

By STEVEN W. COLFORD

WASHINGTON—A senior Food & Drug Administration official in a speech last week disclosed 10 preliminary guidelines the FDA is considering to control the use of medical and health claims in food marketing.

Though not entirely pleasing to food industry executives, who have been closely watching FDA's position, the tentative policy laid out by Joseph Hile, FDA's associate commissioner for regulatory affairs, suggests the government agency is ready to adopt a new, more permissive stance.

The speech was the first attempt at revamping policy since the FDA was confronted last fall with Kellogg Co. ads and packaging that promoted Kellogg All-Bran cereal as being helpful in avoiding some forms of cancer (AA, Oct. 22, *et seq.*). Previously, the FDA regarded foods making such claims as "drugs" and subjected the claims to the same stiff substantiation requirements as prescription medicines.

A unified response

The FDA action shows its thinking points in the same general direction as that of the Federal Trade Commission, where high-ranking staffers have publicly proclaimed the Kellogg campaign an important and laudable advancement in nutrition-based advertising.

This semblance of a unified governmental response to health-linked food ad claims follows repeated signals that FDA commissioner Frank Young preferred a tougher stance.

Even after two prominent FTC officials publicly praised the Kellogg campaign, Dr. Young was floating trial balloons for an industrywide moratorium on food advertising that made such health claims. He wanted to have the moratorium until the agency could more fully explore the issue.

Of the 10 specific guidelines Mr. Hile laid out, two proved the most controversial to industry representatives: Requesting that marketers contemplating the use of health messages consult with the FDA before implementing such campaigns and requiring a consensus of scientific substantiation for any medical claims.

FDA's pre-review guideline, though not mandatory, is considered highly advisable for food marketers, FDA officials say.

Timetable to speed up?

Some industry representatives wondered whether the agency would formalize the guidelines. The FDA spokesmen said the guidelines will be subject to public comment, though perhaps not for six months.

The timetable might be accelerated, an FDA official said, but only if Department of Health & Human Services Secretary Margaret Heckler deems it a priority issue or if other food marketers, thinking the agency has given them a green light, quickly begin using health claims for their products.

The guidelines must pass the muster of the Public Health Service, HHS and the Office of Management & Budget before being subject to public comment.

Other specific guidelines from Mr. Hile's speech

Vote today on settlement proposal

Writers work it out

By VERNE GAY
and BOB MARICH

LOS ANGELES—After an all-night session between producers and the Writers Guild of America March 7, a tentative settlement was reached that could end the controversial writers' strike as early as this evening.

The Guild's 9,200 members will be asked to vote on the new terms tonight and production on affected shows could resume as early as March 12. The terms of the proposed settlement were not disclosed.

News of the pact was cheered by members of the tv and advertising community. ABC-TV was "pleased" about the tentative settlement. A spokesman for the network said none of its prime time series had been affected by the short-lived strike.

NBC, the network with the most to lose from the strike's continuation, was "delighted." "Sarah," "The David Letterman Show," "Saturday Night Live" and "The Cosby Show" felt immediate im-

(Continued on Page 93)

Big Mac serves up big tv ad bill for '84

By SCOTT HUME

McDonald's, that epitome of middle-class life styles, has purchased membership in one of America's most exclusive clubs: The Quarter-Billion-Dollar Club.

Yearend figures from Television Bureau of Advertising show that Oak Brook, Ill.-based McDonald's Corp. spent $253.9 million on tv advertising in 1984. The bulk of that spending, $162.5 million, went to network tv, with the remaining $91.5 million allocated to spot tv buys.

Figures for all business segments have not yet been tallied by New York-based TvB, so it's unclear exactly where Big Mac ranks among all tv advertisers—other than to hazard the wild guess that Procter & Gamble surpassed it. But it's certain that last year McDonald's moved into the top five and possible that it made No. 2.

In 1983, Cincinnati's P&G led all tv spenders (network and spot combined) with expenditures of $596 million. The second-place finisher was General Motors, which spent $226 million. GM also may have joined the Quarter-Billion Club last year, giving Ronald McDonald a run for the No. 2 ranking.

McDonald's total tv spending increase of 37%, compared with the $185 million it spent in 1983, came totally from increased network spending, which doubled to $162.5 million from $80.9 million.

Big Mac's network spending peaked during the third quarter, which included its major sponsorship of ABC's Summer Olympics broadcasts. Sources put its network spending during that quarter at between $50 million and $60 million (AA, Dec. 10). Network spending was $25.4 million in the first quarter, $40.2 million in the fourth quarter and an estimated $40 million in the second quarter.

While doubling network spending, McDonald's spot tv expenditures dropped to $91.5 million from $105 million in 1983. But the overall increase in tv spending is attributable to increased contributions from operators rather than a redeployment of funds. In 1983, McDonald's spent 2.6% of total domestic restaurant sales on tv advertising. Last year that figure rose to more than 3%.

Try as they might, McDonald's competitors are having a hard time closing the tv spending gap. Both Burger King, which increased total tv spending 57%, and Wendy's, which upped its expenditures 48%, made greater percentage increases than did Big Mac, but both remain enormously outspent.

The best Miami-based Burger King can say about the burgeoning burger budget battle is that for the first time it spent more than half (51%) what Big Mac did (up from a budget that was 44% of McDonald's in 1983). Dublin, O.-based Wendy's total tv bill still isn't one-third of McDonald's, although its 29% for 1984 closed the gap somewhat from 1983's 27%.

Another fast-growing tv spender among fast-food chains is PepsiCo's Taco Bell, which increased spending 53% to $28.5 million from $18.6 million in 1983 (which represented a 62% increase compared with the $11.5 million spent in 1982). Tracy-Locke, Dallas, handles Irvine, Cal.-based Taco Bell.

Hardee's Food Systems, Rocky Mount, N.C., also is rapidly increasing its tv ad presence. Last year's $25.5 million bill represented a hefty 45% increase compared with 1983's $17.6 million.

Much of that increase came from Hardee's initial foray last year into network tv, where it spent $7 million. Unfortunately, the "It's all here" campaign it took to the network didn't provide the sales returns it expected from the increased expenditures. The result was an end to its 10-year relationship with Benton & Bowles, New York (AA, Jan. 14).

Hardee's this week will hear final presentations from N W Ayer, Ted Bates Inc., William Esty Co. and Ogilvy & Mather, all New York.

Leo Burnett USA, Chicago, handles McDonald's. J. Walter Thompson USA, New York, handles Burger King. Dancer Fitzgerald Sample, New York, is Wendy's agency.

The restaurant category continues to be dominated by the top five chains—McDonald's, Burger King, Wendy's, Kentucky Fried Chicken (handled by Young & Rubicam, New York) and Pizza Hut (handled by Chiat/Day, Los Angeles)—which together account for better than 60% of its total tv advertising dollars.

McDonald's Corp. alone accounts for 27% of the industry's total tv spending.

That strength at the top recently led one second-tier restaurant chain exec to remark, "We gave up the idea of playing ball with the big boys years ago."#

Fast-food chains' tv spending

McDonald's tv advertising isn't just for Saturday mornings anymore. By more than doubling its network tv spending last year to $162.5 million while also spending $91.5 million on spot tv, McDonald's may have become only the second advertiser to spend more than a quarter of a billion dollars on tv in one year. ***Source: Television Bureau of Advertising from Broadcast Advertiser Reports data.***

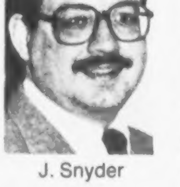
Snyder takes AA wheel

DETROIT—Jesse Snyder has been named chief of the ADVERTISING AGE news bureau here as of March 15.

Mr. Snyder has been a reporter in the AA bureau since August, 1983. He succeeds Ralph Gray, a veteran automotive industry news reporter, whose work will continue to appear in AA and other business periodicals and newspapers in his new role of freelance writer.



J. Snyder

Before joining AA, Mr. Snyder served for 13 years at the *Daily Tribune*, Royal Oak, Mich. He was the newspaper's business editor for the last three of those years.

In 1978, Mr. Snyder was a grand winner in the AAA Steering Wheel competition for his reporting on a fatal school bus accident. He also was a co-winner in 1978 in the Michigan Associated Press news story competition. He has a journalism degree from Michigan State University, East Lansing.#

CORRECTIONS & CLARIFICATIONS

- A color page ad in *Peak* costs $1,670 and the back cover sells for $2,670 (AA, Feb. 11, P. 48). Also, b&w ads are available to advertisers.
- The agency name given in the caption for the Corning Glass Works cookware (AA, Feb. 11, P. 2) should read Saatchi & Saatchi Gough Waterhouse.
- Henry Schafer is now vp-primary and social research, ABC Marketing & Research Services (AA, Feb. 18, P. 52).
- An Agency People item on Philip Herr's promotion to senior vp at Marschalk Co., New York (AA, Feb. 18, P. 41), should have referred to him as the agency's research director.
- Needham Harper Worldwide also handles co-op accounts for McDonald's Corp. in Phoenix, San Diego, Tucson and Las Vegas (AA, Feb. 18, P. 2).
- Stuart Young is ceo of Video Placement International and Conceptual Media Enterprises, New York; (212) 696-9207. Entertel is the parent company (AA, Feb. 28, P. 6).
- The ABC-TV affiliate in Sioux Falls, S.D., should have been identified as KSFY (AA, Feb. 28, P. 18).

Public Relations Beat / BY JACK BERNSTEIN

Role of pr in proxy fights, tender offers

Public relations can play an important and even critical role in a hostile corporate takeover situation, but is almost always subordinate in influence to the lawyers and investment bankers. Richard Cheney, vice-chairman of Hill & Knowlton and pr's leading participant in proxy fights and tenders, acknowledges that lawyers and bankers share the major clout in such contests. Next in importance are pr counsel and proxy solicitors, not necessarily in that order.

The number of pr players in the takeover game is quite limited. Mr. Cheney has dominated the scene for more than 20 years, but Gershon Kekst and the company bearing his name have come on so strongly in recent years that the chances are good the two would be on opposite sides in any major battle.

Closing in on the leaders is Jonathan Rinehart of Adams & Rinehart, New York, who has participated in several important conflicts. Other companies are involved more sporadically.

The behemoth of the pr business has been quiescent in the hostile takeover area. That may be changing. CBS Inc., anticipating hostile action, has put together a takeover defense team. The pr component: Burson-Marsteller.

In a proxy fight, the lawyer calls the shots. In a tender, where price is the paramount consideration, the investment banker is, in Mr. Cheney's words, "the lead horse." "Stockholders," he maintains, "would tender to Ho Chi Minh if the price was right."

Pr is very important in a proxy fight, says Morris Kramer, partner of Skadden Arps Slate Meagher & Flom, generally conceded to be the nation's premier takeover law firm. Mr. Kramer, who has been legal counsel in more than 50 takeover battles, sees a proxy fight as akin to a political campaign: "You can't buy someone's vote because it's against the law, so you have to persuade shareholders to gain their proxies. To do that, effective communication is vital and that's where pr comes in."

Nonetheless, it is a constant struggle to win respect for pr's contribution, says Mr. Cheney. Respect is earned by understanding the business. By asking the right questions and offering sound advice. And by talking the players' language.

That means being conversant with such terms as bearhug, crown jewels, poison pill, scorched earth, shark repellent, lockup and arbs. More recent additions are greenmail and camomail (camouflaged greenmail which some burned arbs, or arbitrageurs, call black-and-blue mail).

Those wishing to obtain a glossary of such terms, as well as relevant takeover rules and regulations, are invited to drop a line to Jonathan Rinehart, who will forward a copy without obligation.

"A proxy fight is basically a process of character assassination," says Grant C. Gentry, chairman-ceo of Pantry Pride Inc., who beat off a group of dissident shareholders in a bitter contest. "That is true, too much so," agrees Mr. Rinehart. "Passions run high, and that's where it's constructive that the Securities & Exchange Commission is on hand to clear communications to shareholders," he adds.

Okay, but if a tender offer is decided almost totally on the basis of economics, what chores are there for pr? Mr. Cheney ticks them off: First, there's the basic stuff like preparation and dissemination of scores of news releases. Innumerable phone calls have to be dealt with. Decisions must be made as to whether something should be said and, if so, what, when and by whom. Myriad other communications details must be attended to relating to charges and countercharges, litigation developments, court decisions, etc.

Things can get a bit ticklish, though, when a pr takeover specialist is superimposed into the corporate communications scheme. That decision is generally made by top management at the behest of the lawyers and/or bankers and can shake the internal staff up.

Mr. Cheney maintains that while the potential for friction exists, more often than not things work out smoothly. "We regard internal pr people as a valuable resource. They know the company intimately and can provide useful information quickly. For the most part, they recognize that we come in with a certain degree of experience and expertise in a highly specialized, high-pressure area."

Pr players in the takeover game assert that they have something significant to contribute. Public relations, they claim, can foster a climate conducive to the achievement of their client's objective. Bad press can create doubt in the minds of the decision-makers and turn an orderly retreat into a rout. Deft media handling can advance the cause with the institutions and general public and, in the opinion of some, even influence judicial decisions.

Monte Gordon, vp-director of research at the Dreyfus Corp., which manages assets in excess of $25 billion, says that while institutions are no less profit oriented than other investors, "there is no question that their attitude toward a vote or tender can be affected by what they see, hear and read."

From a media point of view, Mr. Rinehart observes that the *Wall Street Journal* and the *New York Times* are the most effective in influencing the investment community. If there is a Washington angle, then the *Washington Post* becomes important. Local, regional and trade media also are useful in reaching shareholders. In the Carter Hawley Hale resistance of a raid by another retailer, the *Los Angeles Times* and *Women's Wear Daily* were important communications conduits.

Mr. Cheney is a strong advocate

InfoWorld
KPA

InfoShop.

THE AGENCY THAT KNOWS HOW TO REACH THE PERSONAL COMPUTING INFLUENTIALS.

There are two kinds of ad agencies: those that recommend InfoWorld, and those that don't know how to reach the personal computing influentials.

The InfoShop knows that 9 out of 10 InfoWorld readers work in the businesses and professions that *use* personal computers. More than half of them in companies with 100 or more employees. And the InfoShop knows that InfoReaders are asked an average of 22 times per month for advice on buying personal computer systems, peripherals, or software.

In addition to giving advice, InfoReaders spend a lot of time making purchase decisions of their own. Seven out of 10 personally own a micro. And more than 90 percent have been involved in personal computer purchase decisions in their businesses, the majority making final brand decisions.

And it looks like the InfoReaders' clout is increasing: On the average, each of their companies plans to purchase 63 systems in the next 12 months.

InfoReaders are the InfoLeaders. And they look to InfoWorld when they're forming their opinions. They know that InfoWorld is the *weekly* newsmagazine that reviews new products first, and reports the latest trends in the personal computing industry.

That's why InfoShops always make InfoWorld a 'must buy' for their personal computing clients. They know that there are two kinds of ad agencies: those that recommend InfoWorld. And those that commit InfoCide.

No one works harder than we do.

Ratings give 'Voltron' big licensing charge

By JAMES P. FORKAN

"Voltron" is showing its muscle in the licensing field, after becoming one of the most popular children's tv series in 1984-85 syndication.

The animated Monday-through-Friday strip focuses on the outer-space adventures of a group of youngsters who control Voltron, a robotic "defender of the universe." The robot is formed when five smaller lion-shaped robots come together.

A handful of major "Voltron" licensees will support the property with more than $10 million in advertising this year, said Edward (Ted) Koplar, president of Koplar Communications, St. Louis, and its New York-based World Events Productions syndication-production subsidiary. The broadcaster itself also has plans to bolster young fans' interest in its series, now on 76 stations.

As World Events has been boasting in recent ads in tv trade publications, Arbitron's November sweeps report on syndicated shows has "Voltron" ranked as the No. 1 new-for-fall animated strip series among children aged 2 to 11. It averaged a 3.5 rating and 12 share, which, as World Events vp Thomas Battista noted, was topped only by Group W Productions' one-year-old "He-Man & the Masters of the Universe" (3.9 rating and 13 share).

That kind of ratings prowess in the Monday-through-Friday after-school daypart, and in daily and weekend morning time slots where many stations are repeating the show, is helping the property's licensing appeal.

Besides New York-based Matchbox Toys (USA), the first licensee signed last fall, Mr. Koplar said his company has added LJN Toys, New York, for various robot figures and vehicles, including electronic robots capable of six functions; Panosh Place, New York, for smaller action figures and play sets, and Impulse Ltd., St. Louis, for children's calculators, cameras, flashlights and wristwatches.

Should another pending toy company sign on, he said, that would add another $5 million or so to "Voltron's" support.

Moreover, Merchandising Corp. of America, Universal City, Cal., is handling the licensing of products in nearly 50 other categories, primarily outside the toy field, said Hulas Kanodia, Koplar's chief financial officer.

The retail prices for all these "Voltron" toy products range from $2 to nearly $100, the latter for a large-size Matchbox robot toy, Mr. Kanodia said.

The majority of the other products will hit retail shelves in July, though some will be available in April, the executives said.

"Our main business is tv," Mr. Koplar said, citing World Events and his company's ownership of two tv outlets, in St. Louis and Sacramento, Cal.

"This is all new to us," he admitted, as he discussed the company's first licensing successes. "I feel like I'm going through the jungle with a machete. If someone had asked us a year ago, we never would've anticipated this."

Not surprisingly, Mr. Koplar already has given the go-ahead for another season of 21 new episodes, starting in September. Toei Co., a Japanese company, will produce five new episodes a week. The total production and postproduction costs will be about $250,000 per episode, he estimated.

Mr. Koplar said he is not concerned that interest in robot tv series and toys might wane by next year, given the clutter of 1985-86 robot specials, miniseries and series (including Marvel Productions' "Transformers" and Hanna-Barbera's "GoBots" as daily series as of September).

"Voltron" is more than a robot show, he maintained, because the robots are "extensions of the child characters who control them."

Still, Mr. Koplar has various concepts in development aimed at maintaining youngsters' interest in the property, which now has more than 3 million viewers a week.

Although World Events is working on other series prospects, he said, "We're really concentrating on maximizing 'Voltron's' potential, to make it the most profitable show a station can have."

Much of the money from its cash sales are being channeled into promotional spots, ad slicks and press releases that stations can use during sweeps periods, he said, as well as into the new season's $5 million-plus production budget.

World Events is handling these promotional efforts in-house.

"We want to keep the momentum going," Mr. Kanodia said. Ideas under consideration include a 90-minute "Voltron" tv cartoon special for fall prime time on carrier stations and a feature-length "Voltron" movie for theatrical release, Mr. Koplar disclosed.

Another idea, newly approved, is a live-action touring road show, due for a June start, to tie in with the series' local tv stations as it visits shopping centers in various major markets.

Sony Corp. of America, Park Ridge, N.J., this spring will promote both the series and Sony Video Software Operations' April home video release of six 90-minute "Voltron" episodes, Mr. Koplar said.

Priced at $49.95, each title is expected to sell nearly 25,000 units, Sony sources said.

Sony, which is considering a "Win a 'Voltron' video party" concept, also plans to play the stereo "Voltron" videocassettes in stores, in effect as a point-of-purchase tool for its stereo tv sets.

Confident that "Voltron" has a long life, Mr. Koplar pointed out that this cartoon series is the first to be produced in Dolby stereo. Although distributed via Robert Wold Co., Los Angeles, in stereo, relatively few outlets can use it in that form, he said.

However, during the stations' four-year contract span, stereo tv will become more important, he predicted—in "three years or so," to be more specific. Koplar's own KPLR-TV, St. Louis, is a stereo carrier.

The producers have taken great pains to have superior sound quality in the show, though sounds like the swishing of the villain's cape will not be clear until aired in stereo, the broadcasters said.#

Robot toys expected to march on in 1985

New York—Robot toys, led by those that can be changed into vehicles or dinosaurs, appear to be headed for another strong sales year.

Industry sources seemed to believe that Transformers (from Hasbro Bradley, Pawtucket, R.I.), GoBots (from Tonka Toys, Spring Park, Minn.) and Starriors (from Tomy Corp., Carson, Cal.) in particular will repeat their 1984 success stories. They will be aided by tie-in tv cartoon programing support in syndication and well in excess of $25 million in ad support by those companies and various licensees.

However, there are some industry executives, including some with products in the robot figures sector, who think the craze could begin tapering off by the end of 1985, largely because the robot category this year will become more crowded with me-too products and the concept will lose its novelty for the small-fry.

Still, new products unveiled at the February Toy Fair in New York included transformable Transformers electric train and auto racing sets from Tyco Industries, Moorestown, N.J.; Techmate, a strategy game with robot-like playing pieces, from Schaper Toys, Minneapolis, and Chargertron, which can turn into robots and vehicles, from Buddy L Corp. here.

As for large-size robots, Tomy is aiming mainly at young adults with Omni 2000 and Omnibot. San Francisco-based Lewis Galoob Toys' Bron, whose hydraulic pressure enables it to lift objects up to 25 pounds, and CBS Toys' Maxx Steele, on which consumers can play electronic games, are directed more to youngsters.

One company that obviously anticipates ongoing children's interest in robot characters is Telepictures Corp., which already is selling "Silverhawks" as a daily cartoon series for fall, 1986, syndication.#—*J.P.F.*

PR agencies' 1984 earnings

All of the top 20 pr companies posted fee income gains in 1984, some as much as 50%. *Source: 1985 edition of O'Dwyer's Directory of PR Firms.*

Bernstein

(Continued from Page 36)

of using advertising in a selective manner. He feels that letters and phone calls are more effective, particularly when time is pressing, but believes that a powerful ad can be persuasive and can sometimes color the news coverage. "We don't recommend advertising, however, unless we've got a real blockbuster message," he says.

Public relations played a particularly interesting part in the defense of Houghton Mifflin Co., the Boston-based publishing company, against a raid by conglomerate Western Pacific Industries. As Mr. Cheney relates it, the time-honored ploy of attacking the attacker on the basis of poor management wouldn't work because, in fact, Western Pacific was well run. But when he learned from the publisher's ceo that the authors didn't want the company to be taken over by a conglomerate, Mr. Cheney suggested that be communicated to Western Pacific's ceo and other members of the board.

Copies of authors' letters expressing their concern were provided to the *Boston Globe*, resulting in a story that included interviews with some of the authors. The *Globe* story found its way to Herbert Mitgang of the *New York Times*, who happened to be one of the leaders of the Authors' League fighting the takeover of publishers by conglomerates.

Mr. Mitgang asked the Western Pacific ceo about the authors' stand. He said: "That's got all the spontaneity of a demonstration in Red Square." The *Times* reporter then confronted the ceo of Houghton Mifflin with his adversary's quote. His retort was: "Does he think I can orchestrate Arthur Schlesinger and John Kenneth Galbraith?" Both were Houghton Mifflin authors.

The denouement of this sizzling saga? Well, the *Times* story ran using both statements and, according to Mr. Cheney, it was devastating. At his suggestion it was sent to the publishing company's authors, which inspired them to express their indignation to the Western Pacific ceo, making it clear they would never write for him. He got the message; the offer was dropped.

Perhaps Mr. Cheney took inspiration from an earlier contest which gained notoriety as the "Jewish dentists" defense. In brief, a subsidiary of Cable Fund Corp. made an uninvited pass at Sterndent Corp. which, among other things, supplied tools and gold to dentists.

As Mr. Kramer puts it, "Marry a fact with a little fiction and come up with a defense."

When it was learned that a Kuwaiti group was one of the attacker's sources of financing, a defense was fashioned that went something like this: Everyone knows dentists are Jewish; Jews won't deal with Arabs; ergo, if Sterndent is acquired by Cable Funding, you can say goodby to a healthy chunk of the business.

Mr. Kramer says this scared the Kuwaitis into withdrawing because the last thing they wanted was an international imbroglio. "It worked then," he says, "but it would have zero chance today. Aggressors are more aggressive, and that includes foreigners."

Asked if he foresees hostile acquisition activity in the ad agency field, Mr. Cheney said: "Essentially, the ad agency is a people business. The challenge is not just to get the stock but the allegiance of the people. That, combined with the problem of client conflicts, would make such a move unlikely."#

D.C. pr shops in 'star wars'

WASHINGTON—The battle for political heavyweights among local communications shops has turned into a game of musical chairs, with Gray & Co.'s losses turning into Burson-Marsteller's gains.

Gray, which triggered the "star wars" battles by bringing aboard such politicos as Alejandro Orfila, former secretary-general of the Organization of American States, and, more recently, William Bolger, former postmaster general, just lost John Lengel, former vp for pr, to Burson-Marsteller. There he'll report to a boss who's equally new: Sheila Tate, Nancy Reagan's former press secretary.

(Mr. Orfila resigned last week to work with Gray chief Robert K. Gray on another business project.)

Another Gray vp loss is Patrick Pellerin, who opened a pr shop with partners Howard Bomstein and Michael Gura, the owners of the Bomstein/Gura Agency.

Gray plans to replace its lost personnel, but the agency hasn't gained any heavy hitters in recent months, and most of the replacements are expected to be of lesser renown.

Last week, Gray promoted longtime vp Elizabeth Weltner to senior vp in charge of its new Washington Market/Special Projects Group.

And Burson is priming itself to snare some of Gray's lobbying thunder. Jon Jessar, Burson's general manager and former chief of Gray's pr division, recently hired Pat Griffin, former secretary to the Senate minority leader, to head his lobbying division.#

Beer ad ban won't hurt nets

By VERNE GAY

New York—The proposed ban on tv beer advertising is still alive in Washington, but a research report by a Wall Street brokerage house here suggests that its effect would not be severely disabling to the tv networks.

L.F. Rothschild, Unterberg, Towbin noted in its recent report that beer and wine advertising accounted for less than 18% of total network sports revenues in 1983. The major beer advertisers, Philip Morris' Miller Brewing and Anheuser-Busch, accounted for roughly 13% of the total.

While not discounting the importance of beer advertising to the networks, the report showed that the networks cull sports advertising revenues from a broad variety of sources.

For example, the automotive ad category outweighed beer and wine advertising as a revenue source for the networks' sports divisions in 1983. General Motors alone generated more than 10% of all networks' sports advertising revenue.

In total, automotive advertising contributed to more than 21% of network sports revenues.

Other major nonbeer sports advertisers include Sears, Roebuck & Co., IBM Corp., the armed forces and AT&T.

The report illustrates that an imposed ban would severely crimp the marketing efforts of the beer advertisers, however.

Adolph Coors Co., Van Munching & Co., A-B, Miller Brewing and Stroh Brewing each placed more than 70% of its total network ad budgets on network sports in 1983.

Some sources within the ad agency community, meanwhile, expressed other concerns. During a break at an Assn. of National Advertisers' tv workshop, a number of agency executives said that such a ban could have a major impact on the selling of tv sports. "It'd be a buyers' market," if the networks were left without beer sponsors in sports, said one veteran agency buyer, who does not represent a beer or wine account.

Speaking from the podium at the ANA gathering, Sam Thurm, Washington-based senior vp, labeled the proposed ban of beer and wine broadcast advertising "undoubtedly the hottest advertising issue" of 1985.

Alan Gottesman, an analyst with L.F. Rothschild, assembled the figures in two tables *(see chart above)*. The first table shows the percentage of the advertiser's total budget that goes to sports on network tv. The second table represents the percentage of ad revenue the networks receive from each advertiser.#

Health companies get help

Chicago—Sieber & McIntyre and Performance Technologies here have formed a joint field sales unit called Sieber & McIntyre/PTI.

The unit will help healthcare companies with customized training programs. Telephone is (312) 266-9200 or 670-2121.#

Incontinence market heats up

By LAURIE FREEMAN

TRANQUILITY
Undetectable brief
TRANQUILITY
PERRY

Tv spots for Devilbiss Healthcare Worldwide's Tranquility products are aimed at "the active incontinent." Barnum Communications, New York, is the agency for Tranquility.

Devilbiss Healthcare Worldwide will break its first network tv campaign in May for Tranquility incontinence pads and briefs. Devilbiss' action could add a third major competitor to what has been a virtually exclusive battle between Procter & Gamble, Cincinnati, and Kimberly-Clark Corp., Neenah, Wis.

The flushable pad system, developed by Principle Business Enterprises, Dunbridge, O., and marketed by Devilbiss, Somerset, Pa., has been available in home healthcare stores and some pharmaceutical home healthcare sections since last spring.

The network tv launch coincides with the company's move to make Tranquility available in all drug outlets.

Themed "Maximum security with minimal bulk," the spots already have been airing in limited areas, such as Chicago and Fort Myers, Fla. Barnum Communications, New York, is Tranquility's agency.

Tranquility products, like Kimberly-Clark's Depend undergarments, are aimed at "the active incontinent," a Devilbiss spokeswoman said.

"Of the estimated 8 million incontinent people [in the U.S.], only 700,000 [9%] are considered bedridden incontinent. The rest are ambulatory," said Francis Bouda, a patent attorney-consultant specializing in paper products.

"For the ambulatory market, there's a need for easy-to-use, nonbulky, superabsorbent products, and Tranquility may take [P&G and K-C] by surprise," he added.

However, K-C marketing executives don't view Tranquility as a competitor against their Depend shield and pads.

"[Tranquility] doesn't have meaningful consumer value. . .its flushability is a gimmick. As a practical matter, you'd have to handle it after use and it remains to be seen whether consumers want to do that," a K-C spokesman said. Neither Depend nor P&G's Attends is marketed as a flushable product.

Retail sales of incontinence products totaled $250 million in 1984, Mr. Bouda said.

Industry analysts say the market will eventually grow to $6 billion, surpassing the baby diaper category.

P&G owns 52% of that market, "primarily because it markets Attends to the bedridden incontinent," Mr. Bouda said. Attends is sold to hospitals and nursing homes and through durable medical equipment supply stores.

Attends pads also are available by mail order through Sears, Roebuck & Co. and Montgomery Ward & Co.

K-C has an 8% share of the market, "a smaller percentage because the company is going after the active, at-home, ambulatory market [which is harder to reach than the bedridden market] and is selling Depend pads and shields through drugstores. However, K-C may come out on top because the market for active incontinents is far greater than the bedridden," Mr. Bouda said.

Network tv spots for Depend position the brand as the one for "comfortable, discreet protection. . .gives you effective protection from wetness because of a fluid-locking material that absorbs fast."

A similar spot for Depend shields notes that the shields offer security from minor bladder control problems. Campbell-Mithun, Minneapolis, is the Depend agency.

To capture its share of the ambulatory market, P&G is now marketing Trimfit Attends, a product Mr. Bouda said is "like a diaper but not as bulky.

Trimfit Attends is marketed through nursing homes, a P&G spokesman said. This smaller version of Attends includes a "wetness indicator," a thin, litmus strip that turns blue when the diaper is wet.

Benton & Bowles, New York, handle advertising for both P&G Attends products.#

Wendy's benches ballpark spot

By SCOTT HUME

A funny thing happened on the way to the ballpark.

"Ballpark" was the title of what was to have been one of two new spots comprising Wendy's latest campaign (AA, Feb. 25). The commercial centered on a fast-food customer who asks when his hamburger was prepared. In reply the counterman asks, "Ballpark figure?"

But director Joe Sedelmaier woke up one night before production began with second thoughts. He called Cliff Freeman, copywriter for Wendy's national agency Dancer Fitzgerald Sample, New York, and the two decided there was an even better idea for a commercial: "Wine cellar."

"The agreement I have with Wendy's now is that I get involved with scripts right from the beginning, which saves making changes on the set," said Mr. Sedelmaier, who has directed a half-dozen commercials for the fast-food chain, including the immortal "Where's the beef?"

"And the way Cliff and I work, we toss around a lot of ideas before the script goes to the client. I thought 'Ballpark' was funny, but the more I thought about it, I realized it didn't relate to the problem the spot is supposed to address, which is Wendy's fresh preparation."

As a result, the "Ballpark" script was sent back to the minors and Messrs. Sedelmaier and Freeman created "Wine cellar." It goes on the proposition that aging might be acceptable for fine wines and cheeses, but hamburgers are best when they're served fresh from the grill.

Wendy's is comfortable giving Mr. Sedelmaier a free hand, but it was keeping a somewhat nervous eye on the clock during the past two weeks while production of "Wine cellar" and its companion spot, "12 o'clock," was completed. Both are planned to air on the networks beginning this week.

So, too, is a commercial titled "The will," which also completed filming only last week. That spot is the first tv work for Wendy's from Lockhart & Pettus, New York, hired last fall as the chain's agency for the black market.

The spot focuses on a family gathered for the reading of a wealthy relative's will. Family members who "couldn't tell a good hamburger if it looked them in the eye" are left only some stern advice on their taste in fast-food chains, while the nephew who introduced the deceased to Wendy's inherits the whole estate.

Wendy's hopes to work "The will" into the network rotation if time constraints allow. Spot buys on programing with high black viewership are definite.#

Allbaugh opens company

Westport, Conn.—J. William (Bill) Allbaugh is opening an advertising sales rep company here called Allbaugh, Decker, Freas.

Mr. Allbaugh left Sept. 1 as advertising director at *Newsweek* (AA, June 25, *et seq.*).

The other two partners in the new company are John Decker, president, Decker Decker & Freas, and Lenwood Freas, exec vp at DDF. Allbaugh, Decker, Freas is located at Four Nutcracker Ln., 06880.#

DDB a winner in up-&-down 4th quarter

By STEWART ALTER

Doyle Dane Bernbach International, New York, the last of the public ad agencies to release its 1984 figures, had what was probably the best news to report relative to its own past performances.

In a fourth quarter of extremes, exhilarating some shops and upsetting others, DDB had reason to be thrilled.

Through a variety of much-publicized cost-cutting measures (AA, Jan. 28), DDB managed to boost '84 net income, excluding consideration of an extraordinary gain in 1983, by 51% in the quarter and 36% for the year *(see accompanying chart)*. In the previous two years, DDB earnings had declined.

Mickelberry Corp. was probably most thrown for a loop, owing to the loss of the Brown & Williamson Tobacco Corp. business in Cunningham & Walsh's Chicago office and the costs associated with restructuring that office. It posted a loss of $518,000 in the fourth quarter, bringing 1984 net income to $1.3 million from $2.6 million a year earlier (AA, March 4).

Alan Gottesman of L.F. Rothschild, Unterberg, Towbin judged the year financially as being "okay. It didn't knock my socks off, but it wasn't bad."

Some agencies did turn in strong, if anticipated, results. Ogilvy & Mather reported a net income gain of 45.2%, double its 22.5% increase in revenues.

That thrust O&M ahead of JWT Group in the earnings category. The two had similar net incomes in '83, but O&M's earnings of $25.8 million in '84 were considerably higher than JWT's $20.5 million (AA, Feb. 25).

JWT said net income declined in the fourth quarter, owing to "a higher level of business development spending, higher compensation costs and the impact of the strong dollar on its international operations."

But JWT and Interpublic Group of Cos. were added to the recommended list by Charles Crane, an analyst at Oppenheimer & Co.

On JWT, he said, "Following an anticipated decline in first-quarter earnings [at JWT], per-share comparisons should improve smartly for the balance of the year. Earnings are expected to increase some 20% in 1985 over 1984."

Interpublic got on the recommended list for its $100 million in new-business wins in January. And that was before the RJR Industries realignment *(see story on Page 1)*, a bonanza for McCann-Erickson Worldwide.

Mr. Crane added, "The uncertain economic forecast which formed the basis of our modestly bearish yearend outlook for the agency stocks has been replaced by the consensus view that the current recovery will last at least until 1986."#

Agency financial results

While 1984 was a healthy year for revenue growth for most agencies, the rate of net income increase was even higher for such agencies as DDB, Interpublic and O&M. NA means not applicable. Source: *Advertising Age*.

[2] *Doyle Dane Bernbach's actual 1983 net income both in the quarter and for the year was actually $1,009,000 higher because of an extraordinary item—redemption of funds from a terminated pension plan.*

[3] *Foote, Cone & Belding's figures are restated from what was actually reported in 1983 to reflect the merger with The NCK Organization, which took effect Jan. 1, 1984.*

Saatchi hooks Rowland shop

By STEWART ALTER

The Rowland Co. is expected to begin expanding first on the West Coast and then nationally and internationally following its agreement last week to be acquired by Saatchi & Saatchi Co., London. Much of the expansion is likely to come through acquisitions.

It was the need to expand to keep up with the other major ad agency-owned public relations agencies that became the primary motivation for Herbert Rowland to sell his New York company.

"We're among the top 10 firms, but increasingly we find that to be competitive to attract business that is multinational, we need to be able to provide greater resources," Mr. Rowland said. He is tied into a five-year contract to remain the agency's president.

Rowland Co., one of the nation's top 10 pr agencies with 1984 fee income of $10.4 million and pretax profits of $2.2 million, has agreed to be acquired by Saatchi for an initial cash payment of $10 million plus future payments based on an after-tax income formula.

"It's become increasingly clear that with our business developing on the West Coast that we need a presence there," said Mr. Rowland, whose agency handles many major national clients, all from New York.

Among Rowland's top clients are Chesebrough-Pond's, Citibank, E.I. du Pont de Nemours & Co., Eastman Chemical and Procter & Gamble. All are clients of various Saatchi agencies.

What appealed to Mr. Rowland most about selling to Saatchi was its hands-off attitude toward subsidiary management. "The important thing to me was I never wanted to be owned by a single advertising agency."

Although Saatchi generally doesn't get involved much in the daily management of its companies, it recently has begun focusing more on spreading business through its network. In the two months since it acquired the Hay Group consultancy, it reportedly has had the opportunity to spread four clients either from an ad agency to Philadelphia-based Hay or vice versa.

The identities of those clients could not be learned. Some advertising clients, such as Pirelli Tires, which Saatchi handles overseas, also have become U.S. agency clients. Pirelli recently moved to Cochrane Chase, Livingston & Co., Irvine, Cal., from in-house.

With its entry into the pr business, Saatchi has what may be an even greater opportunity for spreading business because pr agencies often benefit from ad agency referrals.

In fact, some of the last remaining independent pr companies see each pr agency acquisition as a boon for them. "The fewer of us there are, the more referrals we're going to get," said Robert Marston, president of Robert Marston & Associates and a former admiring employe of Mr. Rowland.#

Rance Crain, Crain Communications president (r.), and Mark Pattis, vp-general manager of National Textbook.

Crain Books

(Continued from Page 3)

sales promotion and communications.

Rance Crain, president of Crain Communications, said: "We have long recognized the need to expand the activities of Crain Books. National Textbook Co. has the people and the resources to serve the growing communications business."

Mark Pattis, vp-general manager of National Textbook, commented: "Crain Books is an excellent complement to our current publishing activities. The knowledge that exists within our two companies will enable us to publish a number of exciting books to serve the constantly changing fields of advertising, marketing and communications."

Crain publishes ADVERTISING AGE and other business and consumer publications.#

Travisano

(Continued from Page 1)

now has 64% control of the shop, founded in 1966 with only a few clients—a hairpiece company and two small hotels, there will be a reorganization of stock ownership involving other partners in the near future.

Mr. Travisano, who will remain a consultant to the agency for five years, will be joined in his new venture by his cousin, Frank DiGiacomo, a former Della Femina executive who now heads a small agency under his own name. Mr. Travisano said he soon will begin hunting for office space here.

"I've been wanting to do this for two years," explained Mr. Travisano, who has been directing commercials for a number of the agency's clients, including American Isuzu Motors, for which he will continue to work, and WDIV-TV, Detroit. He also directed two spots for President Reagan's reelection campaign as a member of the ad hoc agency that called itself the Tuesday Team.

Although the two partners peppered the phone interview with quips and laughter, there was an underlying tone of sadness as they spoke.

Questions about their early days seemed to bring forth the most wrenching memories for the two men. Recalling the past, Mr. Travisano remarked, "We've been together since 1965 [when they worked at Ted Bates & Co.]. Those were the days Jerry had hair and I had black hair." As for their proudest accomplishment, Mr. Travisano remarked, "It's been the 17 years of incredible creativity. We have provided arenas [New York and Los Angeles offices] for people to do incredible work. Having been at [the former] Delehanty, Kurnit & Geller and then Bates, we went out and built an agency that *we* would like to work for."

Mr. Della Femina said he will assume Mr. Travisano's duties until a successor is named. In Los Angeles, James Weller is the agency's other co-director of creative services-U.S.

In response to a question, Mr. Della Femina said he plans to be in the agency business "forever."

James Travis, vice-chairman and chief operating officer, was known to be notifying Della Femina clients of Mr. Travisano's departure late last week.#

Kostyra

(Continued from Page 1)

division from 1980 to 1983. He will get a corporate assignment in the "business development" area, the agency said.

The spot operation, which buys $360 million worth of time, no longer will report directly to Robert Buchanan, the exec vp-U.S. media director. Instead, Mr. Kostyra will report to John Peters, JWT USA president, and Stephen Bowen Jr., exec vp-general manager, JWT, New York.

Effective April 1, the spot operation will be reorganized into two groups, with the intent to tie it more to account-planning needs.

"More clients are becoming increasingly sophisticated in the way they want to do regional marketing," said Mr. Bowen. This has led the agency to conclude that spot buying "needed to be more closely woven into the fabric of offices by having a mechanism to relate it more to people who run the accounts," he said.

In some cases, there have been clashes between the account and spot-buying operations.

Some clients "want tonnage," said Mr. Bowen, while others have different needs. "We have to have a unit responsive to these kinds of things. Both in terms of individuals and structure, we have significantly strengthened the capability of our spot unit."

In light of that last remark, upon which Mr. Bowen would not elaborate, the move also appears to indicate that JWT believes it has put the controversy around Ms. Luisi behind it and can return direction of the department to a media professional.

Ms. Luisi had headed JWT's spot buying and tv program syndication units prior to a discovery that syndication revenue had been overstated significantly through computer-system entries. Because of the discovery of these irregularities, JWT had to restate its earnings to reflect a loss of more than $30 million. Ms. Luisi was dismissed March 31, 1982, and since has filed a libel suit against JWT. A decision on whether it will go to trial or be dismissed is pending in the New York state supreme court.

The Luisi episode has had a lingering effect in that it has made JWT still feel inordinately vulnerable to rumors. One, from an anonymous caller to various publications more than a month ago, claimed there was a West Coast billings scandal at JWT affecting Burger King, the agency's largest spot client. BK chairman Jeffrey Campbell immediately responded (AA, Jan. 21) that he had been informed by JWT of what was happening and that it involved a program-rating procedure.

The anonymous caller then called again to say Mr. Hackett would be replaced as head of the spot-buying operation as a result of the discovery of a billings irregularity involving several clients. A JWT spokesman at the time denied any personnel change was under way; apparently no decision was made until recently.

While the caller in both cases has pointed, somewhat accurately, to actual developments at the agency, there appears to be no evidence that the changes in either the program-rating procedure or spot-operation personnel have to do with anything that could be called irregularities.#

ABC-TV turns down a spot of Seagram's

By GAY JERVEY

Joseph E. Seagram & Sons' bid to get on tv with a comparative campaign equating the alcohol content of whisky, wine and beer was dealt a major blow last week when ABC-TV rejected the distiller's proposed campaign.

According to an ABC spokesman, Seagram's plan is contrary to the network's policy prohibiting advertising for hard liquor on its airwaves.

Seagram now is awaiting word from NBC-TV, which was still reviewing Seagram's "equivalency" tv spots late last week. An NBC spokeswoman said a decision was expected soon.

CBS, which was not included in Seagram's original conversations with the networks, will get its chance to scrutinize the campaign this week, according to Walter Haimann, Seagram's senior vp in charge of external affairs.

At the same time, Michael Jacobson, executive director of the Washington-based Center for Science in the Public Interest, has been talking to network standards and practices executives, urging them to refuse the Seagram effort.

In addition, Mr. Jacobson sent letters to all three networks and the Turner Broadcasting System that, among other things, described the ads as a "real disservice to the public" and "an inducement to drink hard liquor."

According to Mr. Jacobson, the networks told him that they would move very cautiously. "They realize the significance of the issue and don't want to jump," he said.

"They also seemed to think that ultimately Seagram would run the messages under the signer of a group like MADD [Mothers Against Drunk Driving] or SADD [Students Against Driving Drunk]," Mr. Jacobson continued. "But that makes no difference. It's still an ad for liquor."

Mr. Jacobson, a leader in the movement to ban beer and wine advertisers from tv, termed the actual spon-

(Continued on Page 94)

The new USA Band, backed by Anheuser-Busch, rocks the crowd at New York's Limelight club. *(Staff photo by Arnie Adler.)*

A USA Band in hand is worth plenty to Busch

By GAY JERVEY

The only beer served that night was Budweiser, at least between 7 p.m. and 10 p.m. Other than that, there was little evidence that the debut of a new rock 'n' roll group called USA Band was signed, sealed and delivered by Anheuser-Busch.

Rarely do unknowns such as USA have their first gig at the Limelight, one of Manhattan's current hot spots that sports lines as late as 3 a.m. and normally features taped, not live, music. But this time, St. Louis-based A-B quietly is putting its name, and more importantly, its pocketbook behind a "baby band" that—and here's the rub—has been custom-made for A-B.

So on the big night, one or two gray-flanneled A-B executives milled in the crowd, snapping and swaying a bit self-consciously. But, by and large, the 2,000-strong crowd skewed far more toward an anything-goes look than a corporate one. Mohawk cuts and pink hair mixed with record executives and sashaying models.

Why all the secrecy? Quite simply, as a USA spokesman said, A-B is in the business of beer, not bands; it does not wish to be deluged by young musical hopefuls—so much so that Budweiser declined to comment on its involvement with USA.

Sponsoring undiscovered musical talent is a growing, but not altogether new trend among corporations needing to tap the youth market. A-B's brewing rival, Milwaukee-based Miller Brewing, has adopted music as its linchpin strategy to reach this group, according to Gary Reynolds, president of Gary M. Reynolds & Associates, a Milwaukee-based group that handles all the entertainment/music promotions for Miller.

In addition to the well known Miller High Life concert series,

(Continued on Page 96)

Another exec out in Coca-Cola tiff

More fizz at McCann

By VERNE GAY

New York—A top-level executive at McCann-Erickson was ousted last week following conflicts with the media management of the agency's largest account, Coca-Cola Co.

Dan Riordan, senior vp-director of national broadcast, a veteran network negotiator who formerly supervised Ford Motor Co.'s network business at J. Walter Thompson USA in Detroit, was dismissed last week after holding the McCann position for just six months.

Mr. Riordan is the second top media executive to be ousted from the position in less than a year. Rick Busciglio, now an account exec with the Christian Broadcasting Network, also reportedly left the department under similar circumstances.

Commenting from his home, Mr. Riordan said, "I'm extremely disappointed and surprised at the turn of events. My long record and experience in the business speaks for itself." Mr. Riordan would not elaborate on the reasons for his departure or his next move.

Mr. Riordan will be replaced by John Otter, senior vp-director of network programing for SSC&B, which, like McCann, is a Coca-Cola Co. agency and a member of the Interpublic Group of Cos. No successor to Mr. Otter was named.

Mr. Riordan's immediate superior, Gordon Link, exec vp-director of media services, also would not go into details about the situation. He said, however, that the succession was "healthy" for McCann's network buying group and denied that the group, which has experienced turnover in recent months, was in turmoil. "The de-

Ogilvy & Mather wins $35 million Hardee's pitch

Rocky Mount, N.C.—Hardee's Food Systems has moved its $35 million national ad account to Ogilvy & Mather, New York, following a review that also included N W Ayer, Ted Bates Advertising/New York and William Esty Co. "In the final analysis, we saw three or four excellent campaigns, but only one long-term positioning," said Ronald Wertheim, exec vp-marketing, explaining why O&M was named to succeed Benton & Bowles (AA, Jan. 14). A new campaign for the 2,315 store fast-food chain will be launched this summer.

Cunningham & Walsh to leave Dallas behind

New York—Cunningham & Walsh's Dallas office, not yet three years old, will be closed May 1, forcing the *Dallas Morning News* and Lennox Industries into agency searches. C&W said it intends to concentrate on its larger offices. Both C&W orphan accounts expect to name new Dallas-based agencies.

General Foods freshens Maxwell House cans

White Plains, N.Y.—General Foods is introducing Maxwell House ground roast with a "fresh lock packet"—a new concept that the company says allows for a fresher brew due to a packaging device within the can—into a spring Dallas test market. Ogilvy & Mather, New York, is the

HCM bubbles over Orangina

By STEWART M. ALTER

Havas Conseil Marsteller, which needs to make some creative waves in New York and London as part of its growth strategy, will get a good opportunity with new commercials in that most visible of categories—soft drinks.

It has been assigned advertising for Orangina, a carbonated citrus beverage that has more than a 20% share of the soft-drink market in France, but previously was introduced unsuccessfully into the U.S. under another name. HCM also handles the brand in the U.K.

"We see New York, Paris and London as important markets for developing agency creative reputations," said Robert Schmetterer, president-ceo worldwide of the $500 million agency formed this year as the result of a joint venture between Marsteller and the French-based Havas Conseil.

Since HCM is betting there's a niche in the multinational agency world it can fill by being a creative powerhouse in each of its U.S. and European offices, winning that reputation in those three prominent markets is a cornerstone of its strategy.

HCM/Paris, the largest European office, already is strong creatively, while HCM/London, which is small, won't get a new creative director until midyear. But HCM/New York, a $75 million agency and second in size in the

Israel touches off fresh tomato tempest in U.S.

By LENORE SKENAZY

New York—This food fight is dirty. Florida tomato growers are accusing Israeli tomato exporters of "dredging up illusions [sic] of the Holocaust" in their ads.

Agrexco, the government and kibbutz-owned Israeli company exporting Carmel brand tomatoes and other produce, ran ads in the *New York Times*, plus 30 and 10-second spots on local tv, to promote its premium tomato. "Move over, you thick-skin, mealy mouth, paleface imposter. There's a new tomato in town," challenges the copy.

The ad goes on to describe how American "Agribusinessmen force-feed their tomatoes to get a quick yield. They wean them too early, pluck them from the vines still green and gas them to turn 'em pink. Then they cram them into semi-trailers and turn them out into the street. Tsk. Tsk. No way to turn out a nice tomato."

The Florida Tomato Exchange, a 30-member organization representing most of the South and Central Florida tomato farmers, urged the *Times* to stop running the ad. In a Feb. 11 letter penned by the Exchange's pr man, David Gustafson of Communication Resources, Waukesha, Wis., it noted that from mid-October to mid-June more than 90% of the tomatoes found in New York markets are shipped from Florida. "So these obviously must be the [ones] that Agrexco tells to move over."

When the *Times* refused to reject the ad, Mr. Gustafson issued a press release headlined "Israel declares war on U.S. tomato industry."

The release said: "Dredging up illusions of the Holocaust, the Jewish ads denounce American tomatoes for being 'gassed' and 'crammed into semis' for shipment. They accuse Americans of 'force-feeding tomatoes' and 'weaning them' too early from the vine." Wayne Hawkins, exec vp of the Florida Tomato Exchange, was quoted as saying, "Resorting to slurs, intentional distortions and outright lies about tomato production in the United States is an affront; it's counterproductive. I

Ally in global linkup

Shopping around

By CLAIRE WILSON

Paris—Advertising agencies in 35 countries—including the U.S., represented by Ally & Gargano in New York—will announce March 19 that they have formed an unusual new international network whose members have total gross income in excess of $90 million.

The network, called Grandfield Rork Collins International Holding Co., or GRCI, has as founding members Homsy Delafosse et Associes, Paris; Edem, Athens; Associati Globe, Milan, and Schofield Sherbon Baker, Sydney, as well as London-based Grandfield and Ally.

Federal Express, an Ally & Gargano account, is the network's first international client. The campaign for Federal Express will break in Europe in May *(see related story on Page 58).*

Nigel Grandfield, chairman of GRC, also is GRCI's chairman. How the agency will organize itself to service clients across borders

Blair slows buys to fine-tune management

By WILLIAM F. GLOEDE

New York—Just as the overextended consumer who's made liberal use of credit cards, John Blair & Co now is paying the price of its purchasing habits.

During the past 12 months, Blair's stock price has swung wildly from a high of $40 to a low of $14 on the New York Stock Exchange. Its 1984 pretax earnings were less than half of 1983's $35.2 million, despite the doubling of revenues from $414.3 million in 1983 to $842.4 million last year. And two of its units, John Blair Marketing and Advo/Blair, underwent extensive changes in management and staff late last year and early in 1985 (AA, Oct. 29, *et seq.*).

To complicate matters further, Blair's stock recently has moved rapidly from 14⅛ to 22⅜, setting off wild rumors on Wall Street that several communications companies and even an insurance company wanted to buy Blair.

Jack W. Fritz, Blair's president-ceo, has an explanation for Blair's perceived malaise. The company, in the past two years, has sunk about $100 million into media acquisitions, with its most recent buy being the Hartford, Conn.-based Advo System. When Blair bought Advo in early 1984, it embarked on a rapid expansion program that proved extremely costly. At the same time, the bottom fell out at another of Blair's units—John Blair Marketing—due to changes in the marketplace. The result was the poor 1984 earnings performance, and the sharp drop in the price of Blair stock.

In an Advertising Age interview with three Blair executives in the company's offices here, Mr. Fritz said, "When we were at 45, about a year-and-a-half ago, that was probably too high, a little euphoric. Certainly, the price dropping down to 14 was ridiculous."

Ridiculous, maybe. But it did attract investors, including the Allstate Insurance Co.'s Equity Fund, which, already an investor, acquired more Blair stock, putting it over a 5% ownership position and making necessary a filing with the Securities & Exchange Commission. Wall Street analysts began speculating that Allstate (some called it Sears, Allstate's parent) was seeking to buy Blair.

A depressed-market bargain

Mr. Fritz scoffs at that notion, saying he believes Allstate as an institutional investor saw a bargain in Blair's depressed-market price and increased its holdings.

"Every time our stock starts to go up a little bit, the rumors hit the street that somebody is going to buy us," he said. "We're fairly thin out there, so if anybody wants to come in and buy a little bit, the stock will jump up a point and a half or two points in a very short period of time."

Mr. Fritz believes Blair is less like an overextended consumer than a consumer who bought a Picasso at a bargain-basement price. In 1984, Blair bought itself what Mr. Fritz calls a $40 million "machine"—Advo—that he expects will dispense cash for acquiring radio and tv stations.

Advo/Blair is the nation's largest third-class mailer. During the past three years, its revenues have more than tripled from a little more than $100 million in 1982 to $320 million last year. But that explosive growth came at a price. The rapid expansion, the result of what Mr. Fritz called the "grandiose" vision of Advo's former owners, had the company starting Marriage Mail programs to a substantial number of markets where profits were marginal at best.

"We extended ourselves pretty rapidly in 1984," said Mr. Fritz.

Last fall, Blair began cutting the number of markets served by the Advo/Blair unit from 215 to 160 and consolidating operations in several other markets.

"Now, we're managing for profit," he said. Advo has no expansion plans for the near term.

Added Hugh Beath, who joined Blair as exec vp-operations from president of R.J. Reynolds Industries' Del Monte specialty grocery products division late last year, "We should be able to grow that business dramatically without one new household reached." (Advo now reaches 42 million households nationwide.)

Turmoil hits fsis

Last year Blair saw 1983's $15.8 million operating profit turn into a 1984 operating loss in its John Blair Marketing unit, which prints, sells and distributes manufacturers' cents-off coupons in freestanding inserts (fsis) to Sunday newspapers. Total operating profit for John Blair & Co. in 1983 was $47 million. The 1984 operating profit in Blair's marketing services division was slightly more than $6 million, reflecting almost exclusively the blending of Advo's profits into the marketing services group.

Turmoil hit the fsi business last year, said Steven Kampf, an Advo veteran who became president of the marketing unit last year.

"The price-value relationship in the fsi business has eroded substantially," said Mr. Kampf. The concept of category exclusivity for advertisers' products virtually has disappeared as the four major producers of fsis increased the number of coupon dates offered to the extent that as many as four inserts would show up in the same Sunday newspaper. A price war among the fsi producers further exacerbated the profit picture, said Mr. Kampf.

John Blair Marketing has cut the number of fsi dates planned for 1985 to 21, six less than it produced in 1984. At the same time, it has increased the number of its exclusive Network Mail (a shared-mail program that uses a coupon insert as a wrapper for several advertising inserts) from 12 to 20.

Blair's broadcasting businesses are "moving ahead very nicely," said Mr. Fritz, although time sales at the company's San Juan, P.R., and Oklahoma City tv stations have been somewhat soft during the first quarter of 1985, with all business off in San Juan and national sales off in Oklahoma City.

Business is booming

Business is booming at two other John Blair units, its Blair Television advertising representative company and its Blair Entertainment division. The company's eight radio stations also are doing well, Mr. Fritz said.

Its two radio representative companies are profitable, but they don't contribute heavily to the bottom line. "I don't think you make a lot of money in the radio rep business," said Mr. Fritz. But the company has a long history in the rep business, with several major long-term clients and its own radio stations. "It's a business that is profitable," he said, "but you're not going to get rich that way."

Through the rest of 1985, Blair will continue its inward focus, oiling and greasing the Advo cash machine and building up the corporate coffers. Mr. Fritz does not expect any major acquisitions this year. But he clearly does want to buy more radio and tv stations, now that the Federal Communications Commission has increased the number of tv and am and fm radio stations that one company can own from seven to 12 of each.

"I would think that it's probably going to take place in 1986," he said, "not in 1985. We've got a few other things we have to clear up before we get back into an acquisition mode."#

CORRECTIONS & CLARIFICATIONS

• The rate card for Marketing Evaluations Inc., Port Washington, N.Y., calls for $50,000 per year per tv network for its full TvQ Program ratings service and $12,500 annually for each network for its Performer Q service, not $690,000 annually per network as reported in an article headlined "Audience reaction steers tv program pilots" (AA, Feb. 28, P. 27). Steven Levitt, MEI president, also points out that ABC is not a subscriber to the Performer Q ratings. He also notes that the Screen Actors' Guild did not, as reported, file a lawsuit against him. What actually happened, he said, was that a bill that would have outlawed Performer Q and other entertainer surveys was defeated in the California state legislature and ultimately was withdrawn. Thus, the action did not constitute a lawsuit specifically directed against him.

• The magazine among those with the largest percentage declines in circulation for the six months ending Dec. 31 (AA, March 4, P. 66) should have been identified as *Tiger Beat*.

• Grey Advertising's full-year 1984 net and gross income were incorrectly reported in a chart on public ad agency financial results (AA, March 11, Page 90). Net income for the year was $10.2 million, up 27.3% from $8 million in 1983, while gross income was up 26%, to $204.1 million from $162 million.

• The Ad Whirl column (AA, March 14) incorrectly reported that the Marschalk Co. had refused to work with top-model Christie Brinkley because of a quarrel she had with another model while shooting an ad for the agency. Marschalk says it has never worked with Ms. Brinkley. Ms. Brinkley has called the report "completely false."

• Zwiren & Wagner, Chicago, is the agency for Beecham Cosmetics' Diane Von Furstenberg "In the Pink" skin fitness kit and Vitabath bathing gel (AA, March 11, P. 82) #

Hale opens pr agency

New York—Alan Hale Public Relations, a new public relations agency specializing in entertainment clients, is opening offices here at 1501 Broadway, 10036.

Mr. Hale was formerly in the position of account exec at March Five Inc.#

Direct-marketing agencies register strong '84 gains

New York—Last year was a strong year for direct-marketing agencies, according to the annual survey of billings released by the Direct Marketing Assn.'s research department. Only one agency posted a decline for the year; virtually all others that reported showed sizable increases.

However, there are some new faces showing up among the 10 leading direct-marketing agencies as reported by DMA, largely the result of a change in the way the statistics are compiled.

This year for the first time, DMA is publishing two lists, one for agencies that provide only the usual agency fare and a separate, smaller, listing of those specialized agencies that also combine in their billings the revenue derived from related businesses such as lettershops, database or printing.

In the past, DMA has not separated the two groups, much to the consternation of agencies that did not report or did not have related income. The change, according to a spokeswoman at DMA, was made by the association's research department and a committee of agency representatives. "They didn't want to compare apples and oranges any longer," she said.

Of the 10 leading agencies listed a year ago, two have been moved off the general list and now appear on the smaller list of specialty agencies. The Direct Marketing Group, which last year had been considered the third-largest agency, now heads up the list of specialized agencies. And the Direct Marketing Agency, purchased last year by Cunningham & Walsh, moved from the No. 8 spot last year to No. 4 on the specialized list.

Those moves, plus the acquisition of Smith-Hemmings-Gosden by Foote, Cone & Belding, also on the smaller list, made room for three new agencies in the Top 10—Soskin/Thompson, MARCOA Direct and Direct Inc. (formerly Benton & Bowles Direct). They're Nos. 8, 9 and 10, respectively.

Another change among the leading agencies was Grey Direct, moving from No. 9 to No. 5 on the strength of a 43.4% increase in revenue, the largest increase reported by the leading agencies. AyerDirect moved the other way, dropping to No. 14 with a 10.3% decline in billings.#

[1] Formerly B&B Direct

Repeat customers mean $$: Exec

New York—The key to profits in direct marketing is repeat business, but, unfortunately, little thought is given to retaining customers until the introductory advertising is well under way, according to Terry Reiner, exec vp, Zimmermann & Reiner Direct.

Addressing a recent meeting of the Direct Marketing Club of New York, Ms. Reiner outlined the essential elements of a campaign built around "retention marketing."

"The first principle," she said, "is providing a strong and unique position or reason for your product or service. . .developing realistic expectations on which you can deliver. . .and developing and establishing frequency tactics before the introduction."

Techniques available to direct marketers, she said, include bounce-back materials included with orders, follow-up telephone calls and post-purchase catalogs.

She cautioned against techniques that work against future orders. "I think there is nothing more bizarre than the system which health clubs or gyms have of forcing members to stop being customers by limiting the period of their memberships and making them renew once a year if they want to continue. Why not go with human nature, like an insurance company or a book club, and force a customer to *cancel* if they don't want to continue. What's wrong with a lifetime membership to the East Side Tennis Club?"

Once a business is launched, she said, the company then must work to hold on to its customers. Reasons they might leave include unrealistic expectations not satisfied, a bad experience with the product or service, inertia or apathy, or more competitive alternatives.

Methods that have been successfully employed to counteract these problems, she noted, include communications—personally addressed if possible—that involve the customer in the business. Surveys and brochures often are used, she said. And research, she added, not only helps to keep customers motivated, it can reveal facts about your customers than can help with future sales.

As the customer relationship grows, it becomes especially important to track and monitor its progress, she said. Careful monitoring can reveal whether or not you're keeping long-term customers satisfied.

And one way to do that, she said is to recognize and reward customers for long-term patronage. "You must give your long-term customers the impression that they are members of an exclusive group who, because of their loyalty, are entitled to unadvertised specials not available anywhere else." In so doing, she said, "You force them to maintain a high level of interest in your relationship."#

New shop helping its clients bail out

Minneapolis—S.E. Nelson, a new full-service general and direct advertising agency, is using a direct-mail and telemarketing campaign to develop business.

The agency, which opened its doors in mid-February, developed a self-mailing brochure that it is sending to 400 targeted potential customers.

"We're positioning ourselves as an agency that you call when you're really up against it," said founder and president Lance Nelson. "We're going after four types of companies—high-tech, health-care, financial services and companies where new products are an important element of growth, like package goods."

To that end, the brochure teases, "You've just been tossed out of an airplane with no parachute. What do you do?"

The answer: "Pull the cord [the one attached to your phone] to head for a softer landing."

The mailings were directed to companies in the Twin Cities, Chicago and St. Louis.

The brochures will be followed by a second mailing that contains a reprint of a *Minneapolis Star & Tribune* article that reported on the new agency. A third mailing will consist of a personal letter from Mr. Nelson, to be followed by a call, meeting and lunch.

"My experience is that, so far, the brochures haven't prompted very many phone calls. But when I call, there is instant recognition of who we are and that they received the mailing," he said.

S.E. Nelson already has two clients, neither of which were won via the campaign. Both are located in the Twin Cities.

Before founding his agency, Mr. Nelson was exec vp at Associates & Larranaga, an advertising agency here. Earlier, he served as director of new products at Land O' Lakes and as an account supervisor at what then was known as Needham, Harper & Steers, Chicago, where he worked on the Anheuser-Busch and McDonald's accounts.

S.E. Nelson is located at 112 N. Third St., 55401.#

Senior editor Paul L. Edwards, New York, is the editorial director of the Advertising Age *Direct Marketing section.*

Tv spot testing flat for '84

New York—There were 8,037 incidences of tv commercial testing in 1984, a slight dip from 8,066 tests in 1983, market researcher Jack Honomichl reported at the 31st annual conference of the Advertising Research Foundation here last week.

Mr. Honomichl said the 1984 figure was down a scant 0.4% from 1983. The figures he presented were compiled from confidential data supplied by 11 research organizations and two major advertisers, General Foods and General Mills.

The research companies included ASI Marketing Research, Bruzzone Research Co., Burke Marketing Research, Gallup & Robinson, Mapes & Ross, M/A/R/C, McCollum/Spielman Research, Sherman Group, Video Storyboard Tests, Vopan Marketing Research and Westgate Research.

Mr. Honomichl also unveiled the ARF's new magazine research expenditures index, which he helped develop in cooperation with the ARF and the Magazine Publishers Assn.

There are 26 publications participating in the index. Of the $7.1 million invested by those magazines last year, 46% of the total was invested in syndicated audience measurement studies; 15% for custom ad hoc studies; 12% for editorial development and evaluation, and 27% for "all other."

The magazines covered by the index include *Better Homes & Gardens, Bride's, Business Week, Family Circle, Field & Stream, Forbes, Gentlemen's Quarterly, Glamour, Golf, Golf Digest, Gourmet, House & Garden, Inc., New York, Parents, Playboy, Popular Science, Reader's Digest, Seventeen, Smithsonian, Southern Living, The New Yorker, Tennis, U.S. News & World Report, Vanity Fair* and *Vogue*.#

PROMOTIONS VIA SHOPPING MALLS

Founded in 1975, Shopping Center Network produces National Traveling Mall Merchandising Events for M&M/Mars, Kraft, Chevrolet, General Foods, Lorimar, Clairol, Procter & Gamble, and other leading advertisers.

Study warns of harm from 15-second spots

New York—The first results from the J. Walter Thompson/-ABC-TV study on split-30s indicate that a proliferation of 15-second ads could seriously damage both network tv and advertising.

Many viewers are unable to distinguish the length of different ads within a pod, the four-month long study revealed.

However, "viewers believe they see more advertising [and] become more negative to it," Edith Gilson, senior vp-research, JWT, said last week at the Advertising Research Foundation's 31st annual conference.

ABC's vp in charge of marketing and research services, Marvin Mord, also noted the threat to the networks: "While it may be true that advertisers will be the first to receive negative messages from viewers disturbed by clutter, television as well will eventually feel the negative impact." Mr. Mord added, "A reduction in the quality of advertising and a decrease in our viewing audience will both put at risk a loss of advertising revenues."

In their study the partners used five 30-second and eight 15-second ads in several different pod configurations. Each pod had different combinations of 15s and 30s. For example, one pod had only three 30s; a two-minute pod had eight 15s. The pods were embedded in two unaired sitcoms, both supplied by ABC, and shown to 5,600 respondents.

While the study showed that viewers reacted negatively to the clutter, it revealed that the effectiveness of a 30-second unit was not hurt by 15-second adjacencies.

This point is key because many advertisers fear that a flood of shorter units could hurt 30s and 60s. The study found that longer units, in fact, prospered in a sea of 15s.

"We determined that increasing the number of 15-second commercials in a pod enhances the effectiveness of the 30s in [the] pod," Ms. Gilson said.#

GLEN-WARREN BROADCAST SALES

William H. Cox

Richard L. Hetherington

Mr. E. J. Delaney, Chairman of the Board of Glen-Warren Broadcast Sales, a division of Baton Broadcasting Incorporated, is pleased to announce the appointment of Mr. William H. Cox as President of the company.

Mr. Delaney also announced the appointment of Mr. Richard L. Hetherington as a Vice President of the company.

Both these gentlemen have extensive experience in the broadcast industry and they are located at 2 Bloor Street West in Toronto.

Glen-Warren Broadcast Sales represents a number of Canadian and American broadcast properties, and Mr. Cox's new duties shall encompass the enlargement of that aspect of that business.

Humphrey to head IMI

Fairfield, N.J.—Jack Humphrey has become president of the newly formed Institute of Medical Information.

Mr. Humphrey formerly was a vp at the Health Education Technologies division of BBDO Health & Medical Communications, New York.

IMI is a division of Daniel Glassman Advertising and specializes in medical education programs, seminars, teleconferencing and publications.

The new unit also assists pharmaceutical companies in developing education programs for domestic and international clients and markets.

Its offices are at 116 Fairfield Rd., 07006-2475.#

Food

(Continued from Page 12)

template.

But if food companies and trade groups are wary of plunging headlong into the medical-claim quagmire, they may be tempted in the near future to hang their promotions onto some major education programs planned by the National Institutes of Health for cholesterol and coronary care.

The National Heart, Lung and Blood Institute expects to launch a major cholesterol education campaign in the coming months, emphasizing the link between reduced cholesterol and lower coronary risk.

Dr. Ron Goor, program coordinator, reports several "feelers" from food marketers, but still no agreements. Dr. Goor indicated that some trade groups—including the beef and pork industries—might not be anxious to see a nationwide educational program that, in effect, would warn consumers against eating too much beef, pork or other high-cholesterol foods.

One company that has expressed interest has been Quaker Oats Co., Chicago, according to Dr. F.E. Scarborough, director of FDA's regulatory affairs staff. The company is awaiting results from a Northwestern University study on the beneficial effects of oats on cholesterol levels before deciding whether to incorporate such information into its promotions.

Also, Dr. Scarborough said, the fish industry has approached the institute about involving itself in the low-cholesterol campaign.

Mark White, associate director of the heart, lung and blood institute, expects "quite a number of collaborative efforts" between food marketers and the institute's cholesterol education program.

"We've heard from a number of food companies and trade groups," he said. "The industry sees this thing developing. . .and knows that they could be a big force in it."#

In the news

GE turns on a new sound

General Electric's new advertising for its line of youth-oriented audio products fights the marketer's stodgy image. "These kids simply didn't want to buy a radio from someone who makes refrigerators and light bulbs," said Richard Costello, GE's manager-marketing communications for consumer electronics. *See Page 4.*

The gospel according to Bud

To Father Ellwood Kieser—"my friends call me Bud"—the road into Hollywood studios was a natural outgrowth from the path a group of ad agency people steered him toward 25 years ago in Los Angeles when Father Kieser began looking for a mass medium and found it in tv. From that initial effort, which he jokingly refers to today as 28 minutes of "God-talk and platitudes" with a magnetic chalkboard, the 55-year-old Paulist priest has landed in prime time. *See Page 5.*

The taxman may cometh

A California congressman is dusting off legislation that would bar alcoholic-beverage marketers from deducting ad costs as a business expense. "This is our way of saying that alcohol is a dangerous substance, but it's not as harmful as other legislation, such as a ban," said an aide to Rep. George Brown. *See Page 50.*

Special Report

Marketing to Hispanics

Sixty-two per cent of U.S. Hispanics live in the top 10 Hispanic markets. Understanding these people is the key to grasping the whole Hispanic market, and Special Report provides a starting point for analyzing those 10 cities and their residents. *Beginning on Page 13.*

Presstime

Luisi wins libel round

New York—Marie Luisi has won the right to sue J. Walter Thompson USA and JWT Group chairman Don Johnston for libel. Ms. Luisi, formerly head of JWT's spot tv and syndication unit, was fired following a $30 million time banking scandal in 1982 (AA, Feb. 8, '82, *et seq.*). Statements contained in a March 30, 1982, press release distributed by JWT showed sufficient cause to be tried for libel, said New York state supreme court Judge David Saxe. The judge waived the requirement that Ms. Luisi demonstrate "special damages" from the press release, a requirement in most libel cases. The case now goes to the discovery procedure. Libel charges were dismissed against JWT officials Robert Buchanan, Herbert Eames Jr., Victor Gutierrez and Burt Manning.

Tyco shops for new agency

Morristown, N.J.—Tyco Industries is opening its $6 million account for review. The $70 million toy marketer has fired Scott Lancaster Mills Atha, Los Angeles, after a 10-year relationship. The agency was let go because Tyco has "expanded beyond its traditional business and requires an agency to handle its new growth," said Tyco vp-advertising Robert Lurie. Agency ceo Steve Scott attributed the breakup to "sharp differences" about creative strategy.

A-B Cobra ready to strike

St. Louis—Anheuser-Busch next week will spring into major markets with King Cobra premium malt liquor. It has been testing the brand for the last year. A-B settled on the King Cobra name after testing both it and the Jaguar name. J.P. Martin Associates, New York, handles.

AdCom bid stalling?

Chicago—Quaker Oats Co. may be starting to lose faith in AdCom president Gary Bayer's ability to finance his planned purchase of Quaker's in-house agency, a company insider said. The snag is over whether Quaker will guarantee Mr. Bayer and his investor group minimum billings from Quaker products or lower its asking price. Sources at New York agencies Backer & Spielvogel and BBDO say Quaker hasn't notified them that they're out of the race.

Guild writes off strike

Hollywood—Members of the Writers Guild of America have voted by more than a 2-to-1 margin to end their two-week strike. The action had hit NBC-TV the hardest of the Big 3 commercial networks, forcing some shows into reruns as production schedules jerked to a halt (AA, March 11, *et seq.*).

Chiat grabs Kelly Award

New York—Chiat/Day, Los Angeles, won the 1984 Stephen E. Kelly Award from the Magazine Publishers Assn. March 19 for its Nike Apparel print ads. The fourth annual presentation of the award, for the year's best magazine advertising, was accompanied by a check for $25,000, to be shared by Lee Clow, Chiat creative director; Jeff Gorman, copywriter, and Gary Johns, art director. Chiat's Los Angeles and San Francisco offices had three of the 10 finalists.

Cap Cities buy signals future for networks

By Craig Reiss

Cable tv was expected to do it, but that medium could only bruise network tv. It hasn't yet drawn blood.

Syndication was supposed to do it, yet advertisers still await the emergence of a legitimate fourth network—and network tv continues to report record financial results.

But with two short weekends of negotiations and a check for $3.5 billion, Capital Cities Communications has accomplished what all previous efforts had fallen short of doing: The Cap Cities buyout of ABC Inc. serves notice that network tv no longer can remain an untouchable corporate institution in America.

Start of new chapter

Cap Cities' bold move represents the start of a new chapter in U.S. tv history.

It is the prolog. The face of tv ownership, management and direction can be expected to change beyond ABC. An industry that for years resisted the notion that the rules of the tv game were being rewritten now finds its management independence for sale. Forces far removed from prime time ratings and segmentation of audience have brought forth this change. Cap Cities' motives for the merger were explained more in terms of undervalued stock prices than underdelivery of audience. It is not a brush fire easily contained.

Sources at Capital Cities said the company moved so swiftly to acquire ABC Inc. because it feared it could soon face a takeover bid, perhaps from American Express, part owner of Warner Amex Cable Communications. An American Express spokesperson called the idea "ludicrous," but that's what they were saying inside Cap Cities.

For ABC's part, the decision to sell reportedly was an admission that some company was bound to buy it out, and Capital Cities was the most desirable choice.

Smaller gobbles larger

The most salient factor in the merger was the fact that the smaller of the two parties acquired the larger in this $3.5 billion deal. Cynics who had dismissed the reported bid by Ted Turner to take over CBS Inc. because of the disparity in financial size between the two companies now must be taking a second look.

The explanation of how Cap Cities could acquire the much larger ABC Inc. lies in both companies' bottom lines. ABC Inc. last year had revenues of $3.7 billion (up 26% compared with '83) and net earnings of $195 million (up 22%). Cap Cities had revenues of $949.7 million in '84 (up 23%), with net earnings of $135.2 million (up 18%). It simply costs Cap Cities less money to make more money.

Cap Cities' management philosophy in one major respect is not so different from that of Mr. Turner. For years, Mr. Turner has predicted that the survivors in tv will be the companies that are managed most efficiently.

Cap Cities believes that to be true. It is only the style and experience of Cap Cities' top management that makes it a more desirable acquirer than the outspoken and brash Mr. Turner.

The management pecking order of the merged company clearly points up that Cap Cities is the acquirer and is in control. Thomas Murphy, chairman-ceo of Capital Cities, holds the same titles in Cap Cities/ABC. Daniel Burke, president-coo of Cap Cities, takes those titles to the merged company as well. Reporting to Mr. Burke will be Frederick Pierce, who had been president of ABC Inc. and now becomes chairman-ceo of the ABC unit. Leonard Goldenson, formerly chairman of ABC Inc., becomes chairman of Capital Cities/ABC Inc.'s executive committee.

L. Goldenson

T. Murphy

Murphy in charge

Mr. Murphy now becomes the ultimate ruler of the merged company. The man who started as an executive at Lever Bros. in the 1950s has remained a relative unknown entity in broadcasting, even though Capital Cities before the merger was the 16th-largest media company in the U.S. He is known for his low-key style, his management skills and his penchant for small staffs and big financial returns on operations.

In its New York headquarters, Capital Cities has a staff of 30 persons. ABC Inc. has considerably more people occupying executive suites at its Manhattan headquarters.

But will Cap Cities be able to effect the kinds of management streamlining and cost-cutting necessary to maintain its reputation for bare-bones investment and high returns? When a network is in third place in the ratings race, is it the most opportune time to approach the Hollywood production community with pleas for lower prices? It is difficult to see Hollywood's motivation to cooperate in the short term. Such a strategy by the new communications company will, no doubt, require very skillful maneuvering.

The merger also comes on the heels of management restructuring at ABC Broadcast Group and ABC Television (AA, March 18).

While it is not expected that Cap Cities will immediately reverse those changes (which demoted former ABC-TV president John Severino and placed absolute power for turning around the ratings in the hands of ABC Broadcast Group president Anthony Thomopoulos and ABC Entertainment president Lewis Erlicht), the old alliances at ABC that led to the reformulated structure now must answer to a new, higher authority. It is this

A city within a city

By Richard Mahler

1 "The Mexican-Americans of Los Angeles are lucky," wrote Truman Capote. "They have their own culture."

The remark—as much a put-down of nonethnic Angelenos as a positive statement about their Hispanic counterparts—provides important insight into this city within a city, culture within a culture.

A walk down Broadway, the main artery of the city's Spanish-speaking community, is almost the same as a stroll through Mexico City's *Zona Rosa.* Los Angeles now rivals the Mexican capital as the second largest Spanish-speaking city in the Northern Hemisphere and the eighth largest in the world.

For miles east of Broadway, a visitor may hear and read nothing but Spanish. Hundreds of thousands are born, grow old and die in East Los Angeles with Spanish their primary language and Mexico their cultural touchstone—80% are of Mexican descent.

The market may be shifting toward greater diversity, however. Those of Mexican descent now are more likely to have been born here, and many new arrivals are streaming in from other countries, primarily Caribbean and Central American nations, notably Guatemala and El Salvador.

"However, the movement is not in the classic melting pot sense," says Henry Adams-Esquivel, vp, Market Development, a transcultural research company based in San Diego. "The people are assimilating, but primarily to other Hispanics in their communities. In Los Angeles, the community of Mexicans is so enormous that the other nationalities skew their language, eating habits and life styles to the Mexican." They are not necessarily becoming more like the general population, he says, but more like each other.

This melting pot within a pot is getting larger each day. Public schools report more than 50% Hispanic enrollment in elementary grades, and demographers estimate the Hispanic population is growing 6.5% annually, five times the rate for the city as a whole. Possibly by the year 2000, the Hispanic minority is

(Continued on Page 18)

Richard Mahler is a frequent contributor to Special Report who reported on the growing influence of California's Asian population in last year's Special Report on California.

Not just Spanish Harlem

By W. Franklyn Joseph

2 After more than 30 years in the industry, very little, if anything, that relates to the Hispanic market slips by Alicia M. Conill, president of New York-based Conill Advertising Associates. The ground has been covered and recovered so much lately that Ms. Conill says she is tired of seeing and reading statistical reports that identify the same aspects unique to the Hispanic community.

Nothing is new, she says, except an awakening by many advertisers to the Hispanic market's potential. Items that trumpet the behavioral patterns of the group such as strong family and religious ties as well as their brand loyalty are true, Ms. Conill says, but repetitious. Hispanics have charisma beyond the cold illusion of statistical charts, she says, and occasionally the human aspects are overlooked.

"The fascination of the Spanish market is that it is the only new market right now in the United States," says Pedro Font, president of Font & Vaamonde, a New York agency. Advertisers in search of new targets have realized the potential of the Hispanic market, he says.

"The key to unlocking the New York segment of the Hispanic market is to understand the composition of the market . . . and communicate a message to them, in their own language," Ms. Conill says.

Ranked as the No. 2 U.S. Hispanic market in population, New York area Hispanics are concentrated in the city's five boroughs. The majority of Manhattan's Hispanics live in *El Barrio*—better known as "Spanish Harlem"—between the exclusive Manhattan high-rises and Harlem's black neighborhoods. The South Americans have picked Queens, the Cubans moved to New Jersey and the Puerto Ricans primarily have claimed the Bronx, says Mike Psaltis, vp, Adelante Advertising.

According to Strategy Research Corp., when neighboring counties in New York and New Jersey are included, the area's Hispanic population stands at 2.4 million, or 14% of the total U.S. Hispanic population. Puerto Ricans represent 60% of the market, followed by Dominicans and Cubans as the next most visible ethnic groups.

"When you take into consideration the amount of undocumented aliens who are in the

City has split personality

By Richard Erickson

4 Identifying and targeting the San Antonio, Tex., Hispanic audience is tough. In fact, it might be even more difficult than in most of the other major Hispanic cities.

"The reason this market is tougher," says Lionel Sosa, president-creative director of Sosa & Associates, "is that it has a little bit of a schizo personality in that most of the Hispanics in San Antonio are not newcomers to the United States. In fact, they are third and fourth-generation Hispanics and overwhelmingly bilingual, the Hispanics that carry the cultures and traditions of Mexico while becoming mainstream U.S.A."

Statistics tell part of the market's story. Strategy Research Corp., Miami, estimates the local Hispanic population at 781,800, 72% within San Antonio's Bexar County, and most of those people residing on the south and west sides of the city. The U.S. Census Bureau, which admits undercounting Hispanics by about 12%, projects the Bexar County Hispanic population at 565,400. The community generally is described as being 54% Hispanic.

Although Strategy Research pegged San Antonio as the nation's fourth largest Hispanic market in 1984, the Census Bureau dropped the city from the third largest in 1980 to seventh in 1985.

This did not happen because the population stopped growing

Integration, not isolation

By Richard Vara

7 Uncovering the average Houston-area Hispanic's profile is a task not unworthy of Sherlock Holmes. However, collecting the numerous clues and piecing together the substantial but scattered data could help garner a share of the Hispanic community's $1.3 billion income.

Even estimating the number of Hispanics in Harris County, which includes Houston and several suburbs, can stump a ta-

Cross-section of nation

By Jack Hafferkamp

5 If an actress wanted to portray Hispanic Chicago, she could warm up with readings from "The Three Faces of Eve" or even "Sybil"—because Chicago's Hispanic community has multiple personalities.

The Windy City is at the crossroads of Hispanic North America. The Chicago area is not only the fifth largest U.S. Hispanic market with 741,000 people, according to Strategy Research Corp., Miami, but also the convergence of all the major Hispanic nationalities.

So to be accurate, the actress would have to play a Mexican-American 63% of the time, a Puerto Rican 22%, a Cuban 3% and then a series of characters from Spain to the Philippines, Tierra del Fuego to Guatemala the remaining 12% of the time.

You could say that makes Chicago one crazy woman. You also could say that if you can get a handle on her, you've gone a long way toward grasping the national Hispanic population. Chicago's Hispanic profile is uncannily similar to the national mix—with only 4% more Mexicans and 8% more Puerto Ricans, and 3% fewer Cubans and 8% fewer Central and South Americans.

Strategy Research says Chicago Hispanics are generally younger and less educated, but a bit more affluent than their national counterpart. Although scattered, culturally and geographically, over the 19-county Chicago area of dominant influence, about 85% of Illinois' Hispanics live in Cook County, making it the fourth largest Hispanic county in the U.S.

Community leaders estimate the actual population at more

The magic is gone

By Mickey Torres

8 There was magic once in the Rio Grande Valley. Back when the downtown warehouses were teeming with goods, sales were by the case or lot number, cash on the barrel. Magic when the rail cars in Edcouch were loaded with hand-picked beets or cabbage, bound for East Coast housewives who demanded farm fresh vegetables.

Promoters and developers planted palm trees along the highways and convinced frozen Midwesterners that the area along the South Texas border was "Miami Beach at half the price."

Mickey Torres is a Brownsville, Tex.-based free lance writer.

Today, packing sheds sit idle and downtown has been taken over by money exchange houses and boutiques that offer the latest fashions in used clothing at 75 cents a pound.

Oldtimers say the magic began to fade when supermarkets stocked frozen vegetables. But everyone agrees the bottom fell out when the peso disintegrated. The retail sector of Brownsville, McAllen and Harlingen, Tex., shrank, sales tax revenue plunged and the tax base eroded.

What's left of boom time, according to the South Texas Institute for Latin and Mexican American Research, Brownsville, are 600,000 people, 85% Hispanic, occupying a string of mushrooming communities in one of the nation's most poverty-stricken regions. Not including another 215,000 people south of the ankle-deep Rio Grande, the area constitutes the eighth largest U.S. Hispanic market, according to Strategy Research Corp., Miami.

Rio Grande Valley

Mickey Torres

This market is expected to double by 1990 despite an 18.5% unemployment rate valleywide, which is three times the state average, according to the Texas Employment Commission. Adjoining Starr County's unemployment rate has hit 40%. If the citrus industry fails to recover from the past two killing freezes, the poorest people in the U.S. will get even poorer. De-

Albuquerque Visitors Bureau

Rooted in history

By Karen Evans

9 New Mexico Hispanics are an unusual Hispanic subculture with their Spanish roots—some of which predate the Pilgrims.

"In some parts of New Mexico we still speak a Spanish spoken hundreds of years ago," says Lionel Holguin, president of the Albuquerque Hispano Chamber of Commerce. "We use the old sayings, or *dichos*. The isolationism has caused us to create a unique market."

Immigrants are not flowing constantly into the area from other countries the way they are in Florida, Texas and California. "Hispanics have been here for generations, longer than the Anglos," says A.B. Collado, publisher of *El Hispano*, the area's only Spanish-language newspaper.

Hispanics can't be considered a minority here, says Edmundo Delgado of Delgado Advertising & Public Relations, Santa Fe. "I don't consider myself a minority. I'm Spanish on both sides, but my cultural background is U.S.A.—American."

While other states with heavy Hispanic populations find that a majority report Mexico as their country of origin—California, 81%; Texas, 97%—more than half of New Mexico's Hispanics trace their roots to the Spanish colonists. Puerto Rican and Cuban immigrants, which make up large sectors of other Hispanic populations, are negligible in New Mexico.

"The Hispanics in California and Texas are trying to assimilate," says John Ramsey, client representative of Hispanic Advertising Consultants in Albuquerque. "Here, it's the Anglos who are trying to assimilate.

"The main strategy in New Mexico is to realize that it's a unique market," he says. "Very few advertisers are doing it right. They are saying, 'Oh, you

'Siamese twins'

By Ken Flynn

10 Cliff Sherrill, writing 25 years ago in the *El Paso Herald-Post*, described the international metropolis of El Paso, Tex.-Juarez, Mexico, as Siamese twins "joined together at the cash register."

If that statement was true in 1960, it is even truer today. But the cash register is not all that binds the two cities.

Ken Flynn is chief of United Press International's El Paso bureau.

El Paso and Juarez are united in language, culture, traditions, philosophies and needs. Only the trickle of the Rio Grande separates the two communities. Developers have boasted that the two cities represent the largest international twin city; geographers have yet to dispute the claim.

Juarez has a population conservatively estimated at more than 1 million. El Paso's population is now more than 470,000, 60% of which is Hispanic. Strategy Research Corp., Miami, classifies El Paso as the 10th largest U.S. Hispanic market. When joined with its Siamese twin, El Paso-Juarez ranks fourth.

G.A. Rossi, ©The Image Bank

Whether fourth or 10th, El Paso represents a major Hispanic market. Some say it is the most unusual Hispanic market in the country because of its comparative geographic isolation and its strong ties with Mexico.

The El Paso-Juarez market is very traditional, slow to change, with an ever-increasing Hispanic influence, says Hector Bencomo, owner of Bencomo's Ruidoso Market, a 60-year-old neighborhood grocery store located four blocks from Mexico. "Our people are never going to assimilate into the mainstream of American society because there is a constant influx of new immigrants, almost daily.

"There is a great deal of interaction. We all have relatives 'on the other side of the river,' as we say. We speak the same language and have the same problems," he says.

Margarita H. Hidalgo, a lecturer at El Paso Community College who recently completed a study on border language habits and attitudes, says residents of Juarez speak quality Spanish, and that Spanish is a source of national identity. The Spanish spoken in El Paso is good Spanish also, she says, but among the younger Mexican Americans, there is an increase in Spanglish, beginning a phrase in Spanish and finishing it in English.

Ms. Hidalgo's study, a sampling of individuals from both cities, concluded that Spanglish generally is disliked by Mexicans, who are encouraged to withstand the cultural barrage from the north and keep the language pure. She says loyalty to Spanish in Juarez is part of the community's need to survive as a part of Mexico.

Cashing in on the unusual language situation in El Paso-

Los Angeles

(Continued from Page 14)

expected to become the majority population of Los Angeles, putting the city's non-Hispanic population in the unusual role of melting into another culture.

Already, the Los Angeles area of dominant influence is by far the largest U.S. Hispanic market, home to an estimated 3.4 million Spanish-surnamed persons—almost 20% of the entire U.S. Hispanic population—according to Strategy Research Corp., Miami. Strategy Research estimates 75% of these live in metropolitan Los Angeles.

This growing market is an ideal consumer segment because Hispanics spend a substantial amount on consumer products. A 1982 *Los Angeles Times* estimate pegged their annual purchasing power at $11.3 billion, and only New York Hispanics spend more each week on groceries, according to SRC.

Although the majority work in manufacturing (garment, aerospace or electronics industries) or services (hotels, restaurants or hospitals), a growing number are employed in higher paid professional positions. They also are members of a distinct, identifiable culture that can be reached in most cases by both English and Spanish-language media because 60% are bilingual.

Despite the fact that studies show many of their buying habits do not radically depart from those of the mainstream population, Los Angeles Hispanics traditionally have been classified as underprivileged people with little purchasing power. However, the mean Hispanic income has doubled during the past 10 years--the U.S. Census placed it at $18,732 in 1983. That buying power is bolstered by youth—their median age is 23, 35% younger than the national figure, and 70% are younger than 34.

But by virtually all accounts, the market remains woefully untapped. A recent study by *Hispanic Business*, for example, estimates that in 1984 advertisers spent $47.5 million in Los Angeles, compared with $46 million in Miami. "It's clear that Miami, with a population of about 580,000 Hispanics, sells itself much better than Los Angeles, with about 2 million," says Jesus Chavarria, editor and publisher of Santa Barbara, Cal.-based *Hispanic Business*.

He estimates the aggregate family income in Los Angeles for the same period was $10.6 billion, compared with Miami's $4 billion.

"The Hispanic market has the potential to pay tremendous dividends," says Jay Rodriguez, vp-corporate information for NBC-TV, Burbank, Cal. Mr. Rodriguez says traditional media in most markets, including Los Angeles, are ignoring Hispanics.

David Ochoa, president of Hispanic-owned Buenavision Cable of Los Angeles, concurs: "[Hispanics] are mainline, blue-chip consumers, but somehow the idea has emerged that they're different."

California Hispanics are different in a few important respects. Between 12% and 30%, depending on whose research is quoted, are fluent only in Spanish, while a similar percentage speak little or no Spanish. About two-thirds are bilingual, with about half of these preferring English. As in other Hispanic markets, language usage generally is divided along educational lines. The least educated —only 35% have a high school education or more—are most likely to use only Spanish.

Although Mr. Ochoa advocates "research, research and more research" as the best

Strong identity present

In Southern California, Hispanics refer to themselves as Chicanos, Latinos, Hispanics, Mexican-Americans, Mexicans or of Spanish heritage. Each may be extremely sensitive about whether a term is used and quick to anger if it is not.

The distinctions go beyond language to include major cultural differences. Increasingly, advertisers are recognizing these subtleties in their media campaigns, attempting to cement an emotional bond with each ethnic community.

Not long ago, Anheuser-Busch hired Castor Spanish International, a New York-based agency specializing in Hispanic accounts, to produce separate Budweiser ads for four Hispanic groups: Mexicans, Cubans, Puerto Ricans and Latin Americans. Thus *mariachi* music was added for Mexican-descended Hispanics, while those aimed at Puerto Ricans featured Caribbean *salsa* rhythms.

Jesus Chavarria, editor and publisher of Santa Barbara-based *Hispanic Business*, says the debate about whether separate ads should be produced is shifting from a cultural to a socioeconomic focus.

As serious, high-quality market research becomes available, more sophisticated strategies will be used, he says. "My feeling is that you can develop a standard campaign for the Hispanic population of this country."

Mr. Chavarria also says campaigns based on emotional appeals may be more successful if tailored for a specific Hispanic segment. This is made more difficult by demographic changes. Until now, advertisers have assumed that Los Angeles could be approached with Mexican-oriented sales techniques.

"We're getting to the point now where Los Angeles is not just a Mexican-American market," Mr. Chavarria says. "There's a very large number of Central Americans and even Puerto Ricans now."

In the meantime, companies such as Los Angeles-based Rayo Asociados are prospering. A recently formed division of Rivas Film Associates, Rayo Asociados insists on tailoring its advertising to reflect five Hispanic groups: Californians of Mexican descent, Southwest residents of Mexican descent, Midwesterners of Mexican descent, Cubans of South Florida and Puerto Ricans in the Northeast.

Producers pay close attention to food, clothing, music, architecture, interior design and social behavior in their ads to reflect an authentic cultural context. Rayo Asociados uses a bilingual production staff to simultaneously shoot commercials

¿SE HABLA RESEARCH?

WE DO! Our new Hispanic division offers the highly-regarded analytics and superior field quality control that have led to our rapid growth. Division head, Peter Benziger, has 13 years of bilingual experience in Latin America conducting research for clients such as Lever, Heinz, Duracell, and Pepsi. Call Peter, in English or Espanol, for a proposal on your next Hispanic project in the U.S. or Latin America.

MORAN & TUCKER INC.
7 BENEDICT PLACE GREENWICH CT 06830 (203) 629-3660

Los Angeles

(Continued from Page 18)

means for understanding the Hispanic consumer, that task is made more difficult by the fact that only 18% have listed telephone numbers and an estimated 1.4 million Southern California Hispanics are not legal U.S. residents. Because this contributes to census undercounts, local organizations have succeeded in officially revising Hispanic population totals up 10%.

Several studies have found Southern California Hispanics, perhaps more so than other Hispanics, rely on electronic media. Although the city has two daily Spanish-language newspapers, the circulation of the largest of these—*La Opinion*—has been about 70,000 for years.

The typical Los Angeles Hispanic spends more than 19 hours watching tv each week, 16 hours listening to the radio and four hours reading, according to recent studies. Bilingual or English-only speakers and more affluent Hispanics spend more time with print media. Only 7% subscribe to cable tv.

KWKW-AM is one of six Los Angeles-area radio stations broadcasting in Spanish full-time. In a 1982 study of 600 Hispanic households conducted by Carranza Associates and California State University at Northridge for KWKW, researchers concluded both English and Spanish should be used in marketing to area Hispanics. A bilingual approach "reinforces a sense of belonging and of consistent self-image for the entire target market."

The study documented "an inordinate brand loyalty and desire for product quality . . . traced, in part, to the Hispanic's desire for positive and consistent self-image. Identification with quality and recognized brands can signify that the individual is giving the best to the

(Continued on Page 24)

Identity

(Continued from Page 18)

in both English and Spanish.

Ray Rivas, a commercial director for the company, says this approach represents a substantial improvement over the early days of Spanish-language tv, when English-language dubbing was common.

"The sophistication level has risen and there's upward mobility in the community," Mr. Rivas says. "Nevertheless, I still find agencies budget about 20% less than what they are paying for Anglo campaigns."

Mr. Rivas emphasizes that cultural differences can be reflected in subtle ways. "Some Anglo agency people want to show cereal being served in a Mexican-looking bowl . . . and a *serape* casually draped over a chair. I have to tell them, 'You don't have to beat people over the head with this.'" Less blatant—and patronizing—distinctions include showing women wearing skirts rather than pants or men wearing designer jeans at a picnic, he says.

Although he says they often are naive, Mr. Rivas agrees that Anglo agency executives are more receptive than in the past, in part because of groundwork by radio stations and their agencies. Caballero Radio Network, for example, published a list of different ad-related Spanish-language terms as a means of convincing advertisers they needed to buy regionalized radio advertising.

Ernesto Balleste, vp-managing director of Noble y Asociados, Newport Beach, Cal., acknowledges linguistic differences among Hispanic groups, but says his agency is not interested in subdividing Spanish-language ad campaigns. "I think that in radio, especially, such regionalization is a natural," he says.

"But there is such a thing as neutral Spanish. It is one language," he says. "There is a way to use Spanish that is acceptable to everybody, including Mexicans, Puerto Ricans, Cubans, Dominicans and Argentines."

In addition, many companies that are reluctant to budget for Hispanic messages might be shocked by the production costs of four or five separate versions of the same campaign.

Hector Orci, vp-general manager of La Agencia, the Hispanic division of McCann-Erickson, says it's important to recognize that the Los Angeles Hispanic market is predominantly bilingual and bicultural.

"Depending on the situation, sometimes it is necessary and desirable to use specific approaches to specific groups of Hispanics," he says. "But sometimes it isn't. It depends on the marketing strategies of the brand or the account."

Although La Agencia sometimes tailors its campaigns along cultural subdivisions, Mr. Orci says generally it is not necessary. "More important to us is ensuring the use of correct Spanish," he says.

Perhaps even more important is to communicate with Hispanics at all. Advertisers that deemphasized the Hispanic market in the past are surprised to find them so appreciative of efforts to reach them in their native language, Mr. Orci says.

Mr. Balleste says Spanish-language advertising is effective even in convincing predominantly English-speaking Hispanics that an advertiser is interested in them. "Your mental reaction is, 'That was written for me, because I understand Spanish.' When the commercial is in English, it can never register in the same way." —*R.M.*

U.S. HISPANIC MAGAZINE NETWORK

NOW OFFERS

REGIONAL
FLEXIBILITY

A 57 BILLION DOLLAR PLUS MARKET

The U.S. Hispanic market is richer than any Latin American market. And bigger than the seven top A.D.I.s, all together.

Now you can reach the U.S. Hispanic market with the magazines you want nationally, or on a regional basis -via the U.S. HISPANIC MAGAZINE NETWORK.

TAKE ADVANTAGE OF THREE REGIONAL EDITIONS OF 15 MAGAZINES:

- Northeast
- Southeast
- West Coast/Southwest

Use these editions the way you want: singly; any two; or all three with copy changes. And you have the added flexibility of being able to select just those magazines that fit your needs.

So don't overlook the richest Spanish market in the world. Don't overlook the effectiveness of magazines. Don't overlook flexibility.

MIX & MATCH FLEXIBILITY

It's great, because it allows you to feature your products, prices, and even copy changes by region. And, of course, you'll be able to select the magazines, women's or men's, that you prefer. Or, in fact, any combination of the magazines included in our Network. And besides, you'll have more options than ever to fulfill your marketing requirements! We'll give you copy changes, heavy-ups, regional products and packages, and test markets. In other words, this is the best of times to advertise in our U.S. Hispanic Magazine Network, because you can mix and match, at your convenience, the areas and the magazines...

Los Angeles

(Continued from Page 20)

family or to guests."

Los Angeles Hispanic consumers, the report concludes, "spend an inordinately high percentage of their income on products, services and entertainment for *la familia.*"

Although it estimates it attracts 70% of these loyal buyers, KMEX, the only fulltime Spanish-language tv station in Los Angeles proper, has had difficulty attracting national advertisers. "Our schedule is 70% local and 30% national," says KMEX president-general manager Danny Villanueva. "I can deliver people, I just can't deliver numbers sometimes," adding his opinion that the major tv ratings companies—A.C. Nielsen Co. and Arbitron Ratings Co.—still "don't know how to measure us."

KMEX also offers advice on how to target Hispanics. Programs "must include children, young, adults, parents, working women and grandparents," a published ad appeal says.

Hispanic Business' Mr. Chavarria is encouraged to find a growing number of agencies specializing in the Los Angeles Hispanic market. In Newport Beach, Cal., Mendoza, Dillon & Asociados promotes such clients and products as Miller Brewing Co., Denny's Restaurants, Johnson's Band-Aids, Ban deodorant and Vitalis. Beverly Hills-based Bermudez & Associates' clients include American Telephone & Telegraph, Stroh's, Schlitz and Schaefer beers.

Some major agencies farm out Hispanic marketing work to these smaller companies because rates, and thus commissions, are generally low. For example, KWKW charges about $70 for a commercial that would cost up to $500 on another station to reach the equivalent audience. Others have established their own in-house Hispanic units, notably McCann-Erickson's La Agencia, Young & Rubicam's Bravo Group and J. Walter Thompson USA's Hispania.

Castor A. Fernandez, president of Castor Spanish International, a New York-based Hispanic agency, says, "The growth of the market from here on in, with the attention that it is now being given, and will be given, by the big boys in marketing, will be by leaps and bounds."

For those interested in the Los Angeles ADI, 3.4 million prospects are waiting to hear what you have to say. ■

New York

(Continued from Page 14)

New York area of dominant influence, the Puerto Ricans' edge as market leader is lessened," Ms. Conill says.

Because immigrating Puerto Ricans—as residents of a U.S. possession—already are registered citizens, the well-established underground Hispanic population is made up of primarily Central and South Americans, she says.

Puerto Ricans are more transient than other immigrating Hispanic groups, says Thomas Johansen, vp-sales director, WNJU-TV. Because the ties are strong and the travel unrestricted between their island home and adopted residence, they are more likely to come to the states for a few years and then go back to Puerto Rico, he says.

New York is different from the other major U.S. Hispanic markets, Mr. Font says. He cites three reasons: Puerto Ricans predominate; Spanish-language media representation is strong, and "New York has subways."

Subways are a very important, often overlooked medium in New York, he says. Hispanics average 25 minutes a day commuting on the subway. With such a captive audience, he says, advertisers can make a tremendous impression.

"There is a very high dependence on mass transit by Hispanics in New York," Mr. Psaltis says. "Statistically, fewer than 25% of the city's Hispanic market owns automobiles. Outdoor boards are an important sell in Miami or L.A., where cars are a necessity. In New York, however, pedestrian boards are better suited."

On any given weekday morning, the city's George Washington Bridge bus terminal is besieged by Hispanic rush-hour commuters. en route to primarily low-paying jobs in New Jersey factories and offices.

The median family income for a New York Hispanic family is $16,300, which falls short of the $19,900 national average for the group, according to Strategy Research. Although the latter figure is lower than the over-all U.S. median income of $28,400, U.S. Hispanic families are the most financially secure of all Hispanics in the world, the company's report says.

"When they come here, they come for a better life. They come to make it," says Daisy Exposito, vp-creative director, Young & Rubicam's Bravo Group. One affordable way of showing that life has improved is with food, she says. This helps to explain why the approximate weekly grocery expenditure for a New York Hispanic family, which averages 3.71 people, is the highest among U.S. Hispanics at $101.

Hispanic consumers in New York are aware that they have purchasing power as a bloc, Ms. Exposito says. And much of that power is channeled through the area's more than 10,000 *bodegas*, the mom-and-pop shops. Any product an advertiser wants a New York Hispanic to purchase must be highly visible in the *bodegas*, Mr. Font says.

It is necessary to get distribution through the cash-and-carry outlets or a product will be shut out of the Hispanic market, says William Stiles, exec vp, SIN Television Network, New York. Many *bodegas* will not carry a product that is not advertised to the Spanish market, he says.

WNJU's Mr. Johansen says making the effort may result in garnering a share of the $5 billion New York's Hispanic consumers spend annually. "Even with the token advertising . . . those brands that bother to advertise in Spanish will be the No. 1 or 2 brand in each of their categories," he says. "The Hispanic who sees the Anglo company that bothers to advertise to them in their language will become brand conscious and brand loyal to that company beyond the advertiser's wildest expectations."

Opportunity and growth are the primary objectives of the Hispanic community; education and jobs are the main issues, Mr. Johansen says. Many schools with high Hispanic enrollments are bilingual, a move that aids education but reduces the need for acculturation.

The impact, Mr. Johansen says, "is a statement of pride. Hispanic people are understanding their new-found force. They are in a way saying—and there's nothing you can do to change it —I will go to Spanish movie theaters; I eat at Spanish restaurants; I have two Spanish tv stations."

"In New York today a person can live and work without speaking English . . . they can even get a Spanish driver's license," says Eduardo Caballero, president of Caballero Spanish Media, a national Spanish-language radio representative.

Over-all, New York Hispanics are enthused about the progress they have made in recent years. Mr. Caballero, a Cuban native who has been in New York for 20 years, says he has witnessed an increase in "pride in one's background" among Spanish-speaking people.

"Ten years ago many Hispanics were afraid to let their heritage be known . . . even when it came to reading a Spanish newspaper in public they would often avoid it because of embarrassment; they were ashamed to let others know about their background," he says.

Along with this esteem—and in an effort to further themselves—Hispanics have become more politically aware. The Hispanic community has felt closer to the black community, both emotionally and politically, Mr. Caballero says. "The Hispanics went to Harlem in part because they were attracted by the black push for equality and strength,"

143-155 VARICK STREET NEW YORK N.Y. 10013 (212) 807-4600

GANNETT

WE'LL PROVE IT.

There's more to Hispanic marketing than just having a Spanish surname. You need available facts. Statistics. Demographics. Psychographics. You also need insight —to guide you when facts are not available.

Montemayor Y Asociados has all of that. Plus something perhaps even more important—applied experience in the Hispanic market. Let us show you. Call Carlos Montemayor at (512) 224-4500. And get the proof.

Montemayor Asociados, Inc.

New York

(Continued from Page 24)

he says.

"The influx of other Latins [from Central and South America] into New York from politically charged countries also has had an effect," Mr. Caballero says.

"The new residents are helping to change the composition of the Northeast's Hispanic community from a mainly Puerto Rican and other Caribbean type of market, to one that is more heterogeneous. Puerto Ricans remain the dominant group but the global mix makes New York a one of a kind market," he says.

But the merging of Hispanic groups from varied backgrounds into the New York area had not resulted in a united political front.

"Puerto Ricans have traditionally been Democrats," Mr. Caballero says. Cubans and Argentines on the other hand are more conservative, he says.

A recent flap may have provided the issue that solders the community. A coalition of blacks and Hispanics had selected Herman Badillo to contest Mayor Ed Koch in the upcoming mayoral contest. When the black community then selected its own candidate, a rift separated the two minority communities.

Where the Hispanics previously might have been mired in indecision or split their support, they have banded together behind Mr. Badillo and appear to be ready to fight their own battle.

This could be a turning point. According to Mr. Caballero, New York Hispanics have been among the least politically influential.

Texas, for example, has some 39 mayors of Hispanic background, he says, while New York state has none. "Sooner or later you will have a Latin mayor in New York . . . maybe not now but the potential is so strong," Mr. Font says.

But before that happens, they will have to unite. "The subject of unity was proven by the Yankelovich [Skelly & White] study that indicated Hispanics are now considering themselves Hispanic as a whole," says Rochelle Newman, director-new accounts division, Font & Vaamonde. "Less and less are you seeing, 'I'm Cuban, I'm Puerto Rican, I'm South or Central American.' There's a unity that's happening and the stronger that unity becomes the more influence it will have."

Miami

deposed dictators Somoza, Trujillo and Batista; Fidel Castro's sister, Juanita, a pharmacist; Juan Bosch, retired chairman of Bacardi Corp., worth an estimated $300 million; Eduardo Suarez, who fled Cuba four years ago and is winner of five Emmy Awards for WLTV.

Meet Miami's Hispanic community, as seen through the media:

Ricardo Tubbs, the Puerto Rican half of the "Miami Vice" team; Tony Montana, "Scarface" with his mountains of cocaine.

Meet the rest of the Miami Hispanic community:

A majority of Miami, a plurality of Dade County, 805,800 strong, the most affluent and aggressive Hispanic enclave in the U.S.

Dramatic events have shaken Miami, causing irreversible changes in the Hispanic community. These changes have hardened lines among Miami's once fairly harmonious ethnic groups, and foretell a startingly different Miami in the 1990s.

"The community is simply not shoulder to shoulder, side by side as it was in the 1970s," says Richard Tobin, president of Strategy Research Corp., Miami. Evidence of this rupture reverberates thoughout the state. A proposed amendment to Florida's constitution would make English the state's official language. The three-person Hispanic majority on the Miami

(Continued on Page 30)

Advertisers that reach target reap great rewards

The Hispanic market presents an advertiser with both a problem and an opportunity. The problem: Finding the surest method of reaching the consumer. The opportunity: Knowing that a successful campaign can pay sizable dividends.

The methods of how to solve the problems and make the most of the opportunities are elements of a major debate. Advertising and media experts fail to agree on the ideal execution because some say the Hispanic community is homogeneous, while others are adamant that it is a collection of subcultures.

"No question about it," says Thomas Johansen, vp-director of sales, WNJU-TV. "Mexican Spanish is as different from Caribbean Island Spanish as British English is to [an American]. Even though it's English, the accent is different, the colloquialisms are different."

Eduardo Caballero, president of Caballero Spanish Media, agrees. "Most people who share a philosophy that the Spanish market should not be segmented are generally those who do not speak Spanish." He advises advertisers to concentrate on being emotionally appealing to the consumer by paying close attention to the unusual features indigenous to each group.

According to Alicia Conill, president of Conill Advertising Associates, subdividing the market and targeting Hispanic groups from different areas with separate campaigns does little more than dilute the total market's impact. "Even though the market is so mixed, you can sell to this market in a generic Spanish way," she says. The key is to look for similarities among each group and use them to your advantage, she says.

"There is only one [group of] Hispanics," says Pedro Font, president of Font & Vaamonde, who says he cannot understand why some people suppose Hispanic people are so different simply because they come from different countries.

"We believe in the national approach," says Daisy Exposito, vp-creative director at Bravo Group, Young & Rubicam's Hispanic division. Ms. Exposito does concede that specific areas do need individual consideration.

"People who believe in segmenting believe that you have to have *salsa* [music] in New York and *cha-cha* in Miami. That's a nice approach," Ms. Exposito says, "but you can also do a nice general approach that will sell all groups."

Many agencies avoid segmenting the market because of the cost involved in preparing separate executions and the traditionally smaller budgets allocated for the Hispanic market. The economics usually preclude separate executions, Ms. Exposito says. "So you do one tv execution that will do well across all the subsegments." Only when it's a regional or spot placement should the local flavor be prevalent, she says, otherwise it's "not a necessity."

Opportunities to reach the market both locally and nationally exist. "If you have a healthy advertising budget you should use all four mediums: Tv, radio, print and outdoor," she says.

"We operate a television network in 80 ADIs nationwide and send the same programing and the same commercial messages all over the country," says William Stiles, exec vp, SIN Television Network. "Obviously we have a viewpoint that you can program and advertise to this segment as a monolith. There are many more similarities than there are differences."

Mr. Caballero touts radio as "the most effective method to target Hispanics," saying the other mediums do not match radio's reach. Houston has seven stations while New York boasts four that carry 24-hour Spanish-language programing: WADO, WKDM, WJIK and WSKQ. Indicating the market's growth, Mr. Caballero says, "as little as two years ago there were only two stations servicing the [New York] area." In addition to the 24-hour stations other networks in New York carry limited hours of Spanish programing.

Thomas W. Koopman, sales manager for De Armas Publications, New York, says print—not radio or tv—is the most effective way advertisers can speak Spanish with prospects on a national level. His opinion is understandable because De Armas blankets the nation with Spanish-language magazines aimed at most demographic levels.

"Print advertising offers advertisers more time to get their messages across than a 30-second spot on tv or radio," he says.

However, Messrs. Koopman, Caballero and Stiles agree that advertisers should not ignore any medium.

Media placement aside, Ms. Conill says the main issue is proving the power of the Hispanic market—a power that is increased by homogeneous numbers

Advertisers know a large Hispanic population exists, Mr. Caballero says, and if they are to reach them, they must ensure that each group within the whole is equally targeted. And the only way to do so is to "target each segment individually," he says.

The real goal, Ms. Exposito says, is "to prove to people that yes, there's money to be made in the Spanish market." *W.F.G.*

Miami

(Continued from Page 28)

city commission recently ousted the black city manager, and blacks and many Anglos retaliated by petitioning for the recall of Mayor Maurice Ferre, a Puerto Rican.

"We have a problem," Mr. Tobin says.

The problem's roots go back to May, 1980, when 125,000 people fled Cuba in the Mariel boatlift. About 100,000 of these "Marielitos" settled in Miami, and the differences between them and earlier waves of refugees have recast forecasts of Miami's future.

The Mariel influx accelerated an already steady climb in the number of Dade County Hispanics. Between 1980 and 1983, the Dade County Hispanic population increased 204,106, according to the U.S. Census Bureau; non-Latin residents increased only 39,713. The surge of Marielitos boosted Latins to a 43% plurality, compared with a 40% white and a 17% black population.

"What happened after Mariel was that Latins stopped melting" into the general population, says Frank Soler, publisher of *Miami Mensual*, a Spanish-language city magazine.

Most observers agree with Mr Soler. "Throughout the 1970s," Mr. Tobin says. "the Cuban community developed economically and socially in concert with Anglos. With the rescinding of Dade County's bilingual ordinance, Cubans, who thought that they had been companions in community progress, then felt a real slap."

A general airing of frustrations by Hispanics followed Mariel and the repeal of the bilingual ordinance, says Eduardo Padron, vp, Miami-Dade Community College. And, according to Joaquin Blaya, vp-general manager of WLTV, Miami's Hispanics perceived "clandestine bigotry" by Anglos after Mariel.

Some disagree, of course. "Mariel is over, the impact is over," says Luis Botifoll, chairman of Republic National Bank.

But even if the impact has subsided, the boatlift's residue can be measured. In 1980, according to SRC, the median annual family income of Cubans was $18,245, or 91.6% of the U.S. median. This year, Cuban

Cuban pride in heritage steers market

"Miami 'Hispanics' do not think of themselves as Hispanics," says Isabel Mola, president of Interamerican Marketing and Communications, Miami. "The Cubans and Cuban-Americans are very proud of their heritage and are a very aggressive and assertive people. They will never think of themselves as 'Hispanics.' They will always keep their identity."

Because of this, most media and advertising executives agree that when speaking to Miami's 805,800 Hispanics, 84% of whom are Cuban, it should be done in their dialect.

The basic social difference between Miami's Cubans and other U.S. Hispanics is rooted in the varying motivations for emigrating. The overwhelming majority of Mexicans and Puerto Ricans came here because of economic reasons. But Cubans who came to Miami in the 1960s were fleeing not economics, but Fidel Castro.

Cubans are "more concerned with international politics than with local issues," Ms. Mola says. The intensity of this feeling has made Spanish virtually a requirement for reaching Miami's Cubans.

The media provide a good lesson. Between 1980 and 1985, Dade County's population increased from 1.3 million to almost 1.9 million, or about 48%. Meanwhile, the Miami Herald showed an anemic 2.5% increase in daily Dade County circulation, according to the *Herald's* market research department.

Even the introduction of *El Herald*, which is delivered free along with the "main" *Herald* to all subscribers with Spanish surnames, has done little to plug the dike of eroding penetration. By comparison, *Diario las Americas* has more than doubled its circulation since 1973.

Similarly, while the three network-affiliated tv stations were hammering at each other for ratings, WLTV, the SIN Television Network-affiliated Spanish-language station, has attracted the largest audiences of any local station during both local and national news, according to Arbitron Ratings Co.

Local marketers realized in the 1960s and 1970s the need to address Cubans in Spanish. Retailers such as Farm Stores, Winn Dixie and Big Daddy's Lounges all have learned Spanish and profited by it. But, as *Diario* advertising director Enrique Perez says, "The giant national advertisers are slower to respond to Spanish."

Joseph Albonetti, director-Hispanic and international marketing, Tinsley Advertising, Miami, states the problem more emphatically. "Frankly," he says, "we are still a long way from attaining universal recognition of the importance of the Hispanic consumer by many otherwise astute advertisers."

After getting recognition, the next question is how to best reach Dade County's Hispanics. "Advertising must be culturally relevant," says Herb Levin, president of WSUA-AM. And "it must recognize the subsegments of the Hispanic market."

Variations in the Spanish spoken by Cubans, Puerto Ricans and Mexicans are not dialects, says Jorge Garrido, president of Mingo-Jones-Garrido, "they are 'isms'—Cubanisms, Puerto Ricanisms and Mexicanisms—expressions that vary from countries of origin and therefore different parts of the U.S."

Teri Zubizaretta, president of Zubi Advertising, agrees, asking, "Would you sell a product the same way in both Boston and Alabama?"

Ana-Marie Brechner, president of Inter American Communications, Miami, says even among Cuban-Americans, differences should be noted. Ms. Brechner devises different messages depending on the location of the audience.

Tampa Bay has a large Hispanic community, whose members mostly came to the U.S. several decades before Castro's revolution. "Tampa's Hispanics represent an older culture and tradition from Cuba than do most Miami Cubans," Ms. Brechner says.

The need to segment the Hispanic market often is illustrated by language gaps and gaffes. In New York, for example, *habichuelas* would refer to any type of bean. But that word would leave Cubans and Mexicans cold —a bean to them is a *frijole*.

According to Ms. Zubizaretta, an advertiser does not have to be overly concerned about subgroups within the market. "Here in Miami," she says, "Nicaraguans assimilate to the Cuban message. And Cubans in New York don't resent the Puerto Rican message."

Many marketers now are touting the existence of the "national Hispanic market." "We are interested in trends that indicate that there is a little more homogeneous nature to the Hispanic market than we had originally believed," says Sidney Levin, a partner with Beber Silverstein & Partners, Miami.

"Each market has its own characteristics," he says. "But it is possible to approach the [national] Hispanic market with a single campaign." Another trend is that the "upscale Latin consumer increasingly can be reached by the general media, especially television."

Joaquin Blaya, general manager of WLTV, also sees a more homogeneous national Hispanic market. "There were great differences in the United States among different regions, differences of culture and language," he says. "But network television became the common denominator, and we now accept a fairly universal 'American English.'"

Now, Mr. Blaya says, "the same thing is happening with Hispanics. SIN is the only national medium reaching all Hispanic groups, and we are seeing the emergence of a general 'broadcasting language.'"

More important, Mr. Garrido says, is whether a company should advertise to Hispanics at all. "Segmentation has been an excuse to not target the Hispanic market when the product's budget isn't that great. For products sold *en masse*, where the budgets are astronomical, it pays to localize the effort in the same way you would localize any national effort.

"But the key questions are; should we address the market and then how should we address it?" Mr. Garrido says. "It's a quantitative judgment first, then a qualitative." —*J.F.S.*

The South Florida Hispanic Factor.

In the four-county South Florida market, the Hispanic factor represents 23 percent of the population and $9 billion in buying power.

South Florida is truly global. More than three times its population is attracted yearly in international and domestic visitors.

The Hispanic factor is everywhere — in finance, communications, retailing, restaurants, construction, education, trade, politics, cultural and sports events. These energetic people are working together to make South Florida one of the most exciting, vibrant markets in the Americas.

This major international market is sold by the one newspaper that reaches seven out of 10 newspaper readers in all of South Florida. Daily and Sunday growth of The Herald in 1983 and 1984 was one of the largest two-year gains in the last 25 years.

El Miami Herald, published seven days a week in Spanish and delivered with The Miami Herald to Hispanic readers, has also enjoyed spectacular growth in the nine-year history of its publication.

Realize your full advertising potential in South Florida's dominant newspaper, covering the market with one voice, two languages.

Miami

(Continued from Page 30)

income has increased to $24,400, but has slid to 85.9% of the U.S figure. Although still much higher than any other U.S Hispanic group—the average is $19,900—this decline has not gone unnoticed.

"You now have to break down the Cubans by age and time of arrival in the United States," says state Sen. Joseph Gersten, one of the few Anglo politicians supported by the Cuban community. "If you combine all of Miami's Hispanics," he says, "the statistics show a more insular, lower income group."

Generally, the income decline is attributed to the unskilled and blue-collar occupations of most Mariel refugees, compared with the large numbers of professionals and entrepreneurs in earlier waves. The educational level among recent arrivals is much lower. And, says Herb Levin, president of WSUA-AM, "You can't ignore the fact that [Mariel refugees] spent 20 years under a socialist system. Their values are different."

Again, some disagree. "I think this is the only community in the nation able to assimilate 100,000 individuals in six months," says Teri Zubizaretta, president of Zubi Advertising.

On one point, few disagree. If language is an indicator of change, then change has occurred. "With Mariel, the increase in Spanish use is up 10%," Mr. Tobin says.

The Marielitos were primarily monolingual, and, according to Enrique Perez, ad director, *Diario las Americas*, "it isn't that there has been a reluctance to learn English. There simply hasn't been a need [for new arrivals] to learn English."

The primary reason English is almost superfluous along *Calle Ocho*—SW 8th St., the heart of "Little Havana"—is the strength of the Spanish media. Uhf station WLTV regularly bests the three network and several independent stations in both local and national news show viewership and during many other time slots. "Unfortunately, among many [national] advertisers, this is still an untold story," Mr. Blaya says.

The Latin community is served by two Spanish daily newspapers, *Diario las Americas* and *El Herald*, a Spanish version of the *Miami Herald*, and dozens of weekly newspapers. According to Mr. Perez, *Diario's* advertising and circulation success is partly because of the post-Mariel attitudinal shifts among Hispanics. "It's not that Latins can't read the *Herald*," Mr. Perez says. "They no longer feel the need to assimilate, so even if they speak perfect English, they prefer their own media."

Seven Spanish-language radio stations serve the market, ranging from WQBA-FM, with a pop, bicultural brand of Spanglish, to political diatribes on WRHC-AM and WOCN-AM. The Spanish-language stations routinely occupy top spots in rating polls.

Miami also has a booming Spanish-language magazine business, led by Editorial America, publisher of the internationally circulated *Vanidades* and other publications. Also with a strong international circulation—and plans to expand to other Hispanic markets—is *Miami Mensual*. Mr. Soler attributes his success to "reflecting the aspirations of Cubans. We are very upwardly mobile."

According to Strategy Research, although South Florida's Latins represent only 5.8% of the total U.S. Hispanic population, they will spend $11 billion this year on consumer goods, or about 12% of the nationwide Hispanic expenditure of $94 billion. "That's twice the per capita consumer goods expenditure compared to the national Hispanic average," Mr. Soler says.

Other distinguishing demographic information on Miami's Latins includes:

- Cubans have the smallest households of any U.S. Hispanic group at 3.3 people.
- The percentage of Cubans who have completed four years of college is about equivalent to the total U.S. population.
- Both Cuban males and females lead all Hispanic groups in managerial and professional employment at 19.4% and 15.7%, respectively.
- Of all Hispanic groups, Cubans have one highly significant low figure: English proficiency. Only 28.9% say they speak English well or very well, and 31.2% say, "*Yo no hablo Ingles.*"

"Those patterns aren't likely to change," Miami-Dade Community College's Mr. Padron says. "But we are undergoing a period of adjustment."

What this adjustment will lead to remains in question, but may be determined by two major international situations.

The first of these situations is the Reagan administration's decision to expedite normal residency status for the Mariel refugees, making their families eligible to leave Cuba for the U.S.

"We are probably going to see 25,000 to 35,000 new Cubans a year for the next eight years or more arriving in Miami," Mr. Perez says.

Almost undoubtedly it will result in an absolute Latin majority in Miami. Excluding the Mariel influx, the Latin population has grown 3% annually during the past 15 years, compared with a non-Latin figure of only 0.7%. That disparity in growth could lead to a Latin majority as soon as 1993.

The other major international factor looming on Miami's horizon is the future of Latin American, Central American and Caribbean economies and governments. Fidel Castro turned Miami from "a small tourist town on the decline into a major commerce center," Mr. Botifoll says. Everyone came to Miami in the 1970s to do business.

When the bottom fell out of the Latin economies, trade declined, as did Latin American tourism—from 1.3 million in 1982 to 896,000 in 1984, the lowest level since 1978, according to the Dade County Department of Tourism. Similarly, office vacancy is setting record highs, and hundreds of luxury condominiums are empty.

The only certain area of Hispanic growth, other than additional waves of Cubans, will come from countries in revolution such as Nicaragua and El Salvador. Mr. Perez says this will result in a decade of political adjustment, and only Anglo politicians with strong ties to the Latin community will survive.

"The new generation of young Cuban businessmen are really more American than Cuban," Mr. Botifoll says. "As they increasingly take over the leadership of the community, we will again become united."

Mr. Tobin agrees, saying, "We could already be on the way back. However, there will be a difference. The Cubans were fooled once that they were full partners. Now, they will demand to be full partners, and they won't readily give up their culture and language."

"Miami will never be a melting pot again," WLTV's Mr. Blaya says. "But we will become a tasty mixed salad."

San Antonio

(Continued from Page 15)

—it jumped more than 27% in those five years—but because other Hispanic communities grew faster. Part of that growth difference, local marketers say, is because of Hispanics' move toward middle-class Anglo life styles, a move that includes smaller families.

Emilio Nicolas, president of KWEX-TV, San Antonio's only Spanish-language tv station, doesn't necessarily agree, but he does admit the strangeness of the South Texas market. "This is like the twilight zone," he says. "It is neither light nor darkness. This is neither Mexico nor the

San Antonio

(Continued from Page 32)

United States. This is neither Latin America nor the typical rest of North America. This is not a pure Anglo city or a Mexican city. This is in between.

"And what happens here is very funny," Mr. Nicolas says, "because the Mexicans are bilingual and communicate very well with the Anglo. The Anglos are not bilingual. They are only one way streets and we are two-way streets."

These two-way people are usually young and poor. Some 41% are younger than 18, and 69% are younger than 35.

The San Antonio Hispanic had a 1983 median income of $15,171, and as much as one-third of the city's Spanish-speaking population would be classified as "poor" by the Census Bureau. As those numbers indicate, chronic underemployment is a problem. Of the Hispanic work force 24 years old and older, only 12% hold managerial, professional or technical positions.

But these kinds of numbers are not uncommon to the whole community. The local economy is governmental and service oriented. While San Antonio is gaining fame as a high-technology center, most of these jobs arrive in hourly wage assembly plants.

In fact, industry has been attracted to the city because of the availability of inexpensive, unskilled, nonunion labor—primarily Hispanic.

San Antonio is filled with those little quirks. The city, with its graceful plazas and cobblestone downtown river walk, has an easy and comfortable bicultural feel.

But the city is divided, with most of the economic generators on the city's northern edges. The south side contains four of the five original Spanish missions in the area. All of the four still have active parishes. The fifth—the Alamo—is crowded with tourists.

Even the city's 105-year-old, 10-day Fiesta added its first Hispanic-oriented event only a few years ago. About the same time the local chamber of commerce ran a cover story in *San Antonio* about the city's tv sportscasters, overlooking the existence of KWEX-TV.

This polarity is not hostile, but merely another aspect of the city's schizo personality. When an issue commands it, Anglo and Hispanic quickly unite—and just as quickly separate.

Hispanics are making great advances in the local political arena, but in San Antonio's business and social life, it is another matter. Out of more than 70 banks, fewer than 5% have Hispanic top executives.

"In the San Antonio Hispanic culture, the way to be polite is a bit like the southern culture only more so," Mr. Sosa says. "There is a saying in Spanish, '*a sus ordinance*,' which means 'I am at your command.' That is polite.

"What happens is that part of the culture in the United States sees that as a very subservient type of personality, one that doesn't want to make waves," he says. "But what has happened with that attitude? We have an Hispanic mayor. We have representatives on the city council, two Hispanic congressmen, an Hispanic police chief. How has this subservient attitude manifested itself into such great political power? I think the reason is that attitude says I want to do it your way, and I am here to be

Cultural keys unlock effectiveness

After you identify the San Antonio Hispanic—if you can identify the San Antonio Hispanic—comes the major task of reaching him. That is not easy either. Nor is there much agreement on how to do it.

Lionel Sosa, president-creative director of Sosa & Associates, handles such national Hispanic accounts as Anheuser-Busch, Brown & Williamson Tobacco and Westinghouse Electric. He says he believes strongly in the bilingual approach. "I tell them to look at the Hispanic first as a cultural phenomenon. There are cultural differences and language is only one of them," he says.

"You should consider English media just as much as Spanish media in San Antonio. I would recommend an advertiser produce English-language radio and television commercials directly to the Hispanic just as in Spanish language. And I would tell them to forget Spanish print in any shape or form," Mr. Sosa says. Hispanics in the San Antonio market "can't read Spanish to save their lives."

He recommends an advertiser "depict the Hispanic just as you would an Anglo. Don't put him in a Mexican rodeo or at a pinata party. Depict him as an American—and then make those wonderful little nuances in the execution."

One example is a Sosa spot—done in conjunction with N W Ayer, New York—for the U.S. Army. An Hispanic father working in his garage is telling a neighbor how his son just received an R.O.T.C. scholarship. His son walks into the scene.

"*Let's get going, Dad,*" the son says. "*Yes, sir, mi general,*" the father responds with a grin.

All of the cultural keys are there, Mr. Sosa says: A family orientation, pride of accomplishment, a desire to advance and those two words of Spanish that anyone can understand. "You're talking like a Hispanic would talk and triggering a response so that he knows immediately that that is for him," and you don't turn off Anglo viewers, he says.

Even though all of his accounts are national, Mr. Sosa says San Antonio is the place to test his spots. "This market, from an attitudinal point of view, is where the red flags will come up in the way Hispanics are depicted. The people in California and Miami are much more tolerant. People in San Antonio, while acculturating faster, are less confident of their own identity, so problems with commercial messages will tend to surface here quicker."

The local Spanish-language media, however, think Mr. Sosa's techniques are designed more for Anglo ad executives than for Hispanic consumers. "We hear a lot of stuff from the agencies that we can reach the Hispanic market with English," says Nathan Safir, vp-general manager of KCOR-AM, the country's oldest fulltime Spanish-language radio station. "But we turn down accounts, and big accounts too, by refusing to use any English copy."

KCOR is tied for sixth place in a 27-station market. Mr. Safir says the formerly top-rated station would head the ratings again if Arbitron Ratings Co. had not changed its methodology, measuring only listeners with telephones. According to Strategy Research Corp., 13% of San Antonio area Spanish-language households do not have phones and 44% have unlisted phones.

Unfair treatment by the rating services is the opinion at KWEX-TV as well. KWEX, a SIN Televison Network affiliate, was the nation's first Spanish-language tv station. It carries programing mostly from Mexico, and it also rejects any ads using English.

"We are dealing with Spanish-speaking Mexican-Americans," says Emilio Nicolas, KWEX president. "This is the programing that they identify with. This is the programing where people talk like they do, look like they do and do things like they do. We are the only people bringing all of that, so we must have one hell of an audience.

"It is not *our* problem. We suffer from the rating services' lack of capability," he says. "This is the same programing that is No. 1 in Miami and No. 2 in Los Angeles, but in San Antonio, it doesn't exist in the Arbitron or Neilsen books. That doesn't speak against us, but it does speak against their system."

In a Strategy Research Corp. study paid for by SIN, KWEX emerges with half of the San Antonio Hispanic audience, burying the local English-language network affiliates. But local advertisers don't appear to believe those numbers. While Mr. Nicolas says his national ad billings doubled last year, local advertising increased only 13%. KWEX has an estimated 11% of the local advertising market, while CBS-affiliate KENS has about 34%.

Spanish-language media receive little business from local agencies, confirms Carlos Montemayor, president of Montemayor y Asociados. "They are trying hard, but the local agencies seem to feel they can reach the majority of the Spanish market through English-language stations."

He counsels a middle road. "In English or in Spanish? Part of the market in San Antonio is Spanish-speaking only, so you have to do some, but what percentage? That's where all of these theories break down. I don't know if you can really tell that." —*R.E.*

¡HABLAMOS SU IDIOMA!

The enormous buying power of 3-million-plus Hispanics in Texas, plus millions more in other Southwest U.S. cities, is tapped daily by the most effective advertising vehicle in the region--the Texas State Network's Spanish Information Service.

Not only does SIS supply this significant and constantly growing market with news, sports, information and commercial messages, but it also talks to them in the language they understand and accept. SIS keeps Hispanics in the Southwest continuously updated with 15 newscasts daily, 70 per week, plus 17 sportscasts weekly, as well as special information programming.

Significantly, SIS originates the Dallas Cowboys football broadcasts in Spanish for stations throughout the U.S. and Mexico, making the Cowboys the most popular NFL team in the Spanish-speaking communities of both countries.

Find out more about our satellite transmission to affiliates in every major Southwest Hispanic market....Contact Jose Luis Madrigal, Director of Spanish Services, and see how you can capitalize on SIS's impact on this expanding and vital market segment. *HABLAMOS SU IDIOMA....We speak your language...and theirs.*

Zubi Advertising has made its mark as the largest Hispanic advertising agency in the Southeast. With a roster of international blue chip clients. If you want to make your mark in the Hispanic market, do business with an advertising agency that really knows how to reach and motivate that market. An advertising agency that knows the Hispanic market from A to Z. Zubi Advertising Services, Inc., 2525 S.W. Third Avenue, Suite 105, Miami, Florida 33129. Telephone (305) 854-6807.

part of whatever the U.S is all about," Mr. Sosa says.

"The folks that are in power are less apprehensive here," he says. "It is a feeling that 'I want to work within the system.' Here they become part of the structure, and that is unique to [San Antonio]."

Part of that probably has to do with the stability of the market. Nearly two out of three Hispanic heads of households have lived in the area for more than 10 years. About half of the Hispanic population speaks both English and Spanish at home, but 28% prefer Spanish compared with a 60% Spanish-language preference in Los Angeles.

This does not mean the San Antonio Hispanic is really an Anglo in disguise, says Lloyd Lopez, marketing director of Mira/Hispanos, a research subsidiary of locally based Communications Advertising. "The reality is that there are several different profiles within this community," he says. "Contrary to studies by Yankelovich, Skelly & White, we are not homogeneous."

Mr. Lopez has segmented the San Antonio Hispanic market to try to prove that statement. The Primary Hispanic, he says, makes up 28% of the South Texas Hispanic population. The Primaries speak only Spanish, have 54% larger families than their non-Hispanic counterparts, lack a formal education, are strongly Catholic and earn about $14,000 to $16,000 a year, accounting for $1.3 billion aggregate income, he says.

Primary Hispanics tend to rely on a national brand because of the strength of the name, Mr. Lopez says. It is the best for the family, or at least the best they can afford.

On the other end of the spectrum, according to Mr. Lopez, is the Assimilator Hispanic. Only 12% of the local Mexican-American population, this group represents more than $2 billion in aggregate income. The members of this segment are well educated and professionally employed. A large percentage is younger than 40 years old and is the fastest growing group of Hispanics in the country.

Between the two ends of the spectrum is the 60% of the marketplace that most confuses the experts. The Participator Hispanic is usually second and third-generation and follows one of two paths: Intra-acculturation, staying within the Hispanic culture, or inter-acculturation, moving toward the Anglo community. Together they represent about $3.7 billion in income.

Which path they take, Mr. Lopez says, depends on the parents' experience with the Anglo community. If that experience is good, the influence will be to meld the two cultures, to "be an Amercan" and still retain the strong Hispanic heritage. The result is shrinking households, more suburban living, more striving for education and income—and more use of English.

The intracultural direction is just the opposite. The parents' experience with Anglos was bad, but consumer, family and society patterns still are changing.

"If I am one of this group," Mr. Lopez says, "my cultural comfort zone must extend beyond the west side or the south side. It must extend to a north side job. I start to lose control of my family, because they are trying to retain the imperatives of the past completely. It is not possible to do this and still succeed in the work place."

The result, he says, is a new, younger generation of Hispanics. This subculture's combination language, Spanglish, represents the idea that this group's members are neither truly Mexican nor Anglo, but a hybrid.

Some of those mixtures can be seen in more moderate success stories. Mayor Henry Cisneros—37, Harvard-educated, White House fellow, university professor—is the first Hispanic mayor in the Alamo City in more than 100 years. He reached that post by being attractive to both elements of the community.

"Henry is the first Hispanic politician who is able to walk the line between the north side power structure and keeping the west side and south side groups happy," says Carlos Montemayor, president, Montemayor y Asociados. "That is a credit to Henry as an individual."

While San Antonio has traditionally been a nonpartisan city for local politicians, Mr. Cisneros broke that custom by supporting Walter Mondale. He was even among the handful of finalists in the Democratic vice-presidential contest. Some suggest that his local support—he won his last election with 94% of the vote--comes from deep Democratic roots. Mr. Sosa, whose agency produced Spanish-language spots for the Republicans in last year's national elections, disputes this.

"The majority are Democratic, but 40% of the Hispanic vote in the last presidential election went for Reagan. Four years ago, that was 31%; eight years ago, the Republican vote was 8%, and 12 years ago, it was 4%. There's an interesting phenomenon going on here. Hispanics are basically conservative by nature, they seem to want to be Republicans as soon as they go up the economic ladder. They are anti-welfare, for the home and neighborhood, for defense and anti-abortion."

As can be seen by changing voting patterns, changing consumer choices, new life-style choices, San Antonio is evolving.

"For all of these years, we have been in the backseat," Mr. Lopez says. "Now you can see we have arrived; we are emerging.

"Migration trends of San Antonio's west side are moving north, into the typically Anglo communities. The new commercial development there, including new housing and retail malls, is a catalyst for a whole new universe that has sprouted out there, just like Henry Cisneros is a new catalyst for another type of universe," he says. "There is a new group of people who are saying 'I can be like Henry.' Look at those catalysts. That is what we've been lacking for years." ■

Chicago

(Continued from Page 15)

than twice the official tally; some estimate as high as 1.4 million people. Having increased 16% from 1980 to 1985, according to Strategy Research, Hispanics constitute the city's fastest growing population segment.

This trend is not likely to slow soon. Today, Hispanics account for about 15% of the city population. Yet 24% of Chicago children younger than 5 are Hispanic.

"Hispanics are now a part of what makes Chicago Chicago," says Enrique Loza, president of Americas Inc., a local ad agency.

Marketers have a few main reasons to look at Chicago. First is the market's size. Second is its mirror of the U.S. Hispanic population, "making it a perfect test market for national products," says Mary Montgomery, editor, Extra Bilingual Publications Group. "Because of the community's composition, you'll find out here first if something can work on a national level."

Perhaps most interesting, though, is the emergence of the Hispanic consciousness—the consciously Hispanic-Hispanic. "It was the Anglo market that labeled us Hispanic," says Jose Nino, president, Latin-American Chamber of Commerce. "We certainly didn't put on an advertising campaign for it."

Consequently, "in many places you say 'Hispanic' to Spanish-speaking people and they look at you with a puzzled face. There are a lot of Mexican-Americans, Puerto Ricans, Cubans and so forth, but there are very few who truly feel their primary identity is Hispanic," says Armando Triana, director-special research and academic programs, DePaul University.

Even so, Chicago is where "the concept of 'Hispanicness' reaches its highest levels," the Cuban-born management expert says.

This is because on the city's north side something new is bubbling up from the cultural caldron. More than half of the city's 526,000 Hispanics live on the north side, Mr. Triana says. "The north side is unique in relation to Hispanics worldwide. Nowhere else do so many Hispanics of so many different nationalities use goods and services in such close proximity."

The north side is Chicago's Hispanic melting pot. "The southeast side is primarily Mexican," says Mila Tellez, publisher, Extra Bilingual Publications Group. But because of the loss of steel industry jobs in that area, many Mexicans have moved closer to employment, which happened to be to some Puerto Rican areas. In addition, "as they become upwardly mobile, they seem to be moving to the north and west sides of town, as well as the suburbs." But even Hispanic suburbanites return to the old neighborhood to do their shopping, she says.

Growing community awareness also has been a reaction to the realities of Chicago politics. "The Hispanic elite has no choice but to work together across nationality lines. We simply are not enough individually to make a difference," Mr. Triana says.

As people in cultural transition, he says, Hispanics need an identity, and Hispanic-ness provides the most flexible socially acceptable framework. A rise in Hispanic consciousness typically is accompanied by a marked reduction of cultural bias against other Spanish-speaking nationalities.

"My father from Puerto Rico could not get along with Mexicans," says Miguel Del Valle, executive director, Association

Three major communities converge in Windy City

In Chicago the issue of to target or not to target specific Hispanic audiences takes on national significance because of the convergence of three major—Mexican, Puerto Rican and Cuban—and several other distinct Hispanic communities.

The message here is clear: Go generic. Of course, nothing is that simple. You have to remember that what's right for a campaign depends as much on the product and company as it does on the audience.

For some products it may be better to target Mexican-Americans, who make up about 60% of both the Chicago and U.S. Hispanic markets. For life style products or ad messages, it might be best to segment the Hispanic audience by regions, using the dominant nationality characteristics.

Or if budgets are tight, it might be wiser to skip Hispanic-oriented ads, hoping the 41% to 57% of Hispanics who describe themselves as fluent in English will be swept into a general market campaign.

Still, for a campaign that wants to reach all Spanish speakers with the same ad message, the favored method in the Windy City is to work with ethnically neutral images in a media mix that includes tv, radio, print, outdoor and even circulars.

Paul Sierra, creative director at Chicago's O.M.A.R., recommends this approach for several reasons, not the least of which is that tv alone "is too expensive to target to a single audience."

It's not cost-effective to target all the nationalities, says Enrique Loza, president of Americas Inc. The solution is to use a range of media and promotional events and Spanish that everyone will understand—"Walter Cronkite Spanish," he says.

Illinois Bell, with nearly 15 years of advertising to Hispanics under its belt, has had considerable opportunity to weigh the various ad stratagems. Assistant vp Fredric J. Felton has concluded that universally accepted Spanish is the best policy. "We have found that if you stick to the traditional classic Spanish you may come off as a little prim, but at least you are understood," he says.

George San Jose, president of San Jose Associates, doesn't care for the word "generic." He says it sounds too much like "mediocre." But he does agree with the concept of aiming for the largest possible audience rather than running ethnically oriented material in the various outlets favored by specific nationalities.

Mr. Sierra likes the idea that universally accepted spots are aiding in creation of a distinct American Hispanic nationality. It's not only good business," he says, "it's the right thing to do."

The ad message should stress "a theme that will unite all of us," Mr. Loza says. "That's the best way to invest advertising money wisely."

A Mexican factory worker and a Mexican architect are as different—or even more different—from each other as a Mexican and a Puerto Rican factory worker, says Jorge Caballero, president of Caballero & Associates. "Unless it's a specific case," he says, "I go for the life styles, not the nationalities." Yet he too agrees that to create one commercial for each ethnic group is making it too complicated.

Chicago agency executives agree that there is no single best way to spend dollars allocated for Hispanic advertising. Everybody likes tv, but they also say radio, print and outdoor are effective. Mr. Loza says Hispanics even will take the time to read door-to-door circulars.

"There is no rule," Mr. Caballero says. "It depends on the product, and the end product probably should be a mix."

Mr. San Jose says he looks at the media mix as a jigsaw puzzle with "seven or eight pieces that have to be put together in new configurations each time." In short, many Hispanic agency executives in Chicago agree that you can't rely on one medium and that the smartest way to go fishing is to cast the widest net.

A group of local Spanish-language newspaper publishers has realized that if the net is to be cast wider, they should be a bigger fish. Calling themselves the Hispanic Publications of Chicago, the publishers of *El Manana Daily*, Extra Bilingual Publications Group and *La Raza* discovered that between their formats—daily news, weekly community affairs and weekly features—and circulation areas, they weren't competitors.

In addition to commissioning independent research on the Chicago Hispanic market, the group's goal "is to take a professional approach to improving our effectiveness, discussing and verifying the numbers and selling the permanence of print," says Steve Hopkins, assistant publisher, *La Raza*.

"They're networking—doing what the Anglos have been doing for years," says Rosanna Stoll, president, Metrica Marketing Group, a research company.

As the message and the media become more sophisticated, the members of Chicago's Hispanic potpourri—whether they assimilate and acculturate to each other or the mainstream public—should become easier to talk to and easier to find. —*J.H.*

The U.S. is the Fifth Largest Spanish-Speaking Country in the World

Marketers take note . . .
Hispanics are the fastest growing population group in the United States today. At the present rate of growth, they will outnumber the black population within the next few years.

Not only do they represent a huge market, but U.S. Hispanics spend a total of $50 billion annually in U.S. retail markets. Moreover, U.S. Hispanics demonstrate above-average brand loyalty and quality consciousness.
